10925. FO/G3BJ was FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-21 03:05:56 UTC
From: Alan Leith
Topic: 10757 Message: 10925

I saw many spots for FO/G3BJ and had absolutely no idea that he was on the Australs. Had I known that, I would have turned the beam and made an attempt to work him. I didn't even try to hear him. And I don't remember hearing or seeing anything about the operation and didn't need FO on any band.

I loose.

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of Dale Frederick
Sent: Sunday, September 20, 2009 11:41 PM
To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] Re: FT5GA

FO/G3BJ - Austral Is, was quite active. Even managed a contact on 12M phone, although he was extremely weak on that band. The pacific is not a problem usually from NM. He was primarily operating CW.

Now FT5GA is another matter, usually in the noise or just not there. Did mange to hear them on 17 phone today, but just as the path was opening, they disappeared which seems to be the operating mode...

The Indian Ocean is tough from here all the time, although with TO3R late last year II had contacts from 80 though 17.

10929. Re: [DX-IS] Re: FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-21 10:10:44 UTC
From: Brian Alsop
Topic: 10757 Message: 10929

Experienced the same "it didn't work". Got the the screen where you
enter your call and pressed go. Nothing.
There was a world map for "propagation to FT5GA" below this dialog box.
That was new.

The upshod was that I had turned enable JAVA script off in the browser
(some ongoing virus problems with redirection to bogus site). Turning
it back on and all OK. Map also disappeared.

aburkefl wrote:
> Someone provided a URL that didn't work - that supposed log never gets updated.
>
> Ultimately, I googled FT5GA and took the first result. There's a choice of language, then following that, an aerial photo of the island. On the left hand side of the frame there's a list of items, including "online logs." Click on that, then your call. The red squares show where they've been active (band and mode) and, if you were lucky, there will be a check mark (or two or....) identifying band and mode you worked them.

10930. Mini Tribanders at low heights

Yahoo group: DX-IS (2009)
Date: 2009-09-21 17:19:57 UTC
From: John Geiger
Topic: 10930 Message: 10930

After some antenna damage last year I am still contemplating what HF antenna to go with. I am now using a homebrew G5RV and have worked about 105 countries on it this year. I know that on the higher bands it shows gain in some directions with nulls in other directions (like for K5D on 20m).

The only beam I would be able to get up right now would be one of the smaller tribanders (like a MA5B or a Mosley Mini 32/33) at around 25 feet. I know that is below the real minimium height to get such an antenna to play on 20. So here is my question-is it really worth the expense and effort to put a mini antenna at that height? Would it show much improvement over a G5RV. I know the G5RV has nulls in some directions, but I could fill those in with a rotatable dipole or a vertical as well.

John,

Yes, for several reasons. In addition to improved gain and directivity, you get the null off the back. I used a Cushcraft A3 on a roof tripod for several years, and it was much better than my ground mounted vertical for DX'ing. The peak of the roof was up 25 feet on one end and about 20 feet on the other end of the house, so the total antenna height above average terrain was about 30 feet. A friend of mine moved recently and traded his 90 foot tower for a 35 foot tower due to city code limiting tower height to 10 feet above the roof line. He is using a Bencher Skyhawk at that height with decent results. If you can leave the G5RV up and put up the tower, you get the best of both worlds.

That they have not appeared is proof enough for me!

BTW, a young fellow working next door to me told me today he has spent time in Freemantle and is heading soon to New Zealand for a year with his girlfriend on work visas. Also, today at lunch I met a couple, visiting Sydney, NS from Sydney, NSW. Small world!

No sign of FT5GA on any band so far today. Guess I'm way too far north. VK6ANC was S-5/8 just as I was leaving for lunch so didn't get a chance to call.

Maybe there's something to these increased numbers :-).

Alek,

How do you know there are missing logs for 40CW and we (me included because I was not in the log for a 40 mtr contact on 18 Sept at 00:31Z) just "added a new one" to our "Worked 100 Slims Award"?

If you have good solid information that the logs are incomplete, that would be great news to a large number of Homo Sapiens Sapiens that might have worked them!

I wonder if Al VE1AL worked them around the same time?

In any case, I just re-worked them (and I bet a bunch of others might be doing the same thing) this evening because I was not in the log according to the log that was just updated today. I guess that is the "down side" of uploading logs that are incomplete!!!

Hope you are right and the logs are incomplete; that will be good news to a number of guys, gals, lids, kids, and space cadets that worked him on 40 CW!!

Subject: [DX-IS] Mini Tribanders at low heights

After some antenna damage last year I am still contemplating what HF antenna to go with. I am now using a homebrew G5RV and have worked about 105 countries on it this year. I know that on the higher bands it shows gain in some directions with nulls in other directions (like for K5D on 20m).

The only beam I would be able to get up right now would be one of the smaller tribanders (like a MA5B or a Mosley Mini 32/33) at around 25 feet. I know that is below the real minimium height to get such an antenna to play on 20. So here is my question-is it really worth the expense and effort to put a mini antenna at that height? Would it show much improvement over a G5RV. I know the G5RV has nulls in some directions, but I could fill those in with a rotatable dipole or a vertical as well.

10935. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-21 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10935

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 21 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 264 Issued at 2200Z on 21 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 20/2100Z
to 21/2100Z: Solar activity was very low. There was one B-class
event during the past 24 hours; a B1 x-ray event at 1256Z from newly
numbered Region 1026 (S29E63). The current proximity of the region
to the limb prevented detailed analysis. The remainder of the disk
was quiet and stable.
IB. Solar Activity Forecast: Solar activity is expected to be very
low. A slow increase in background levels is expected as Region 1026
rotates more fully into view. There is a chance for additional
isolated B-class events from Region 1026.
IIA. Geophysical Activity Summary 20/2100Z to 21/2100Z:
The geomagnetic field was quiet to unsettled during the past 24
hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled for the first day (22 September).
Predominantly quiet levels are expected for the second and third
days (23-24 September).
III. Event Probabilities 22 Sep-24 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux

From: Steve
Topic: 10927 Message: 10936

John,

I have been using the G450 for 10 years to rotate a Mosley TA33jr WARC at 40'. It continues to flawlessly function.

It has been subjected to winds up to 100 mph and is inside mounted.

Steve, NU7T

P.S. 300 countries have been confirmed with this setup.

Yes, my 40m cw qso is there now and so are the rest of the ones that I know about.

VK6ANC is my club station. We have a meeting tonight. (Tuesday). I will mention your swl report. http://www.ncrg.org.au

If I walk 1km to the beach and I look south, I can just see the port cranes and stuff of Fremantle some 24km away.

Come on down and look around summer is approaching.

Hi John,

I used a Yaesu G450 rotator for 8 years and it turned a Mosley TA53M (55 pounds) with no problems. We get a lot more icing, and I suspect stronger winds, that you'll encounter in Arkansas. The great thing about this rotator is that it doesn't have a wedge break. The "break" is simply the multiple gear reduction to the motor so if there is a really strong wind, it will "slip" a bit (I've had it move up to 20 degrees in a heavy wind storm.) However, as soon as you power it on, the controller senses it is off and the indicator corrects itself to the right heading. At one point I had a Hygain TH3 on it with a homebrew 3-element 12 metre monobander stacked above that with no issues.

I'm currently turning a couple of heaver beams with more wind load. I'm using two Yaesu G-800SA rotators. They have performed flawlessly for 3-4 years. I believe that Yaesu offers a better bang for your buck that CDE (now MFJ), although the HAM-IV series are likely the most widely used rotator in NA. If you have a G450, it will turn any small tribander available. I wouldn't put a Mosley PRO series or an ObtiBeam on it, but for "normal" tribanders, you won't be disappointed.

Too bad about summer coming. But, cheer up. In about 6 months you will have a return to BEAUTIFUL winter wx.

I hate heat. I hate humidity. Heat is any ambient temperature above 70F. Humidity is any dew point above 55F.

I'm a polar bear :-)

You are welcome to come to New Hampshire. Our temp this morning is 41F. We are experiencing a heat wave for the next three days with temps in the mid to high 70s F. But next weekend we will start to have better wx with high temps for the day getting into the low 60s.

PS: I'm not sick! I don't like warm wx.

PPS: I see an increase in the SSNs for the next few days. There is hope for DX!

10941. The 4W6AL story - Ch. XXIX

Yahoo group: DX-IS (2009)
Date: 2009-09-22 14:10:37 UTC
From: Alan Leith
Topic: 10941 Message: 10941

Today I didn't bother to get up for the possible 1200Z opening to 4W6AL on 20M CW. Instead I arrive in the shack at 1320 and don't hear much of anything with the beam pointed North. However, at 1331 I see a spot from SE2T on 14007.1 and go there, only to hear nothing. But YB4IR is up just one kilocycle (or kilohertz, if you prefer) and is S-3.

OK, so I start scanning the band, and go to the usual frequency of 14027. Suddenly there's a spot. But I don't hear a thing. Lots of Europeans, calling and making QSOs from up one and a jammer on 4W6ALs transmit frequency but no sign of 4W6AL.

I think I can hear something, but no, it is only some other guy who can't hear the 4W6 and the frequency cops pounce on to him and shoo him away. Still nothing on the frequency. I can hear loads of EU calling him and making QSOs up one. Nada, nuttin' and so I sit and listen to the noise tuning ever so slightly on the frequency where I know he's hiding.

Stay tuned for chapter XXX.

10943. RE: [DX-IS] Mini Tribanders at low heights

Yahoo group: DX-IS (2009)
Date: 2009-09-22 14:56:13 UTC
From: John Geiger
Topic: 10930 Message: 10943

Hi Nelson,

Thanks for the info and the A3 situation you had sounds about like the setup I would have as well. I am hoping to get enough saved up for a tower in a couple of years, and was thinking of maybe just waiting until that went up if there wouldn't be enough difference between the beam and the G5RV. I ran a MA5B on the roof for a while with decent results but never really compared it to the dipole I also had up.

John,

Yes, for several reasons. In addition to improved gain and directivity, you get the null off the back. I used a Cushcraft A3 on a roof tripod for several years, and it was much better than my ground mounted vertical for DX'ing. The peak of the roof was up 25 feet on one end and about 20 feet on the other end of the house, so the total antenna height above average terrain was about 30 feet. A friend of mine moved recently and traded his 90 foot tower for a 35 foot tower due to city code limiting tower height to 10 feet above the roof line. He is using a Bencher Skyhawk at that height with decent results. If you can leave the G5RV up and put up the tower, you get the best of both worlds.

Nelson, KU0A

Subject: [DX-IS] Mini Tribanders at low heights

After some antenna damage last year I am still contemplating what HF antenna to go with. I am now using a homebrew G5RV and have worked about 105 countries on it this year. I know that on the higher bands it shows gain in some directions with nulls in other directions (like for K5D on 20m).

The only beam I would be able to get up right now would be one of the smaller tribanders (like a MA5B or a Mosley Mini 32/33) at around 25 feet. I know that is below the real minimium height to get such an antenna to play on 20. So here is my question-is it really worth the expense and effort to put a mini antenna at that height? Would it show much improvement over a G5RV. I know the G5RV has nulls in some directions, but I could fill those in with a rotatable dipole or a vertical as well.

JOHN,

maybe you should ask these guys that are giving you all the advice and bragging about all the Countries they have Worked,......

at what POINT in the cycle they worked all these COUNTRIES !

I worked about 100 on 17 meters at the low point of the cycle,
but I have a 4 element, 17 meter yagi at 85 FEET with 1500 watts.

and some of those where very HARD to hear !

for what its worth,

Joey

Hi Nelson,

Thanks for the info and the A3 situation you had sounds about like the setup I would have as well. I am hoping to get enough saved up for a tower in a couple of years, and was thinking of maybe just waiting until that went up if there wouldn't be enough difference between the beam and the G5RV. I ran a MA5B on the roof for a while with decent results but never really compared it to the dipole I also had up.

John,

Yes, for several reasons. In addition to improved gain and directivity, you get the null off the back. I used a Cushcraft A3 on a roof tripod for several years, and it was much better than my ground mounted vertical for DX’ing. The peak of the roof was up 25 feet on one end and about 20 feet on the other end of the house, so the total antenna height above average terrain was about 30 feet. A friend of mine moved recently and traded his 90 foot tower for a 35 foot tower due to city code limiting tower height to 10 feet above the roof line. He is using a Bencher Skyhawk at that height with decent results. If you can leave the G5RV up and put up the tower, you get the best of both worlds.

Hey John,

There is absolutely no comparison between ANY BEAM and a vertical or G5RV on any band between 40 and 10 M (I know you love 6M but I have zero experience on that band). A beam at any height will out-perform either of those antennas at 25' and if you can find a used A-3, a Hygain Explorer or a TH-3, you'll be way better off.

I have an Explorer at 50' and it out-performs my dipole/inverted vee by many db on 20M. I've never counted the number of countries I've worked with it since I put it up in 1988, but I am HR.

The answer is simple!!!

Today the FT5GA had a great 12 mtr opening to the US.

I logged him as did many 4s, 5s, 2s, 3, and of course those ever loving 1s.

Thank you SOL.....now if I could only get them on 15 mtrs!!!

80 40 30 20-rtty 12. All new band or mode counters. One of 5 I need on 15, that WOULD have to be the hard one for me.

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 22 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 265 Issued at 2200Z on 22 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. There were two x-ray
events during the past 24 hours, a B3 at 1057Z and a B4 at 2041Z.
Both of these events originated from Region 1026 (S29E57) which has
rotated into view as a small, C-type sunspot group with a simple
beta magnetic configuration. Region 1027 (N24E31) emerged on the
disk today and appears to be a small D-type region in a simple beta
magnetic configuration.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (23-25 September). There is a slight
chance for an isolated C-class event.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (23-25 September).
III. Event Probabilities 23 Sep-25 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux

Hi Dale,

It's been easier here on the east coast, but they haven't been a slam dunk. I was one of the lucky "1s" Don referred to earlier on 12M, and it shocked me to hear *anything* on 12, let alone a FR/G station. They have not been loud on any band except 17, and I have not been able to break that in the last 3 days with a beam and a KW. Just too many others trying to get through, mostly EU. Heard a murmur on 80 tonight at out grey line but not really workable and calling for JAs only. They might do better if they concentrated their efforts on 20 SSB and 20 CW, I think, but that is easy for me to say. They might have reasons for not doing so.

Hang in there because I'd have bet anything they never would have been audible on 12 given conditions. I'd say your best bet is 17 . . . today the OP was asking for west coast NA and getting quite a few W6s and W7s.

I used a Mosley TA33JR (3 elements on a 12 ft. boom) at 40 ft for several years and worked something like 250 countries. Sometimes I had to work a little harder in a pileup or wait until all the big guns worked the DX, but I usually got them. Had to buy a Mosley Classic 33 WARC to make the honor roll hi hi. Have since replaced that with a Tennadyne T10 log periodic thats flat SWR wise across all 5 bands.

Of course I made nearly 1,100 Q's from FS and PJ7 with a Buddipole in a week.

Hi Paul,
I have no intention of giving up. One good contact is all I want. Hopefully, feedback from the pilots and updated propagation data fed to them will help them make decisions on when to attempt to work the west side of the continent. I know that they were down to two transceivers, which dropped them down to two stations. That this may still remain the case, I would drop the use of the data modes in that case. I am not in contact with them, obviously, and really don't know what their current situation is beyond that reported by the website. The MUF for us has not reached 17M, so it is a little frustrating when you see spots for 17M. There are another 12 or so days, so hopefully they will make adjustments and propagation will give us what is needed.

Dale

I am surprised that you western 5's have not heard him on 80 and 40. His signals on those bands have been good into CO. 12 mtrs is a different story; when he was on this morning, I heard nothing, and I am using a 7 ele mono band beam at 65 ft. Additionally, I have not heard him on 20 at all; and you would think that would be the best band to work him on.

I guess that each part of the country has its advantages to live in!!

Maybe the eastern 5's are getting contacts. Us western 5's, if we've heard them at all on any band, have only heard whispers in the noise.

I think it just sounds like gloom and doom because there's nothing else to talk about!

While the coming cycle will most likely not be as strong as in the past, the propagation experts do seem to agree that next year will see lots more 15M (consistent) openings and by 2011 we'll probably see many regular openings on 10M.

The guy who does the ARRL prop bulletins also does a column in the National Contest Journal. His comments there seem more positive than I've seen in quite some time. He also stated that for those who still promulgate a Maunder Minimum that experts have conclusive proof that the next cycle has already begun.

A couple of years from now we'll be laughing about how we thought the world was coming to an end!

Hi Dale,

It's been easier here on the east coast, but they haven't been a slam dunk. I was one of the lucky "1s" Don referred to earlier on 12M, and it shocked me to hear *anything* on 12, let alone a FR/G station. They have not been loud on any band except 17, and I have not been able to break that in the last 3 days with a beam and a KW. Just too many others trying to get through, mostly EU. Heard a murmur on 80 tonight at out grey line but not really workable and calling for JAs only. They might do better if they concentrated their efforts on 20 SSB and 20 CW, I think, but that is easy for me to say. They might have reasons for not doing so.

Hang in there because I'd have bet anything they never would have been audible on 12 given conditions. I'd say your best bet is 17 . . . today the OP was asking for west coast NA and getting quite a few W6s and W7s.

10957. FT5GA I am embrassed and question if DX is worth it!

Yahoo group: DX-IS (2009)
Date: 2009-09-23 04:39:33 UTC
From: Robert
Topic: 10957 Message: 10957

I am losing faith in the Ham community.

I have never experienced the level of interference that is taking place with the FT5GA DXpedition.

Sure it is normal and a challege for the first several days. But this is getting out of hand. It has been a week. Why NA pirates, cops, & jammers insist on ruining it for us in the part of the world I'll never know. Also the use of pirated calls is ridiculous. I am absoluteoly sure it was not Dave AA6YQ who was transmitting over top of the DX on RTTY today. Yet the call was there.

Lots of complaints about the team but not me. They have shut down operation several times for this behavior and I hope they continue.

If anyone knows of or suspects who may be ruining this operation either talk to them, report them, or visit them with a baseball bat.

Hopefully I made it today but if not I'll try again...maybe.

From: Alan Leith
Topic: 10957 Message: 10958

I have to disagree a bit, Bob. The intentional QRM from cops, lids, space cadets and otherwise deranged individuals is not confined to NA. When I've listened to them on 40, 30, 20 & 15 (the only bands I have been able to hear them on) I am willing to bet the QRM I heard was not necessarily from NA because on 17 & 15 I could hear no NA callers.

Like you, I am somewhat dismayed to listen to the nonsense generated not only by this particular operation but by every other operation including the really good ones.

In the case of continuing interference, it is due, in my opinion, to two major problems:

1. the operators do don't have particularly good propagation or antennas and are unable to take control of their pile-ups, and

2. the operators are unfamiliar with band propagation and spend inordinate time on the strongest stations.

There's no doubt about the failure of the FT5 operation's ability to satisfy the demand, to this point. There's no question that the operation has been given little, or no, chance to perform their untended task.

Many of us hams have become schoolyard bullies. And our respective governments, the principals in this case, have abdicated their responsibilities.

Incidentally, excellent conditions over the pole this morning with a JM7 and BX4AD both up to S-8. However, not another Asian signal by 1210, and certainly no sign of 4W6AL, the reason I'm on today.

We don't hear the rubbish here. 99% of the time, the dx enjoys a clear frequency. The interference simply does not reach this far.

Alan talked about propagation. You have to remember that we are currently still in the mother of all lows and that makes the whole game so much harder and frustrating.

If this Glorioso expedition was happening 5 years from now, it would be a completely different scenario. All of us would have worked them 4 times over and the bad guys wouldn't even get a look in.

The guys on the island are making the best of what they have been dealt. Hearty congratulations to all of them.

I am in the same boat as you Zack-just need one QSO! CW would sure be nice but I would take an SSB QSO as well. Really haven't listened much for them yet, but then they seem to be on at times that don't fit my schedule real well right now.

Oh for a MosterIR and some sunspots!

Well, I'll take one QSO, any band or mode, for an all-time new one. Just hope I can make it.

It's interesting the times they are active and the bands they are emphasizing at those times. I remember working FR5HG/E at around 10 pm local time on 40 meters many years ago. I think that was in the winter, though. These ops seem to be QRT at that time.

The times they operate conflict with my schedule during the week. So I guess I get four shots at them - the next couple Saturdays and Sundays. Hope I can get at least one QSO.

Hi Dale,

It's been easier here on the east coast, but they haven't been a slam dunk. I was one of the lucky "1s" Don referred to earlier on 12M, and it shocked me to hear *anything* on 12, let alone a FR/G station. They have not been loud on any band except 17, and I have not been able to break that in the last 3 days with a beam and a KW. Just too many others trying to get through, mostly EU. Heard a murmur on 80 tonight at out grey line but not really workable and calling for JAs only. They might do better if they concentrated their efforts on 20 SSB and 20 CW, I think, but that is easy for me to say. They might have reasons for not doing so.

Hang in there because I'd have bet anything they never would have been audible on 12 given conditions. I'd say your best bet is 17 . . . today the OP was asking for west coast NA and getting quite a few W6s and W7s.

>for what its worth, I dont think its Americans either

I've never heard a DX station, even from Europe, at a level quite as loud as the carriers I've heard on 80m. Some of it is domestic QRM, I guarantee it. On the higher bands, probably not... band's too short.

>simply because YOU cant even Hear the FT5 here.

QRMers don't have to hear the DX.

We spoon feed these a**holes all the information they ever need to cause QRM.

All they've got to do is go to DXSummit and key down on the frequencies listed there. For maximum effect, they can time their keydowns by working "reverse split" and listening to the pileup. You can try to misdirect them by posting fake spots:

DX de N3OX: 3506 FT5GA moved down 2

But then someone will come in 30 seconds to "correct the error" and post

3508 FT5GA correct frequency

So that doesn't work either.

Why would anyone intentionally QRM a station they can't even hear? I don't know. But what I do know is that the interferers on 80m have been so loud that if they were Europeans they were running broadcast power. I couldn't really hear FT5GA anyway... just little snippets. But someone stateside was QRMing them.

It also seemed like the QRM would flare up when FT5GA came up a bit in signal, but NOT immediately timed with the signal increase. There was a delay... very much like if someone were listening the *callers* to time their QRM. FT5GA goes up a bit so I could copy a call or two, a few moments go by, and THEN there's QRM on the transmit frequency.

I maintain that the worldwide, web connected, anonymous cluster has an element that's very destructive for DXing. DX Spots themselves are a very constructive thing, allowing us to work a lot more DX. But an intentional QRMer or a garden variety lid doesn't have to pause one second before screwing up the pileup, because we give them a live play-by-play of where the DX is at all times.

I've spent a fair amount of time using "semi-private," non-anonymous chat rooms while DXing. They're not really private because any member of the public can sign up and log in.

And I've noticed that a "private" spot... attracts pretty much zero QRM. It attracts interest, because there are 50 guys logged in to the chat room, but there's no QRM.

The lack of anonymity gives a sort of accountability. If there's no public-to-the-world cluster spot and someone intentionally QRM's the DX immediately afterward, you've got a leak. After a while, if the leak is a persistent intentional QRMer, the community will find

out. If someone is on the wrong VFO, you can mention it to them usefully on the chat room, without QRMing the DX:

"HEY N3OX... VFO!"

If someone is ALWAYS on the wrong VFO, always screwing up... maybe you say "hmm, I'm not going to spot this while that stupid N3OX guy is in here, he's a big pain." It's just like if you had a DX club telephone tree in the days of yore and you noticed when you added the new guy, all sorts of problems started. Take him back off the tree, right?

The disadvantage of the "chat room spots" is that they're not in a format or sortable or whatever.

Someday I plan to try to rectify this. What I want is a "trusted spotting" network... the modern internet equivalent of the phone tree, with several tiers of "trust"

If you're tuning along 15m when the spots come up and you hear a P5, you're going to work 'em and call two, three friends. Long time DX buddies. Real friends who you know are among the true "deserving" to get a shot at this. After they work them, they'll potentially call a few of their friends, guys they know can be trusted to not screw things up. No one is going to call the "local lid" hotshot with no courtesy who doesn't care about good operating practice.

You hear an XX9... well... pretty rare, but it's no P5, so you maybe spread the word around a bit more. Maybe you want everyone in your DX club to know directly. You might still not want to tell that persistent lid, though?

You hear a YB4 ... probably worth posting for the new guys but not "sensitive information" in the sense that there's probably going to be another one up the band a bit within the hour. The lid knows? He'll be in and out quickly, who cares.

This is what I want, but in electronic, automatic format. I keep a list of "contacts" who I really trust. The most juicy, amazing spots go only to them, and it's up to them to choose if they will send it on. If it's a P5, no one is going to send it to anyone except their trusted lists, and then only after careful consideration.

Then there's the next level, where I can choose to have the spots AUTOMATICALLY spread to the next ring... friends of friends.

Or I can choose AUTOMATIC to friends of friends of friends.

The lowest level, the garden variety spots, get sent to anyone who chooses to use the system and also the public cluster.

That's what I wish the DX cluster was, and hopefully some day I can work up some software to make it happen.

Peg,

Tell Paul congrats from me! That is fantastic for 80m. What are you using for a transmit antenna on 80? I have only had that kind of immediate luck once-put up a dipole, went inside to test it, and worked TI9JJP for an all time new one back in 1993 or so. Worked him with a Heathkit SB102 to top it off.

This morning is a typical morning for me. I heard BX4AD calling CW. Called and he came back. Someone posted him and bedlam broke out when we finished our QSO.

Heard 4W6AL not where he usually hangs out on 14027. Very difficult to get through the pile-up of EU after he was spotted on 14007. I doubt it, but will check to see if I'm in the on-line log.

JT1CO comes on 14007 and K9PPY proceeds to have a QSO. Really screwed up the frequency for a few minutes. K9PPY wasn't hearing the 4W6? Doubtful.

BD1TCC is on 14003. Huge EU pile-up so no point in wasting my time. 4W6AL is back on 14007 but now pitifully weak here so no go there either. Lots of US stations, much farther south are hearing him. Not me.

Two nights ago I worked KH7XS on 80 before going to bed and last night worked KH6MB on 40 around the same time.

Dan, I don't spend a lot of time on 80 because it is unbelievably noisy in my neighbourhood. I don't doubt your observation about "local" QRM.

All I want is one CW QSO with any 4W. I continue to live in hope.

I guess I'll never understand anyone who deliberately QRM's a DX station, or anyone for that matter. I guess it's a psychosis and that's why it's not understandable behavior. It's sad, though, to think there are that many psychotic hams in our ranks.

The lid who was sending "OBAMA" on the FT5's frequency when the FT5 wasn't even around is a good example.

I'm hoping this weekend will yield at least one QSO. Now that the VHF contesting season is winding down and I'm not out prowling the shores of Lake Michigan making 10 GHz QSO's like I was last weekend, I can have more time on HF.

Three of the places I haven't yet worked are in the Middle East - A9, EP and YA. One of these years I'll work them, too. I haven't given up hope.

You're doing the right thing, Al. That's how I worked YK1AO on 40m CW some years ago. I knew the times he would show up and the frequencies. I kept at it night after night. He finally showed up and I was the first caller, before he got spotted on packet, and I got a QSO.

Keep trying.

It is too bad that the DX cluster can't have some sort of username and password requirement, where you have to join, and then log in to see the cluster. That wouldn't eliminate all problems, but would make a few more hoops for the non-DXer QRMers to have to jump through.

>for what its worth, I dont think its Americans either

I've never heard a DX station, even from Europe, at a level quite as loud as the carriers I've heard on 80m. Some of it is domestic QRM, I guarantee it. On the higher bands, probably not... band's too short.

>simply because YOU cant even Hear the FT5 here.

QRMers don't have to hear the DX.

We spoon feed these a**holes all the information they ever need to cause QRM.

All they've got to do is go to DXSummit and key down on the frequencies listed there. For maximum effect, they can time their keydowns by working "reverse split" and listening to the pileup. You can try to misdirect them by posting fake spots:

DX de N3OX: 3506 FT5GA moved down 2

But then someone will come in 30 seconds to "correct the error" and post

3508 FT5GA correct frequency

So that doesn't work either.

Why would anyone intentionally QRM a station they can't even hear? I don't know. But what I do know is that the interferers on 80m have been so loud that if they were Europeans they were running broadcast power. I couldn't really hear FT5GA anyway... just little snippets. But someone stateside was QRMing them.

It also seemed like the QRM would flare up when FT5GA came up a bit in signal, but NOT immediately timed with the signal increase. There was a delay... very much like if someone were listening the *callers* to time their QRM. FT5GA goes up a bit so I could copy a call or two, a few moments go by, and THEN there's QRM on the transmit frequency.

I maintain that the worldwide, web connected, anonymous cluster has an element that's very destructive for DXing. DX Spots themselves are a very constructive thing, allowing us to work a lot more DX. But an intentional QRMer or a garden variety lid doesn't have to pause one second before screwing up the pileup, because we give them a live play-by-play of where the DX is at all times.

I've spent a fair amount of time using "semi-private, " non-anonymous chat rooms while DXing. They're not really private because any member of the public can sign up and log in.

And I've noticed that a "private" spot... attracts pretty much zero QRM. It attracts interest, because there are 50 guys logged in to the chat room, but there's no QRM.

The lack of anonymity gives a sort of accountability. If there's no public-to-the- world cluster spot and someone intentionally QRM's the DX immediately afterward, you've got a leak. After a while, if the leak is a persistent intentional QRMer, the community will find out. If someone is on the wrong VFO, you can mention it to them usefully on the chat room, without QRMing the DX:

"HEY N3OX... VFO!"

If someone is ALWAYS on the wrong VFO, always screwing up... maybe you say "hmm, I'm not going to spot this while that stupid N3OX guy is in here, he's a big pain." It's just like if you had a DX club telephone tree in the days of yore and you noticed when you added the new guy, all sorts of problems started. Take him back off the tree, right?

The disadvantage of the "chat room spots" is that they're not in a format or sortable or whatever.

Someday I plan to try to rectify this. What I want is a "trusted spotting" network... the modern internet equivalent of the phone tree, with several tiers of "trust"

If you're tuning along 15m when the spots come up and you hear a P5, you're going to work 'em and call two, three friends. Long time DX buddies. Real friends who you know are among the true "deserving" to get a shot at this. After they work them, they'll potentially call a few of their friends, guys they know can be trusted to not screw things up. No one is going to call the "local lid" hotshot with no courtesy who doesn't care about good operating practice.

You hear an XX9... well... pretty rare, but it's no P5, so you maybe spread the word around a bit more. Maybe you want everyone in your DX club to know directly. You might still not want to tell that persistent lid, though?

You hear a YB4 ... probably worth posting for the new guys but not "sensitive information" in the sense that there's probably going to be another one up the band a bit within the hour. The lid knows? He'll be in and out quickly, who cares.

This is what I want, but in electronic, automatic format. I keep a list of "contacts" who I really trust. The most juicy, amazing spots go only to them, and it's up to them to choose if they will send it on. If it's a P5, no one is going to send it to anyone except their trusted lists, and then only after careful consideration.

Then there's the next level, where I can choose to have the spots AUTOMATICALLY spread to the next ring... friends of friends.

Or I can choose AUTOMATIC to friends of friends of friends.

The lowest level, the garden variety spots, get sent to anyone who chooses to use the system and also the public cluster.

That's what I wish the DX cluster was, and hopefully some day I can work up some software to make it happen.

I, for one, have absolutely no objection to having to log in to my own (or any other) cluster. You'd also have to sign out when you leave. And I agree that it would help to eliminate some or, hopefully, all this garbage.

QRMers don't have to hear the DX.

We spoon feed these a**holes all the information they ever need to cause QRM.

All they've got to do is go to DXSummit and key down on the frequencies listed there. For maximum effect, they can time their keydowns by working "reverse split" and listening to the pileup. You can try to misdirect them by posting fake spots:

DX de N3OX: 3506 FT5GA moved down 2

But then someone will come in 30 seconds to "correct the error" and post

3508 FT5GA correct frequency

So that doesn't work either.

Why would anyone intentionally QRM a station they can't even hear? I don't know. But what I do know is that the interferers on 80m have been so loud that if they were Europeans they were running broadcast power. I couldn't really hear FT5GA anyway... just little snippets. But someone stateside was QRMing them.

It also seemed like the QRM would flare up when FT5GA came up a bit in signal, but NOT immediately timed with the signal increase. There was a delay... very much like if someone were listening the *callers* to time their QRM. FT5GA goes up a bit so I could copy a call or two, a few moments go by, and THEN there's QRM on the transmit frequency.

I maintain that the worldwide, web connected, anonymous cluster has an element that's very destructive for DXing. DX Spots themselves are a very constructive thing, allowing us to work a lot more DX. But an intentional QRMer or a garden variety lid doesn't have to pause one second before screwing up the pileup, because we give them a live play-by-play of where the DX is at all times.

I've spent a fair amount of time using "semi-private, " non-anonymous chat rooms while DXing. They're not really private because any member of the public can sign up and log in.

And I've noticed that a "private" spot... attracts pretty much zero QRM. It attracts interest, because there are 50 guys logged in to the chat room, but there's no QRM.

The lack of anonymity gives a sort of accountability. If there's no public-to-the- world cluster spot and someone intentionally QRM's the DX immediately afterward, you've got a leak. After a while, if the leak is a persistent intentional QRMer, the community will find out. If someone is on the wrong VFO, you can mention it to them usefully on the chat room, without QRMing the DX:

"HEY N3OX... VFO!"

If someone is ALWAYS on the wrong VFO, always screwing up... maybe you say "hmm, I'm not going to spot this while that stupid N3OX guy is in here, he's a big pain." It's just like if you had a DX club telephone tree in the days of yore and you noticed when you added the new guy, all sorts of problems started. Take him back off the tree, right?

The disadvantage of the "chat room spots" is that they're not in a format or sortable or whatever.

Someday I plan to try to rectify this. What I want is a "trusted spotting" network... the modern internet equivalent of the phone tree, with several tiers of "trust"

If you're tuning along 15m when the spots come up and you hear a P5, you're going to work 'em and call two, three friends. Long time DX buddies. Real friends who you know are among the true "deserving" to get a shot at this. After they work them, they'll potentially call a few of their friends, guys they know can be trusted to not screw things up. No one is going to call the "local lid" hotshot with no courtesy who doesn't care about good operating practice.

You hear an XX9... well... pretty rare, but it's no P5, so you maybe spread the word around a bit more. Maybe you want everyone in your DX club to know directly. You might still not want to tell that persistent lid, though?

You hear a YB4 ... probably worth posting for the new guys but not "sensitive information" in the sense that there's probably going to be another one up the band a bit within the hour. The lid knows? He'll be in and out quickly, who cares.

This is what I want, but in electronic, automatic format. I keep a list of "contacts" who I really trust. The most juicy, amazing spots go only to them, and it's up to them to choose if they will send it on. If it's a P5, no one is going to send it to anyone except their trusted lists, and then only after careful consideration.

Then there's the next level, where I can choose to have the spots AUTOMATICALLY spread to the next ring... friends of friends.

Or I can choose AUTOMATIC to friends of friends of friends.

The lowest level, the garden variety spots, get sent to anyone who chooses to use the system and also the public cluster.

That's what I wish the DX cluster was, and hopefully some day I can work up some software to make it happen.

I agree Alek. Additionally, there are some guys out there grumbling about why such a "needy one" was taken on during such a low sunspot (i.e., poor propagation conditions) period.

Imagine how these same guys would feel after all the work the French team did just to make this happen and then they go back to the appropriate authorities and say "Could we wait two or three years on this when propagation might be better and do the trip then?"

To paraphrase an old ethnic joke - if you plan on launching a mission to the sun, it might be somewhat difficult to go in the dark!

The best effort we can make (those of us who are being interferred with) is to do the best to ignore it. The frequency/split cops are often more obnoxious than the offenders! What number is the "don't" on that little slip we see with some QSL cards (Uncle DX?) - NEVER be a frequency cop - NEVER!

Art - N4PJ

What is the performance of your typical 20/15/10m tribander like on 12m and 17m when you run it on those bands with a tuner? Does it show gain or loss relative to a dipole on those bands? Is the radiation pattern fairly skewed?

Strange! I can hear enormous EU pile-ups all over 20M, can see spots for lots of juicy DX and I can't hear anything but the Europeans. 17 & 15, up here, are flatter than .....

Bummer :-(

Peg, please convey our congrats to Paul! I just barely heard them on 80, not nearly well enough to call. I was very fortunate to get them on 20 CW the first day of operation and on 20 SSB a couple of days later. Marsha was still struggling to work them when we left Florida.

We're currently semi-stranded in Jackson, MS. We are near the middle of our Mississippi River Rat County Run - putting out all 82 counties in MS for the County Hunter CW Net. The AC died in the truck on the way into Jackson last night so it's in the truck hospital. We'll continue the trip tomorrow (Thursday morning) and be back home late Saturday or early Sunday. Needless to say, working the guys on the county hunter net leaves darn little time to listen (even if we could hear them!) for the FT5GA on a mobile system!

VK0IR went to Heard at the bottom of the sunspot cycle, further away from population areas than FT5G is, and they put up some impressive numbers. I didn't work them, though, and am still waiting to hear Heard.

To paraphrase an old ethnic joke - if you plan on launching a mission to the sun, it might be somewhat difficult to go in the dark!

The best effort we can make (those of us who are being interferred with) is to do the best to ignore it. The frequency/split cops are often more obnoxious than the offenders! What number is the "don't" on that little slip we see with some QSL cards (Uncle DX?) - NEVER be a frequency cop - NEVER!

Richard;

I don't think we can put the onus on NA. Sure there are plenty of bad apples hanging on our trees; but often we can't hear the pirates and *holes that EU and SA have to put up with either. Everybody, organization, business, etc, etc,.....has its own set of bad apples. But, I'm still going to go after them and I hope you will two.

Dale K8TS

Subject: [DX-IS] Re: embrassed and question if DX is worth it!

>for what its worth, I dont think its Americans either

I've never heard a DX station, even from Europe, at a level quite as loud as the carriers I've heard on 80m. Some of it is domestic QRM, I guarantee it. On the higher bands, probably not... band's too short.

>simply because YOU cant even Hear the FT5 here.

QRMers don't have to hear the DX.

We spoon feed these a**holes all the information they ever need to cause QRM.

All they've got to do is go to DXSummit and key down on the frequencies listed there. For maximum effect, they can time their keydowns by working "reverse split" and listening to the pileup. You can try to misdirect them by posting fake spots:

DX de N3OX: 3506 FT5GA moved down 2

But then someone will come in 30 seconds to "correct the error" and post

3508 FT5GA correct frequency

So that doesn't work either.

Why would anyone intentionally QRM a station they can't even hear? I don't know. But what I do know is that the interferers on 80m have been so loud that if they were Europeans they were running broadcast power. I couldn't really hear FT5GA anyway... just little snippets. But someone stateside was QRMing them.

It also seemed like the QRM would flare up when FT5GA came up a bit in signal, but NOT immediately timed with the signal increase. There was a delay... very much like if someone were listening the *callers* to time their QRM. FT5GA goes up a bit so I could copy a call or two, a few moments go by, and THEN there's QRM on the transmit frequency.

I maintain that the worldwide, web connected, anonymous cluster has an element that's very destructive for DXing. DX Spots themselves are a very constructive thing, allowing us to work a lot more DX. But an intentional QRMer or a garden variety lid doesn't have to pause one second before screwing up the pileup, because we give them a live play-by-play of where the DX is at all times.

I've spent a fair amount of time using "semi-private," non-anonymous chat rooms while DXing. They're not really private because any member of the public can sign up and log in.

And I've noticed that a "private" spot... attracts pretty much zero QRM. It attracts interest, because there are 50 guys logged in to the chat room, but there's no QRM.

The lack of anonymity gives a sort of accountability. If there's no public-to-the-world cluster spot and someone intentionally QRM's the DX immediately afterward, you've got a leak. After a while, if the leak is a persistent intentional QRMer, the community will find out. If someone is on the wrong VFO, you can mention it to them usefully on the chat room, without QRMing the DX:

"HEY N3OX... VFO!"

If someone is ALWAYS on the wrong VFO, always screwing up... maybe you say "hmm, I'm not going to spot this while that stupid N3OX guy is in here, he's a big pain." It's just like if you had a DX club telephone tree in the days of yore and you noticed when you added the new guy, all sorts of problems started. Take him back off the tree, right?

The disadvantage of the "chat room spots" is that they're not in a format or sortable or whatever.

Someday I plan to try to rectify this. What I want is a "trusted spotting" network... the modern internet equivalent of the phone tree, with several tiers of "trust"

If you're tuning along 15m when the spots come up and you hear a P5, you're going to work 'em and call two, three friends. Long time DX buddies. Real friends who you know are among the true "deserving" to get a shot at this. After they work them, they'll potentially call a few of their friends, guys they know can be trusted to not screw things up. No one is going to call the "local lid" hotshot with no courtesy who doesn't care about good operating practice.

You hear an XX9... well... pretty rare, but it's no P5, so you maybe spread the word around a bit more. Maybe you want everyone in your DX club to know directly. You might still not want to tell that persistent lid, though?

You hear a YB4 ... probably worth posting for the new guys but not "sensitive information" in the sense that there's probably going to be another one up the band a bit within the hour. The lid knows? He'll be in and out quickly, who cares.

This is what I want, but in electronic, automatic format. I keep a list of "contacts" who I really trust. The most juicy, amazing spots go only to them, and it's up to them to choose if they will send it on. If it's a P5, no one is going to send it to anyone except their trusted lists, and then only after careful consideration.

Then there's the next level, where I can choose to have the spots AUTOMATICALLY spread to the next ring... friends of friends.

Or I can choose AUTOMATIC to friends of friends of friends.

The lowest level, the garden variety spots, get sent to anyone who chooses to use the system and also the public cluster.

That's what I wish the DX cluster was, and hopefully some day I can work up some software to make it happen.

And as a former DXSpider SYSOP I believe you should be limited to logging into six nodes maximum, all where you've made prior arrangements for login and password. This would allow programs like SpotCollector to work while still providing some flexibility in security. The alternative is a fair amount of user sophistication in spot filtering at each node and by the sysop allowing or disallowing information flows via IP security / addressing.

I had our local RF accessed node N9PE connected to K1EA and K9USA via the internet. When I used telnet to connect to the DX summit in order to compare transit times, European generated spots arrived over the RF connection from N9PE within 2-5 seconds of the telnet spots from the DX summit under normal conditions.

Maybe the login - password method would reduce the garbage and callsign (identity) theft. On the other hand maybe the thing to do is just stop spotting the rare stuff and use alternate methods to notify the Deserving DXers.

As I stated before, I haven't heard FT5GA for certain at signal levels I want to try for a QSO that'll result in a QSL although last night at sunset there was a marginal signal... I made several calls with 100 W to a vertical while my neighbor was calling with a kilowatt to a inverted V at 90'... might have been SL1M, who knows?

73,

Gary - AB9M

It is too bad that the DX cluster can't have some sort of username and password requirement, where you have to join, and then log in to see the cluster. That wouldn't eliminate all problems, but would make a few more hoops for the non-DXer QRMers to have to jump through.

>for what its worth, I dont think its Americans either

I've never heard a DX station, even from Europe, at a level quite as loud as the carriers I've heard on 80m. Some of it is domestic QRM, I guarantee it. On the higher bands, probably not... band's too short.

>simply because YOU cant even Hear the FT5 here.

QRMers don't have to hear the DX.

We spoon feed these a**holes all the information they ever need to cause QRM.

All they've got to do is go to DXSummit and key down on the frequencies listed there. For maximum effect, they can time their keydowns by working "reverse split" and listening to the pileup. You can try to misdirect them by posting fake spots:

DX de N3OX: 3506 FT5GA moved down 2

But then someone will come in 30 seconds to "correct the error" and post

3508 FT5GA correct frequency

So that doesn't work either.

Why would anyone intentionally QRM a station they can't even hear? I don't know. But what I do know is that the interferers on 80m have been so loud that if they were Europeans they were running broadcast power. I couldn't really hear FT5GA anyway... just little snippets. But someone stateside was QRMing them.

It also seemed like the QRM would flare up when FT5GA came up a bit in signal, but NOT immediately timed with the signal increase. There was a delay... very much like if someone were listening the *callers* to time their QRM. FT5GA goes up a bit so I could copy a call or two, a few moments go by, and THEN there's QRM on the transmit frequency.

I maintain that the worldwide, web connected, anonymous cluster has an element that's very destructive for DXing. DX Spots themselves are a very constructive thing, allowing us to work a lot more DX. But an intentional QRMer or a garden variety lid doesn't have to pause one second before screwing up the pileup, because we give them a live play-by-play of where the DX is at all times.

I've spent a fair amount of time using "semi-private, " non-anonymous chat rooms while DXing. They're not really private because any member of the public can sign up and log in.

Wow this subject woke everyone up....

My 2 cents:

- Those interfering with this activity when I am calling are 90% NA. Just look at the signal level and in SSB note the speech.

- These are big stations with big amp...translation these folks are into radio. They know how to find the stations and how to interfere. Even without packet, I am convinced that this would be just as bad.

- Whats wrong with the FT5GA folks. I can hear them and could easily work them except for not knowing if I got a comfirmation due to a QRM.
Solar cycle be damn...maybe if you want them on all bands but surely you can find one band/mode open.

Nothing like sitting in a pileup for a couple of hours only to have someone jam your contact.

My perennial favor is the Maritime Mobile net on 14.300....No one there, FT5GA calling, finally opens to NA, netop hops on and claims they have been on the frequency since 7am.....where is the FCC when you need them. At least they ID.

The only problem with not spotting, Gary, is that in the few years since clusters became popular, many DX stations do not identify often enough. They seem to rely on the traffic generated by the spots. Even taking into account the lousy typists on the cluster who make horrific spotting errors what we have now is quite workable. At least is is workable if we can keep the idiots at bay.

And after all my bitchin' and compainin' today, and even if I didn't get 4W6AL (yet), I still got some good DX in the log.

I agree with W5TFW.

14.300 ***is*** the maritime mobile net, basically 24/7.

DXPeditions should not even consider using 14.300, no matter how you feel about the issue of apparent frequency "ownership"

There are plenty of other places that DX can operate on 20m. There are only a few frequencies that need to be absolutely avoided, and 14.300 is one of them.

14.275 is another, and something like 14.230 to 14.235 to stay away from SSTV.

Running voice on 14.300 is about as useful as running CW on 14.070 listening up. Yeah, it's LEGAL but it completely ignores conflict with a common convention.

I have not seen a spot for FT5GA today on any band where I have the slightest chance of propagation other than 17 meters and I've already worked them there. It appears that FT5GA has taken retribution on NA for the rude cluster comments and abysmal behavior on the bands. Perhaps this will serve as an incentive to improved behavior. Let's hope the boycott is temporary.

I doubt if they pay attention to cluster spots and besides every continent seems to be on punishment

I worked them on 40m and not called them again on that band

would like 80m and 160m but at least I got my cw mode and new band

I have just seen a spot from an Italian complaining that FT5GA isn't working EU. Tell me this, if they aren't working Europe, for whatever reason, and they aren't working North Americans because they're angry with us, just who the devil are they working?

Plain and simple: conditions aren't particularly good and they're not doing a good job -- for whatever reason. Granted, conditions are better than they have been and we can debate until the cows come home about their operating prowess.

But, get over it. Just because you have to work damned hard to get this country on every band is no excuse for bellyaching. I finally got my 4W CW QSO today -- 25 days after I started searching for him. And yes, I complained about how hard it was along the way and I'm pleased as punch with my contact.

Now get back in to the fray and just do it.

I'd never even listened to the MMN until the other day when FT5GA was using the frequency and I could hear the Net Control. I did not hear any check-ins but there was a buzz of activity there that wasn't for the FT5. I just know to stay away from it and always have. Just like I don't go near the part of 20M staked out by the SSTV guys. And I don't operate in that part of the band where digital modes (other than CW, of course) are common. However, he was transmitting on 14.300 when I worked him.

I would never have thought to use a frequency that high on 20M for a DXpedition and when I saw the spot I thought "here comes trouble." But that's been the story of this Glorioso operation from the day they started to plan it all those years ago.

Like you Rene, I don't have much use for nets. However, someday you or I might need one and at least we'll know where to look.

The SSTV'ers I can understand. They need a place to conduct their activities and I'll grant them 5 kHz. Heck, I like to watch their SSTV transmissions sometimes. The MMN is also a useful resource for some. Give it some space to breathe.

Glenn Bastar ... er ... Baxter, however, is more than a bubble off the level ... more than a few bricks shy of a load ... he'd never even know there was a pileup on 14.275 because he never listens, only transmits.

From: Paul Dunphy
Topic: 9721 Message: 11002

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 23 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 266 Issued at 2200Z on 23 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 22/2100Z
to 23/2100Z: Solar activity was very low. Region 1026 (S36E34) has
shown little change while Region 1027 (N23E21) has grown in both
white light areal coverage and sunspot count. No flares were
observed in the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low. There is a slight chance for an isolated C-class event given
the two regions on the visible disk.
IIA. Geophysical Activity Summary 22/2100Z to 23/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next two days (24-25 September).
Unsettled conditions, with isolated active levels, are expected for
day three (26 September) as a recurrent coronal hole high speed
stream becomes geoeffective.
III. Event Probabilities 24 Sep-26 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 23 Sep 077
Predicted 24 Sep-26 Sep 077/077/077
90 Day Mean 23 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 22 Sep 002/004
Estimated Afr/Ap 23 Sep 002/004
Predicted Afr/Ap 24 Sep-26 Sep 005/005-005/005-010/012
VI. Geomagnetic Activity Probabilities 24 Sep-26 Sep
A. Middle Latitudes
Active 05/05/30
Minor storm 01/01/05
Major-severe storm 01/01/01

Nelson,

I don't know that you are correct in saying they are "boycotting" NA. I worked them on 20 mtr SSB at 2000Z and he was working a lot of NA (in fact a SA station sent a packet requesting them to listen for SA).

If your QRZ com location is correct (Iowa), I would think that you would have been able to work him on 80, 40 and maybe 30 (160 is definitely "iffy"). His CW signals on 80, 40, and 30 (as well as 17) have been pretty good here in CO, so I would think he would be workable from Iowa. I will say, however, that he has been much eaiser to work on CW than SSB.

It is quite possible that you have not been on when he was workable; fortunately I am retired and unless my wife comes up with some activity that I cannot "weasel" out of, I can be on the air just about anytime.

Additionally, I can assure you that US hams are not entirely responsible for all the QRM; the Europeans have been just as guilty, the other day when I worked him on 17 SSB he was continually "admonishing" (even to the point of using their callsign) that Italy, Poland, and a few other countires are not exacly located in NA - it is a damn shame they don't teach geography in school any more).

I think we all are well aware that the timing for an operation from such a needed country (I have been active since 1961 and only had it worked and confirmed on 15 SSB and CW) was not the best. But the team has to deal with the cards they were dealt, and I believe they are doing a good job; they are certainly standing by for NA when the propagation is exceptable. They were even on 12M yesterday working the eastern half of the US; I could certainly use them on 12, but I didn't hear a peep, and I have a 7 element 12 mtr monoband beam at 66 ft. Such as be the "propagation gods"; if the conditions were like they were in the late 50's, you could work them on 10 mtrs with 1 watt bicycle mobile.

Personally, I get sick and tired of listening to all the bitching and complaining about just about every DXPedition lately and how they are "doing it all wrong". If one feels that strongly about it, the easy solution is for them to organize and pull off the "perfect" DXPedition where not one station in any part of the world would take issue to the way they were running it. And just think, they would be a "shoe in" for the DXPedition of the year awarded at Dayton every year!!!

Dick K8ZTT

PS Maybe P5 would be a good choice, that would be a good one to please everybody with and remove from the top 100 most wanted.

In any case, don't give up hope; they are not leaving tomorrow. And now their on line logs are up to date, that should ellimilate guys working them for an "insurance" contact.

Good luck,

Dick K8ZTT

From: Nelson Moyer
Topic: 10990 Message: 11004

Dick,

I wrote the retribution piece at 1900 UTC, and I had to go out this afternoon and thus missed the 2000 UTC 20 meter operation. I still need 20 for a band country. Sometimes you luck out and sometimes you don't. The good news is they'll be there for another week or more. I haven't heard them well enough to call on 30, 40, or 80 yet. The East Coast wall has been formidable of those bands. I haven't listened on 15 because I already have it confirmed there. I could tell they were there on 12 yesterday, but couldn't understand phonetics. I don't expect to hear them on 10 at all. I'd be happy with RTTY on any band. The op was taking all callers on 20 RTTY yesterday during our propagation peak, then as the band started to drop out he called for NA. I heard lots of stations East of the Mississippi River get through, but not many West of the Mississippi. It would be nice to call for NA during our peak. W0s aren't going to compete very favorable with EU on 20 meter RTTY between 2000-2200 UTC. My goals for FT5GA are modest, 17, 20 and 30 for band countries and an all time new one on RTTY. With 17 worked, I still have a long way to go.

The bad behavior keeps getting worse. It's a shame that a segment of society can't express themselves adequately without resorting to profanity.

I am with the rest of you. Just one good one. I'd like it to be CW, but...
Looking a the latest propagation predictions between my QTH and Glorioso,
the pickings are slim. Greyline in the lower bands, and some openings on 20
and 17 but with low SNR's and they are brief. I was by the house at lunch
today, and could hear them on 20 phone. Unfortunately I facilitate a couple
of meetings right after lunch and so; I could hear them above the noise
though. I will be here at that time and the remainder of the day tomorrow
and Friday, we'll see what happens.

What is the performance of your typical 20/15/10m tribander like on 12m and 17m when you run it on those bands with a tuner? Does it show gain or loss relative to a dipole on those bands? Is the radiation pattern fairly skewed?

From: Paul M Dunphy
Topic: 11011 Message: 11011

For those who didn't catch it on the LoTW group, there appears to be a problem with LoTW in that it is reporting everyone's certificate as expired. Check your recent uploads (seems to have started yesterday.) Here is Norm's (W3IZ of the ARRL) response to a report of the issue:

"We are aware of the problem and our people are working on a solution.
We apologize for any inconvenience.
Please stand by."

Sad to say, the only VE1 I heard being worked was VE1MC. I could not cut the mustard, even though the CW signal on 15 peaked to S-5. The QSB was very, very deep -- he would be unreadable after I sent my call once or twice. It appears he was much, much stronger futher south and farther to the west. I heard at least one VE2 and several VE3s being worked.

Nonetheless, whoever the 15M CW operator was, he was a crackerjack. Lots of eastern NA got through. Also, there were lots of complaints from EU that NA was being favoured.

You can't win! And I'll be back there tomorrow!

I heard VO1SA get through and at least two other VE1s but can't recall the exact calls.

Never expected 15 and 12 from this operation. And yes, the 15 mtr op today was top notch. I believe he was the 40 mtr op I snagged two nights ago.

It has taken me hours to pick up new needed band counters, and well worth the investment in time.

From: Alan Leith
Topic: 10990 Message: 11014

Yep, now that you've mentioned it, I heard VO1SA and VE1NG get through. They are the same person in the same QTH. And he would have used all of the other calls he has also.

Was really surprised to hear 15 open today. It didn't last long and is now dead here. But I'll try tomorrow.

Keep an ear out for me on Midway, Don. I need several band fills like 12, 15, 17, 30, 40 CW and 80, hi. I don't have anything up for 160.

Have fun, play safe and bye for now :-). When I was a kid a local radio announcer used to sign off his morning show with that!!!

11015. Re: [DX-IS] Retribution

Yahoo group: DX-IS (2009)
Date: 2009-09-24 16:43:39 UTC
From: Zack Widup
Topic: 10990 Message: 11015

My schedule just hasn't permitted me to try to work them during the week. I couldn't hear them at all on 17 meters this AM when everyone else was saying they were S9. Oh well ...

This weekend might be my only chance at them. I'm a bit saddened that they are devoting one station to the CQWW RTTY contest. I am more interested in a CW or SSB QSO at this time than a RTTY QSO, and operating in a contest opens the door to people who have already worked them once on RTTY working them again.

Oh well ... it's only one of eight I need for the current DXCC list. If I don't get FR/G this time, maybe I will some day before I pass on to the Great Pileup In The Sky.
:-)

Hello Helmut,

I also found out that his widow, DL7CN might still have the logs and I have written to her and sent a QSL to her address in Berlin. Do you know this to be true?

If that does not work, I will certainly try the GDXF.

Again, thanks for the information.

11018. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-24 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11018

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 267 Issued at 2200Z on 24 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar activity was very low. Region 1026 (S29E28)
produced a B1 x-ray flare at 24/0020Z. This region remains an
H-type spot group. Region 1027 (N24E05) continues to grow slightly
in area and spot count and remains unchanged in its magnetic beta
configuration.
IB. Solar Activity Forecast: Solar activity is expected to be very
low. There is a slight chance for an isolated C-class event.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet for day one (25 September). Quiet to
unsettled levels, with isolated active conditions, are expected for
day two (26 September). This activity is expected due to a
recurrent coronal hole high speed stream. Quiet to unsettled
conditions are expected to return for day three (27 September).
III. Event Probabilities 25 Sep-27 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 24 Sep 075
Predicted 25 Sep-27 Sep 075/075/075
90 Day Mean 24 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 23 Sep 001/002
Estimated Afr/Ap 24 Sep 002/005
Predicted Afr/Ap 25 Sep-27 Sep 005/005-010/012-007/008
VI. Geomagnetic Activity Probabilities 25 Sep-27 Sep
A. Middle Latitudes
Active 05/30/25
Minor storm 01/05/05
Major-severe storm 01/01/01

11019. A3WS

Yahoo group: DX-IS (2009)
Date: 2009-09-24 22:34:53 UTC
From: Alan Leith
Topic: 11019 Message: 11019

I'm planning to put together an A3WS that has recently come in to my possession. I've had to do a few repairs on end tips and one broken trap end but otherwise the antenna is in good shape.

I have a photocopied manual and cannot see if the elements are mounted on the under side of the book or on top. The manual doesn't indicate which way they go. I assume from the few pictures I have looked at on the net that the elements go under the boom. Am I correct?

>
> Nelson,
>
> I don't know that you are correct in saying they are "boycotting" NA. I worked them on 20 mtr SSB at 2000Z and he was working a lot of NA (in fact a SA station sent a packet requesting them to listen for SA).
>
> If your QRZ com location is correct (Iowa), I would think that you would have been able to work him on 80, 40 and maybe 30 (160 is definitely "iffy"). His CW signals on 80, 40, and 30 (as well as 17) have been pretty good here in CO, so I would think he would be workable from Iowa. I will say, however, that he has been much eaiser to work on CW than SSB.
>
> It is quite possible that you have not been on when he was workable; fortunately I am retired and unless my wife comes up with some activity that I cannot "weasel" out of, I can be on the air just about anytime.
>
> Additionally, I can assure you that US hams are not entirely responsible for all the QRM; the Europeans have been just as guilty, the other day when I worked him on 17 SSB he was continually "admonishing" (even to the point of using their callsign) that Italy, Poland, and a few other countires are not exacly located in NA - it is a damn shame they don't teach geography in school any more).
>
> I think we all are well aware that the timing for an operation from such a needed country (I have been active since 1961 and only had it worked and confirmed on 15 SSB and CW) was not the best. But the team has to deal with the cards they were dealt, and I believe they are doing a good job; they are certainly standing by for NA when the propagation is exceptable. They were even on 12M yesterday working the eastern half of the US; I could certainly use them on 12, but I didn't hear a peep, and I have a 7 element 12 mtr monoband beam at 66 ft. Such as be the "propagation gods"; if the conditions were like they were in the late 50's, you could work them on 10 mtrs with 1 watt bicycle mobile.
>
> Personally, I get sick and tired of listening to all the bitching and complaining about just about every DXPedition lately and how they are "doing it all wrong". If one feels that strongly about it, the easy solution is for them to organize and pull off the "perfect" DXPedition where not one station in any part of the world would take issue to the way they were running it. And just think, they would be a "shoe in" for the DXPedition of the year awarded at Dayton every year!!!

>
> Dick K8ZTT

I would have to go back and look at the cluster spots but I would guess there were a few EU stations that complained about it.

I've noticed that, as the days go by and more and more stations
log the FT5GA guys, the complaints on the DX Clusters (and on their
transmit frequencies) have diminished dramatically.

There has to be a psychology Masters thesis here. Something
along the lines of the level of frustration being inversely
proportional to how many have worked them. For example, I was very
frustrated at people transmitting on their RTTY TX QRG, but now that
I have worked them on RTTY, I'm not nearly as frustrated.

Where can you find a psychology professor to explain all this
when you need one? :-)

I've noticed that, as the days go by and more and more stations log the FT5GA guys, the complaints on the DX Clusters (and on their transmit frequencies) have diminished dramatically.

There has to be a psychology Masters thesis here. Something along the lines of the level of frustration being inversely proportional to how many have worked them. For example, I was very frustrated at people transmitting on their RTTY TX QRG, but now that I have worked them on RTTY, I'm not nearly as frustrated.

Where can you find a psychology professor to explain all this when you need one? :-)

>>>I'm no psychologist, but I'll take a shot at it, Paul.

>>>Before your worked FT5GA on RTTY, the careless and intentional QRM was an impediment to your goal of getting a solid RTTY QSO before the team goes QRT, on schedule or possibly earlier. This impediment is both out of your control, and completely unnecessary. The combination of these two characteristics generates frustration that increases exponentially with each passing day, because the remaining opportunities to succeed are declining. Contrast this impediment with poor band conditions, which while equally effective at preventing QSOs aren't nearly as frustrating.

>>>Once you succeed, however, the pressure evaporates. The frustration generated by the QRM becomes a distant memory, displaced by the pleasure of succeeding in spite of tough conditions; you might even feel better about having made the QSO than you would have in the absence of the QRM.

>>>FT5GA is working down the pileups, so the overall frustration level is declining, which is reducing the intentional QRM, which makes it easier to work down the pileups -- a classic virtuous circle.

>>>Pretty soon, you'll see FT5GA spots with notes saying "begging" or "lonely".

Dave, you'll also see spots saying

FANTASTIC OPERATION, THANKS.

From the same ops who posted the nasties.

Always happens.

Remember, the bad dxpedition is the one you didn't work.

I've already seen a few of those spots, Don. Having worked them on 160m and 80m, I certainly feel that way -- though it'd be nice if the @#$%^& cops would stay off FT5GA's frequency long enough for me to make a solid RTTY QSO, hi.

73,

Dave, AA6YQ

Gee. I haven't worked Midway yet. Where are they? They should
be on when there is propagation to the east coast. I bet they are
working all JAs during my peak time. What a bunch! :-)

Well, not that I doubted it, but I had to check the online log
before replying, Dave. CONGRATULATIONS on 160!

That indeed is a feat that will be hard to duplicate from
here. Long haul, not particularly efficient Top Band antennas on
their end, etc. You definitely were at the right place at the right
time and timed propagation perfectly. I'll trade you a RTTY for your
160, and throw in a 12M too! :-)

To all radio amateurs

SB DX ARL ARLD038
ARLD038 DX news

This week's bulletin was made possible with information provided by HA3JB, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CONWAY REEF, 3D2. A group of operators will be QRV as 3D20CR beginning around October 1. Activity will be on 160 to 6 meters using CW, SSB and RTTY, with a 6-meter beacon at 50124 kHz. QSL via DJ8NK.

TIMOR-LESTE, 4W. Al, 4W6AL is QRV until October 3. Activity is mostly on 40, 30 and 20 meters. QSL via CT1GFK.

CYPRUS, 5B. Gab, HA3JB is QRV as 5B/HG3IPA until October 2. This includes being an entry in the CQ WW RTTY contest. QSL to home call.

MALAWI, 7Q. Barrie, G4AHK is QRV as 7Q7BJ until October 12. Activity is mainly on 160, 80 and 40 meters. QSL to home call.

CANARY ISLANDS, EA8. Val, RD3AF will be QRV as EF8M from Santa Maria de Guia, IOTA AF-004, in the CQ WW RTTY contest. QSL via UA3DX.

AUSTRAL ISLANDS, FO. A group of operators will be QRV as TX5SPA from Tubuai, IOTA OC-153, from September 29 to October 12. Activity will be on 160 to 10 meters using CW, SSB, RTTY and possibly PSK31 with three stations active. QSL via SP9PT.

ST. LUCIA, J6. Bill, WB5ZAM plans to be QRV as J68WI from September 28 to October 11. He will be active on all HF bands using CW and SSB. He may to be to active on 160 meters as well. QSL to home call.

DOMINICA, J7. Babs, DL7AFS and Lot, DJ7ZG will be QRV as J79ZG near Calibishie from September 27 to October 15. Activity will be on 80 to 6 meters using mainly RTTY and PSK, but with some CW and SSB as well. QSL via DL7AFS.

SVALBARD, JW. Operators LA9DL, LA6VM and LA7XK will be QRV as JW5X in the SAC SSB contest from Longyearbyen, IOTA EU-026. Before and after the contest they will be QRV as JW9DL, JW6VM and JW7XK, respectively. Activity is on all HF bands using CW, SSB, RTTY and PSK31. QSL JW5X via LA5X and all others to home calls.

LUXEMBOURG, LX. A group of operators will be QRV as LX7I in the CQ WW RTTY Contest as a Multi-2 entry. QSL via LX2A.

LEBANON, OD. Special event station OD5F will be QRV from September 27 to October 6 from the Village Francophone at the university of Hadath during the Francophone Games. QSL via operators' instructions.

ALAND ISLAND, OH0. Tomi, OH6EI will be QRV from Mariehamn as OH0Z in the SAC SSB Contest. QSL via W0MM.

MARKET REEF, OJ0. A group of operators will be QRV as OJ0B in the SAC SSB contest. In addition, they will be active as OJ0J primarily on the newer bands before the contest. QSL OJ0B via OH2BH and OJ0J via OH0RJ.

GREECE, SV. A group of operators will be QRV as SY1RY in the CQ WW RTTY contest. QSL via SV1JMO.

COSTA RICA, TI. Operators WW4LL and NP3D are QRV as TI5/home calls until September 28. Activity is on all bands using mostly RTTY with some CW and SSB. In addition, they will be entries in the CQ WW RTTY contest on 20 and 40 meters, respectively. QSL direct to home calls.

ROMANIA, YO. Special event station YR550BU is QRV until October 5 in celebration of the 550 years since the first mention in writing of the capital city of Bucharest. Activity is on 80 to 10 meters. QSL via operators' instructions.

MACEDONIA, Z3. Look for Z37M to be an entry in the CQ WW RTTY contest. QSL via bureau.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Chesterfield Island, TX3A, 2009 operation; Afghanistan, T6AB, 2008 and 2009 operations; Afghanistan, T6AF, current operation.

THIS WEEKEND ON THE RADIO. The CQ Worldwide RTTY DX Contest, NCCC Sprint, Scandinavian Activity SSB Contest, Texas QSO Party, AGCW VHF/UHF Contest and UBA ON 6-Meter Contest are all scheduled for this weekend. The QRP Homebrewer Sprint is scheduled for September 28. The 222 MHz Fall Sprint is scheduled for September 29. Please

see September QST, page 78, and the ARRL and WA7BNM contest web
sites for details.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4W - Al, 4W6AL (CT1GPQ) will go QRT from East Timor on 27 September and return home the next day. A log search can be found at http://algarvedx.com (latest update at 15.48 UTC on 24 September). [TNX CT1GFK]
5B - 5B4AHE, 5B4MF, 5B4XF, 5B4ZN and 5B8AP will operate as homecall/p from Agios Georgios Island (AS-120) on 26 September, from around 6 UTC until around 16 UTC. They will have two stations active on 10, 15 and 20 metres SSB. QSL via home calls. [TNX The Daily DX]
7Q - Once again Ely, IN3VZE will be active holiday style as 7Q7CE from Malawi on 2-20 October. He plans to operate SSB and RTTY on all bands depending on propagation. QSL via home call, direct or bureau. [TNX IN3VZE]
A5 - JA1FJJ will be active as A52FJJ from Thimpu, Bhutan on 8-20 October. He plans to operate SSB, RTTY and PSK31. QSL via JA1FJJ. [TNX NG3K]
BY - David, BA4DW will be active as BA4DW/4 from Dongxilian Island (AS-135) for 4-5 days between 1 and 8 October. He will operate holiday style on 20 metres with 100 watts and a dipole. QSL via home call. [TNX BA4DW]
I - Several operations from Italian lighthouses are scheduled to take place on 27 September for the Lighthouse Activity Special Event organized by the Strange Radio Team. Information on the event and the relevant award can be found at http://www.strangeradioteam.com
J6 - Bill, WB5ZAM will be active as J68WI from St. Lucia (NA-108) from 28 September to 11 October. He will operate SSB and CW, possibly also on 160 metres. QSL via home call. [TNX NG3K]
JW - Erling/LA6VM (JW6VM), Halvard/LA7XK (JW7XK) and Just/LA9DL (JW9DL) will operate CW, SSB and digital modes from Longyearbyen (EU-026), Svalbard on 26-30 September. They will participate in the SSB leg of the Scandinavian Activity Contest (SAC) as JW5X. [TNX The Daily DX]
KL - Hugh, K6HFA says that the tentative dates for his operations from Alaskan islands [425DXN 959] are as follows: until 25 September

from IOTA group NA-087, 26-30 September from NA-236 (new one),
then from NA-216 or NA-222 until 3 October. He plans to operate as
K7A on 20, 30 and 40 metres CW and SSB. QSL via K6HFA. [TNX K6HFA]
OH - Anne, OH2YL will be celebrating her 20th anniversary in amateur
radio using a special callsign (OG20YL) on 25-27 September. She
will operate CW on the HF bands. QSl via home call. [TNX OH2YL]
OH0 - Martti/OH2BH, Ville/OH2MM and Pekka/OH2TA will travel to the Aland
Islands to compete head-to-head as OG0A with the OJ0B team (see
below) in the Scandinavian Activity Contest. QSL via OH2BH. [TNX
OH2BN]
OJ0 - Pekka (OH1TV), Ilmo (OH2BO), Pertti (OH2PM) and Lars (OH0RJ) will
be active as OJ0B and OJ0J from Market Reef (EU-053) on 25-29
September, including an entry in the Scandinavian Activity Contest
on SSB as OJ0B. Most of the time from Friday evening to Monday
evening two stations will be on the air, with a focus on the low
bands, especially on 160 metres (1815 kHz). QSL OJ0B via OH2BH, QSL
OJ0J via OH0RJ [TNX The Daily DX]
PY - Jim/PY7XC, Ciro/PY7ZY, Andre/PY0FF, Renner/PY7RP, Leo/PP1CZ and
Mike/K9AJ will be active as PW6C from Coroa Vermelha (SA-062, the
8th most wanted IOTA group in South America) on 11-16 November.
They plan to run three stations 24/7 from two operating sites, and
to operate CW and SSB on 80-10 metres. QSL via K9AJ. Further
information can be found on the expedition's website
(http://www.pw6c.com). [TNX PY7XC]
ST - Robert, S53R is now working in Sudan and expects to be QRV
(requested call ST2X) in late September-early October. He plans to
operate CW and SSB on 80-10 metres. QSl via home call.
VE - Special event callsign VC3COPP will be activated from various
parts of the province of Ontario on 2-31 October to celebrate the
100th anniversary of the Ontario Provincial Police Force. QSL
direct to via VE3BDB. [TNX The Daily DX]
XV - The Russian team in Vietnam [425DXN 958] are facing a "crazy
typhoon" in the area of Ngu Island (XV6RRC, AS-185). The weather
forecast is bad for the next five days, and the operation has been
postponed. They are now travelling to the Cham Island (XV7RRC,
AS-162) area and see what's the weather like over there. Their
original plan also included activity from Tam Island (XV3RRC,
AS-157). Please visit http://xv6rrc.com/ for the regular updates
provided by the team through Twitter.

PACIFIC TOUR ---> Rick, AI5P will be active holiday style from four Pacific
entities during October and early November:
1-8 October FK/AI5P New Caledonia
10-18 October YJ0PX Vanuatu
22-31 October AI5P/VK9N Norfolk Island
1-6 November ZL/AI5P New Zealand
He will operate mainly CW. QSL via home call. [TNX MM0NDX]

CQ WW DX RTTY CONTEST ---> The following stations have announced their
participation in this year's event (26-27 September):

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CLIPPERTON DX CLUB ---> The Clipperton DX Club (http://www.cdxc.org/) elected the following officers to serve for 2009/10: Flo/F5CWU (President), Frank/F4AJQ, Sylvain/F4EGD, Didier/F5OGL and John/F5VHQ (Vice-Presidents), Laurent/F8BBL (Treasurer), Gerard/F2JD (Assistant Treasurer), Sebastien/F8IJV (Secretary) and Laurent/F1JKJ (Assistant Secretary). [TNX F5NQL]

DIAMOND JUBILEE WAZ ---> The Worked All Zones (WAZ) award was introduced in the November 1934 issue of R/9 magazine, a predecessor of today's CQ. To celebrate the 75th anniversary of WAZ, CQ is offering a special, limited-time version of the award. The Diamond Jubilee Worked All Zones will be issued upon presentation of log extracts showing twoway contacts with each of the 40 CQ zones of the world during the period from 1 November 2009 to 31 December 2010. Details can be found at http://www.cq-amateur-radio.com/DiamondWAOct09.pdf

DXCC NEWS ---> The following operations have been approved for DXCC credit: T6AB (Afghanistan, 2008-09 operation), T6AF (Afghanistan, current

operation) and TX3A (Chesterfield Islands, 2009 operation). [TNX NC1L]

FT5GA ---> The on-line log (http://www.clublog.org/charts/?c=FT5GA) now contains 20330 QSOs (latest QSO made at 13.56 UTC on 24 September). It has been confirmed that FT5GA is being pirated: "if your QSO is not online", F5CQ says, "it will be quite sure you have been cheated", and you had better try work them again. Bookmark http://glorieuses2008.free.fr/ for updates.

LOGS ---> A log search for Florentin, FT5WO is now up and running on the Nouvelles DX's website (http://www.lesnouvellesdx.fr/voirlogs.php). [TNX F6AJA]

PIRATE ---> The station R1FJA/p, which was repeatedly spotted on the DX Cluster over the past few days, is a pirate. The genuine R1FJA is now RL3DS, and has not been active from Franz Josef Land for many years. The only station currently active from FJL is Victor, R1FJM. [TNX RZ1OM]

QSL 7P8AO ---> Pista, HA5AO has received the 7P8AO cards from the printer, and will process QSL requests as follows: first, those who donated to the charity project [425DXN 955]; second, those who QSLled direct with sufficient funds; third, those who QSLled direct with IRCs; fourth, bureau cards (including direct requests with 1 USD only). Pista has uploaded (and will upload) to LoTW the QSOs with those stations who have already sent (or will send) a donation; remaining contacts will be uploaded "at least a year later on". QSLling instructions can be found at http://ha5ao.novolab.hu/ [TNX HA0HW]

Seattle, WA September 25, 2009
To all radio amateurs

SB PROP ARL ARLP039
ARLP039 Propagation de K7RA

This week we had a double-dose of good news. Right at the time of the Autumnal Equinox, on Tuesday, September 22, sunspot 1026, a new Cycle 24 sunspot, came into view over the Sun's eastern horizon. We watched this emerge a week ago on the Sun's far side via the STEREO project (see http://stereo.gsfc.nasa.gov/).

STEREO is a fantastic tool, because it gives us all a live view of nearly the whole Sun, and it displays very recent images. It turns out that images from each craft--the ahead (leading earth in its orbit) and the behind (trailing earth in its orbit) satellite--are updated approximately every 15 minutes! No more guessing about activity on the other side of the Sun, because we can see it live in animated form based on real time data.

On that animated Sun display you can see there are longitude lines every 30 degrees. Since there are twelve of them, and a rotation of the Sun takes approximately 27.5 days (it varies by latitude), then on average it takes about .0764 days (1 hour, 50 minutes) for the Sun's rotation to progress one degree longitude. Therefore, when we saw the sunspot at -120 degrees longitude, we could estimate that it would take about 2.2917 days (2 days and 7 hours) for the spot to reach the Sun's eastern horizon (at -90 degrees) and first become visible.

On Monday the daily sunspot number was 11, then on Tuesday and Wednesday a second Cycle 24 spot (number 1027) emerged in the Sun's Northern Hemisphere. Tuesday's daily sunspot number rose to 26, then on Wednesday it was 31 as the area of the spots grew. On Thursday the sunspot number was 32. From Monday to Tuesday the total sunspot area increased by seven times, then on Wednesday it doubled, then on Thursday rose about 29% over Wednesday's area. You can see the sunspot numbers, solar flux and sunspot area for each day at, http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt.

Checking http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt shows us that geomagnetic indices are extremely quiet and stable, so I suppose there are three pieces of great propagation news this week. Both sunspots have moved into their maximum geo-effective position (around zero degrees longitude, in the center of the solar disc as viewed from Earth), led by sunspot 1027.

The current prediction from NOAA/USAF is for continued quiet conditions today with a planetary A index of 5, then on Saturday some unsettled conditions and a planetary A index of 12. It drops to 8 on Sunday, then back to 5 for the foreseeable future. Solar flux is expected to continue at about the same level through the first few days of October.

Geophysical Institute Prague has a similar prediction for geomagnetic values, quiet to unsettled September 25, unsettled September 26, quiet to unsettled September 27, and quiet conditions September 28 through October 1.

Ken Tata, K1KT of Warwick, Rhode Island (grid square FN41gs) reports that the Fall 144 MHz Sprint saw some great activity along the East Coast. This is sponsored by the Southeastern VHF Society (http://www.svhfs.org/) and lasted for just four hours, from 7:00 PM to 11:00 PM local time, on Monday, September 21.

Ken wrote, "From Rhode Island the band was open from at least central Virginia to southern Nova Scotia. Overall, signals were stable with shallow, slow QSB. This was perhaps the most active 2 meter contest I've seen. At 8 PM local time it sounded like an HF contest!"

Tim Hickman, N3JON of Timonium (Baltimore area), Maryland said "Propagation is up!" after he worked VK4MA long path on September 23 at 2137z. Tim was running barefoot with a small 2-element multi band beam, and received an S5 signal report. Unfortunately, he didn't say what band he was using, but I will bet it was 20 meters.

K4WY, KI4BXN and others tipped us off to a fascinating new story about solar wind during the cycle minimum. Dr. Sarah Gibson, lead scientist on the study, found that solar wind may be much more active during cycle minima than previously thought. See the story at, http://tinyurl.com/ndlffo, http://tinyurl.com/kw32nv and http://tinyurl.com/y8n6old.

This weekend is the CQ World Wide DX RTTY Contest, and FT5GA, the Glorioso DXpedition will be active.

With the heightened solar activity, here are some rough propagation estimates for the path to Glorioso Island this weekend, which is off the East Coast of Africa, northwest of Madagascar.

>From Chicago, best bet for 15 meters is 1600-2100z, 1600-2300z for 17 meters, 1930-0030 on 20 meters, 2130-0400z on 30 meters, 40

meters from 2230-0030z, and 80 meters from 2300-0300z.

>From Cleveland, Ohio, check 15 meters 1500-2030z, 17 meters 1700-2230z, 20 meters 1900-0030z, 30 meters 2100-0400z, with a possibly difficult period 0200-0230z, 40 meters 2200-0330z, and 80 meters 2300-0300z.

>From Boston, 12 meters 1400-1830z, 15 meters 1200-2130z, with signals gradually increasing over that period, 17 meters also increasing signal strengths 1300-2300z, 20 meters 1730-0030z, with increasing signal strengths, 30 meters 1900-0430z, with best chance 2130-0100z, 40 meters 2130-0330z, and 80 meters 2200-0230z.

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 25 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 268 Issued at 2200Z on 25 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar activity was low. Region 1026 (S30E15) produced
a C2 x-ray flare at 25/0102Z. This single-spot group has decreased
in area in the past 24 hours. Region 1027 (N24W08) remains a beta
group and has also decreased in both area and sunspot count.
IB. Solar Activity Forecast: Solar activity is expected to be very
low with a slight chance for a C-class event.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be unsettled, with isolated active conditions, for day
one (26 September) as a recurrent coronal hole high speed stream
becomes geoeffective. Quiet to unsettled levels are expected for
day two (27 September), with mostly quiet conditions returning for
day three (28 September).
III. Event Probabilities 26 Sep-28 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 25 Sep 072
Predicted 26 Sep-28 Sep 072/072/070
90 Day Mean 25 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 24 Sep 001/001
Estimated Afr/Ap 25 Sep 003/005
Predicted Afr/Ap 26 Sep-28 Sep 010/012-007/008-005/005
VI. Geomagnetic Activity Probabilities 26 Sep-28 Sep
A. Middle Latitudes
Active 30/25/05
Minor storm 05/01/01
Major-severe storm 01/01/01

11037. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-26 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11037

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 26 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 269 Issued at 2200Z on 26 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 25/2100Z
to 26/2100Z: Solar activity was very low. Region 1027 (N24W21) has
shown little change and remains a simple beta group. Region 1026
(S34E05) is a spotless plage region today. No significant flares
were observed during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 25/2100Z to 26/2100Z:
The geomagnetic field was quiet. An increase in solar wind speed,
density, and temperature were observed from the ACE spacecraft
around 26/1130Z. These signatures are an indication of a possible
weak co-rotating interaction region.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled for day one (27 September) due to
effects from a coronal hole high speed stream. Predominantly quiet
conditions are expected for days two and three (28-29 September).
III. Event Probabilities 27 Sep-29 Sep
Class M 01/01/01
Class X 01/01/01

Here in the Southwest, I'm in Albuquerque, it seems we are in a black hole. They have not been much above the noise, and seem to QSY just as they start to come up. I had no trouble breaking a pile-up for A92GR on 17M around noon. A lot of QRN on 20 this afternoon, around S3.

I heard you on some band... 30m I guess... sri you didn't get 'em... neither did I.

20m SSB had good signals today but I just couldn't pull the trigger.

30m CW was weak but steadily good copy, but they were working all EU.

I hoped they would come up on 17CW but no go.

Dale. 1318Z. On short path, they were just kinda in there, but when I
turned around to long path, they were strong.

Same here. I listened most of the day where they were supposed to be and heard just faint signals in the noise, not strong wnough to work.

Wish I'd had a chance at the A92. That's another one I need!

You are correct, I did not get a contact with them yet. Could hear them at times on 20 SSB yesterday, called when they were up enough to hear the calls correctly, otherwise I waited patiently. I found it humorous that when he announced that he was moving to, I think it was 30M, there were still a lot of callers. For several minutes afterwards.. :-D
I'm a little frustrated, but there is another week. I can't think of a time with a DXpedition that at this point I did not have a contact. I took Friday afternoon off looking for them to be on 17M SSB, as that was where I heard them the clearest for half an hour or so on Thursday, and they didn't show. No spots for them at all that afternoon. I don't recall seeing spots for them on 20 or 17 CW when it's open to the western US in quite some time? That would certainly help me hear them though the QRN.

While I don't need Glorioso for a all time new one, I have been looking for them a single contact. I haven't heard them for sure after many many hours of searching when the propagation prediction software suggests there's a possibility. Two of my neighbors (less than a quarter mile) AA9LC and AC9S are in the log, but somehow I continue to miss the peaks. Such is the DX game.... it wouldn't be much of a game if every time you called, you made the contact, and received a QSL.

Yep, I've worked Pratas, Cambodia and South Sandwich. No, I haven't worked Burma yet. Oddly enough, I only have Pratas on RTTY. I don't have RTTY DXCC yet.

I wish it were that easy (trading QSO's). :-)

11048. Re: Glorioso

Yahoo group: DX-IS (2009)
Date: 2009-09-27 14:47:16 UTC
From: Tom Martin
Topic: 10897 Message: 11048

K8TS,

Dale, I've worked them on 17 SSB, CW, and 20 RTTY here in the U.P. All of my DX friends in the U.P. have heard them and most have worked them. They were 579 on 15 CW last week but QSY'd before I could get them. Not much heard on 40 and 80 here with slopers and a vertical. By the way, the Butternut HF6 with 40 radials doesn't hear them on 20. My 4 element SteppIR at 72 feet is 4-5 S-units better. On 17 the SteppIR really does the job.

Haven't heard them on 12 at all.

A local has worked them on 75 SSB in the daylight! Of course, he has a 4 square on 80.

I know that stations in your area have worked them. I don't know if you have the beam up yet, but the Hustler vertical probably is the problem in hearing FT5GA.

Oh, I have worked two pirates on 30 and 20!!! I really "hate" pirates. I do like Johhny Depp, though. HI!

Good luck. You have time.

73,

Tom W8JWN

11049. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-27 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11049

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 27 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 270 Issued at 2200Z on 27 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 26/2100Z
to 27/2100Z: Solar activity has been very low. Region 1027 (N24W34)
is a single spot alpha group today. No flares were observed during
the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 26/2100Z to 27/2100Z:
The geomagnetic field was at quiet to unsettled levels. An isolated
period of active conditions was observed at mid-latitudes at
27/1200Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (28-30
September).
III. Event Probabilities 28 Sep-30 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 27 Sep 072
Predicted 28 Sep-30 Sep 070/070/070
90 Day Mean 27 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 26 Sep 003/003
Estimated Afr/Ap 27 Sep 007/008
Predicted Afr/Ap 28 Sep-30 Sep 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 28 Sep-30 Sep
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11050. Ohio/Penn DX Bulletin #927

Yahoo group: DX-IS (2009)
Date: 2009-09-27 22:18:00 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 11050 Message: 11050

Ohio/Penn DX Bulletin No. 927

The Ohio/Penn DX PacketCluster
DX Bulletin No. 927
BID: $OPDX.927
September 28, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KY1V, NJ1Q, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, 5B4MF, AT International, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, OH2BN, OH2HAN, ON5JV, Pete's-DX-Newsdesk, PS7AB, PY7XC, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VE3EXY, VE3ZZ and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-September, through Sunday, 27th-September there were 220 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FR/g, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TK, TL, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V5, V7, V8, VE, VK, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). Updates for this one are expected to be on QRZ.com (under 3D20CR). The crew plans to start operations on October 1st. Suggested frequencies are:
CW - 1826.5, 3505, 7020, 10104, 14024, 18080, 21024, 24894, 28024 and 50124 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950, 28490 and 50124 kHz

RTTY - 10140, 14080, 18110, 21080, 24920 and 28080 kHz.
Look for a 6m beacon to be on 50124 kHz. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are most likely to be sent out in January 2010). For more details and possible updates, see their Web page at: http://www.conwayreef2009.de

4U1, ITU HQ (Topband Activity). A report from RSGB President Colin Thomas, G3PSM, states: "4U1ITU will be active during the CQWW CW Contest at the end of November and there will be a 160m operation. Currently there is no 160m operation due to the very high noise level from computers both from within the main ITU building itself, but also from surrounding international organizations. It is understood that a Titanex V160 has been promised from a Japanese source, and it is hoped that time can be found during the week preceding the contest to get the antenna up on the flat roof of the 5 storey Varembe building. However, most of the operators and helpers will be taking part in WRC-12 preparatory meetings during that week. A Multi Single operation is currently planned for the contest."

4W, TIMOR-LESTE. By the time you read this, Al, 4W6AL (CT1GPQ), will be QRT (September 27th) and will be heading home. The Algarve STAR DX Team has updated the log and it can be found on: http://algarvedx.com

6Y1V YOUNG HAM EASSAY DEADLINE (September 30th). David, KY1V, reports on September 26th: "In just four short days we will be selecting 4 young hams to join us this year for CQWW at 6Y1V. We are very excited this year as we have received essays from every continent, from age 9 through 21, and from both boys and girls! I have previewed many of the essays and I can already say it is going to be very difficult to select just 4 young hams. If you wish to be considered for this years' CQWW SSB or CW contest, you have only 4 days to submit your essay. I would like to thank all of the young hams that sent essays this year and their parents for putting their trust and faith in Stacy, Krassy and I. Please be sure to work the all Young Ham 6Y1V station in CQWW this year!"

AT10, ANTARCTICA. Bhagwati, VU3BPZ, will once again head to the Antarctica with the 29th Indian Antarctic Expedition (IAE). The crew has just finished their pre-Antarctic training and medical checks. The team is expected to be there over the winter during a long term operation between November 15th and March 2011. Bhagwati is expected to be on the air from the Maitri Base (WAP IND-03) using his personal callsign VU3BPZ and also a special callsign AT10BP to be issued by the Ministry of Communication & IT for this event. Updates and more details are expected on the WAP Web site at: http://www.waponline.it (Check: News & Information page)

E21, THAILAND. Tinkon, E21NPZ/8, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (40m)/Low-Power entry. QSL via E21NPZ.

EA8, CANARY ISLANDS. Operators Jean/ON5JV and Georgette/ON6AK will be active as EA8/homecall from Tijoco Bajo, Tenerife Island (AF-004) between November 20th and February 10th (2010). Activity will be on 40-10 meters

during their evenings. They plan to use 100 watts into a vertical 14AVQ.
QSL via their home callsigns, the bureau is preferred.

FK, NEW CALEDONIA. Akira, JA1NLX, (along with his XYL) will once again
head to the Pacific, but this time he will be active from Ouvea Island
(OC-033), the biggest island in the Loyalty Islands Group, between November
19-23rd. His callsign will be FK/JA1NLX. Activity will be on all HF bands
(80-10 meters) using CW and RTTY with a IC-706MK2 100 watt transceiver
and vertical antenna. QSL via the LoTW or by his home callsign, direct
or by the Bureau. For more details and log after his operation, visit
the following Web page at: http://www.ne.jp/asahi/ja1nlx/ham/fk_2009.html

FT/G, GLORIOSO ISLAND (Update). The FT5GA team continues to be on the
air and is trying to satisfy the international Ham radio community. As
of September 27th, they have made over 26.6k QSOs with 9.4k unique
callsigns (12885/CW, 11676/SSB and 2070/RTTY). The team has had some
problems with radios (two transceivers went down out of the four they
had, but one was repaired). FT5GA was active during the CQWW DX RTTY
Contest this past weekend. Still most stateside stations report that
the FT5GA signals are very weak and propagation is not helping.
Operations will last until October 5th, as per the Web page at:
http://glorieuses2008.free.fr
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON,
FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA

IOTA NEWS.....
AS-120. Members of the Nicosia Amateur Radio Club were expected to
activate Agios Georgios Island on September 26th, as homecall/p.
QSL via their home callsigns (using addresses on QRZ.com).
Operators mentioned were: Andreas/5B8AP, Spyros/5B4MF, Tamer/
5B4AHE, Philip/5B4ZN and Paris/5B4XF. It has been two years
since the island was last activated during the IOTA Contest
in 2007. <http://kkioftes.homeip.net/ham/iota2007/>
<http://kkioftes.homeip.net/ham/as120-2009/pictures/island_view.jpg>

EU-104/ Claude, F5MCC, will once again activate some of Corsica's
EU-164. coastal islands as TK/F5MCC between now and October 2nd.
He was heard last week on EU-014, but is expected to activate
Sanguinaires Islands (EU-104, DIFM TK-002, MIA MCO-022, WLOTA
L 0098) soon and also Lavezzi Islands (EU-164, DIFM TK-011,
MIA MCO-007, WLOTA L 0755). The activation on EU-164 will be
for one day only between 1000-1600z. QSL via his home callsign,
the Bureau is preferred.

NA-110. Rich, K3RWN, will once again activate the Isle of Palms (USI
SC001S, Charleston County, South Carolina) between September
26th and October 2nd. Activity will be mostly SSB/RTTY/PSK31
with a focus on 30 meters for the Digital modes and 40/20 meters
for SSB. This will be a portable operation using only 100 watts
into a PAC12/Buddipole antenna. While on the beach, Rich will
try some QRP SSB operations using his FT-817 and 5 watts. QSL

via his home callsign (QRZ.com).

OC-070. Hotang, YC0IEM, will be active as YC0IEM/8 from Ambon Island between October 4-23rd. Bands and modes of activity were not provided. QSL via IZ8CCW.

OC-142. Ray, K9LUK, will be active from Fraser Island (WLOTA L 2976, Queensland State, Australia) between October 18-23rd. Callsign was not provided. Activity will be on all HF bands. QSL via his home callsign (QRZ.com).

SA-062. With the support of the Island Radio Expedition Foundation (IREF), the Araucaria DX Group and the ForDX, a group of operators, will be activating Coroa Vermelha Island between November 11-16th. Activity will be on 80-10 meters using CW and SSB. The team members are Leo/PP1CZ, Andre/PY0FF, Renner/ PY7RP, Jim/PY7XC, Ciro/PY7ZY and Mike/K9AJ. QSL via K9AJ. For more details, visit their Web site at: http://www.pw6c.com

J79, DOMINICA (Update). By the time you read this, operators Babs/DL7AFS and Lot/DJ7ZG should be active as J79ZG from the city of Calibushie (Loc. FK95HO and NA-101) between now and October 15th. Activity will be on 80-6 meters on the usual DX frequencies, mainly on CW, SSB, RTTY and PSK, as well as 6 meters. They will look especially for JA stations. QSL via DL7AFS. Their Web page for this operation is: http://www.qsl.net/dl7afs/Index_J7.html

KC4, ANTARCTICA (On the Birds and APRS). Bill, K7MT, will once again be returning to McMurdo Station (AN-011) and be active as KC4USV between November 15th and February 20th, 2010. Bill states that he will be on the HF bands on 14243 kHz, Sundays at 0000z. He will also be active on PSK-31 (on 14070 kHz) and CW (14043 kHz) if time permits. Bill has also mentioned that he will take an Arrow II antenna and his Kenwood TH-7 to work the Amateur Satellites into VK and ZL land. He also has plans to be on APRS VHF/HF with a Kam Plus, so you might just see him driving around on the Ross Ice Sea as K7MT-7 on APRS. QSL via K1IED. Visit his home page for some interesting pictures at: http://www.mt.net/~k7mt/

KH4, MIDWAY ISLAND (Press Release). Tom/N4XP and Dave/WB4JTT, co-leaders for the 2009 Midway Island Dxpedition, sent out the following press release number 7 dated September 23rd (edited): "There is less than a month to go before the K4M team hits the air. Our final dates are now set.
We arrive on the Island on October 9th and our return will be October 19th. That gives us two weekends to be QRV.
Our website was updated this week with interactive propagation charts. Pick a month and then the time and it will show you openings from KH4 to the world at that moment.
The team wishes to thank those 15,000 DXers who voted on our web poll. If you haven't voted on your needed band/mode please do so now as we are going to use this to schedule our operators. We also appreciate all the comments left for us there. Our website is, http://www.midway2009.com

If you haven't visited it in a while stop by and help support our effort.
This month we are highlighting four more team members. You can read
all their history at: http://www.midway2009.com/meettheops6.html "

KH6BZF PROPAGATION FORECAST/REPORT (For September 28th-October 4th)....
Sep 28 LN-AN SOLAR REFERENCE
Sep 29 AN ---------------
Sep 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 1 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 2 AN LN - Low Normal
Oct 3 AN
Oct 4 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH0, MARIANA ISLANDS. Yoshi, JK2VOC, will once again be active from
the Northern Marianas (OC-086) as KH0/JK2VOC between October 23-26th.
Activity will include the CQWW DX SSB Contest (October 24-25th) as
a Single-Op/All-Band entry. Look for activity before the contest on
30/17/12 meters. QSL via his home callsign, by the Bureau or direct
to: Yoshihiro Fukuta, 7-9 Mikawa, Tsu-City, Mie 514-0045 Japan

KL5, ALASKA (Special Event). Look for special event station KL5O to be
active on the air in observance of Alaska Day. Activity will take place
between 1800z, October 18th and 0600z, October 19th. Operations will be
on 160-10 meters, including 30/17/12 meters. Modes will be CW, SSB and
RTTY. Details from the KL5O Web site states, "Operation will be scheduled
to facilitate working North American stations, though all stations world-
wide are encouraged to participate. See the 'On The Air' link for time/
frequency/mode information." QSLs are available via the LoTW, eQSL and
if you want a hard copy QSL card, the QSL manager is AC7DX. For more
information, visit the KL5O Web site at: http://www.kl5o.com

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQ World Wide
DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power
entry. QSL via WC4E.

OG0, ALAND ISLAND. If you worked OG0A this past weekend, it was an Aland
Island contest station in this past weekend's Scandinavian SSB Contest.
A press release late last week from Jarmo, OH2BN, stated: "Martti, OH2BH;
Ville, OH2MM, and Pekka, OH2TA, will travel to Aland Islands to compete
head-to-head with the announced Market Reef OJ0B team headed by Pertti,
OH2PM, in the Scandinavian Activity Contest.
Radio Arcala's mother station OH8X will be operated by Juha, OH8NC,
while Toni, OH2UA, will travel south to put the OH2BH station on with
a pair of K3's for serious benchmark testing. QSL OG0A and OJ0B via
OH2BH, OH8X via OH2UA and OJ0J via OH0RJ."

OH, FINLAND (Special Mine Activity). Operators Simo/OH2HAN and Timo/OH3DF will be active as homecall/9 from the Arctic Amethyst Mine in Luosto (Lapland, Finland) between October 15-18th. Activity will be on the HF bands using SSB and RTTY. The Amethyst Mine is situated on a very beautiful natural place on top of Lampivaara Fell in Luosto, Lapland. Instead of being in raw material business it sells only locally produced amethyst jewelry. It also welcomes all the visitors, and you can dig your own amethyst gemstones there and hear the story of amethysts. They are mining only manually without machinery and their ideology of sustainable development is to preserve nature and work in a manner which does not disturb magnificent Lappish nature. A special QSL will be available via their home callsigns.

QSL INFO AND NEWS.....
QSL 3V8SS via IZ8CCW. Operator was SWL Ashraf, 3V4-002, from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX RTTY Contest this past weekend. Read about Ashraf on: http://www.qsl.net/3v4-002

QSL ER0FEO via UU0JM or LoTW. Activity was in the CQWW DX RTTY Contest this past weekend.

FJ/VE3EY QSL STATUS. Nenad, VE3EXY, reports: "QSLs are out... Received first batch of FJ/VE3EY QSL cards from Nick for his August 2009 St. Barth activation. QSL cards are processed and ready to go to QSL bureaus."

QSL LS1D via LW9EOC. Operators were Daniel/LU3CT, Tim/LW9EOC, Daniel/LW1DIO and Mario/LW8DQ from La Tablada, Argentina. Activity was in the CQWW DX RTTY Contest this past weekend.

QSL OG20YL via OH2YL. Operator is Anne, OH2YL, from Karjalohja, Finland. Activity is to celebrate Ann receiving her license 20 years ago.

QSL SX5R via SV5DKL (QRZ.com address). Activity was in the CQWW DX RTTY Contest this past weekend.

7P8AO QSL STATUS. Laci, HA0HW, was informed by Pista, HA5AO (edited): "Yesterday (September 21st) I have received the QSL cards from the UX5UO printshop. I will answer the QSL requests, first, to the stations who sent donations to the orphan children in Lesotho, than those who sent direct requests with sufficient funds. In the third batch the QSL cards will be posted to stations who sent IRCs, however, I kindly asked for GS (Green Stamps) only. All the direct requests with 1 USD will be answered via the bureau. Finally the bureau cards will be answered. I uploaded and will be uploading the QSO details to the LoTW to all those stations who sent or gave donations on-line or it was included with their direct requests. The complete log will be uploaded to the LoTW at least a year. If you are going to send for a direct QSL request, please read my QSL policy carefully (on QRZ.com), especially for the Lesotho operation."

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Vlad is still sending them out.

QSLS VIA LOTW: 5N0OCH, 6H1IM, 7Q7BP, CP6/DF9GR, DL4CF, FO8RZ, LA9Z, LY2IJ, SM3EVR, UA0YAY, XE1HSW, ZC4LI and ZP6CW

QSLS RECEIVED VIA MAIL: 5V7PRF, 7Q7BP, 7Q7HB, 7P8MM, 7P8OK, 9J2FM, 9L1X, A25/DL7DF, A43DLH, BX5AA, C21TI, EA5ARJ, EA9IB, EU3AR, FM1FV, GB5KIL, GB0SGB/p, H44MY, HR9/WQ7R, HV5PUL, JD1BMH, OZ1GML, P29NI, S04R, SV2AVP, TY5ZR, V51YJ, V8AQM, V85SS, VK9GMX, VK9NI, VP8YLH, YJ8TZ, ZF2DX and ZF2ZB

QSLS RECEIVED VIA THE BUREAU: 5X7FN, 6Y1V, 7P8FC, BY4RSA/4, C56YK, CE0Z/DL2AH, CO2IZ, DL6EZ, DR25RIN, E7/YT2ED, EA2VE, EA9BW, EB1DH/p, EG2ANT, EK8PL, EK0B, F/ON7MH/P, HA8IE, HF94KE, HG0HQ, HG5Y, IF9/IK5MEQ, II8ANT, II8IPY, IK6CAC, IO1DCI, IP5PJ, IQ4AX, JE1FAR, JJ5EFY, JW8DW, LY0HQ, OE9XHQ, OH5NE, ON64POL, PA143ITU, R45VT, RD3MA, RP3D, RK3IWT/1, RT4M, SN7Q, TF/LA9SN, TO6T, TU/F5LDY, UA6UDV, UT0VE/P, VE3MIS, VK7AC, YL2GQT, YV5CRB and YW6AJ

TC1, TURKEY. Members of the Turkish group called TCSWAT (TC Special Wireless Activity Team) will activate the special callsign TC10TF between September 25th and October 2nd. Activity will be on the HF bands. Operators mentioned are TA0U, TA1HZ and TA2RX. Their activity is to celebrate the 10th Transportation Forum which is organized by the Ministry of Transportation & Communications between September 27th and October 1st in Istanbul <http://www.ulastirmasurasi.org/tr/main_page.html>. TCSWAT will be on the air to show that the Turkish ham radio operators are part of the infrastructure of communications. QSL info is available at: http://www.tcswat.org/QSL.html
It is suggested to "Please read the info before sending in any QSL cards."

TI, COSTA RICA. A large team of operators will be active as TI5N during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via W3HNK. Operators mentioned are: Sandra/N3TQU, Todd/KD4YHY, Don/N6JRL, Jim/AL7BA, Stan/KC7EHJ, Dave/KB8OCP, ???/KF0FWC, Jim/KI0DN, Carlos/TI5KD and Sophia/TI2IY. Look for the operators to be active before and after the contest using their own callsign between October 22-27th. Activity will be on 60/30/17/12 meters.

TX5, AUSTRAL AND MARQUESAS ISLANDS (Reminder/Update). Just a reminder that Les/SP3DOI, Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will activate Tubuai Island (OC-152) in the Austral Island group between September 29th and October 12th, as well as Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns have been confirmed and are TX5SPA (Austral) and TX5SPM (Marquesas). Their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. Both countries rank 21st and 19th respectively on the most wanted list in that area, but they do not intend to ignore the stations from other continents. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). PLEASE NOTE: Operators would like to emphasize that all the costs of the DXpeditions are covered entirely by its participants. They do not accept any sponsors, and are going there for their own pleasure, using their own money. The QSL Manager for their DXpeditions

is going to be Wojciech, SP9PT. For more details and update, go to:
http://fo2009sp.pl
UPDATE: According to their Web page (as this was being typed), the team
was expected to fly to Tubuai Island on Sunday, September 27th.

V3, BELIZE. Pete, K8PT, will be active as V31PT between November 24th
December 6th. No other details were provided. However, in past operations
by Pete, activity usually is 160-6 meters using CW, SSB, RTTY and some
PSK-31. QSL via his home callsign.

VC2, CANADA. Operators Noel/VE2BR and Gregg/VE3ZZ will once again be
active in the CQ World Wide DX SSB Contest (October 24-25th) from Mercier,
Quebec (Zone 5, Grid Loc FN35dh), using the special call VC2Z. QSL via
VE2BR.

VP9, BERMUDA. Bob, KE0UI, will be active as VP9I from Hamilton Parish
during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-
Band/Low-Power/Assisted entry. QSL
via N1HRA. Look for activity before and after the contest by Bob signing
VP9/KE0UI. QSL via his home callsign.

XU, CAMBODIA. Operatprs Norbert/F6AXX and Alain/F6HBR will be active as
XU7UFT from Sihanoukville between December 3-8th. Activity will be on
the HF bands, but CW only. QSL via F6AXX, by the Bureau or direct (w/SAE
and return postage). Look for direct QSLs to be answered after January
15th, 2010.

ZY0T, TRINDADE AND MARTIM VAZ ISLANDS. Four members of the Rio DX Group
will activate Trindade Island (PY0T/SA-010) as ZY0T between October
11-16th, however this may vary due to the Brazilian Navy schedules.
Operators mentioned are: Felipe/PY1NB, Linneu/PY1ON, Ivan/PY1YB and
Fabio/PY1ZV. Activity will be a on 160/80/40/30/20/17/15/12/10 meters
using CW and SSB. They plan to have 2 stations. Suggested frequencies
are:
CW - 1821.5, 3520, 7005, 10110, 14030, 18088, 21030, 24910 and 28030 kHz
SSB - 1840, 3765, 7050, 14250, 18118, 21250, 24950, 28450 and 28550 kHz
QSL via PY1NB DIRECT ONLY. For more information, visit their Web page at:
http://riodxgroup.dxwatch.com/trindade-2009

Tom;

I did hear them good enough to work the other nite......put em the log and shouted with joy........terriorized the cat--she went and hid

However, did not show up in the log.

Worked on 40m also--same story.

#$%^*&^% pirates!

Subject: [DX-IS] Re: Glorioso

K8TS,

Dale, I've worked them on 17 SSB, CW, and 20 RTTY here in the U.P. All of my DX friends in the U.P. have heard them and most have worked them. They were 579 on 15 CW last week but QSY'd before I could get them. Not much heard on 40 and 80 here with slopers and a vertical. By the way, the Butternut HF6 with 40 radials doesn't hear them on 20. My 4 element SteppIR at 72 feet is 4-5 S-units better. On 17 the SteppIR really does the job.

Haven't heard them on 12 at all.

A local has worked them on 75 SSB in the daylight! Of course, he has a 4 square on 80.

I know that stations in your area have worked them. I don't know if you have the beam up yet, but the Hustler vertical probably is the problem in hearing FT5GA.

Oh, I have worked two pirates on 30 and 20!!! I really "hate" pirates. I do like Johhny Depp, though. HI!

Good luck. You have time.

Hi Bob,

Try www.vanityhq.com . There is a box on the left side for a callsign look up that goes back quite a ways.

11054. FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-28 04:36:10 UTC
From: Zack Widup
Topic: 10757 Message: 11054

Well, I worked FT5GA or someone like him this evening on 7004 a little after 0300Z. He called CQ and was 20 over 9. He worked a handful of people simplex (including me) before the pileup started, then started working split. As I listened, the signal rapidly faded down to S2 or so in 10 minutes. It was the same signal on the same frequency.

So was it a propagation fluke a half hour after their sunrise, or a pirate who turned his power down after people started posting him as a slim on packet? What's weird is they have apparently been at it for over an hour now. I can still hear them in there about S2. Would a pirate keep working people that long?

Guess I'll know in a few days if it does or doesn't show up in the log. That might've been my last chance to get them due to my schedule.

The vanityhq.com site only seems to go back as far as the current vanity program. I got my current callsign in 1976 and it isn't considered a vanity call by the FCC now. I guess those of us who got them in the mid-70's were "grandfathered in."

The RAC would only help you to identify the year and appromiate time. How accurate does it need to be for LoTW?

Did you save your old licenses?

Actually, Vanity HQ appears to go back to 1981. Use the "Unique Call Lookup" box in the top left.

It did help with the OM's original call BTW so it helped us out. We need to add that call to his LOTW account.

Yes but as I mentioned, I got this call in 1976. It just says something
about "already licensed" in 1981.

But I kept the old license!
:-)

Comment from another list:

We really shouldn't be so hard on the pirates. The guys on the island aren't giving all areas of the world the possible bands, or one contact, so someone has to do it for them. So if I can't get the real one for the bands I don't have, I'll settle for Black Beard.

Hope for my friend sake it was real

I have them on 40

but the strange think was they were 599 plus 30 over
 then later a fade to 579 then continual fade down to where they disappeared

if a pirate it was to the east .

When I worked them on 40m on 20-sept it was 2333 utc but I have heard them on one other time later in the eve and they were good copy but not 599

I did manage a contact on 15m this morning using 100w

Good luck to all and hope this week brings better results for a lot of deserving

They came up out of the noise for almost an hour on 15 CW today -- peaking here at about S4. Lots of guys in New England and farther south and west of me worked them but I didn't hear them work a single VE in that period. They were in and out of the QSB for the entire period and a QSO from this QTH would have been only slightly more than marginal. Given the chance, however, I would have taken it.

The logs were just updated and I'm not in it. Guess I worked a pirate. I knew it was too good to be true!

Looks like I might not get the chance to work this one. Maybe there will be another FR/G operation if and when we have a sunspot cycle peak. Maybe the lids will all hibernate. Lots of maybes.

If they're as active for the rest of the operation as they have been so far today, Zack, you'll get your chance. I wasted almost two hours today (mind you, I had little else to do) chasing them on 15 CW and didn't manage a QSO. And I've been listening on 20 SSB and they're plenty strong. I just don't need 'em there.

Perhaps I'll hear them on 30 or 40 later as the sun sets. We'll see.

Don't give up!

Well, I worked FT5GA or someone like him this evening on 7004 a little after 0300Z. He called CQ and was 20 over 9. He worked a handful of people simplex (including me) before the pileup started, then started working split. As I listened, the signal rapidly faded down to S2 or so in 10 minutes. It was the same signal on the same frequency.

So was it a propagation fluke a half hour after their sunrise, or a pirate who turned his power down after people started posting him as a slim on packet? What's weird is they have apparently been at it for over an hour now. I can still hear them in there about S2. Would a pirate keep working people that long?

Guess I'll know in a few days if it does or doesn't show up in the log. That might've been my last chance to get them due to my schedule.

I dunno. I haven't had time in my schedule to try work them during the week till around 0200Z or later. They haven't been on the air at that time except for a few days, from what I could tell. I missed them yeaterday afternoon on 30. I tuned in to them JUST as they said they were QRT on 30. That was abut 2100Z. I couldn't hear them anywhere after that. I spent the rest of the day listening for them.

Oh well, in the grand scheme of things it isn't a big deal ...

11072. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-28 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11072

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 28 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 271 Issued at 2200Z on 28 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 27/2100Z
to 28/2100Z: Solar activity was very low. Region 1027 (N23W47)
indicated a slight increase in area and spot number and maintains a
bipolar magnetic configuration.
IB. Solar Activity Forecast: Solar activity is expected to be very
low with a slight chance for a C-class event.
IIA. Geophysical Activity Summary 27/2100Z to 28/2100Z:
The geomagnetic field was mostly quiet with an isolated minor storm
period observed at middle latitudes between 28/0600 - 0900Z. An
extended period of southward IMF Bz (-5 to -6 nT) was observed
between 28/0400Z - 0800Z that contributed to the minor storm.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for days one and two (29-30 September). Quiet
to unsettled levels are expected on day three (01 October) due to a
coronal hole high speed stream.
III. Event Probabilities 29 Sep-01 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 28 Sep 073
Predicted 29 Sep-01 Oct 072/072/072
90 Day Mean 28 Sep 069
V. Geomagnetic A Indices
Observed Afr/Ap 27 Sep 008/008
Estimated Afr/Ap 28 Sep 009/009
Predicted Afr/Ap 29 Sep-01 Oct 005/005-005/005-007/007
VI. Geomagnetic Activity Probabilities 29 Sep-01 Oct
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/05
Major-severe storm 01/01/01

From: aburkefl
Topic: 11052 Message: 11075

For LotW purposes, it really only needs to be as accurate as you need, i.e., the dates you specify need to encompass the dates of the QSOs you want to add/check etc.

Since there's no database for anyone to check against, you would most likely be permitted to put in any reasonable date range. The only obvious thing that comes to mind is if someone else now has the old call you're trying to establish for LotW - that could get complicated!

In 2004, I changed my call from NE4F to K4IRS (then to N4PJ in 2006). In 2006 someone "picked up" my old NE4F call. The only complication that arose (none from LotW) was minor - I received some of his bureau QSL cards. Since I had not used the NE4F call for almost 17 years, I made sure the bureau would send all NE4F cards in the future to the new holder - there aren't likely to be very many of them for me!

It would be very difficult for the "new" holder of NE4F to get any cross-dupes from my call - his QSOs would, in all probability, never match even if the dates were improperly entered.

Art - N4PJ

11076. Cluster Spots

Yahoo group: DX-IS (2009)
Date: 2009-09-29 16:06:06 UTC
From: WB6PSY/N6AXK
Topic: 11076 Message: 11076

From my Uncle Phil:

Steven from California: Dr. Phil, people don't appreciate me. I put cluster spots on the internet to help people out. Rather than
show their appreciation, they say bad things about me.

Dr. Phil: (With a puzzled look on his face) Hmmmmm... I've heard of a cluster, well you know, oh never mind, I can't say that on the air. But what in blazes is a cluster spot?

Steven from California: Well, Dr. Phil, a cluster spot is something ham radio operators use to let other hams know what stations are on the air, and what frequency they are on.

Dr. Phil: OH NO... Not another ham radio operator. I specifically told my producers not to bring any more of you guys on the show. I'll deal with them later. But since you are here, I'll try to help you. Now exactly what are you putting on these cluster spots that are ticking people off.

Steven from California: I don't know Dr. Phil. I try to help people out. If a station is calling for Europe, I'll put it on the cluster so people in the states will know. If I work a station, I put it on the cluster.

Dr. Phil: OK Steven, I just had an email handed to me that came from my nephew, who is a ham radio operator. He says you are a cluster cop, you put your log book on the cluster, and that you use the cluster to make radio contacts. He says, in other words, that you use the cluster to get the other station's attention if you can't contact them over the air. And that you use the cluster to fill in information, such as your call sign, if the other station didn't get it over the air. OH MY GAWD! The second page has all your
spots for 2009. What in the world are you doing? There's more spots here than Carter has liver pills.

Steven from California: Dr Phil, I put spots on the cluster to announce all my contacts, because I'm proud of them. I don't believe I'm a cluster cop, I just want to make sure the US is not transmitting when the DX calls for Europe. I try to call the DX stations with my radio. But there's thousands of other stations calling at the same time. Sometimes, I need the cluster to get the DX station's attention. And it's bad not to get in the log, so I sometimes put information on the cluster to make sure the DX got my call
sign correct.

Dr. Phil: (Leans back and takes a deep breath) Now Steven, first of all, what information do you get from DX stations alerting you that they are working Europe?

Steven from California: Well, they say so on the air.

Dr. Phil: So if you get it on the air, doesn't every other station that's listening to them?

Steven from California: Well, yes they do Dr. Phil. But they don't pay attention, so I put it on the cluster.

Dr. Phil: (Almost laughing) So in other words, other stations don't pay attention to the DX operators instructions, but they will if you spot it on the cluster. Hmmm... I'm now starting to get the picture. And why do you spot everything you work just to let the whole world know you worked it?

Steven from California: It's like I said Dr. Phil, I'm proud of my contacts.

Dr. Phil: Steven, read my lips. No one cares what you work. I don't care, the man sitting next to you doesn't care, no one in the audience cares, and no other ham radio operator cares. What you do is a personal achievement, and no one else cares. Now here you are using the internet as a crutch to work something that is suppose to be a radio contact. Isn't that cheating? Think about it this way. When I played college football in Oklahoma, I was a middle linebacker. What if the opposing halfback had the ball, and I had him in my sights on him about to make a tackle. Suddenly a helicopter came over the field, threw down a life line, lifted him over me, and he scored a touchdown.

Steven from California: That wouldn't work. Flags would be going up, the referees would be jumping up and down making all kinds of waving motions, and it wouldn't count.

Dr. Phil: Thank you. Now you get the point. We have referees to keep everything legal on the field, but you guys are on your own. What you are doing on the air is only a personal accomplishment. Personally, I wouldn't get any satisfaction out of radio if I had to depend on the internet to get a foreign station's attention or to give them information that should have been sent over the air. But whatever burst your bubble. If you broadcast everything you do on the cluster, you'll will get the world's attention. So don't come crying to me if you get flak from those who read the cluster.

Steven from California: You're just like the rest of them Dr. Phil, you're against me. What I'm doing is right those who don't believe it are wrong.

Dr. Phil: OK Steven, have a safe trip back to California. I was about to make arrangements for some therapy, near your town in California, but you won't be needing any. That would be like sending a blind man to an optometrist.

Rene
p.s. Steven's callsign on request but I think most know who he is...

11083. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-30 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11083

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 30 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 273 Issued at 2200Z on 30 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 29/2100Z
to 30/2100Z: Solar activity was very low. Region 1027 (N23W76) has
decreased in size and spot number and currently indicates an alpha
magnetic configuration as it approaches the west limb. No
significant flares occurred during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low with a slight chance for a C-class event.
IIA. Geophysical Activity Summary 29/2100Z to 30/2100Z:
The geomagnetic field was mostly quiet with an isolated unsettled
period observed during the period 30/1200Z - 1500Z. Observations
from the ACE spacecraft indicated the possible arrival of a weak
co-rotating interaction region in advance of a recurrent coronal
hole.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled for day one (01 October) due to a
weak coronal hole high speed stream. Quiet levels are expected for
days two and three (02-03 October).
III. Event Probabilities 01 Oct-03 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 30 Sep 072
Predicted 01 Oct-03 Oct 072/070/070
90 Day Mean 30 Sep 069
V. Geomagnetic A Indices
Observed Afr/Ap 29 Sep 000/002
Estimated Afr/Ap 30 Sep 005/005
Predicted Afr/Ap 01 Oct-03 Oct 007/007-005/006-005/005
VI. Geomagnetic Activity Probabilities 01 Oct-03 Oct
A. Middle Latitudes
Active 10/05/05
Minor storm 05/01/01
Major-severe storm 01/01/01
```

11084. FT5GA (HA!!!!)

Yahoo group: DX-IS (2009)
Date: 2009-09-30 22:51:38 UTC
From: Alan Leith
Topic: 11084 Message: 11084

Of course I want to believe I just worked FT5GA on 30M but I'm having a hard time convincing myself that whoever I worked was genuine. But lots of guys are being fooled by this probable PIRATE.

Whoever he is, he's way too strong.

But the hopeful are, just that, hopeful. I doubt they, or I, will be in the log when it is next updated. But I ask, why do people do this?

As well, I'm amused by the 17M operations of FT5GA and TX5SPA. Of course, I know it is TX5SPA and not FT5GA but the cluster spots are hysterical. Also, N0ATT calling for a long time on LSB. No wonder he's not getting an answer.

When, in the name of all that is good and holy, will people start to listen, stop calling when there's no sign of their call in the one the DX is asking for and pay attention to instructions.

I'm getting really sick of the rudeness of the Europeans in general (of course there are exceptions) and also many of my fellow North American hams. Civility disappeared on SSB some time ago, has recently been removed from CW and will soon, if it hasn't begun, be something of the past on the digital modes. For want of a better description, I'll call it Band Rage.

Today's pile-ups are outrageous free-for-alls.

I believe Martin G3ZAY left Miquelon Sunday (probably on the afternoon ferry to St. Pierre) and is portable somewhere in VE1-land. They had a fine short trip to Miquelon and sounded very happy with how everything worked out.

Al,

I wish you the best of luck. I found out today that FT5GA is NOT a DXpedition but rather a military expedition with a number of radio operators. They have military responsibilities and amateur radio is a secondary / off duty past time. So we should all just take a deep breath.... Now don't we all feel better now? I've heard them once. Just as they were above the noise they went to Europe only then QRT. Never when propagation should be working for W9 - FT5G path or Sun rise / set peaks. But Slim shows now and then.

73,

Gary - AB9M

I heard him on 40 CW last night-huge pileup, but only because someone spotted him as FT5GA. I thought he was way too loud to be the FT5. The pileup died down pretty quickly when he started signing after every QSO.

Still trying to even hear the FT5GA.

Perhaps the fact that Conway came on the air tonite will take some pressure off FT5GA.
Will put the pressure on the lids, silms, pirates, etc, to cover TWO expeditions at once.

Poor guys, such is the luck.

I don''t recall any DXPedition ever working on a "fixed schedule", much less most of them.

The FT5GA team is operating under constraints imposed by their hosts. The constant lidfest on their frequencies is not their responsibility.

Subject: RE: [DX-IS] FT5GA (HA!!!!)

I've already worked two different 30m pirates.

I'll be implementing the WAP (Worked All Pirates) award in the next version of DXKeeper; hopefully they'll upload their logs to LotW...

73,

Dave, AA6YQ

Subject: [DX-IS] FT5GA (HA!!!!)

Of course I want to believe I just worked FT5GA on 30M but I'm having a hard time convincing myself that whoever I worked was genuine. But lots of guys are being fooled by this probable PIRATE.

Whoever he is, he's way too strong.

But the hopeful are, just that, hopeful. I doubt they, or I, will be in the log when it is next updated. But I ask, why do people do this?

As well, I'm amused by the 17M operations of FT5GA and TX5SPA. Of course, I know it is TX5SPA and not FT5GA but the cluster spots are hysterical. Also, N0ATT calling for a long time on LSB. No wonder he's not getting an answer.

When, in the name of all that is good and holy, will people start to listen, stop calling when there's no sign of their call in the one the DX is asking for and pay attention to instructions.

I'm getting really sick of the rudeness of the Europeans in general (of course there are exceptions) and also many of my fellow North American hams. Civility disappeared on SSB some time ago, has recently been removed from CW and will soon, if it hasn't begun, be something of the past on the digital modes. For want of a better description, I'll call it Band Rage.

Today's pile-ups are outrageous free-for-alls.

When it becomes impossible to get in the log unless they do that?

Well, I just worked a very strong "FT5GA" on 7002.97 (called once on
7007.59 and got him).
It was 0357z Oct 1st.
He finally gave his call a few times a few minutes later and disappeared.
I've got the real FT5GA on 30m, so I won't be too disappointed if the
40m qso doesn't show up.
As others have said, it's strange that a pirate would work a pile up for
an hour or so, but just disappearing at the end sounds like a pirate.
We will see.

We need to figure out how to get Obama to "pardon" the pirates so they'll eventually beocme known to all the world. Then we can tar and feather them and ride them out of the galaxy on a rail.....

11098. Re: FT5GA (HA!!!!)

Yahoo group: DX-IS (2009)
Date: 2009-10-01 10:46:26 UTC
From: aburkefl
Topic: 11084 Message: 11098

Last week Marsha and I wandered through the 82 counties in Mississippi. She logged and navigated and I worked CW while dodging the rainstorms. Near the end of the first day, I was on 30 CW in Adams county and was deluged. Many, many, many of the calls were not the "standard" county hunters, but contest and dx stations. Twice I slowed way down and sent "County Hunter Net, Adams, MS, not DX not DX." Didn't seem to matter. I guess the combination of poor conditions for so long and someone with what started out as a modest pileup...

A typical county run was normally between 10 and 30 calls. When you get well off the interstate in a not-so-well-travelled state like Mississippi, some of the counties approach "rare" status. But that afternoon in Adams county I took approximately 75 calls. Felt like I was there so long I was going to have the post office forward my mail there!

It's even better than that!

XV3RRC (they're on AS-157 off Vietnam)
TX5SPA (Austral Islands)
3D20CR (that's 3D2 zero - Conway Reef)
FT5GA (Glorioso)

The pirates will have to stay somewhat busy!

You assume that there is only one slim/pirate/nut case or weirdo

there are many of them and they tend not to sleep and are quite aware of the expeditions on-going

Good luck -- lets hope all of them take their medication at the same time for our sake

11103. FT5GA vs TO7RJ ??

Yahoo group: DX-IS (2009)
Date: 2009-10-01 16:44:33 UTC
From: Rick W
Topic: 11103 Message: 11103

Both of these stations are in the same part of the world and about 16,000 km from my QTH short path. Both are pretty rare. Why is it I can hear and work (got him at 1630 utc) the one-man Mayotte operation on SSB when the West Coast of NA is open but the Glorioso operation is not there?

When they are around they are barely audible and rarely calling for the west coast. Glorioso has had problems with rigs, generators and I believe the operators are military personnel. BUT they do have more operators and better antennas. Mayotte is a one-man operation and, according to the website, he's using a K2, 400 watt amp and an inverted-L antenna (pretty modest).

Why the difference in signals here on the west coast? Is it strictly propagation? Is Glorioso a black hole?

Thoughts appreciated. Thanks.

73,

Rick

The FT5 crew says they are in a very bad location on the island with obstructions around them. They can't operate on the beach which would be a better site. Remember these are members of the military and have to go with what their senior officers want them to do. They are not there on an entirely ham radio expedition. We take what we can get (and it appears I'm not going to get anything except one pirate QSO).

Apparently, they're not beaming at all. They're using Spider beams. NA was only 15% of Qs last I checked, and it's not because we're not calling! This operation is by EU for EU. The stats prove it, and the ops don't seem to care.

Nelson, the "stats" prove nothing. My uncle swore that black cows ate a lot more feed than the white ones, the one fact that he failed to take into account was he owned twice as many black cows as white ones.

As far as the number of contacts to NA and SA; look at a map and check the distance between FT5GA and Europe and then to NA or SA. With the sunspots near zero, band condtions have not exactly been steller to NA and SA.

Look at the number of QSO's on 10, 12, 15 and 17 mtrs to the different areas, and that explains why EU has so many QSO's. I have not even heard them on 10, 12, or 15; worked them on 17, but they were no "tower of strength", and I am using a 7 element monobander at 80 ft.

I would sure love to work them on 160; but just looking at the "stats", one would conclude they don't give a damn about zone 4 (or NA for that matter). Unfortunately, it is to early in the season for 160, propagation sucks, and it is not because they are favoring EU.

Additionally, we have to understand that the "DXPedition" is not their primary mission, and to exacerbate the problem, there are numerous other constraints they have to live with.

In CO, I think that 40 and 80 have been the best bands to work them on.

I would have to agree with HK3CW that SA seems to be "taking the honors" of worst proagation.

Dick,

I wouldn't be quite as incensed about 10, 12, and 15 meter Qs to EU if there were more 20 meter Qs to NA/SA. The fact is, many times FT5GA has been QRT or working EU on the low bands during NA predicted peak 20 meter propagation between 2030-2330 UTC. The fact is, they haven't arranged their schedule to accommodate the weak and short openings to NA or SA on potentially the most productive band. Additionally, they have spent most of their time on 20 meter phone to the exclusion of 20 meter CW. They have been asked, begged, pleaded with, etc., all to no avail. That's why NA and SA are underrepresented in the stats. NA has a huge DX population, and despite poor propagation, NA should represent more than 15% of the Qs. They just haven't been where we could work them when we could work them. Unfortunately for us, that period happens to be in the middle of the night on Glorioso. Maybe the military constraint has something to do with that middle of the night absence from the bands, but if so, shouldn't they just tell us?

I suspect the tables will turn shortly, with the arrival of Midway on the bands. I'll bet we hear long and loud howling from EU about the NA wall and the poor propagation to EU. I also bet that the ops on Midway will make a pointed effort to work EU at their predicted propagation peaks. While Midway comes too late to be instructive to Glorioso, maybe a retrospective study of the stats from both Dx'peditions could be the topic of an article on how to or how not to conduct a DX'pedition.

I'm not completely disappointed with FT5GA. I've worked new band countries on 17 and 20 meters. I even worked them on 15 meter phone from Iowa with a pretty good signal, and I printed them for a while on 15 meter RTTY during the contest, but they were working mostly EU. I am disappointed that they operated a lot of the RTTY contest by hunt and pounce instead of running a split pileup on the WARC bands during the contest. The means only the big gun run stations worked them. I'm even more disappointed that they haven't been on RTTY since the contest. Obviously, I haven't worked them on RTTY, yet.

It's not over for another week, but they haven't shown any responsiveness to input or stats. All I can do is BELIEVE that a miracle will occur and I'll work them on RTTY.

Nelson, KU0A

P.S.

Actually, Dick, stats do prove things, when scientifically interpreted in light of the variables. As a retired doctorial scientist, I made my living interpreting stats.

11110. FT5GA Qso statistic

Yahoo group: DX-IS (2009)
Date: 2009-10-01 20:42:18 UTC
From: WB6PSY/N6AXK
Topic: 11110 Message: 11110

(sure glad I don't need it)
FT5GA team is only 5 young completely unexperimented op's in low-band traffic,
even not DXers, they are only pilupers, on the wrong side of the island
and with antennas away from sea costing, which means 10 to 20 db signal loss

Beach access is prohibited for it’s a Turtles reproduction area.

But FT5GA is on the air !
it was this or nothing
after 5 years of lobbying,
so .... ?

We are not responsible for:
- SFI = 70
- poor S/N ratio in the evening
- and legions of QRMers
- low band peak from 2 to 5 in the morning EU local time
- power availability
- operator avalaibility

Radio is only 2/3 of time 1/3 is job as military
We dont have control on sharing time,vand local organisation makes number of activities on the island
for all residents (100%) at the same time.
It is a compromise,

in balance it is
- a long expedition
- low cost cost operation for an very isolate place and nobody complains about .

In the evening the propagation is quite poor , because this dates are very early in the season
and noise level reduces the signal to noise ratio
and so many peole who are listening nothing are permanatly making deliberate QRM
and it is just time lost
.
So up to you, you have until oct 8th to try again

Pilots received about 500 requests a day, for ultra selective operation.
We can’t and we don’t want to manage in that way (planning prog require a Cray computer us in back office, and operators. We are sure to be in line with DXCC concept.
Remind, DXCC is a competion, and expeditions not a minium public service for every one.
Dxpeditions working via list operation or equivalent selective mode should not be accepted by dxcc desk
If a red carpet is spread between dx and dxer’s what is a QSO value? nothing more than contact via MSN.

We hope 35 000 qso's today in the log, which made 35 000 smiles.

73 Jeff F6AOJ Eu-Pilot

Our Glorioso journey or Don't give up, we both need it for all-time new one

OM Paul K9OT called me at work Monday noon saying he thought he had worked them on 15 CW. His earlier 80 CW contact must have been with a pirate, we both thought it was too easy.

Anyway I decided to go home early because they were starting to come in on 20 sideband in the Black Hole of Wisconsin. Yes, he was strong but asking for "West Coast, USA 6s and 7s" which I'm sure made the VE6 and 7 guys happy (not). Then he just started working anyone so about 85% EU made it. The QRMers had a field day. "QRX for 5 minutes" which for this group means a long wait. A new op, much lower voice, came on shortly, was he the real deal? WFWL.

Finally EU died out along with the lids (any connection?) and the new guy was working mostly NA and some SA. I heard him work AE9YL in Indiana so there was hope. He came back to Lima Echo and I figured that was close enough for me. He got my call corrected and that was that. If there was a true Lima Echo out there at the same time, my apologies.

We are both in the online log this time.

Patience and remember EU loses propagation too while NA still has it. I almost forgot that.

Thanks Zack. I gathered the conditions were not optimal - even for a dxpedition.

They were definitely workable on the west coast today. Unfortunately they were calling CQ North America. My location is in western NA and 5,000 km (3,000 miles) from the most eastern part of NA (VO1). So only a very few west coast stations broke through the pile. But signals were the best I've heard so far.

If they time the propagation a little better (an hour or 2 earlier) and perhaps ask for NA west coast ... who knows I may just get him!

73,
Rick

This week's bulletin was made possible with information provided by IN3VZE, NC1L, OH2BN, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

UNITED NATIONS HQ, 4UxUN. UN Headquarters station 4U64UN is active until mid November in celebration of the 64th annual UN general Assembly. Activity is on all band and modes. QSL via HB9BOU.

SENEGAL, 6W. Martin, OK1FZM and Lenka, OK1WZM will be QRV as home calls/6W from October 3 to 15. Activity is holiday style on all HF bands. QSL to home calls.

MALAWI, 7Q. Ely, IN3VZE is QRV as 7Q7CE from the south shore of Lake Malawi until October 20. Activity is holiday style on all bands using SSB and RTTY. QSL to home call.

CHINA, BY. David, BA4DW/4 is QRV from Dongxilian Island, AS-135. He is active holiday style on 20 meters. QSL to home call.

MOZAMBIQUE, C9. Marco, IK1RAE will be QRV as C91VM from October 5 to 23. Activity will be on 40 to 10 meters using SSB. He plans to be active from some of the offshore islands. QSL direct to home call.

AZORES, CU. Look for OH2BH, OH8NC and OH2UA to be QRV as CU2KG, CU2KH and CU2KI, respectively, from October 5 for one week while they perform maintenance work on contest station CR2X. Activity will be on a variety of bands. QSL to home calls.

SWITZERLAND, HB. Special even station HB9SPACE will be QRV from October 4 to 10 during World Space Week. QSL via HB9ACA.

SOUTH COOK ISLANDS, E5. Bill, N7OU will be QRV as E51NOU from Rarotonga, IOTA OC-013, from October 5 to 30. Activity will be on

80 to 10 meters using only CW. QSL to home call.

LUXEMBOURG, LX. A group of operators will be QRV as LX/PA6Z from October 4 to 10. Activity will be on 160 to 6 meters using CW, SSB and PSK31. QSL via PA9M.

NETHERLANDS, PA. Special event station PD55EA is QRV until October 28 in celebration of the 55th anniversary of the Museum Ellert and Brammert in Schoonoord. Activity is on 40, 20 and 10 meters using SSB and digital modes. QSL direct via PD7BZ.

BONAIRE, CURACAO, PJ2. Fred, PA1FJ is QRV as PJ2/home call from Curacao, IOTA SA-006, until October 7. QSL direct to home call.

CANADA, VE. Special event station VC3COPP is QRV until October 31 in celebration of the 100th anniversary of the Ontario Provincial Police Force. Activity is on the HF bands using CW and SSB. QSL direct via VE3BDB.

SOUTH GEORGIA ISLANDS. Lars, MM0DWF is QRV as VP8DIF from Husvik on South Georgia, IOTA AN-007, until mid November. Activity is on the HF bands using CW, SSB and RTTY in his spare time. QSL via DJ9ZB.

CAMBODIA, XU. Pete, NO2R is QRV as XU7ACY for at least a year. He is active on 40 meters using CW and will soon be active on 160 and 80 meters as well. This includes being entries in both upcoming CQ WW contests. QSL via W2EN.

INDONESIA, YB. Hotang, YC0IEM will be QRV as YC0IEM/8 from Ambon Island, IOTA OC-070, from October 4 to 23. QSL via IZ8CCW.

ZIMBABWE, Z2. Mikhail, RW3AJX is here on work assignment for two to three years. He is licensed as Z23MS and is active on 80 to 10 meters using SSB. He may be active using PSK as well. QSL via UA3DX.

THIS WEEKEND ON THE RADIO. The Oceania DX SSB Contest, TARA PSK Rumble Contest, NCCC Sprint, German Telegraphy Contest, International HELL-Contest, California QSO Party, EU Autumn SSB Sprint, UBA ON CW Contest and the RSGB 21/28 MHz Contest are all scheduled for this weekend. The ARS Spartan CW Sprint is scheduled for October 6. The 432 MHz Fall Sprint is scheduled for October 7. Please see October QST, page 78, and the ARRL and WA7BNM contest web sites for details.

11115. FT5GA and Pirates

Yahoo group: DX-IS (2009)
Date: 2009-10-02 03:23:50 UTC
From: Bud Morin
Topic: 11115 Message: 11115

Well I worked an FT5GA on 30m today but suspect he was a pirate. Pirates remind me of when I first started DXing about 1965 and being suckered by the calls F0NEY AND L0VE; got a big laugh out of it.

Bud, K9ZT

11116. WHO WAS IT?

Yahoo group: DX-IS (2009)
Date: 2009-10-02 09:30:36 UTC
From: Bob
Topic: 11116 Message: 11116

Did anyone catch the Callsign of the station on 7.080
2 October at 0818?

He seemed to have a reasonable pile up.

Bob

11117. Re: FT5GA vs TO7RJ ??

Thoughts appreciated....

Maybe a tad more research?

The guys on Glorioso are military men. They are amateur radio operators, but are on Glorioso as a part of a military team, not a radio dxpedition. They are under the control of military authority, not some dxpedition leader who studies prop charts and antenna locations. When the boss says they shut down for maintenance on the electrical system, they must do so. They were apparently not given permission to bring in generators for their own power source. Their local conditions are apparently very conducive to constant QRN (thunderstorms all over that area), particularly on the lower bands. They had no choice where to set up their antennas and, consequently (unfortunately) their antenna site is not favorable to our part of the world (North America).

As the French refuse to allow anyone access to the island other than military personnel, we can probably consider ourselves quite lucky that anyone is there at all.

Yes, I do realize there's more than one idiot out there, but they're going to have to pay just a bit more attention. Hopefully, that will make them tired faster!

After all, in the world of DX, there's always hope!

From: aburkefl
Topic: 10757 Message: 11119

The poor prop to/from SA may be a lot of the problem. A little over three years ago, I was in Mozambique with a group of ops. We had some reasonably good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

You know, Art, you talk about poor propagation. Well, you guys who are closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I would like for a new mode on 15) and so I went there. Nothing to be heard but I sat and tuned around the spotted frequency until, some 10-12 minutes later, a faint signal was heard. As it increased marginally in strength and although the operator did not give his call, I was fairly certain it was, indeed, FT5GA. As the signal started to get a bit stronger, I started to call. To no avail, I'm afraid, because the signals south and west of me were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were brutal) but it was not until the station (still unidentified) peaked about S-2, that I started to call in earnest. Just as the peaks were S-3 or a tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have worked two pirates. One outta three ain't good :-). But I will soldier on until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got one QSL from Conway on 20 SSB. So I need that for an overall new CW country. I haven't been able to hear them anywhere and they've been a lot a lot easier to find than FT5GA has been because they're a real DXpedition. I think the world saw in the Glorioso announcement what it wanted to see and this operation has been a great disappointment to the people who didn't bother to read the fine print.

HUm,

lets see I am in Southern Mississippi, and I havent worked FT5GA
on anything as of yet. Maybe I too need to be closer to the Equator.

You know, Art, you talk about poor propagation. Well, you guys who are
closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I
would like for a new mode on 15) and so I went there. Nothing to be heard
but I sat and tuned around the spotted frequency until, some 10-12 minutes
later, a faint signal was heard. As it increased marginally in strength
and although the operator did not give his call, I was fairly certain it
was, indeed, FT5GA. As the signal started to get a bit stronger, I started
to call. To no avail, I'm afraid, because the signals south and west of me
were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were
brutal) but it was not until the station (still unidentified) peaked about
S-2, that I started to call in earnest. Just as the peaks were S-3 or a
tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have
worked two pirates. One outta three ain't good :-). But I will soldier on
until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got one QSL from Conway on 20 SSB. So I need that for an overall new CW country. I haven't been able to hear them anywhere and they've been a lot a lot easier to find than FT5GA has been because they're a real DXpedition. I think the world saw in the Glorioso announcement what it wanted to see and this operation has been a great disappointment to the people who didn't bother to read the fine print.

The poor prop to/from SA may be a lot of the problem. A little over three years ago, I was in Mozambique with a group of ops. We had some reasonably good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

11126. RE: [DX-IS] FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-10-02 16:50:12 UTC
From: ARS NI5F
Topic: 10757 Message: 11126

I am confirmed in the 30-meter log on 30/09/2009 at 1231z from Jackson, MS. I was using the ground-mounted vertical and was lucky to hear them during a thirty-five minute window; oddly, the north-south 270-foot longwire didn't hear them at all. I have not been able to copy them well enough to work at any other time.

Hang in there.

Bill, NI5F

Subject: [DX-IS] FT5GA

HUm,

lets see I am in Southern Mississippi,and I havent worked FT5GA

on anything as of yet. Maybe I too need to be closer to the Equator.

:-)

Subject: RE: [DX-IS] Re: FT5GA

You know, Art, you talk about poor propagation. Well, you guys who are closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I would like for a new mode on 15) and so I went there. Nothing to be heard but I sat and tuned around the spotted frequency until, some 10-12 minutes later, a faint signal was heard. As it increased marginally in strength and although the operator did not give his call, I was fairly certain it was, indeed, FT5GA. As the signal started to get a bit stronger, I started to call. To no avail, I'm afraid, because the signals south and west of me were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were brutal) but it was not until the station (still unidentified) peaked about S-2, that I started to call in earnest. Just as the peaks were S-3 or a tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have worked two pirates. One outta three ain't good :-). But I will soldier on until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got one QSL from Conway on 20 SSB. So I need that for an overall new CW country. I haven't been able to hear them anywhere and they've been a lot a lot easier to find than FT5GA has been because they're a real DXpedition. I think the world saw in the Glorioso announcement what it wanted to see and this operation has been a great disappointment to the people who didn't bother to read the fine print.

73

Al, VE1AL

Subject: [DX-IS] Re: FT5GA

The poor prop to/from SA may be a lot of the problem. A little over three years ago, I was in Mozambique with a group of ops. We had some reasonably good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

Art - N4PJ

03 October 2009 A.R.I. DX Bulletin
No 961
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3V - DF1LON, DJ7IK, DJ8NK, DJ9CB and DL9USA will be active as 3V3S from Sousse, Tunisia from 23 November to 2 December, including an entry in the CW WW DX CW Contest. They will operate from the premises of 3V8SS, and they will donate their antennas (verticals and a Spiderbeam) to that Radio Club. QSL via DL9USA. A website is under construction at http://www.3V3S.tk [TNX DJ7IK]
4U1UN - 4U1UN will be active on 19-25 October on all bands and modes with a large team of operators (F4EGD, F5CWU, G3SXW, JK3GAD, K2DO, K2LE, K2QI, KA2D, KA2RTD, LA4OFA, LA5IIA, N2GA, N2UN, N2YBB, NN1N, OH0XX, OH2BH, OH2NB, OH6LI, PY5EG, UA9AB, W2VQ and WQ2N). Antennas and security access to the building are heavily restricted but the team will do their best to make this rare station available to all. Activity will be from 8 a.m. until midnight local time (12.00-04.00 UTC) each day. All-night activity is planned for 23 and 24 October. Some of the operators will form an international team for CQ WW DX SSB Contest participation in the "Two Transmitter" (M2) category. QSL via HB9BOU. LoTW upload will be done after the operation. [TNX OH2BN]
8R - Ed/PU8TEP, Abilio/PV8AZ, Paulo/PV8DX, Ivanildo/PV8IG, Ivan/PY1YB, Anderson/PY2TNT, Alex/PY2WAS and Peter/8R1WD will be active as 8R1PY from Lethem, Guyana from 31 October to 4 November. They plan to operate SSB, CW, RTTY and BPSK on 160-6 metres. QSL via PY2WAS, direct or bureau. [TNX PY2WAS]
CO - Celebrating the VII Conference of the Federacion de Radioaficiona-dos de Cuba, the Camaguey City Radio Club will operate as T47C on 3-4 and 10-11 October. Eight operators will be active on 160-10 metres (plus 2 metres) CW, SSB, PSK31 and RTTY. QSL via operator's instructions. [TNX CO7WT]
CT8 - The Radio Arcala team will be in action from the Azores starting 5 October for one week. Look for Martti, CU2KG (OH2BH); Juha, CU2KH (OH8NC) and Toni, CU2KI (OH2UA) on a variety of bands during a maintenance operation from their contest station CR2X (www.cu2a.com). QSL via home calls. [TNX OH2BH]

DL - Peter, DL3APO/p and Gerd, DL5AWI/p will be active from Hainich National Park on 5-7 October. They will operate CW and SSB on various HF bands. All of the QSOs will be confirmed automatically via the bureau. [TNX DL3APO]
EA8 - Jean, ON5JV and Georgette, ON6AK will be active as EA8/homecall from Tijoco Bajo, Tenerife Island (AF-004) between 20 November and 10 February 2010. Activity will be on 40-10 metres during their evenings. They plan to use 100 watts into a vertical 14AVQ. QSL via home calls, bureau preferred. [TNX ON5JV]
FP - Eric, KV1J and Tom, W8TOM will be active as FP/KV1J and FP/W8TOM from Miquelon Island (NA-032) on 20-27 October. They plan to operate SSB, CW, RTTY and PSK on 160-6 metres, and to participate in the CQ WW DX SSB Contest as FP/KV1J. QSL via home calls, direct or bureau. Their logs will be uploaded to LoTW and eQSL. Further information at http://www.kv1j.com/fp/october09.html
G - Dave, G4IAR and Judith, G4IAQ will be active as G4LAB/p from the Isles of Scilly (EU-011) on 9-19 October. QSL via G4IAR, direct only. [TNX www.rsgbiota.org]
HB9 - Special event station HB9SPACE will be active during the World Space Week (4-10 October) from the Amateur Radio Club at the Swiss Air Force Museum (http://www.hb4fr.ch) in Payerne, Switzerland. QSL via HB4FR (bureau) or HB9ACA (direct). [TNX The Daily DX]
I - Valeriano/IK5ABG, Giovanni/IK5BCM, Beppe/IK5CBE, Giovanni/IK5CRH and Enrico/IK5DFE will be active as IL7X from San Domino Island (EU-050, IIA FG-001) on 5-9 October. They plan to operate on 160-10 metres SSB, CW and digital modes. QSL via IK5BCM. [TNX IK5BCM]
JW - Arne/LA7WCA as JW7WCA, Maurits/LA3XIA as JW3XIA and John/G4ATA as JW/G4ATA will be active from Svalbard on 8-13 October. They plan to operate SSB and RTTY on 80-10 metres. QSL via home calls. More information is available at http://www.g4ata.co.uk [TNX G4ATA]
KH4 - The team for the 9-19 October K4M expedition to Midway Island [425DXN 935] includes 9V1YC, AA4NN, DJ9ZB, I8NHJ, K6TD, K9CT, KH7U, N1DG, N4PN, N4XP, N6HC, N7CQQ, ND2T, W6KK, W6OSP, W8GEX, WA7NB and WB4JTT. Announced frequencies are:
SSB 28475, 24945, 21295, 18145, 14200, 7078, 3799, 50115
CW 28024, 24894, 21024, 18074, 14024, 10104, 7004, 3504, 1826.5, 50115
RTTY 28080, 21080, 18100, 14080, 10140, 7040
An Online QSL Request System (OQRS) will be activated after the DXpedition goes QRT. You will be able to request your QSLs one of three ways: OQRS Direct, OQRS Bureau, direct mail to Midway 2009, Box 333, Bethlehem, Georgia 30620-9989, USA. All of the contacts will be uploaded to LoTW "within 12 months of the last QSO" at the latest (LoTW QSLling policy is detailed at www.midway2009.com).
KL - The Alaska 50th Anniversary of Statehood Special Event will be on the air from 18 UTC on 18 October until 6 UTC on the 19th. There will be fifteen or more stations on from around the state of Alaska all using KL5O on 160-10 metres SSB, CW and RTTY. Operation will be scheduled to facilitate working North American stations,

though all stations worldwide are encouraged to participate. QSL confirmation will be electronically via LOTW and eQSL, and via mail to AC7DX. Further information on the event can be found at http://www.kl5o.com [TNX AC7DX]
OK - Special station OL22ASE (www.qrz.cz/ol22ase) will be active on 1-15 October for the Association of Space Explorers' XXII Planetary Congress to be held in Prague, Czech Republic on 4-10 October. QSL via OK1TIR, direct or bureau. [TNX OK1TIR]
PY0T - Four operators from the Rio DX Group (namely PY1NB, PY1ON, PY1YB and PY1ZV) will be active as ZY0T from Trindade (SA-010) from around 16 UTC on 11 October until around 6 UTC on the 16th (dates may vary depending on the schedule of the Brazilian Navy). They plan to operate SSB and CW with two stations on 160-10 metres. QSL via PY1NB (direct only). Further information can be found at http://riodxgroup.dxwatch.com/trindade-2009 [TNX PY1NB]
SP - Special event station HF35PEA will be active on all bands and modes from 1 October to 31 December to celebrate the 35th anniversary of Radio Club SP1PEA. QSL via SP1NQF, direct or bureau. [TNX SP1NQF]
TK - Look for Tony/IK2SNG, Augusto/IK4RQJ and Sergio/IZ4BBF to be active as TK/homecall from from Calenzana, Corsica (EU-014) on 8-12 October. They will operate SSB, CW, RTTY and PSK31 on 10-40 metres. QSL via home calls, direct or bureau. [TNX IK4RQJ]
VE - Noel, VE2BR and Gregg, VE3ZZ/Gregg will operate Multi-Single in the CQ WW DX SSB Contest with the special call VC2Z from Mercier, Quebec (Zone 5). QSL via VE2BR. [TNX VE3ZZ]
W - Special event station K4L will be active from Hunting Island (NA-110) on 17-18 October to commemorate the 150th anniversary of the lighthouse. QSL via K3LLH. Further information at http://pws.prserv.net/K4L/ [TNX www.rsgbiota.org]
W - Members of the The St. Augustine Amateur Radio Society (N4AUG, www.saarsham.net) will be active from Lacosta Island (NA-069) on 17-18 October. They plan to be QRV on 20, 40 and 80 metres from about 12 UTC on the 17th until about 19 UTC on the 18th. QSL direct to N4AUG (St. Augustine Amateur Radio Society, P.O. Box 860084, Saint Augustine, FL 32086, USA). [TNX www.rsgbiota.org]
YB - YC0IEM expects to be active as YC0IEM/8 from Ambon Island (OC-070) on 4-23 October. QSL via IZ8CCW.
YV - The Radio Club Venezolano will operate as YW8AJ from Monagas State on 9-12 October. QSL via YV5AJ, direct or bureau. Information on the Venezuelan States Award can be found at http://radioclubvenezolano.org/concurso.htm [TNX The Daily DX]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

DXCC NEWS ---> D2QMN's current operation from Angola has been approved for DXCC credit. Anyone who had this operation rejected in a recent DXCC submission can send a message to dxcc@... to be placed on the list to be updated. [TNX NC1L]

FT5GA ---> The on-line log (http://www.clublog.org/charts/?c=FT5GA) now contains 37285 QSOs (latest QSO at 15.20 UTC on 1 October) with 12171 unique callsigns. The team will remain on the island until 8 October. QSL via F5OGL, direct or bureau. As for LoTW, "uploading is not on the agenda to day", the FT5GA team says, "but we never said the log will not be uploaded in the future. We will have a lot of things to do before, for a long long time". [TNX F5NQL]

QSL ZK2V ---> The entire batch of direct ZK2V cards (about 1400 envelopes, confirming 2979 QSOs) was expected to be to the post office on 29 September, "with the exception of about 100-125 cards that require 'special handling'". Bureau cards will be tackled next. [TNX N3SL]

QSL STATISTIC ---> The idea beyond this service (http://adok.dyndns.org) is "to share the information stored in your local logger database with others - so when deciding wheter to send your paper QSL to a station you can take a look how others have received cards from that station". [TNX RX9TX]

QSL VIA W5KDJ ---> Wayne, W5KDJ (3DA0KDJ, 5R8KD, A25KDJ, C91KDJ, SV0WWW, TF2WJN, YN2KDJ) says he does not accept QSL cards via the bureau. He will only confirm direct cards with SASE or SAE + return postage, or via eQSL and LoTW.

SWL CLUSTER ---> DX Watch (http://www.dxwatch.com/), the popular Internet access for amateur radio DX cluster with additional tools, now has a newly born brother cluster devoted to SWL and general listening activity: http://swl.dxwatch.com [TNX PY2ZX]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

VHF-DATABASE ---> The latest issue of the VHF-DATABASE (2.60 - 10/2009) is now available to private users as well as DX-Cluster Sysops on MMMonVHF, the VHF-DX-Portal. Information can be found at http://www.mmmonvhf.de/dbase.php [TNX DL8EBW]

XV#RRC ---> Typhoon Ketsana affected the plans of the Russian team in Vietnam. The XV6RRC operation from Ngu Island (AS-185) was cancelled, but they were able to log 2149 QSOs operating as XV7RRC from Cham Island (AS-162) for 17 hours on 26 September, then the weather deteriorated and forced them to leave the island before it was too late. On 28 September-1 October they made 10543 QSOs as XV3RRC from Tam Island (AS-157). A log search for both activities can be found at http://xv6rrc.com/; QSL via RZ3EC.

+ SILENT KEYS + Recently reported Silent Keys include Mehmed Cosovic (T99A, ex-YU4CA, a doyen of amateur radio in Bosnia), Vladimir I. Kuzichev (UY5IA), John G. Marshall (W0JM) and Travis G. Casanova (W5GED).

QSLs received direct or through managers: 3DA0EL, 3DA0MH, 3DA0MM, 3DA0TB, 3DA0VA, 3G1M (SA-069), 4S7NE, 4X4DK, 4X4WN, 5K0T, 5V7PRF, 7P8MM, 7P8OK, 7P8YI, 7Q7BP, 7Q7HB, 7X4AN, 8Q7DV, 9J2FM, 9L1X, A25/DL7DF, A35ZS, A43DLH, A45XR, A92HB, AH6RQ, B1Z, BA7IO/4 (AS-136), BX0ZR, BX5AA, C21TI, C6AGU, CG200I (NA-128), CQ2I, CU2A, D44AC, D44TXS, DY1C (OC-120), EA9/KH0AM, EA9IB, EA9LS, ES3AX, EU3AR, EX2T, FM1FV, FT5YI, GB0SGB/p, GB5HOD, GB5KIL, GI0KOW, GJ6YB (EU-013), H44MY (OC-162), HA0NAR, HC8N, HR9/WQ7R, HV5PUL, JD1BMH, K5D, K7C, N6PYN/KL7 (NA-239), OJ0B, OJ0J, OY/LA6FJA, P29NI, PR5D (SA-047), PV8ADI, PX6T (SA-080), PX8M (SA-041), S04R, TI2KI, TJ3SL, TL0A, TM2HC, TM5EL (EU-094), TO3R, TO8YY, TY5ZR, UA0AV, UP5G, V31WC, V51YJ, V55X, V63MY (OC-259), V7XX, V85SS, V8AQM, VK0BP, VK9CNC, VK9GMW, VK9LA, VK9NI, VP2ETN, VP8YLH, VR2C, XX9TCC, XY3C, YJ8TZ, ZB2FK, ZC4LI, ZF2DX, ZF2ZB, ZK2V, ZK3AH, ZL7/SP5EAQ, ZX8A (SA-016).

11128. RE: [DX-IS] FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-10-02 16:25:02 UTC
From: Alan Leith
Topic: 10757 Message: 11128

I don't think just anywhere in Europe, Buzz. But I do think that anywhere in south-central Europe would be best. Up north, in Europe, they suffer from poor propagation sometimes. Down south, they seem to hear and work virtually anything that comes on the air, with relative ease. However, you still see complaints on the cluster from southern EU. Can't please nobody!!!

Subject: RE: [DX-IS] Re: FT5GA

You know, Art, you talk about poor propagation. Well, you guys who are closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I would like for a new mode on 15) and so I went there. Nothing to be heard but I sat and tuned around the spotted frequency until, some 10-12 minutes later, a faint signal was heard. As it increased marginally in strength and although the operator did not give his call, I was fairly certain it was, indeed, FT5GA. As the signal started to get a bit stronger, I started to call. To no avail, I'm afraid, because the signals south and west of me were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were brutal) but it was not until the station (still unidentified) peaked about S-2, that I started to call in earnest. Just as the peaks were S-3 or a tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have worked two pirates. One outta three ain't good :-). But I will soldier on until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got one QSL from Conway on 20 SSB. So I need that for an overall new CW country. I haven't been able to hear them anywhere and they've been a lot a lot easier to find than FT5GA has been because they're a real DXpedition. I think the world saw in the Glorioso announcement what it wanted to see and this operation has been a great disappointment to the people who didn't bother to read the fine print.

Subject: [DX-IS] Re: FT5GA

The poor prop to/from SA may be a lot of the problem. A little over three years ago, I was in Mozambique with a group of ops. We had some reasonably good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only

E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

NA was only 15% of Qs last I checked, and it's not because we're not
calling! This operation is by EU for EU. The stats prove it, and the ops
don't seem to care.

You think? Really? I'd probably move to Europe..have you seen the amount of AF stations worked by them (430) in comparison to 19.522 in Europe. Be careful what you wish for, you just might get it!

And who said to move near the equator? Yeah right, I'm just around the corner...SA stns worked 212...(Caroilina Herrera has a conmemorative cologne for that).

I can't explain SA, Rob. I suspect it is similar to NA but in reverse. So you should have similar propagation, again, in the reverse. Being up here in the northern part of the northern hemisphere, we are closer to the magnetic north pole and even though we appear to be closer to Asia, over the north pole, the path from this location is extremely difficult. I can hear a lot more than I can work.

It was I who said move closer to the equator and there's no argument there. Look at the spots from W4 and the eastern parts of W5 and from southern Europe. Good grief, look at what you do hear and work.

I suspect the low numbers for SA are due to two possibilities: poor general propagation and fewer numbers of DXers on the continent. Perhaps 212 is not a bad number after all.

And, as you said, be careful of what you wish for. I can't imagine the local QRM conditions in Europe.

You think? Really? I'd probably move to Europe..have you seen the amount of AF stations worked by them (430) in comparison to 19.522 in Europe. Be careful what you wish for, you just might get it!

And who said to move near the equator? Yeah right, I'm just around the corner...SA stns worked 212...(Caroilina Herrera has a conmemorative cologne for that).

Subject: RE: [DX-IS] Re: FT5GA

You know, Art, you talk about poor propagation. Well, you guys who are
closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I
would like for a new mode on 15) and so I went there. Nothing to be heard
but I sat and tuned around the spotted frequency until, some 10-12 minutes
later, a faint signal was heard. As it increased marginally in strength
and although the operator did not give his call, I was fairly certain it
was, indeed, FT5GA. As the signal started to get a bit stronger, I started
to call. To no avail, I'm afraid, because the signals south and west of me
were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were
brutal) but it was not until the station (still unidentified) peaked about
S-2, that I started to call in earnest. Just as the peaks were S-3 or a
tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have
worked two pirates. One outta three ain't good :-). But I will soldier on
until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got
one QSL from Conway on 20 SSB. So I need that for an overall new CW
country. I haven't been able to hear them anywhere and they've been a lot
a lot easier to find than FT5GA has been because they're a real DXpedition.
I think the world saw in the Glorioso announcement what it wanted to see

and this operation has been a great disappointment to the people who didn't bother to read the fine print.

Subject: [DX-IS] Re: FT5GA

The poor prop to/from SA may be a lot of the problem. A little over three years ago, I was in Mozambique with a group of ops. We had some reasonably good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

11131. FT5GA Log Update

Yahoo group: DX-IS (2009)
Date: 2009-10-02 17:55:46 UTC
From: Nelson Moyer
Topic: 11131 Message: 11131

Well, it looks like the 30 meter pileup at 2300 UTC yesterday was a pirate. That's two 30 meter pirates I've worked, and still no FT5GA in the log on 30 meters. Is there an award for worked all pirates?

Nelson, KU0A

Rob,

How is that ?

I thought the fun part was putting up towers & Antennas
in 90+ degree weather !

:-)

I can't explain SA, Rob. I suspect it is similar to NA but in reverse. So you should have similar propagation, again, in the reverse. Being up here in the northern part of the northern hemisphere, we are closer to the magnetic north pole and even though we appear to be closer to Asia, over the north pole, the path from this location is extremely difficult. I can hear a lot more than I can work.

It was I who said move closer to the equator and there's no argument there. Look at the spots from W4 and the eastern parts of W5 and from southern Europe. Good grief, look at what you do hear and work.

I suspect the low numbers for SA are due to two possibilities: poor general propagation and fewer numbers of DXers on the continent. Perhaps 212 is not a bad number after all.

And, as you said, be careful of what you wish for. I can't imagine the local QRM conditions in Europe.

You think? Really? I'd probably move to Europe..have you seen the amount of AF stations worked by them (430) in comparison to 19.522 in Europe. Be careful what you wish for, you just might get it!

And who said to move near the equator? Yeah right, I'm just around the corner...SA stns worked 212...(Caroilina Herrera has a conmemorative cologne for that).

You know, Art, you talk about poor propagation. Well, you guys who are closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I would like for a new mode on 15) and so I went there. Nothing to be heard but I sat and tuned around the spotted frequency until, some 10-12 minutes later, a faint signal was heard. As it increased marginally in strength and although the operator did not give his call, I was fairly certain it was, indeed, FT5GA. As the signal started to get a bit stronger, I started to call. To no avail, I'm afraid, because the signals south and west of me were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were brutal) but it was not until the station (still unidentified) peaked about S-2, that I started to call in earnest. Just as the peaks were S-3 or a tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have worked two pirates. One outta three ain't good :-). But I will soldier on until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got one QSL from Conway on 20 SSB. So I need that for an overall new CW country. I haven't been able to hear them anywhere and they've been a lot a lot easier to find than FT5GA has been because they're a real DXpedition. I think the world saw in the Glorioso announcement what it wanted to see and this operation has been a great disappointment to the people who didn't bother to read the fine print.

The poor prop to/from SA may be a lot of the problem. A little over three years ago, I was in Mozambique with a group of ops. We had some reasonably good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

The poor prop to/from SA may be a lot of the problem. A little over three
years ago, I was in Mozambique with a group of ops. We had some reasonably

good condx the first week - SFI was in the 80s. On the day of the IARU contest, prop went on holiday. This was during the same time frame when the WRTC from Brazil was going on. We never worked a single one of the ops in that contest! Not even any PY or LU who weren't in the contest. The only E/W prop we had for almost the entire last week was to Australia.

We were situated on a moderately high hill overlooking the lagoon (to the east) and no obstructions in any other direction. Go figure. Sometimes you can plan all you like, but if the prop doesn't come on the trip....

NA was only 15% of Qs last I checked, and it's not because we're not
calling! This operation is by EU for EU. The stats prove it, and the ops
don't seem to care.

Well, it looks like the 30 meter pileup at 2300 UTC yesterday was a pirate.
That's two 30 meter pirates I've worked, and still no FT5GA in the log on 30
meters. Is there an award for worked all pirates?

Antennas never work right unless you put them up when it is below 32 out, and hopefully with some precipitation.

Rob,

How is that ?

I thought the fun part was putting up towers & Antennas
in 90+ degree weather !

:-)

I can't explain SA, Rob. I suspect it is similar to NA but in reverse. So you should have similar propagation, again, in the reverse. Being up here in the northern part of the northern hemisphere, we are closer to the magnetic north pole and even though we appear to be closer to Asia, over the north pole, the path from this location is extremely difficult. I can hear a lot more than I can work.

It was I who said move closer to the equator and there's no argument there. Look at the spots from W4 and the eastern parts of W5 and from southern Europe. Good grief, look at what you do hear and work.

I suspect the low numbers for SA are due to two possibilities: poor general propagation and fewer numbers of DXers on the continent. Perhaps 212 is not a bad number after all.

And, as you said, be careful of what you wish for. I can't imagine the local QRM conditions in Europe.

You think? Really? I'd probably move to Europe..have you seen the amount of AF stations worked by them (430) in comparison to 19.522 in Europe. Be careful what you wish for, you just might get it!

And who said to move near the equator? Yeah right, I'm just around the corner...SA stns worked 212...(Caroilina Herrera has a conmemorative cologne for that).

Subject: RE: [DX-IS] Re: FT5GA

You know, Art, you talk about poor propagation. Well, you guys who are closer to the equator than I really don't know how bad propagation can be.

For instance, this morning I saw a spot that FT5GA was on 15 CW (which I would like for a new mode on 15) and so I went there. Nothing to be heard but I sat and tuned around the spotted frequency until, some 10-12 minutes later, a faint signal was heard. As it increased marginally in strength and although the operator did not give his call, I was fairly certain it was, indeed, FT5GA. As the signal started to get a bit stronger, I started to call. To no avail, I'm afraid, because the signals south and west of me were also getting stronger at the receiving end.

I "think" one VE1 may have gotten through (the QSB and band noise were brutal) but it was not until the station (still unidentified) peaked about S-2, that I started to call in earnest. Just as the peaks were S-3 or a tad more, the station suddenly announced 18150 and was gone.

Another day my shot on 15 was gone.

My only QSO, so far, has been on 20M CW (also a needed mode) and I have worked two pirates. One outta three ain't good :-). But I will soldier on until the last day.

Quite honestly, I am far more interested in 3D20CR because I have only got one QSL from Conway on 20 SSB. So I need that for an overall new CW country. I haven't been able to hear them anywhere and they've been a lot a lot easier to find than FT5GA has been because they're a real DXpedition. I think the world saw in the Glorioso announcement what it wanted to see and this operation has been a great disappointment to the people who didn't bother to read the fine print.

SB PROP @ ARL $ARLP040
ARLP040 Propagation de K7RA

ZCZC AP40
QST de W1AW
Propagation Forecast Bulletin 40 ARLP040
>From Tad Cook, K7RA
Seattle, WA October 2, 2009
To all radio amateurs

SB PROP ARL ARLP040
ARLP040 Propagation de K7RA

With the appearance of two sunspots, the past eleven days had some nice HF propagation. Combined with quiet geomagnetic conditions and month after month of quiet sun, it seems quite a dramatic relief. Sunspot 1026 has faded away, and sunspot 1027, which appeared later than 1026 but actually led it in the sun's rotation, has just rotated out of view, over the sun's western limb. You could see this early Friday morning by viewing the STEREO animation at http://stereo.gsfc.nasa.gov/.

Remember that the 0 degree meridian is facing us, and the two 90 degree longitudinal marks are at the sun's eastern and western horizons. It seems odd, since we are accustomed to viewing an atlas with west on the left and east to the right, but when we say a sunspot is rotating over the western limb, it is moving to the right, from our point of view.

Early Friday morning (evening on the West Coast in North America) you could see that Northern Heliosphere bright spot just beyond the +90 degree mark. There is a bright spot in the Southern Heliosphere where I think sunspot 1026 was, but it doesn't appear as a sunspot to any of the observatories that track them. This can be puzzling, because if I look at a spot that bright via the STEREO animation that appears to the left, beyond the eastern limb past -90 degrees, I might assume that is a sunspot coming our way.

Perhaps someone is expecting a reappearance of either 1026 or 1027, because if we look at the October 1 forecast from the U.S. Air Force and NOAA at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html, it shows an expectation of a rising solar flux above 70 beginning October 17. It looks like a spot isn't expected any time soon, as they have the predicted solar flux for Friday (today) and Saturday, October 2-3 at 70, then down to 69 for October 4-8, 68 on October 9-14, then rising back to 70, then 72 for October 17-28. This

forecast is likely to change, and is updated daily.

The same forecast projects very quiet geomagnetic conditions, with a planetary A index of five off into the indefinite future. Sunspot number on Thursday, October 1 was 11, same as Wednesday, and today's is likely to be zero.

The three-month moving average of sunspot numbers, which now includes data from September, is the same as last month's three month average, which was calculated from sunspot numbers for June through August. It seems that both June and September had identical average sunspot numbers, so for the latest reading, the June data was dropped, the September data added, and the same 3-month average of 4.0 is the result.

The monthly averages of daily sunspot numbers for January through September were 2.81, 2.54, 0.77, 1.27, 3.97, 6.6, 5.07, 0.39 and 6.6.

Our three-month moving average always is labeled with the middle month, so with the September data, we now have the August average, which is for July, August and September.

For October 2008 through August 2009, the moving average is 4.52, 4.39, 3.62, 2.19, 2.02, 1.49, 2.01, 4.23, 5.2, 4 and 4.

Dan Prebenda, K9DP of Richmond, Indiana is back on the air after 10 years QRT, and is frustrated trying to work fairly short skip on 30 and 40 meters CW around noon to 3:00 PM local time (1600-1900z when local time is Eastern Daylight Time, which ends November 1 this year). He is experiencing a lot of fading, and the stations he is trying to work are about 300 to 700 miles away, mostly to the east and south of him.

Dan wonders if 30 meters will get better for this path with higher sunspot counts?

I suggested he test some paths and seasonal variation using W6ELprop, which is free at http://www.qsl.net/w6elprop/. Using either zero or a smoothed sunspot number of 10, it looks like 40 meters is the best band, although 30 meters looks good 700 miles out to the southwest. I used 39.826 degrees north latitude, 84.896 degrees west longitude for Dan's location, based on the address in his FCC licensing record.

Philadelphia is about 500 miles almost directly east of him. At that distance, 30 meters doesn't look good until the smoothed sunspot number gets above 50, which is not where we are in the cycle. Same thing with Atlanta, at about 400 miles, almost due south. But Dallas at about 800 miles and 237 degrees looks a lot better, with strong signals on 30 meters, 1400-2300 UTC (10am to 7pm EDT) and a smoothed sunspot number of 2.

But 40 meters looks great for any of those paths, even with no sunspots, and he can test some assumptions using W6ELprop. He can look at any path on different dates, too, and should see seasonal variations.

Instead of solar flux, use sunspot number with W6ELprop. If the program isn't set for sunspot number in the options, just precede the number by the letter S. The program is designed to give a rough forecast using the predicted smoothed sunspot number for the month. It was 9 for September, 10 for October. The most recent prediction is in PRF1774 at http://www.swpc.noaa.gov/weekly/ on page 8. There may be a new prediction next week in PRF1779. In the past couple of weeks, when we have actually had sunspots, I would average the three latest known sunspot numbers (a day's number is not available until the evening) from http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt.

The smoothed number changes for any month because it is based on actual sunspot numbers for the previous six months, and predicted sunspot numbers for about 6 months into the future. So the only smoothed sunspot numbers that we know for sure are at least six months old because they are all based on real sunspot data, with nothing predicted.

To use current numbers, on September 26 during the day the three latest known sunspot numbers were 31, 32 and 25, which averages to about 29.3. You can get the latest mid-latitude K index from WWV off the air, or at http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt or by calling 303-497-3235. It is updated every three hours.

Meyersdale, PA is about 300 miles due east of Dan, and for that short skip, 80 meters is the only realistic option, except for a dead period, 0230-1100 UTC. 40 meters is possible from 1600-1800 UTC, but the odds are against it on most days (this time of year). It looks better in the spring, 1600-2200 UTC, and a LOT better when we get some sunspots.

Von Weddige, W5COW of Hope, New Mexico (how did I guess his was a vanity callsign?) reported a surprising six meter opening on September 22. He made 19 contacts on SSB in 31 minutes, from 0022-0053z. Von is in gridsquare DM72, and he worked stations in EM53, EM54, EM57, EM63, EM68, EM73, EM75, EM79, EM81, EM86, EM89, EN50, EN70, and EN71.

In last week's bulletin, ARLP039, Ken Tata, K1KT talked about interesting conditions on two meters from his location in Rhode Island during a weeknight VHF sprint. Leo Halverson, WA2AMW commented in response, "These conditions aren't all that rare at this time of year, although I usually encountered them later at night. They often go undetected because most of these openings happen during work-nights, when most people are asleep. I worked the second shift for many years and encountered these conditions during the homeward-bound commute".

"I found that they were most common, of greater duration, and with longer-distance propagation during the first two weeks of October. I also noticed that they were much more likely to occur on nights when a (mostly low) ground-fog had risen and was very wide-spread and thick, but very clear above. It also seemed that the sky was very clear and with good visibility of stars and distant high-altitude aircraft. The stars even seemed to have an extra twinkle to them".

"One night we had a round-table going on one of the shore town Repeaters, with stations from Nova Scotia to Kitty Hawk, NC. One guy was on a Hand-held in his garage in Virginia Beach. I could copy all the stations on the input frequency on my mobile dual-band. The opening started fading out about 0330 hrs EST".

"I never did find out why the ground-fog was so indicative of these openings".

"I'm glad to be working the day-shift, but I sure do miss those Autumn midnight commutes".

Ken responded, "I don't have decades-long experience with fall tropo conditions, but Leo described the conditions to a 'T.' It was virtually dead calm. I also noticed the sky overhead was unusually clear. The stars did not twinkle and seemed a bit brighter than usual, perhaps because convection currents were minimal. We do get occasional ground fog here at this time of year but I didn't see any. As it cooled on my hilltop that evening the formerly clear conditions gave way to a soaking fog at about 9:30. I was about 8 miles north of the beach and two miles west of Narragansett Bay".

"I think ground fog is not just an indicator. It's a medium with higher mass than the clear air above. It slows the lower part of the wavefront relative to the clear air above, tending to bend the wave along the surface of the earth. Leo's observation of a '...(mostly low) ground-fog had risen...' seems right on".

"As far as being not all that rare, well, I'll pay closer attention from now on. It was still a fun contest. And while I have experienced more extensive tropo propagation than that, I don't think I've ever heard so much widespread activity on two".

Walt commented, "I vaguely remember someone telling me (years ago) that he thought the ground-fog could be (but not always) an indication of a temperature inversion or some other atmospheric anomaly that created some kind of ducting which quite often ran parallel to the shore line. Thinking back, I did notice during those events that the propagation was no where near as long-distance east-west as it was north-south. I wonder if that extra twinkle I thought I noticed in the stars was also there because of some atmospheric thing going on?"

Tim Hickman, N3JON confirmed that his long-path contact with VK4MA, mentioned in last week's bulletin, was in fact on 20 meters.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for September 24 through 30 were 32, 25, 14, 11, 11, 14, and 11 with a mean of 16.9. 10.7 cm flux was 74.6, 72.4, 71.8, 72.3, 73.2, 72.3, and 72 with a mean of 72.7. Estimated planetary A indices were 1, 2, 3, 8, 8, 2 and 4 with a mean of 4. Estimated mid-latitude A indices were 1, 1, 3, 8, 6, 0 and 5 with a mean of 3.4.

Well, it looks like the 30 meter pileup at 2300 UTC yesterday was a pirate. That's two 30 meter pirates I've worked, and still no FT5GA in the log on 30 meters. Is there an award for worked all pirates?

I've never worked P5RS7. So far I haven't worked FT5GA at all either.

I did work AH0M/4L once. I got the card too. ARRL wouldn't give me credit for it.

Can anyone explain to me the source of the tremendous audio distortion I heard on the team's signals yesterday around 1800Z on 15M SSB? From my location I have to shoot almost directly over the top of the northern magnetic pole. Was this just the auroral flutter from Hell? They were almost totally unintelligible from NA-West.

"The fine print"? You mean where it said this team of operators
would spend five years of their lives putting together the best
operation possible so *WE* could sit in our shacks and have a chance
of working Glorioso? Where it said that propagation and conditions
would be difficult, but that this was the best they could do for
US? Where it said that even though they couldn't put Glorioso in
their own logs, they would do everything they could so we could put
it in *OURS*?

And in return for all of this, they are reviled on the air and
written off here as a "disappointment." If you want to talk about
disappointments, talk about ZS8T, but don't talk about these
soldier/operators who are working their butts off to give us a shot
at a rare country.

Dick,

I've worked them on 15, 17, and 20 meter phone and 17 meter CW for two new band countries from Iowa, and I'm not particularly impressed with the operation because so many North American hams are still looking for the first Q. They CAN put a decent signal into North America when they CHOOSE to do so. Unfortunately, they haven't CHOOSEN to do so lately. The solar conditions have improved since the operation began, yet the Q rate to NA has declined. Go figure!

Nelson, KU0A

Heard them at times on 20 this afternoon. S5 noise made it tough. Looked at the national weather service radar, and looks like the Great Lakes and NE had some weather... 17M would have been better for me around 2200 - 0000Z. But even on 20 they just move somewhere else or QRT just before the higher SNR happens out here. CW would be optimal, the narrow filters help with the noise. I'll keep plugging as my schedule allows, took today off just like last Friday, but no joy. That's the way it goes!

Same thing yesterday. I spent two hours calling and calling and
calling before finally getting them on 17M phone.

Today I spent two hours calling and calling and calling before
finally getting them on 20M phone.

Both days reception was so bad I could at best almost make out ever other word.

If it was easy, etc., etc.

I am just glad they are there.

I worked stations signing FT5GA on 15 and 20 CW and 20 SSB this afternoon. The station on 20 CW showed up about half an hour after the 15m station went QRT. Both CW signals had the same identical sound and a slight chirp. Pirate or not, I am sure the same rig was being used to make the QSO's on these two bands.

The station on 20 CW said at about 2120Z that they were going to be QRT till 0600Z. I wouldn't think a pirate would announce that but you never know. Packet spots abounded, with many people saying the beam heading was correct and no one saying it wasn't. A lot of people still felt they were pirates. I guess I'll find out tomorrow if any of them were pirates. I feel that the chances are pretty good that the SSB station on 14260 was for real. It was the same voice that showed up a little earlier on 14215 signing FT5GA.

Keep trying! They are QRV till the 8th.

11156. Condx on the improve

Yahoo group: DX-IS (2009)
Date: 2009-10-05 04:37:04 UTC
From: Lance Martin
Topic: 11156 Message: 11156

Hi Guys,

I think conditions are now on the move upwards. 20m was open last night (pretty well worldwide from VK) even to the Pacific! Which I haven't seen for quite some time (though we are approaching summer down under).

How's everyone doing with the Conway operation? I think the German guys are doing a pretty good job. It has been a bit frustrating when they are ardent at 'EU Only' but I guess it's a very rare one for EU and the daily band openings are short.

I keep missing the Austral guys on SSB and RTTY but I guess they are mainly a CW operation...

So with Glorioso, Austral, Mayotte and Conway all on air at the same time (and Midway to come) wow, we have to smile don't we?

Good luck to all,

73, Lance - VK6DU

I worked the pirate on 30M the other night...
I've dropped by the house during lunch and they are in the noise here on
both 20 and 15. I am going to hang around a little while and see if they
come up. Based on propagation forecasts, 15 is marginal at best from here
today. It looks like around 2100Z on 17 is the better bet. I can't do the
2100Z today but will be prowling during the evening.

On he other hand, the 3D20CR has been a snap, but I had an early con call
(6:30AM MDT) and really need to hit the 80 CW opening to them.

11158. 3D20GA Propagation

Yahoo group: DX-IS (2009)
Date: 2009-10-05 21:04:55 UTC
From: Robert
Topic: 11158 Message: 11158

Beginning to wonder if I am missing a couple of elements on my antenna.

Propogation forecasts give Conway a high to fair chance in the late afternoon on 20/17/15. Boy just a whisper on 17 and then fade. Zip on 15. And zip on 20.

80/40/30 are just as expected with great reception if you like the middle on the night.

Has NE USA (especially MA) erected some type of propagation block?

Bob,
I'm sure it's a matter of luck and time.
Time to listen to the prop'd frequencies for the whole duration of the
prop. day after day.
Lucky if they hear you in the pile.
I've only heard FT5GA once (30M) and worked him
I've only heard 3D20CR once (15M ssb) and worked him.
I almost didn't try 15 ssb because he was barely readable here in GA.
15 mins after the qso he was very readable for another half hour and
then gone.

Both with 200w and a 80m doublet up 60' on one end and 40' on the other end.
I hope you have the time to spend and the luck to be heard Bob.

3D2/C, CONWAY REEF (Update). The 3D20CR is now active until October 10th. As of Saturday, October 3rd, the team has made some 12k QSOs. Most of the activity has been on 160/80/40/20/17 meters using CW, SSB and PSK. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are most likely to be sent out in January 2010). For more details and possible

updates, see their Web page at: http://www.conwayreef2009.de
Also watch QRZ.com for updates at: http://www.qrz.com/db/3d20cr

3V, TUNISIA. A German team will operate from the "Radio Club Station of Tunisian Scouts" (3V8SS) in Sousse, using a special callsign 3V3S between November 23rd and December 2nd. Operators mentioned are: Andy/DJ7IK, Jan/DJ8NK, Guenter/DJ9CB, Andreas/DL9USA and Lars/DF1LON. The team will set up, and use a spiderbeam and verticals antennas. All antennas will be donated to the 3V8SS station. Look for them to also participate in the CQWW DX CW Contest (November 28-29th) as a Multi-Single/Low-Power entry. QSL via DL9USA. A Web page will be active soon at: http://www.3V3S.tk

4U1UN ACTIVITY WEEK (October 19-25th). A press release by Jarmo, OH2BN, states (edited): "4U1UN - United Nations Headquarters, New York - This DXCC entity will be active from October 19-25th, on all bands, all modes, with a team of well-known DX and contest operators: OH2BH, OH0XX, OH2NB, OH6LI, G3SXW, F5CWU, F4EGD, PY5EG, JK3GAD, UA9AB, LA5IIA LA4OFA, NN1N, K2QI, KA2RTD, K2LE, N2UN, N2GA, K2DO, N2YBB, KA2D, WQ2N and W2VQ. Antennas and security access to the building are heavily restricted but the team will do their best to make this rare station available to all.
Activity will be from 8AM until midnight local time (1200-0400 UTC) each day. All-night activity is planned for Friday the 23rd and Saturday the 24th of October. Some of the operators will form an international team for CQ World-Wide SSB Contest participation in the 'Two Transmitter' (M2) category. QSL via HB9BOU. LoTW upload will be done after the operation.
It is highly appreciated if you are able to distribute through your publications. 73 es tnx de Johnny, NQ2G / LA5IIA."

ADDED NOTE: Look for 4U64UN to be active until mid-November. Activity is to celebrate the 64th annual UN General Assembly. Activity is expected to be on all band and modes. QSL via HB9BOU or LoTW. Please note that the logs will be uploaded to LoTW once this event is over. QSL cards are expected to be mailed out sometime in December 2009.

8P, BARBADOS. Brian, ND3F, will be active as 8P9SS between November 22nd and December 2nd. Activity will probably be on all bands, but he will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or direct to ND3F.

9H, MALTA. Andreas, DL9USA, will be active from Comino Island (EU-023) between October 15-22nd. Bands and modes of activity were not provided. QSL via his home callsign.

A2, BOTSWANA. Mike, K9NW, will be active as A25NW between November 23rd and December 1st. Activity will include the CQWW DX CW Contest (November 28-29th). QSL via his home callsign (QRZ.com).

A5, BHUTAN. Just a reminder that Yasuo, JA1FJJ, will be active as A52FJJ between October 8-20th. Activity will be on 80-10 meters using SSB, RTTY and PSK31. He plans to use 500 watts into a G5RV antenna. QSL via his

home callsign, direct or by the Bureau.

AH6, HAWAII. Once again the members of the "Coconut Wireless Contest Club" will be active as AH6XX in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. Operators mentioned are: Rich/K2WR, Tetsuo/AH7C and Kan/JA1BK (KH6BK). QSL via LoTW, or direct to K2WR.

AM3, SPAIN. Members of the AM3SSB Contest Team will be active during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via EA3JW. Operators mentioned are: Eugeni/EA3QP, Marcel/EA3IN, Jaime/EA3JW, Joan/EA3GEG, Martin/EC3ACS, Albert/YV3AZC and Jose/EA5DFV.

CR2, AZORES. Toni, OH2UA, will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the Web page at: http://www.cu2a.com

CU2, AZORES ISLANDS. A press release by Martti, OH2BH, states (edited): "You may catch the Radio Arcala team in action from the Azores starting Monday, October 5th, for one week. Look for Martti/OH2BH (CU2KG), Juha/ OH8NC (CU2KH) and Toni/OH2UA (CU2KI) on a variety of bands during a maintenance operation from their contest station CR2X <http://www.cu2a.com>. QSLs CBA via home calls."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
5N0OCH - Nigeria; Current Operation (Logs in LoTW)
5N0EME - Nigeria; 2009 Operation
D2QMN - Angola; Current operation
Anyone who had this operation rejected in a recent DXCC submission can send a message to dxcc@... to be placed on the list to be updated.

EA8, CANARY ISLANDS. A German team of operators will activate the URE Las Palmas section radio club station EA8URL during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via address on QRZ.com. Operators mentioned are: Hans-Juergen/DB7QJ, Tobias/DH1TW, Heijo/DJ1OJ, Simon/DJ4MZ, Hajo/DJ9MH, Stefan/DJ9NMH, Manfred/DK2OY, Matthias/DK4YJ, Ulf/DK5TX, Christoph/DK9TN, Renate/DL2MY, Ron/DL3BPC, Holger/DL5KUT and Bernhard/DL6RAI. For more info on EA8URL, visit their Web page at: http://www.ea8url.com

FT/G, GLORIOSO ISLAND (Update). The FT5GA team continues to be on the air and is trying to satisfy the international Ham radio community. As of October 4th, they have made just under 43k QSOs with 13.4k unique callsigns (20256/CW, 18342/SSB and 4106/RTTY). This will be the last week to work them. The Web page is now reporting that the team will be active until October 8th. They are also planning to pay more attention to 160 and 80 meters CW to the USA, even if these bands are very very noisy. For updates, visit the FT5GA Web page at: http://glorieuses2008.free.fr QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA

ADDED NOTE (FT5GA Pirates): Carl, N4AA, editor of "QRZ DX, sent out the following press release October 1st: "Hello DXers:
This is a SPECIAL BULLETIN and the following will reveal why.
I have been contacted by a person (who I will NOT name) who has the capability to pin point (very accurately) the source of an on the air signal. What I am saying is this person has the professional equipment and the expertise to monitor a signal on the ham bands and determine to a very narrow area where that signal is coming from.
Apparently there was a pirate on 10114 last night signing FT5GA. That signal was NOT coming from Glorioso, it was coming from QUEBEC in CANADA, NNE of Montreal.
On two other days pirate signals were monitored signing FT5GA, one was coming from LATVIA and the other from the SOUTH COAST OF SICILY.
These pirates should be relatively easy for 'local' DXers to find. They need to be specifically identified and pressure brought to bear on them to cease their deliberate and illegal activities.
The 'source' that I mentioned above will continue to provide periodic reports like this, and I will continue to publish the locations of these irresponsible persons. I ask for those within the areas identified pay particular attention and use whatever means are available to them to put a stop to these activities.
Your cooperation with the identification of these pirates will be appreciated by all of us."

FY, FRENCH GUIANA. Operators Marc/F1HAR, Herve/F5HRY, Gerard/F6FGZ, Laurent/F6FVY, Sebastien/F8CMF and Didier/FY5FY will be active as FY5KE during the CQ World Wide DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via FY5KE, by the Bureau or direct.

G6, ENGLAND. Operators Paul/G6PZ, Mark/M0DXR, Simon/M0CLW, Peter/M3PHP and Simon/2E0CVN will be active as G6PZ during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via G6PZ, by the Bureau or direct. Visit the G6PZ contest station Web site at: http://www.g6pz.com

GJ/MJ, JERSEY (EU-013). Rich, K2WR, will once again be active as MJ0AWR before the CQWW DX CW Contest (November 28-29th). For activity during the contest, look for him to use the callsign GJ2A and be a Single-Op/All-Band entry. QSL GJ2A via K2WR or GJ3DVC. QSL MJ0AWR via K2WR.

II1, ITALY (Special Event/WAP Station). Look for special event station II1CAM (WAP-177) to be on the air until October 15th. Activity is to celebrate the 100th anniversary of the airport at Cameri, logistic and technologic pole of the Italian Air Force (see the following Web page: http://www.aeronautica.difesa.it/SitoAM/Default.asp?idsez=3D2956&idente=3D=412).
The WAP (Worldwide Antarctic Program) has always worked close to the Italian Air Force (IAF) which devotes its personnel every year to the Antarctic Missions. The WAP is joining in on the celebration of the Cameri AFB and a special thanks goes to A.R.I. Sezione di Gallarate (IQ2GM) for this brand new II1CAM (WAP-177) callsign on the air. QSL via IW2MNO. More info and WAP news can be found on the WAP Web site at: http://www.waponline.it

IOTA NEWS.....
EU-011. Operators Dave/G4IAR and Judith/G4IAQ will be active as G4LAB/p
from the Isles of Scilly between October 9-19th. Activity will
be on the HF bands, on or near the usual island and IOTA
frequencies. QSL via G4IAR, direct only (QRZ.com).

OC-070. (Postponed) Hotang, YC0IEM, will be active as YC0IEM/8 from
Ambon Island between October 12-30th (not October 4-12th as
first announced). Bands and modes of activity were not provided.
QSL via IZ8CCW.

OC-203. (RARE IOTA). Operators Paul/ZL4PW and Ray/VK4HDX plan to
activate Stewart Island between March 19-30th, 2010. Last
activation was in 2007 for 48 hours, and before that in 2004.
Previous operations were generally CW. These operators plan to
be active on all modes on 160-15 meters. They may also partici-
pate in CQ WPX SSB Contest too. Paul and Ray have purchased
the majority of equipment for this operation, as well as
covering travel and food costs to Stewart Island. They are
currently looking for donations/funds to assist in the purchase
of a couple of items missing from their list. They still need:
* Antenna phasing device for 2 element phased arrays for 30/40m
* A solid-state linear amplifier
If you feel you can help, please contact Paul at:
zl4pw@...
A Web site is currently under construction for this DXpedition.
Stay tuned for more info.

J45, DODECANESE. Martin, ON4PO, will be active as J45PO between October
21-29th. Operations will be from the SX5P contest station on Rhodes
Islands, so look for activity before and after the CQWW DX SSB Contest
(October 24-25th), especialy on 40 meters. During the contest, Martin
will be the 40m operator. QSL via J45PO via ON4PO.

KG4, GUANTANAMO BAY. Keith, KJ5YU, is currently in GITMO and will be
there until February 2010. He is expected to sign KG4YU. No QSNs have
been reported yet nor what bands or modes he will be using. QSL via KJ5YU.

KH4, MIDWAY ISLANDS (OC-030). Just a reminder that a multi-national team
of 18 operators will activate Midway Island (OC-030) between October
9-19th. The team will sign K4M and will operate from Sand Island (Reference
numbers: USI OI-011S and Grid AL18). The U.S. Fish & Wildlife Service has
authorized this amateur operation from this rare U.S. entity for only a
10 day period -- the first radio activity in almost 10 years. Midway Island
ranks number 24 world-wide and number 13 in Europe on the DX Magazine□s
□Most Wanted List□. The updated team member list consists of operators:
Joe/AA4NN, Franz/DJ9ZB, Max/I8NHJ, Kevin/K6TD, Kimo/KH7U, Craig/K9CT,
Don/N1DG, Tom/ND2T, Paul/N4PN, Tom/N4XP, Arnold/N6HC, John/N7CQQ, Dave/
WB4JTT, Charlie/W6KK, Bruce/W6OSP, Art/WA7NB, Joe/W8GEX and James/9V1YC.
In addition to the on the air team members, K4M is ably assisted by the
following off island support team: Don/AA1V (Web support/online logs),
Markus/DL9RCF (European Fund Raising), Dan/W5DNT (Logistics), Paul/W6XA

(Radio Setup and Testing) and Margarett(XYL AA4NN - Finance), Janet/W8CAA (Fundraising) and Vrata/OK1KT (QSL Card Procurement). Activity will be on 160-6 meters with 5 to 6 stations. Suggested frequencies are:
CW - 1826.5, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 3799, 7078, 14200, 18145, 21295, 24945 and 28475 kHz
RTTY - 7040, 10140, 14080, 18100, 21080 and 28080 kHz
6m - 50115/CW and 50118/SSB
For more details, updates, online log, frequencies and bios, go to:
http://www.midway2009.com
QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA 30620-9989 USA) or LoTW.

KH6BZF PROPAGATION FORECAST/REPORT (For October 5-11th)....
Oct 5 AN SOLAR REFERENCE
Oct 6 AN ---------------
Oct 7 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 8 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 9 AN LN - Low Normal
Oct 10 AN
Oct 11 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
ADDED NOTES BY LEE: Lee states, "It should be noted that some of the of the best DX'ing may be expected between October 17-28th. Always check the low bands....."

KH8, AMERICAN SAMOA (Ops are safe!). Lee, KH6BZF, informs OPDX this past week that Larry, AH8LG, "American Samoa Amateur Radio Association" (ASARA) President, his XYL Uti/KH8FO and family are safe and sound after the tsunami hit KH8-land. He is currently on P/V solar power as the island power is spotty at best. Larry's shop in Pago Pago harbor did sustain some damage. KH8AA is reportedly also safe.

LZ44, BULGARIA (WFF Op!). Members of the Balkan Contest Club (LZ1KZA) will organize a "World Flora Fauna" (WFF) expedition from Biosphere Reserve "Srebarna" (LZFF-016, WW. Loc. KN34MC) between October 9-11th. Their callsign will be LZ44WFF, and activity will be on all HF bands using CW, SSB and the Digital modes. QSL via the Bureau to LZ1KZA.

OL7, CZECH REPUBLIC. Members of the Czech HF Contest Team (OL7R) will be active using a special callsign, OK0K, in the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry in Zone 15. QSL via OK1WMV, direct is preferred.

PA9, NETHERLANDS. Marcel, PA9M, will be active from PA6Z superstation during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (80m) entry. QSL via PA9M. Visit the PA6Z superstation Web page at: http://www.pa6z.nl/index.html

PJ4, NETHERLANDS ANTILLES. Operators John/K4BAI and Don/W4OC will be active as PJ4/homecall from K2NG/PJ4G rental QTH on Bonaire (IOTA SA-006, WLOTA L1279) between November 24th and December 1st. Also look for them to be active as PJ4A during the CQ World Wide DX CW Contest (November 28-29th) as a Multi-Op entry. QSL all callsigns via K4BAI. E-mail requests for bureau cards will be accepted.

QSL INFO AND NEWS.....
4W6AL UPDATE. Toze, CT1GFK, reports that the 4W6AL statistics are now available now at: http://algarvedx.com
QSL cards will be printed during October. Please be patient!

NO BUREAU QSLS! DXer and QSL Manager Wayne, W5KDJ, reports that "I do not accept QSL cards via the Bureau. I will only confirm contacts via: direct QSL with SASE or SAE+(IRC or 1 USD), or using eQSL or LoTW." Wayne is the QSL Manager for: 3DA0KDJ, 5R8KD, A25KDJ, C91KDJ, SV0WWW, TF2WJN and YN2KDJ.

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Vlad is still sending them out.

QSL UPDATE. Bill Horner, VK4FW, QSL Manager for many stations, reports: "I have returned home from my family holiday. In the last 4 days I have completed some 5000 QSL cards (NONE FOR 4W6FR)and have just about caught up with it all. On Monday (October 5th), there will be a major deposit made at the post office. The 4W6FR cards will not begin till probably xmas time as we have yet to print a card, and no logs are available till the op returns from 4W. Regards to all."

ZK2V QSL STATUS. QSL Manager Steve, N3SL, reports, "With the exception of about 100-125 cards that require 'special handling', the entire batch of DIRECT ZK2V cards should be to the post office on Tuesday (September 29th). That will be just shy of 1400 envelopes, confirming 2979 QSOs. Bureau cards will be tackled next."

QSLS VIA LOTW: K5D

QSLS RECEIVED VIA MAIL: 3DA0EL, 3DA0MH, 3DA0MM, 3DA0TB, 3DA0VA, 7P8YI, 7X4AN, C21TI, EEA9/KH0AM, K5D, KL1V, PX6T, S92LX, TC098A, TI2KI, TO8YY, TT8FC, V7XX, VK9GMW and ZK2V

QSLS RECEIVED VIA THE BUREAU: None reported this week!

RARE SPECIAL EVENT STATION. Members of the Kristianstad Radio Amateurs Awards Group (SK7BQ) in Kristianstad (A city in former "Eastern Denmark", Sweden since 1658) inform that the most wanted station for the "Roskilde 1658 Award", SK1658DK, from Lund in the former Danish Province of Scania in southernmost Sweden will be active during the first weekends of October, November and December. There are a couple of hundred stations missing this station for the award. To qualify for this award, four out of seven callsigns in Sweden and Denmark with 1658 in their callsign have to be worked. On February 26th, special rules were applied to the award. For details, visit the award Web site at:

http://www.sk7bq.com/roskilde (entirely in English)
Look for the other special callsigns (SB1658OZ, SH1658DK, SH1658OZ and OZ1658ROS) to be active during the rest of the year. Look at the "Activity Calendar" in the menu on the above Web site which will be updated regularly until the end of the year. They report, "Unfortunately condx have been miserable from Sweden and Denmark to countries outside Europe but a few stations outside Europe have qualified for the award. The stations will be QRV on 20m and higher bands if they are open."

T6, AFGHANISTAN. Pascal, F5PTM, is now active from Afghanistan as T6YA until sometime in December. Activity over the past weekend was on 40/30/20/17 meters CW. He is reportedly using a TS-850 into a G5RV antenna. QSL via F5OGL: Didier Senmartin, Box 7, 53320 Loiron, France.

TF, ICELAND (On the Birds!). Tom, N2YTF, is currently operating as TF/N2YTF from Iceland. According to his QRZ.com page: "Iceland! I will be operating the FM satellites and HF (where time allows) from Iceland until Oct. 5th. Expect me to be on the birds QRP portable, sometimes with an Arrow Antenna for any passes between 1000 and 0000 UTC. Please help get the word out about my satellite operations." Check his QRZ page for more information.

TO5, MARTINIQUE. Saty, JE1JKL, will be active as FM/JE1JKL/p from FM5BH's QTH between November 25-27th. Activity will also include the CQWW DX CW Contest, signing as TO5T, and as a Single-Op/All-Band/High-Power entry. QSL via JE1JKL.

TWO NEW COUNTRIES? It was reported this past week that St. Maarten (PJ7) and Curacao (PJ2) will become separate countries within the Dutch Kingdom on October 10, 2010, and this date is irrevocable. HOWEVER, the two new countries are subjected to meet certain conditions before that date. If the two countries can meet these conditions, the the Netherlands Antilles will officially cease to exist.

TX5, AUSTRAL AND MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB are now active as TX5SPA from Tubuai Island (OC-152) in the Austral Island group until October 12th. As this was being typed, the team has made about 9k QSOs. Remember, their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Keiichiro/JA7GYP will be active from Pohnpei (OC-010) between October 25-31st. Activity will be focused on the lower bands. QSL via their home callsigns. They will also be in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry; possible part time participation. QSL via LoTW.

VK9X, CHRISTMAS ISLAND (Update/OC-002). Operators Harry/DM5TI, Rene/DL2JRM, Tom/DL2RMC and Sid/DM2AYO will be active from here between November 21st

and December 5th. The team plans to have two stations active 24/7 on 160-10 meters on all modes. They will use K3 radios with 600 watts+ amps. Activity will be focused on the lower bands, mostly on CW. The callsign VK9XX will be used during the DXpedition while VK9XW is used during the CQWW DX CW Contest (November 28-29th). QSL via Dl1RTL, by the Bureau or direct. For complete details, visit the VK9XX Web site at:
http://www.dl2rmc.com/tom/VK9X2009

VP5, TURKS AND CAICOS ISLANDS. Operators Frank/WA2VYA, Tony/W2WAS, John/W2GD and John/N2VW will be active as VP5T during the CQWW DX SSB Contest (October 24-25th) as a Multi/Multi/Dxpedition entry. QSL VP5T via LoTW, or via N2VW (by the Bureau or direct). Their activity will be from Providenciales (NA-002). Look for CW and operations on the WARC bands and 60 meters before and after the contest. Operators will sign using VP5/homecall. QSL to their home callsigns. No eQSLS. SWL QSLs are OK.

VP9, BERMUDA (NA-005). Ted, W3TB, will once again be active during the CQ WW DX SSB Contest (October 24-25th), but this time signing as W3TB/VP9 (or possibly VP9I again) and will be a Single-Op/All-Band entry. Also, look for operations before and after the contest. QSL via N1HRA.

XR6, CHILE. Members of the Radio Club Temuco (CE6TC) will be active as XR6T from the QTH of Gaston, CE6DBI, for the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. Operators mentioned are: Alex/CE6SAX, Alex/ CE6DFY, Carlos/CE3AQI, Carlos/CE6CP, Marco/CE6VMO and Ramiro/CE6VMR. QSL via CE3FED, by the Bureau or direct to: Radio Club Temuco, P.O. Box 1234, Temuco, Chile.

YN, NICARAGUA. Eric, K9GY, will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. He will be there between November 25-30th. Outside of the contest, look for CW activity on 30/17/12 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

YW8, VENEZUELA. The members of the Radio Club Venezolano continue to activate all the states across Venezuela. Look for activity from the Monagas State as YW8AJ between October 9-12th. They will try to activate all bands and modes including some 2m. Operation is valid for the DEV award (Venezuelan States Award) and can be viewed at:
http://www.radioclubvenezolano.org/concurso.htm
QSL via YV5AJ, direct or by the Bureau.

ZS9, SOUTH AFRICA. Members of the Bloemfontein Defence Amateur Radio Club members will be active as ZS9X from Bloemfontein during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. Operators mentioned are: Bernie/ZS4TX, Berney/ZS4U, John/ZS4S, Ronnie/ZS4RY, Jan/ZS4JAN and Denis/ZS4BS. QSL only via K3IRV. Read the interesting write-up at:
http://www.qrz.com/db/ZS9X

ZY0T, TRINDADE AND MARTIM VAZ ISLANDS (Update/Delay). Four members of the Rio DX Group will activate Trindade Island (PY0T/SA-010) as ZY0T now scheduled for October 17-20th (not 11-16th as first announced, due to

the Brazilian Navy schedules - and these days can be shifted 1 day either way). QSL via PY1NB DIRECT ONLY. See OPDX.927 for more details or visit their Web page at: http://riodxgroup.dxwatch.com/trindade-2009

Subject: [DX-IS] 3D20GA Propagation

To answer your question: "Blame the Bermuda Triangle! "

It's as good an explanation as anything else.

PS: I have 3D2 [20 & 15] from a previous dxpedition when we had decent SSNs.

Thanks all.... at least I don't feel all alone. Its just that Jan and the crew down there are really good so I can't fault them. Guess I'll have to go with conspiracy & Bermuda triangle!

Did grab them on 40ssb at 3am so its not a matter of working them it just seems like 20/17/15 drop dead around the western part of the "east"

11166. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-05 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11166

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 05 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 278 Issued at 2200Z on 05 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 04/2100Z
to 05/2100Z: Solar activity was very low.
IB. Solar Activity Forecast: Solar activity is expected to remain
at very low levels for the next three days (6-8 October).

This morning I was able to work then on 80m. Fantastic operator on 80m this morning

Propagation was extremely good allowing me to make my contact at 1051utc some 7 mins before my SR.

I have also worked them on 17/40

efficient operation

Thanks all.... at least I don't feel all alone. Its just that Jan and the crew down there are really good so I can't fault them. Guess I'll have to go with conspiracy & Bermuda triangle!

Did grab them on 40ssb at 3am so its not a matter of working them it just seems like 20/17/15 drop dead around the western part of the "east"

That "block" (if it exists) extends to VE1, Bob. All I heard on 15 today was a whisper. I've looked for them on 30/40 with no results.

Subject: [DX-IS] 3D20GA Propagation

Beginning to wonder if I am missing a couple of elements on my antenna.

Propogation forecasts give Conway a high to fair chance in the late afternoon on 20/17/15. Boy just a whisper on 17 and then fade. Zip on 15. And zip on 20.

80/40/30 are just as expected with great reception if you like the middle on the night.

Has NE USA (especially MA) erected some type of propagation block?

This afternoon/evening was one of those situations that favored the lucky - and the patient! My wife and I came in from dinner. She headed toward the kitchen and I headed toward the rig. 3D2MJ came semi-booming in on 15 SSB - I needed that one for a new one on phone. I jerked the headset off and handed it to my wife. I figured there wasn't time to turn on and switch to her rig. The 3D3MJ promptly disappeared into the mud. I told her to hang on. After about ten minutes, she threw the headset down in disgust and left the room. The signal came up, but still very difficult to hear. I finally convinced her to sit down and wait it out - take about half an hour, and forget everything else, I told her. Finally, after about 20 minutes he came up just well enough we could hear "N4 Bravo United, five and nine" She just about fell out of the chair and responded. Suddenly, his signal was 10 over. We heard him very strong for about ten more minutes, then he was gone for good.

Proof that luck sometimes works better than skill - in both our cases!

Speaking of too many to deal with....

An acquaintance of mine (Rick, AI5P) is out in the Pacific. He was listed as being on FK/C, which would be a brand new one for both my wife and me. I sent Rick an e-mail about the possibility of a sked. Before he could answer the e-mail, we both worked him that afternoon on 17 meters.

The following morning, he responded to my e-mail with the news that he is NOT on Chesterfield, but New Caledonia. It's a new one for the wife, but not for me.

I passed the info back to Bernie for The Daily DX and Bernie admitted, yes, there was a mistake, but the guys in the Austral Islands are going to the Marquesas when they leave, and then they're going to Chesterfield! (I may have that somewhat fouled up - guess I'm excited because the FK/C I need is going to happen!)

I've been fortunate that I've heard FT5GA only twice, once on SSB and once on CW (both on 20M) and managed to snag him both times. A couple of times I've faintly heard them on a couple of different bands, but not enough to attempt a QSO.

Managed three bands and two modes with the 3D20CR - the pileups on 40 and 80 have been humongous. This morning I struggled to work them on 40 CW, 40 SSB and 80 CW and never got through on any of 'em!

What?!? Do they really have radio in Mississippi??

Just kidding. We had a great time last week, despite the AC failing on the way into Jackson Tuesday evening. We lost Wednesday sitting in the hotel while the AC system was replaced (that truck is only 15 years old - can't figure out why the AC died? hi hi).

Had a great time driving all over MS. Managed to finish the last county (Clarke) Saturday morning just before noon and headed back toward Mobile and Pensacola. Covered all 82 counties and approximately 2,500 calls - all on CW. The state road and county road systems are very good. There was a stretch of MS 40 south of Marks that was rather bumpy, but most of the roads were great. A lot of unexpected 4-lane roads on the non-US highways!

Called 3D20CR on 80CW for about 2 hours last night and couldn't even get through from VK!

I must admit my 80m inverted V is a bit worse for wear since I lost one side due to a line breakage, it's still intact but not as high on that side and I can only put out 100w on 80m, the amp doesn't function on that band.

Anyway, will keep at 'em,

Those chirpy-sounding CW signals on Sunday were the real thing. All my QSO's are now in the on-line log.

What's interesting is that they were a good S9 or better on 15m when I worked them. It was the middle of night in that part of the world. But other signals from that area could be heard, so there was some propagation from there during their nighttime.

They were on 21010 from about 1800Z to about 2030Z on Sunday. I didn't hear anyone else trying to pirate their callsign at the same time on that frequency and the tuners and QRMers were scarce.

The 20m signals were also loud. I worked them when they were on 14260 SSB, then later on 14011.

It has been almost 10 years since the last DXpedition to Kingman Reef, and there has also been very limited operations from Palmyra Is. and none that I know of from Jarvis Is. from those times. What is the current status of those islands in terms of visiting them? Are they pretty much closed now to the public or could a DXpedition take place again in the not so distant future?

We can hope!

I think the big emphasis after K4M is going to be Navassa. It hasn't been on since 1993. I worked them on most bands back then (NF6S-W5IJU/KP1) but they had a rough time on 80 and 160 with bad QRN and I didn't work them on those bands.

I don't care if they ever make it to Texas as long as they make it to OKLAHOMA! I am limited to a homebrew G5RV type dipole right now, and they don't seem to be operating at times that fit into my schedule real well.

I worked Jacky a few days ago too. I'm surprised the FT5 signals aren't making it to Texas. It doesn't appear to be a polar path.

Those chirpy-sounding CW signals on Sunday were the real thing. All my QSO's are now in the on-line log.

What's interesting is that they were a good S9 or better on 15m when I worked them. It was the middle of night in that part of the world. But other signals from that area could be heard, so there was some propagation from there during their nighttime.

They were on 21010 from about 1800Z to about 2030Z on Sunday. I didn't hear anyone else trying to pirate their callsign at the same time on that frequency and the tuners and QRMers were scarce.

The 20m signals were also loud. I worked them when they were on 14260 SSB, then later on 14011.

On Sun, Oct 4, 2009 at 9:56 PM, Zack Widup <w9sz.zack@gmail. com> wrote:

I worked stations signing FT5GA on 15 and 20 CW and 20 SSB this afternoon. The station on 20 CW showed up about half an hour after the 15m station went QRT. Both CW signals had the same identical sound and a slight chirp. Pirate or not, I am sure the same rig was being used to make the QSO's on these two bands.

The station on 20 CW said at about 2120Z that they were going to be QRT till 0600Z. I wouldn't think a pirate would announce that but you never know. Packet spots abounded, with many people saying the beam heading was correct and no one saying it wasn't. A lot of people still felt they were pirates.

I guess I'll find out tomorrow if any of them were pirates. I feel that the chances are pretty good that the SSB station on 14260 was for real. It was the same voice that showed up a little earlier on 14215 signing FT5GA.

Keep trying! They are QRV till the 8th.

Luckily I have both KH5 and KH5K on the higher bands and KH5K on 30m but would still like both on RTTY, 40m and 80m. 60m would also be a blast-"This is KH5K listening on channels 3 and 4".

I hope no one hurries to KP1 too quickly, as it is kind of nice to have the #3 most need country confirmed on both 15m (using a Yaesu FT101B) and on 20m (using a Heathkit SB102) when you are a little pistol.

Did get my K5D QSL in the other day.

Whoops - sorry about the mistaken QTH!
:-)

They are certainly not in a class with other DXpeditions like VP6DX but they are there mainly on a military mission and the DXpedition comes second to that. If that's the best we are going to get, I guess we can't do anything about it. I'm assuming they are doing their best. It must be difficult for them.

Yeah Zack, that's true. I finally worked them on 20 SSB last friday...so now that I worked them do I have to say they are the best DXP ever? Put comments on the clusters like "Great DXP" , "Tnx for new one" , "Awsome" or "FT5GA easy", with my call prominently displayed? I still think they stink, being Military or whatever!

They are not the best DXpedition I can recall but not the worst either.
Maybe there will be another one to FR/G soon, hopefully during a time of
more sunspots. I think we all miss the sunspots!

Did anyone work the recent operation on ZS8? I never heard him on any band,
not even once.

ZS8T Petrus was a wierd operation - I never heard him but I kept all of the related email and spots.
There were 5 spots for 40m on Jan 11 2009 and 2 spots for 20m on Mar 11 2009 - nothing else.
N1DG had a qso when Petrus was testing antennas - that's the only one I heard of.
Apparently being a new ham and dealing with his work assignments were just too much.

I worked the operation in 1993 by Christie ZS1CDK signing ZS8MI. I believe it was on 20 SSB. Mostly he was working SSB but I found out later that if I had asked for a CW QSO he'd have hooked up a straight key and worked me on CW. I remember I thought it was odd that he had no pileup at the time I worked him. Maybe my timing was just right!

His QSL shows a photo of him with a mic in one hand and a straight key in the other hand.
:-)

From: Derek Wills
Topic: 11188 Message: 11188

I've been listening to TX5SPA calling CQ on 18085
for at least 10 mins now with no takers. Good
signal into TX, I can't believe nobody else has
propagation.

But he's not been spotted on the cluster, so
nobody knows he's there. I worked it the other
day so I'm just listening. And not spotting it;
I'm sure other people have that big knob in the
middle of their radio.

I am sitting here, hoping that I might have a chance to hear them and get a contact. And lo and behold, I can hear him clearly enough on 20, and he is only taking 6/7's. As I get ready to send this, he is slowing falling into the noise.
For those who can remember, how long ago was the last Glorioso DXpedition?

And back to the office I go...

Been listening all afternoon for FT5GA on any band, TX5SPA on 17 or 15, 3D20CR on any band on CW....nada. I did hear T30M on the long path on 20 but very weak and while I called a few times and heard him come back to VE2QRA (what a stupid call), I wasn't successful this far north.

Conditions way up here suck to the Nth degree today, Derek.

Has there ever really been a DXpedition there? There are some
FR ops who go there to work on the weather station or something.
There was a real DXpedition to Tromeln FR/T nearly a decade ago,
but I don't remember one to FR/G.

KH6ND and another guy (call escapes me) were there in November of 2005 (Palmyra). If I remember correctly, the island was either sold or donated and it has become some sort of sanctuary. You can apparently visit, but you have to offer some work in return. KH6ND and the other guy were doing some tower work when they were last there.

That was indeed a disappointment. After his experience on Bouvet, one might have thought he had gained sufficient experience to attempt more operating. What goes on with ZS8 is generally rather hush-hush. The South African government keeps a tight reign on everything there. Maybe Petrus was far too busy to get on the air?

You found it, let them find it too! That seems like a pretty good operation. I just needed a couple of band fills here and there and got everything I needed except 10 meters. They had a better signal most of the time than did the Conway Reef group.

Looking at the gallery of FR/G QSLs at the FT5GA site, I don't see anything that could be called a DXpedition in the last 20 yrs or so. There are operations by individuals who go there for other reasons.

Baldur DJ6SI went there in 1992, and I have a nice QSL card from then - but he didn't jump through the right hoops so it was not Newington-proof. The last one I worked before the current crew was FR5ZQ/G in May 2000.

Someone correct me if I'm wrong about this!

I never worked him on 3Y/Bouvet either. Some years ago I was told by someone that there were plans for a Bouvet operation but I guess it never got too far along in planning.

I'm now seeing why, back when I was a new ham getting QST and not really into DXing yet, there was such a big deal being made out of operations on Bouvet, Niue, Rio d'Oro, etc.

Date: 2009-10-06 23:12:25 UTC
From: Dave AA6YQ
Topic: 11203 Message: 11204

Pathfinder produced two hits, but with conflicting information:

IK3QAR says FO/KM9D was on Raivavae Is.OC-114, which is in the Austral Islands.

However, 425 DXNews nr. 803 of 23/09/2006 says "Look for FO/KM9D to operate on 10-40 metres CW and SSB from Maupihaa (Mopelia) Island, (OC-057), French Polynesia starting 'not later than' 23 September for 'at least five days'. "

You could ask QSL manager, OM2SA.

73,

Dave, AA6YQ

From: Alan Leith
Topic: 11203 Message: 11211

Thanks, Dave. I had seen the 425 DXNews report. But I'd worked him on Aug. 2, & 4 on 15, 17, 30 & 40. So, perhaps I am correct in believing he was on the Australs at that time.

Subject: RE: [DX-IS] FO/KM9D

Pathfinder produced two hits, but with conflicting information:

IK3QAR says FO/KM9D was on Raivavae Is.OC-114, which is in the Austral Islands.

However, 425 DXNews nr. 803 of 23/09/2006 says "Look for FO/KM9D to operate on 10-40 metres CW and SSB from Maupihaa (Mopelia) Island, (OC-057), French Polynesia starting 'not later than' 23 September for 'at least five days'.
"

You could ask QSL manager, OM2SA.

73,

Dave, AA6YQ

From: Lance Martin
Topic: 11184 Message: 11215

I needed Petrus on 3Y0/B and I was on air listening many times when he was spotted. I only ever heard him once very faintly but couldn't get through the EU pile.

Ironically I only heard him once from ZS8T and managed to make a QSO, which I didn't need, oh well, DX can be like that sometimes.

It was a shame that he wasn't QRV very often and didn't have better equip, especially after all the hoo haa about the operation... webpage n'all.

I still need all the VP8/SG, SO, SS, I see VP8DIF occasionally goes to SG but the chances of a QSO are even slimmer than Mt. Athos...so no breath holding going on there.

Encouragingly the propagation on the bands seems to have improved and DXpeditioners world-wide have got very itchy feet, so no doubt more of these places will come up this cycle.

Hang in there,

ZS8T Petrus was a wierd operation - I never heard him but I kept all of the related email and spots.
There were 5 spots for 40m on Jan 11 2009 and 2 spots for 20m on Mar 11 2009 - nothing else.
N1DG had a qso when Petrus was testing antennas - that's the only one I heard of.
Apparently being a new ham and dealing with his work assignments were just too much.

I've been listening to TX5SPA calling CQ on 18085 for at least 10 mins now with no takers. Good signal into TX, I can't believe nobody else has propagation.

But he's not been spotted on the cluster, so nobody knows he's there. I worked it the other day so I'm just listening. And not spotting it; I'm sure other people have that big knob in the middle of their radio.

Ok John, well you have a trans-equatorial path to the VP8s, so that makes it way easier. We are south pole path and 12 hours time difference, so SR and SS stuff...early morning and early evening type propagation....when there is propagation.

I am guessing you would have similar problems with VK0/H, 4S, S2, VU4/7, 9N etc.

I can still remember digging out those weak NA signals when I was on VK9X 24 years ago.

Weren't both Chuck Brady and Petrus both using spider beams from 3Y0/B? Maybe that's why they were both so weak. At least Chuck worked some people. I'm wondering if spider beams are the reason FT5GA was so weak. Most recent island DXpeditions have used vertical dipoles. Maybe spider beams aren't the best antennas for low take-off angles of propagation.

More than a year ago there were some guys in South Africa making comments about a Marion Is. trip. When Petrus ended up there, the talk stopped. Maybe after the result (or the lack thereof!) from Petrus, the talking will start again. With a little luck, by the time they can actually get something moving, the SFI will show significant improvement.

I think the only time I ever heard South Sandwich was back in the early 80s. I had a beam, but no amp. For several days there were huge list operations. It was often more difficult to hear the list monger than it was to hear LU3ZY. Never could get through. If there have been any other opns there, it was while was off the air.

One of the biggest problems with FT5GA was their location. There are apparently significant obstacles between NA and where they were located. Comments were made on the web site that they could have done better if they'd been allowed to set up on the beach. However, as was just about everything on the trip, they had to follow orders about where to set up their facilities. It appears their take-off location was somewhat sub-optimal from our perspective.

Chuck Brady was using a Hexbeam. And Glorioso is definitely different from Ducie Is. as far as verticals are concerned.

It was a shame that he wasn't QRV very often and didn't have better equip, especially after all the hoo haa about the operation... webpage n'all.

I still need all the VP8/SG, SO, SS, I see VP8DIF occasionally goes to SG but the chances of a QSO are even slimmer than Mt. Athos...so no breath holding going on there.

Encouragingly the propagation on the bands seems to have improved and DXpeditioners world-wide have got very itchy feet, so no doubt more of these places will come up this cycle.

Hang in there,

73, Lance - VK6DU

ZS8T Petrus was a wierd operation - I never heard him but I kept all of the related email and spots.
There were 5 spots for 40m on Jan 11 2009 and 2 spots for 20m on Mar 11 2009 - nothing else.
N1DG had a qso when Petrus was testing antennas - that's the only one I heard of.
Apparently being a new ham and dealing with his work assignments were just too much.

They had a DXPedition there in Jan of 2002 for a few days by the microlite DXpedition crew. Finally got some decent prop on a Monday night and I had to go teach a night class before I got thru the pileup. Such is life. Got them 3 times after they went to South Georgia, but that is because I already had South Georgia confirmed!

I think the only time I ever heard South Sandwich was back in the early 80s. I had a beam, but no amp. For several days there were huge list operations. It was often more difficult to hear the list monger than it was to hear LU3ZY. Never could get through. If there have been any other opns there, it was while was off the air.

Lance,

Didn't realize it was a polar path for you. Yes, that would make it more difficult. Haven't heard VK0/H yet. Have heard the others weakly before except for 4S who I have confirmed a couple of times.

The lack of a resident population on VP8SG doesn't help any, although I think there might be military or scientists there from time to time.

Ok John, well you have a trans-equatorial path to the VP8s, so that makes it way easier. We are south pole path and 12 hours time difference, so SR and SS stuff...early morning and early evening type propagation. ...when there is propagation.

I am guessing you would have similar problems with VK0/H, 4S, S2, VU4/7, 9N etc.

I can still remember digging out those weak NA signals when I was on VK9X 24 years ago.

I missed the big VP8SSI DXpedition to S. Sandwich in 1992 or 93 but worked the Miicro-lite ops. The good thing about that was if you could hear them well, they could hear you well running barefoot. I worked them again when they moved to S Georgia.

I have yet to work the Falklands on 40 meters. Got it on several higher bands. I haven't figured out why that is, yet.

Hi Lance,

Thanks to you and all the others who cleared this up for me. I worked Mike on 15, 17, 30 & 40 and had worked FO/DL7FT on 10M SSB before this TX5 operation. Apparently there have been MANY operations from the Australs that I did not know about. I worked TX5SPA during a brief 5 minute opening from here on 20M CW LP yesterday. And that's the only time I have heard them. The only Australs QSL I have is FO0FI but I'm working on the others.

I'm praying for ONE CW QSO with 3D20CR before that one ends and it appears my only good QSO with FT5GA was on 20M CW with three pirates in the log to remind me of my failure!!!

Yes I remember hearing KH6ND/KH5 on 40m RTTY one evening. Unfortunately RF was getting into the computer or interface when I transmitted, causing a nasty hum instead of RTTY tones everything I called him. I lowered the power to 5 or 10 watts with no hum but then he couldn't hear me. He was CQing with no takers for quite a while. Sometimes you just can't win with technology.

KH6ND and another guy (call escapes me) were there in November of 2005 (Palmyra). If I remember correctly, the island was either sold or donated and it has become some sort of sanctuary. You can apparently visit, but you have to offer some work in return. KH6ND and the other guy were doing some tower work when they were last there.

>Most recent island DXpeditions have used vertical dipoles. Maybe >spider beams aren't the best antennas for low take-off angles of >propagation

The "Team Vertical" guys who swear by these for contests seemed to find that 1/2 wavelength from the water edge in the direction you want to take off to was optimum, and the effect dropped off sharply as you back further away from the beach.

As I understand it the FT5GA guys unfortunately weren't allowed to erect verticals on the beach because of sea turtle preservation efforts. Most island expeditions don't seem have that constraint and of course a bunch of them are so small it would be hard to back away from the beach far enough to cause a problem :-)

I think it's right that the vertical dipole arrays blow kinda low horizontal beams out of the water... seems like 10-20dB difference if your vertical looks right out on salt water.

I suspect horizontal multiband yagis are probably a better choice if you're even a few wavelengths inland. Saltwater or dirt matters almost none at all to horizontally polarized antenna performance and vastly to verticals, but the saltwater has to be *right there.*

To all radio amateurs

SB DX ARL ARLD040
ARLD040 DX news

This week's bulletin was made possible with information provided by NC1L, YV1DIG, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MALDIVES, 8Q. Andrew, G7COD will be QRV as 8Q7AK from Embudu Island, IOTA AS-013, from October 11 to 25. Activity will be on 80 to 12 meters using CW and SSB at various times throughout the day. QSL to home call.

BHUTAN, A5. Yasuo, JA1FJJ is QRV as A52FJJ until October 20. Activity is on 80 to 10 meters using SSB, RTTY and PSK31. QSL to home call.

CUBA, CO. Members of the Camaguey City Radio Club will be QRV as T47C during the 7th conference of the ''Federacion de Radioaficionados de Cuba'' on October 10 and 11. Activity will be on 160 to 10 meters using CW, SSB, RTTY and PSK31. QSL via operators' instructions.

CROZET ISLAND, FT/W. Flo is QRV as FT5WO and has been active on 20 and 17 meters using SSB around 0900 to 1300z. He is here until the end of October. QSL via F4DYW.

HUNGARY, HA. Special event call HG0WFF is in use for the next 12 months from different Hungarian National Parks. Activity will begin with an operation from the Hortobagy National Park from October 12 to 18. QSL via HA0HW.

GUINEA-BISSAU, J5. Jose, CT1DSV plans to be QRV as J5S from October 12 to 18. Activity will be during his evening hours for one to two hours. QSL to home call.

SVALBARD, JW. Arne, LA7WCA, Maurits, LA3XIA and John, G4ATA are QRV as JW7WCA, JW3XIA and JW/G4ATA, respectively, until October 13. Activity is on 80 to 10 meters using SSB and RTTY. QSL to home calls.

MIDWAY ISLAND, KH4. A large group of operators are QRV as K4M from Sand Island, IOTA OC-030, until October 19. Activity is on 160 to 6 meters using CW, SSB and RTTY with five to six stations active simultaneously. See the K4M website for QSL information.

BULGARIA, LZ. Members of the Balkan Contest Club are QRV as LZ44WFF until October 11 during a World Flora Fauna expedition from the Biosphere Reserve Srebarna. Activity is on all HF bands using CW, SSB and various digital modes. QSL via LZ1KZA.

CZECH REPUBLIC, OK. Special event station OL22ASE is QRV until October 15 during the ASE XXII Planetary Congress taking place in Prague until October 10. QSL via OK1TIR.

ANTARCTICA. Station R1ANB from the Nirny Base club has been active on 40 meters around 1330z. QSL via RN1ON.

CORSICA, TK. Operators IK2SNG, IK4RQJ and IZ4BBF are QRV as TK/homecalls from Calenzana until October 12. Activity is on 40 to 10 meters using CW, SSB, RTTY and PSK31. QSL to home calls.

BENIN, TY. Operators PA8AD, PA3AN, PA3AWW and PD0CAV are QRV as TY1MS from Grand Popo until October 30. Activity is on 160 to 10 meters with three stations active simultaneously. This includes an entry in the upcoming CQ WW SSB contest. QSL via PA3AWW.

INDONESIA, YB. Hotang, YC0IEM will be QRV as YC0IEM/8 from Ambon Island, IOTA OC-070, from October 12 to 30. QSL via IZ8CCW.

VENEZUELA, YV. Members of the Radio Club Venezolano are QRV as YW8AJ from Monagas State until October 12. Activity is on all HF bands, including possibly 2 meters, using all modes. QSL via YV5AJ.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Nigeria, 5N0EME, 2009 operation; Nigeria, 5N0OCH, current operation (logs in LoTW); and Angola, D2QMN, current operation.

THIS WEEKEND ON THE RADIO. The ARRL EME Contest, North American RTTY Sprint, 10-10 International 10-10 Day Sprint, Oceania DX CW Contest, NCCC Sprint, YLRL DX/NA YL Anniversary Contest, Makrothen RTTY Contest, Pennsylvania QSO Party, EU Autumn CW Sprint, FISTS Fall CW Sprint, SKCC Weekend CW Sprint, Arizona QSO Party and the UBA ON SSB Contest will certainly keep contesters busy this weekend. The NAQCC Straight Key/Bug CW Sprint is scheduled for October 14. Please see October QST, page 78, and the ARRL and WA7BNM contest web sites for details.

IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 07/2100Z to 08/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels during days 1 - 2 (09 - 10 October).
Field activity is expected to increase to quiet to unsettled levels
on day 3 (11 October) due to a recurrent coronal hole high-speed
stream.
III. Event Probabilities 09 Oct-11 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 08 Oct 069
Predicted 09 Oct-11 Oct 069/069/069
90 Day Mean 08 Oct 069
V. Geomagnetic A Indices

To all radio amateurs

SB PROP ARL ARLP041
ARLP041 Propagation de K7RA

Sweet memories of that 11-day run of sunspots ending on the second day of this month will eventually fade. So far the number of spotless days is seven--or perhaps eight by later today--with the last sunspot seen on October 1.

A peek at http://stereo.gsfc.nasa.gov/ for the latest STEREO images shows two active areas in our Sun's southern hemisphere beyond our direct view, but it is hard to tell if these will emerge as sunspots when they appear over the eastern limb. A rough guess has the first one possibly emerging around October 10, and the second around a week later. Currently the solar flux forecast shows flux values lower then 70 through October 15, then around 72 during the two-week period from October 16-30.

The second spot is seen on the look-ahead image, and is passing into the invisible area, now slightly more than 60 degrees wide in latitude, or about one-sixth of the solar surface.

The same NOAA/USAF forecast predicts the same very quiet geomagnetic conditions we've seen for some time, with a planetary A index around 5. Two very small increases are predicted for October 11-12, with an A index of 7, and October 24-25, with the A index at 8.

Average sunspot numbers for the week dropped 15.3 points below the September 24-30 period, and average daily solar flux for the week declined 2.2 points to 70.5.

Regarding the invisible area on the other side of the Sun, this is becoming smaller as the "Ahead and Behind" STEREO platforms slowly converge. You can figure out the size of the dark area in terms of degrees by going to the "Where is STEREO Today?" page at http://stereo-ssc.nascom.nasa.gov/where.shtml. The last figure at the bottom of the page is "Separation Angle A with B." Subtract this value from 180 to get the size of the dark area. Currently

early Friday morning it shows 119.702, which corresponds with a dark area (beyond the sight of the A and B platforms) of 60.298 degrees.

At http://stereo-ssc.nascom.nasa.gov/where/ you can see how wide that invisible area will be at any date and time in the future. On October 1 at 1800z the blank area was 61.7 degrees wide, on November 1 it will be 56.3 degrees, and December 1, 51.6 degrees. The non-visible area will be exactly 60 degrees wide around 0021-0028z on October 11.

In 2010 that invisible area will shrink from 47.7 degrees on January 1 to 9.3 degrees on December 1. The entire Sun will be visible beginning on February 6, 2011 around 1302-2047z. After that, the blank spot in STEREO's vision will be Earth-facing, and as it grows the information can be filled in from observation here on Earth.

Larry Banks, W1DYJ of Woburn, Massachusetts sent in an article from New Scientist magazine titled, "Phantom Storms: How our weather leaks into space." It has many interesting details about our ionosphere and stratospheric warming. Read it on the web at, http://snipr.com/scukl.

Giles Berry, KE3CR of New Castle, Delaware commented about last week's reports of VHF propagation along fog banks. He recalls that in the early 1950s when television first came to the state of Maine, TV reception seemed to improve with fog. Giles notes that on a foggy night he could receive television broadcasts from Boston reasonably well. He was on the mid coast of Maine.

Patrick Hamel, W5THT of Long Beach, Mississippi notes, "Here on the Gulf of Mexico coast we have always known that when we get fog, we can talk from Florida to Texas 'under the inversion' on 2 meters. It also works on 6 meters, and I regularly heard other stations making contact on 2 meters and then jumping to the higher bands during fog conditions."

Gus Malmberg, SM0EGK says, "When I read WA2AMW's comments about the extraordinary conditions on 2m, I recalled what happened early in 1963, when one could listen to all of northern Europe and see many band I TV stations for a few days. As a youngster I didn't understand the mechanism, but have since realized that it must have been an extreme temperature inversion. In 1963 we had a solar minimum."

He continues, "I worked for fifteen years as a radio and television transmitter engineer for the Swedish Telecommunication Administration, but have never again experienced something like that!"

Alan Vigeant, KI6HPO of San Marcos, California wrote, "I'd like to inform you of past and most recent conditions here in NE San Diego County. Since early April, I've been having daily chats with my good

friends at the Santa Barbara Amateur Radio Club, which is situated about 165 miles NW of my QTH."

Alan continues, "I am at 2,200 feet of altitude, on the SW rim of what I like to call the Palomar Ridge, which is about 5,600 feet above sea level. Between the two rims is what I call the 'Palomar Trench.' My QTH is about 12 miles SW of the Palomar Observatory. Using William Hepburn's 'Worldwide Tropospheric Ducting Forecasts web site (see http://www.dxinfocentre.com/tropo.html), which has proven most helpful to me, I can pretty much set my watch as to when the duct will be forming. My QTH is about 40 miles east of Oceanside, California. My signal follows the ducting which occurs in the trench and then goes up the coast of Southern California to Santa Cruz Island, where their 220 MHz repeater is."

He goes on to say. "The past week proved to be a most curious one for me. While I was speaking to the 7:00 AM SBARC Morning Net, I noticed that the S-meter on my 220 rig (I utilize the club's 223.920 repeater) began to fluctuate rapidly."

He ends with, "Looking out my garage side door, I could watch the cloud cover come in from the Pacific; as I looked on, I could actually see that as the cloud cover rose, the meter would decline to an S-3. As the Sun grew higher in the sky and the cloud bank began to recede into the Pacific, the meter would register an S-9 to almost 40 over. At times, during the summer evenings, I could look out along the Palomar trench and look to the horizon to see if prop was going to be good or not so good for the evening."

Thanks, Alan! Very interesting report.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for October 1 through 7 were 11, 0, 0, 0, 0, 0, and 0 with a mean of 1.6. 10.7 cm flux was 72, 71.6, 71.6, 71.1, 69.9, 68.9, and 68.5 with a mean of 70.5. Estimated planetary A indices were 2, 2, 1, 4, 2, 1 and 2 with a mean of 2. Estimated mid-latitude A indices were 2, 0, 1, 4, 2, 1 and 1 with a mean of

1.6.

*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

8Q - Jim, G3VDB will be active holiday style as 8Q7EJ from Vilamendhoo Island, Maldives (AS-013) on 9-25 October. Subject to hotel permission and local conditions, he plans to operate CW, RTTY, PSK31 and perhaps SSB. QSL via home call. [TNX dx-hamspirit.com]
9H - Andreas, DL9USA will be active as 9H8C from Comino Island, Malta (EU-023) on 15-22 October. QSL via home call, direct or bureau. [TNX dx-hamspirit.com]
H44 - Mike, KM9D (H44MY) and Jan, KF4TUG (H44TO) have been lying to anchor in the lagoon of Liapari Island (OC-149), Solomon Islands since 8 October.
HA - Radio Club Puspokladany (HA0KHW) will be active as HG0WFF from a number of Hungarian National Parks between now and October 2010. The first activity will be from the Hortobagy National Park on 12-18 October. QSL via HA0HW. [TNX HA0HW]
J5 - Jose, CT1DSV will be active as J5S from Guinea Bissau on 12-18 October. He expects to operate about 1-2 hours every night, and to concentrate activity on 17-18 October. QSL via home call. [TNX dx-hamspirit.com]
JT - Jeremy, W7EME (JT1UN) and Jim, K7YO (JT1YO) will conduct the first ever EME activity from Mongolia on 10-14 October. Details can be found at http://www.w7eme.org/ulaanbaatar [TNX JT1CD]
PA - Special event station PA30IPA will be active from 10 October to 6 November to celebrate the 30th anniversary of the International Police Association Radio Club of the Netherlands. QSL via PA9LUC. [TNX The Daily DX]
PA - Ben, DO1BEN and Barbara, DO1IQ will be active as PD/homecalls from Texel Island (EU-038) on 16-22 October. QSL via DO1BEN, bureau preferred. [TNX www.rsgbiota.org]
PY0T - The schedule of the Brazilian Navy has changed, and consequently also the dates for the ZY0T operation from Trindade [425DXN 961]. The team now expects to leave on 13 October and to be active from the 17th to the 20th (+/- one day either way). QSL direct to PY1NB. Bookmark http://riodxgroup.dxwatch.com/trindade-2009 for

updates. [TNX PY1NB]
SP - Special event station SN100DP will be active until 11 October to
celebrate the 100th anniversary of the "Dar Pomorza", the Polish
sailing frigate currently preserved in Gdynia a a museum ship.
Please visit http://www.sq2rh.it2.pl/sn100dp/sn100dp_about.html for
Further information. QSL via SQ2RH. [TNX SQ2RH]
TA - Special event callsign TC1IEM will be aired on the HF bands for
this year's Istanbul Eurasia Marathon to be held on 18 October.
QSL via TA1KB, bureau preferred. [TNX TA1HZ]
T6 - Pascal, F5PTM is active as T6YA from Afghansitan until December.
He plans to operate SSB, CW and RTTY on 80-10 metres. QSL via
F5OGL [TNX The Daily DX]
TA - The TC Special Wireless Activity Team (www.tcswat.org) will be
active as TC1ELH from Eregli Lighthouse (Sea of Marmara) on 9-11
October. They plan to operate mainly on 20 and 40 metres SSB. QSL
via TA1HZ. [TNX TA1HZ]
V3 - Rich, N0HJZ will be active as V31MW from Placencia, Belize on
17-26 October, including as SOAB entry in the CQ WW DX SSB
Contest. QSL direct to home call or via LoTW. [TNX N0HJZ]
VK - Look for Ray, K9LUK to be active as K9LUK/VK4 from Fraser Island
(OC-142) on 18-23 October. QSL direct to home call. [TNX
www.ragbiota.org]
W - The Alamance Amateur Radio Club (K4EG) will participate in the
Cape Lookout Lighthouse 150th Special Event on 10-11 October by
operating from Harkers Island (NA-067). Look for them on 80, 40,
20, 15 and 10 metres CW and SSB, with possible activity on 17 and
30 metres as well. QSL via KA4KJI. [TNX VA3RJ]
W - Special event stations N#A will be operated from all ten US call
areas with the appropriate prefix number designator on 12-18
October to celebrate the fifth anniversary of the North American
QRP CW Club (NAQCC). QSL via operator's instructions. Complete
details on the event can be found at http://www.arm-tek.net/~yoel/
[TNX VA3RJ]
W - The South Florida DX Association (K4FK) will operate as W4R from
the Arthur R. Marshall Loxahatchee National Wildlife Refuge as
part of the National Wildlife Refuge Week. The station will be
active on 20 and 40 metres SSB, and possibly CW, on 17 October
(from 14.00 to 18.30 UTC). QSL direct to WA4WTG. [TNX N4II]
YB - Hotang, YC0IEM now expects to be active as YC0IEM/8 from Ambon
Island (OC-070, 425DXN 961) on 12-30 October. QSL via IZ8CCW. [TNX
Mediterraneo DX Club]
ZL - Paul, ZL4PW and Ray, VK4HDX will be active from Stewart Island
(OC-203) on 19-30 March 2010. They plan to operate all modes on
160-15 metres, and possibly to participate in the CQ WPX SSB
Contest. They are looking for a phasing device for 2 element
phased arrays for 30/40m and a solid-state linear amplifier.
Please contact Paul (zl4pw@...) if you are willing to
assist. A website is under construction. [TNX dx-hamspirit.com]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

DXCC NEWS ---> 5N0OCH (Nigeria, current operation) and 5N0EME (2009 operation) have been approved for DXCC credit. If you had QSOs rejected in a recent DXCC submission, send an e-mail to dxcc@... to be placed on the list for an update. [TNX NC1L]

FT5GA ---> Due to a change in the military flight's schedule, the FT5GA team went QRT around 9 UTC on 7 October, one day earlier than planned. Activity started on 15 September, and the five operators on the island were able to log 50,301 QSOs with 15,237 unique calls. All of the logs have been uploaded to the log search (www.clublog.org/charts/?c=FT5GA).

TX3A ---> The first update about TX3A (Chesterfield Islands, 425DXN 951) has been posted to the expedition's website. Last minute tests (including RTTY hardware and software) and preparations are under way, and many improvements have been made to the equipment. As weather is the main variable, AA7JV and HA7RY will be standing-by in Gladstone (Queensland) from 28 October, ready to sail whenever they see a weather break long enough to get them to Chesterfield (the voyage will take 60-70 hours). voyage). Therefore they do not have a fixed date for the start of operations: "in the best case, we may get on the air on November 4, but it could easily be November 10 or later". George and Tomi will have supplies for a 20-day operation. The TX3A license is valid for 15 days only, so they may operate some of the time using their own callsigns. They intend to remain on the island to participate in the CQWW CW contest. Bookmark http://tx3a.com/ for regular updates.

WW DXPEDITION TROPHY 2009 ---> The Strange Radio Team is conducting the fourth annual survey to recognize the "DXpedition of the year" that has aroused the greatest interest in the amateur radio world between 1 June 2008 and 1 June 2009. Cast your vote at http://www.strangeradioteam.com/ [TNX IZ7AUH]

11240. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-09 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11240

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 09 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 282 Issued at 2200Z on 09 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 08/2100Z
to 09/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 08/2100Z to 09/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels on day 1 (10 October). Actitivy is
expected to be at quiet to unsettled levels during days 2 - 3 (11 -
12 October) due to weak recurrent coronal hole effects.
III. Event Probabilities 10 Oct-12 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 09 Oct 069
Predicted 10 Oct-12 Oct 069/069/069
90 Day Mean 09 Oct 068
V. Geomagnetic A Indices
Observed Afr/Ap 08 Oct 001/002
Estimated Afr/Ap 09 Oct 002/004
Predicted Afr/Ap 10 Oct-12 Oct 005/005-007/007-007/007
VI. Geomagnetic Activity Probabilities 10 Oct-12 Oct
A. Middle Latitudes
Active 05/10/10
Minor storm 01/01/01
Major-severe storm 01/01/01
```

_____

Dear Friends,

the latest issue (September 2009) of the 425 ARI DX Magazine is now
available for free download in .pdf format at www.425dxn.org/monthly the
official web site of 425 Dx News.

It includes the weekly bulletins published in September, Qsl Managers and
News from the Web.

Suggestions, advice, articles and photographs are welcome! Closing date for
contributions is ten days prior to publication date. Please send your
articles and pictures to iz3eba@...

Thank you for the attention, de

11245. not spotting!!!

Yahoo group: DX-IS (2009)
Date: 2009-10-10 18:02:07 UTC
From: Alan Leith
Topic: 11245 Message: 11245

Over an hour has passed since 6W/OK1WZM has been spotted. He's been commanding a huge pile-up on 20M CW and NO ONE HAS SPOTTED HIM!!! Are the masses finally learning? Or is 6W not worth spotting?

11249. Carrier on 14.000

Yahoo group: DX-IS (2009)
Date: 2009-10-10 23:31:59 UTC
From: Zack Widup
Topic: 11249 Message: 11249

Is anyone else in the USA hearing a carrier on 14.000 MHz? We were discussiog it on a couple more local groups and it was reported at about a bearing of 250 degrees in the Chicago area and 260 degrees in Champaign and Peoria, 150 miles downstate. That makes me think it isn't very local to us.

It's been reported as around S7 to as much as 30 over 9 (depending on the antenna used) with some QSB on the signal. It's been going continuously for at least several days.

Can anyone else get a beam heading on it?

73, Zack W9SZ

From: Norman Alexander
Topic: 11256 Message: 11256

Received the following - they may be good to go by now however.
Regards,

Norm W4QN
==========

News Flash:

The entire team is in Honolulu. On Thursday when the first members were to depart to Midway we were informed of a problem with the plane involving an oil leak. We were assured it was fixable. Friday several test flights were made that determined that the repairs were unsuccessful. We are frantically searching for alternative means. We discovered yesterday that there are no available planes on the island that are either certified to fly to Midway or large enough for us. We are negotiating with a company in California for a jet as well. The plane we original chartered is about to take off on a test flight to determine if the repairs made overnight were successful.

The team is not giving up and exploring ALL options to make this happen. Fish and Wildlife is being very supportive of our efforts but in no way will they extend the end date of our operation beyond the 19th due to the return of migratory species that have already begun to return early.

We will update this website in 5 or 6 hours when the plane returns and is checked out. We are as frustrated as you.

Well, it is outside the band - about 13.999.69
Maybe a Mars or commercial test.

11259. Re: [DX-IS] Carrier on 14.000

Yahoo group: DX-IS (2009)
Date: 2009-10-11 13:07:24 UTC
From: Brian Alsop
Topic: 11249 Message: 11259
Attachments: 1 described; binary payloads are missing from this source WARC

Interesting to note that just before this carrier appeared there was a
several hundred KHz wide very strong woodpecker just below the band
edge. It lasted a couple of hours. I was impressed how it abruptly
terminated at the band edge. So whatever the source, they clearly are
attempting to stay within an assigned frequency slot.

The woodpecker stopped and the carrier showed up.

11260. Re: Newest IRCs

Yahoo group: DX-IS (2009)
Date: 2009-10-11 14:53:09 UTC
From: W3NJ
Topic: 9233 Message: 11260

Has anyone successfully purchased any of the new IRC's? Tried 2 big post offices here in Austin and they either had the old ones or none at all. One clerk said the new ones weren't printed yet, but I've seen messages in other groups that they came out in Sept. I have a few DX QSLs/SAEs burning a hole in the table in my shack ;-)

tnx es 73

11261. Re: [DX-IS] Re: Newest IRCs

Yahoo group: DX-IS (2009)
Date: 2009-10-11 18:15:36 UTC
From: Dick Flanagan
Topic: 9233 Message: 11261

At 07:53 AM 10/11/2009, W3NJ wrote:
>Has anyone successfully purchased any of the new IRC's?

Yes. I have fifty brand new ones sitting in my QSL cash box. They
have been available to the retail Post Offices since September 10
and, as a matter of fact, the old ones should not be sold after October 15.

I suggest you download US Postal Bulletin PR 22267, September 10, 2009, from
http://www.usps.com/cpim/ftp/bulletin/2009/pb22267/pdf/pb22267.pdf

Take pages 11 and 12 with you to the PO and courteously ask the
Counter Supervisor or Postmaster to read them. They describe how the
local PO obtains IRCs through their normal supply channels and how
they dispose of any old ones they have left.

Just be nice. The postal regs are very complicated and ever-changing.

Dick

11262. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-11 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11262

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 11 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 284 Issued at 2200Z on 11 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 10/2100Z
to 11/2100Z: Solar activity was very low. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 10/2100Z to 11/2100Z:
Geomagnetic field activity was at quiet to unsettled levels. A
geomagnetic sudden impulse occurred at 11/0042Z (09 nT, as measured
by the Boulder USGS magnetometer). ACE solar wind observations
indicated a recurrent coronal hole high-speed stream commenced early
in the period. Solar wind velocities gradually increased during the
period (peak 463 km/sec at 11/1901Z). A period of mostly southward
Bz was observed during 11/0430 - 0800Z (minimum -10 nT at 11/0636Z).
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at mostly quiet levels through the period (12 - 14
October) with a chance for isolated unsettled conditions as the
recurrent coronal hole high-speed stream persists.
III. Event Probabilities 12 Oct-14 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 11 Oct 070
Predicted 12 Oct-14 Oct 070/070/070
90 Day Mean 11 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 10 Oct 000/002
Estimated Afr/Ap 11 Oct 007/007
Predicted Afr/Ap 12 Oct-14 Oct 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 12 Oct-14 Oct
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-October, through Sunday, 11th-October there were 226 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/c, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FR, FR/g, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP6, VP8, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (QRT). The 3D20CR is now QRT as of October 8th. Last report is that the team made over 32k QSOs. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are most likely to be sent out in January 2010). For more details and possible updates, see their Web page at: http://www.conwayreef2009.de

Also watch QRZ.com for updates at: http://www.qrz.com/db/3d20cr

4O, MONTENEGRO. Tonno, ES5TV, will be active as 4O3A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. Activity will be from Ranko, 4O3A, superstation. QSL via 4O3A, direct or by the LoTW.

4S, SRI LANKA. Operators Heinz/DL1IH and Salvo/DH7SA are expected to be active as 4S7AAG and 4S7SAG, respectively, during a holiday DXpedition sometime in October. Stay tuned!

4X, ISRAEL. Yoshi, JE2EHP, will be active as 4X/K1HP from Tel Aviv and Jerusalem in Israel between October 29th and November 5th. Activity will be on all the HF bands and 6m, using CW, SSB and RTTY. QSL is via Bureau to his home callsign JE2EHP.

5B, CYPRUS. John, G4IRN, will be active as 5B/G4IRN between November 27-30th. Activity will include a CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (??) entry. QSL via LoTW or via G4IRN.

5Z, KENYA (IOTA Op). Operators Enrico/5Z4ES, Francesco/IK8TEO, Antonio/ IK8UHA and Anthonio/IK8VRH are planning to be in Kenya and activate two IOTA islands between February 10-20th (2010). Callsign will be 5Z0H (IK8VRH informs OPDX that this will be the only time [first time] the 5Z0 prefix will be used) and islands mentioned are Lamu Island (AF-040) and Wasini Island (AF-067). QSL via LoTW, by the Bureau or direct to IK8VRH: P.O. Box 173, I-80016 Marano (NA), Italy. Visit the 5Z4H Web page at: http://5z4h.sitonline.it

6V, SENEGAL. Just a reminder that Seb, F8IJV, will be on his honeymoon here between October 15th and November 1st. He plans to be active in the CQWW DX SSB Contest (October 24-25th). He will try to operate before and after the contest as 6V7Q on 160-6 meters, mainly on SSB and the Digital modes. He will be operating from Jean-Francois, 6W7RV, QTH in La Somone. QSL via F8IJV.

8Q, MALDIVES. Jim, G3VDB, will be active 8Q7EJ from Vilamendhoo Island (AS-013) between now and October 25th. Activity will be holiday style and subject to hotel permission and local conditions. Look for operations on CW, RTTY, PSK31 and possibly SSB. He will use 100 watts into wire antennas. QSL via his home callsign.

CM2, CUBA. Frank, CM2IR, informs OPDX that he is on 40 meters using BPSK31 on 7035 kHz (IOTA NA015 and GRID LOCATOR EL83tc). He is also on SSB around 7150 and 7170 kHz (times not provide). QSL via EB7DX, QSL Manager with 2 USDs or IRCs. QSL SENDING ONLY BY REQUEST!!!

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (??) entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (???) entry. He is testing wire yagis/beverages on lower bands. QSL via OH2BYS.

EA9, CEUTA AND MELILLA. A group of Spanish operators will be active as EE9Z during the CQWW DX SSB Contest (October 24-25th) as Multi-2 or Multi-Single entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jose/EA9CD, Enrique/EA9GW, Jose/EA9PY, Mariano/EA9LS and Jorge/EA9LZ.

EI, IRELAND (On the Bird!). Marc, W4MPS, will be active as EI/W4MPS from County Cork between October 16-26th. Most of the time he will be in Grid IO52, although he may also travel to IO42 and IO51 (if the family ever lets him out of the pub). Marc states that he uses a FT-60R at 5 watts and an Arrow antenna on AO-51.

FS, SAINT MARTIN (Possible PJ7). Craig, AH8DX, will once again be active as FS/AH8DX starting October 22nd. Activity will include the CQWW DX Contest (October 24-25th) as a Single-Op/All-Band entry. Operations outside of the contest will be on 160/80 meters CW and SSB. Look for 40 meters RTTY also. QSL via AH8DX direct or via LoTW. Craig may also be active as PJ7/AH8DX from St. Maarten.

FT/G, GLORIOSO ISLAND (QRT). The FT5GA team is now QRT and is happy that the goal of 50k QSOs was reached by a crew of 5 operators with two and sometimes three stations. The FT5GA went QRT on October 7th (a day earlier than expected due to the military flight schedule). According to their Web page, they have made a total of 50427 QSOs with 15250 unique callsigns (24235/CW, 21080/SSB and 5112/RTTY). For updated details, visit the FT5GA Web page at: http://glorieuses2008.free.fr
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA
LATE MINUTE ADD-ONS: Didier, F5OGL, states, "The logs of the FT5GA operation will be very soon on LoTW." Also, a couple of pictures of the operation are now available at: http://picasaweb.google.fr/MauriceF5NQL/FT5GA#

HC8, GALAPAGOS ISLANDS. A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal (SA-004, WLOTA L0094) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via W5UE.

HG0, HUNGARY (WFF Op). This October, members of the Regionalis Radios Sportklub Puspokladany plan to start a year long activation of different Hungarian National Parks that qualify for the WFF program (see the Web page at: http://www.wff44.com/en). The first event will take place from the Hortobagy National Park <http://www.hnp.hu/index_en.php> between October 12-18th. The area has a reference number of HAFF-006. They will use the special callsign HG0WFF. QSL by the Bureau is "OK", but their QSL Manager is HA0HW. Some of the operators will use their own callsign with mark /p.

HP, PANAMA. Members of the Radio Club de Panama (HP1RCP) will be active during the 2009 JOTA event, October 17-18th, from Panama City, Panama, Colegio La Salle assisting Troop 4.

ID9N VIDEO AVAILABLE ON YOU TUBE! Members of the Noantri DX & Contest Team that were active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001) in April, now have a video available on YouTube at: http://www.youtube.com/watch?v=iwbJb66leaM

INDIAN OCEAN GRIDS (On the Birds). Jim, ND9M/VQ9JC, sailing toward Diego Garcia (VQ9) at about 27, will be activating the following grids during the following AO-51 passes:
November 11th at 2258z - MI95 or MI96 (as ND9M)
November 12th at 1304z - MI84 (as ND9M)
November 12th at 2355z - MI63 (as either ND9M or VQ9JC)
November 13th at 1224Z - MI62 (as VQ9JC)
Jim will try to be active for AO-27 on Monday (November 12th/0757z) and Tuesday (November 13th/0906z). Those times are during his work schedule, and he may not be able to set up. Also, Jim "may" be active on SO-50 for very late passes Sunday (November 11th/1924z for MI96 or NI06) and Monday night (November 12th/1814z for MI73 or MI63). Jim is operating full duplex with an FT-897D (TX) and FT-817ND (RX).

IOTA NEWS.....
EU-038. Ben/DO1BEN and YL Barbara/DO1IQ will be active as PD/homecalls from Texel Island (WLOTA L0043) between October 16-22nd.
Activity will be on the HF bands, propagation permitting.
QSL via their home callsigns, the Bureau is preferred.

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG, Antonino/IT9SAZ and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545), between October 24-25th, for the CQWW DX SSB Contest as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-118. RARE IOTA! Operators Oscar/EA1DR, George/EC2ADN, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning a DXpedition to Flannan Isles (a extremely difficult island to land on) during sometime early/mid-June, 2010. Last activation was in 2002 (also in 1989 and 1995). QSL Manager will be M0URX. More details, the callsign and Web site will be forthcoming.

NA-036. Rob, VE7RSV, will be active from Vancouver Island (CISA BC001, WLOTA L0858) during the W/VE Islands QSO Party (October 17-18th). QSL via address on QRZ.com.

OC-142. Ray, K9LUK, will be active as K9LUK/VK4 from Frazer Island between October 18-23rd. QSL via his home callsign direct.

SA-008. Orlando, PY2TJ, will be active as LU/PY2TJ from Isla Tierra Del Fuego (WLOTA L2448) between November 1-7th. Activity

will be on all HF bands. QSL via PT2OP, direct is preferred
or by the Bureau.

SA-058. Members of the Grupo DX Caracas will be active as YW5F from
Farallon Centinela Island between November 6-9th. Activity
is to celebrate the 20th anniversary of the Caracas DX Group.
Operations will be on 80-2 meters using CW, SSB and FM. QSL
via DM4TI.

J5, GUINEA-BISSAU. Jose, CT1DSV, will be active as J5S between October
12-18th (especially between October 17-18th). QSL via his home callsign.

J8, ST. LUCIA. John, W5JON, will once again be operating from the hilltop
QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between
October 20-30th. His callsign will be J68JA. Reference numbers are: IOTA
NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including
60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into
the following antennas: Alpha Delta DX-LB and DX-EE Dipoles, and a 3
element yagi on 6m. Activity will also include the CQWW DX SSB Contest
(October 24-25th) as a Single-Op/All-Band entry. QSL via W5JON. John
adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

JT1, MONGOLIA (EME Op). Operators Jeremy/W7EME and Jim/K7YO are active
on 2 meter EME from Mongolia as JT1UN and JT1UN/JT5, and also JT1YO
and JT1YO/JT5 on 70cm, until October 14th. Activity will be from the
JT1KAA HQ station of the Mongolian Amateur Radio Society. This operation
will be the first Moon Bounce QSO from Mongolia. For more information,
please visit: http://www.w7eme.org/ulaanbaatar

KH4, MIDWAY ISLANDS (OC-030). On Saturday, October 10th, the following
press release was sent out from Tom, N4XP: "The entire team is in Honolulu.
On Thursday when the first members were to depart to Midway we were
informed of a problem with the plane involving an oil leak. We were
assured it was fixable. Friday several test flights were made that
determined that the repairs were unsuccessful. We are frantically
searching for alternative means. We discovered yesterday that there
are no available planes on the island that are either certified to fly
to Midway or large enough for us. We are negotiating with a company in
California for a jet as well. The plane we originally chartered is about
to take off on a test flight to determine if the repairs made overnight
were successful. The team is not giving up and exploring ALL options to
make this happen. Fish and Wildlife is being very supportive of our
efforts but in no way will they extend the end date of our operation
beyond the 19th due to the return of migratory species that have already
begun to return early. We will update this website in 5 or 6 hours when
the plane returns and is checked out. We are as frustrated as you."
On Sunday, just before going to print, a statement on the KH4 Web page
states, "(0400z) We have just learned our aircraft is in the air testing
repairs made in the past 24 hours. We are anxiously waiting the results."
For more details, updates, online log, frequencies and bios, go to:
http://www.midway2009.com

QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA 30620-9989 USA) or LoTW. See the above Web page for complete details.

KH6BZF PROPAGATION FORECAST/REPORT (For October 12-18th)....
Oct 12 AN SOLAR REFERENCE
Oct 13 AN ---------------
Oct 14 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 15 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 16 AN LN - Low Normal
Oct 17 AN
Oct 18 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Lee, KH6BZF, informs OPDX that a relief fund is now set up for American Samoa at: C/O BANK OF HAWAII, ATTN: AMERICAN SAMOA RELIEF, 111 SOUTH KING STREET, HONOLULU, HI 96813.

MU, GUERNSEY. Gerhard, OE3GEA, will be active as MU/OE3GEA from Guernsey (EU-114, WLOTA L0013) between October 27-29th. Activity will be on the HF bands using CW and low power only. QSL via his home callsign, direct or by the Bureau.

NYQP IS BACK! (After 25 years!) The Rochester DX Association looks forward to your support and participation in the 2009 New York QSO Party. The event takes place Saturday, October 17th, starting at 1800z (2:00 PM Eastern) for 12 hours. Check out the NYQP Web page for complete rules, FAQ's, Software, Forum, County maps and Log submissions at: http://www.NYQP.org Over thirty plaques to be awarded. <http://www.NYQP.org/sponsorship.php>

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. Operators mentioned are: Juha/OH1JT, Timo/OH1NOA, Jouko/OH1RX, Timo/OH1TM, Ari/OH5DX, Tomi/ OH6EI, Timo/OH6GLE and Juha/OH6XX. QSL via W0MM.

PJ2, NETHERLANDS ANTILLES. Members and non-members of the Caribbean Contesting Consortium (CCC) will activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. QSL via N9AG or LoTW. Operators mentioned are: Geoff/W0CG/PJ2DX, David/G3NKC, Martin/G4XUM, Kyle/WA4PGM, John/K6AM, Wayne/K8LEE, Joe/W9JUV, Kelly/N0VD and Richard/N0YY. Operators will sign as PJ2/homecall before the contest on all bands and modes. QSL via their home callsigns. Visit the CCC Web site at: http://www.pj2t.org

QSL INFO AND NEWS.....
TC1ELH via POB 73, Karakoy 34421, Istanbul, Turkey. There was activity by the TCSWAT from the Marmara Eregli Lighthouse (TUR059) during this past weekend. This was the first activation of the lighthouse. If you are interested in Lighthouse activities, please check the Web site for

upcoming TCSWAT events and awards at: http://www.tcswat.org

QSLS VIA LOTW: 5W0VK and XV3RRC

QSLS RECEIVED VIA MAIL: 6I7CQ, 6J2T, 7P8OK, A45WD, A61Q, EA9IB, T6AD, TO8YY, TU5JM, V51AS, XF4T, YS1MAE, Z29KM and ZK2V

QSLS RECEIVED VIA THE BUREAU: EZ8BO, EZ10BO, EZ21BO, EZ75BO, EZ56BO, EZ60SB, EZ3A, EZ75R, EZ21A, EZ56V, EZ10A, EZ8CW and EZ8-001

TC1, TURKEY. Club members for the TRAC Istanbul Branch (TA1KB) will activate their new club station using the special callsign TC1IEM between October 16-18th, for the "Istanbul Eurasia Marathon". The race will take place on October 18th, and it is the only marathon race that starts from Asia and ends in Europe. Details about the race are on: http://www.istanbulmarathon.org/en/index.php
The race course is only two hundred meters away from the new club station. Activity will be on the HF bands. QSL via the TA Bureau is preferred (or direct to TA1KB).

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQ WW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as Single-Op/Single-Band (40m) entries. QSL via LX1NO.

TK, CORSICA (Contest and IOTA Op). Paolo, IV3UHL, will be active as TK/IV3UHL during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/ Single-Band (20m) entry. QSL via IV3UHL. He states that he will probably activate EU-164 before the contest. He is also looking for one more operator. If interested, E-mail him at: iv3uhl1@...

TK, CORSICA. Salvatore, IK8UND, will be active as TK9R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Assisted entry. Look for activity on CW and RTTY before the contest. QSL via IK8UND direct ONLY.

TX3, CHESTERFIELD ISLAND. Operators George/AA7JV and Tomi/HA7RY report on their Web page that last minute tests and preparations are under way for the TX3A operation to take place between November 23rd and December 6th. Equipment is being packed and weighed. They have both weight and capacity constraints, and they like to keep things simple. Many improve-ments have been made to the equipment (antennas and radios). They have also loaded and tested RTTY hardware and software. There will be RTTY on Chesterfield Island, if they make it there! Read their complete update at: http://www.tx3a.com/news.html

TX5, AUSTRAL AND MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/ SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will be moving onto Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns will be TX5SPM. Remember, their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe

PSK31). The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V3, BELIZE. Rich, N0HJZ, will be active as V31MW from Placencia between October 17-26th. Activity will be on all bands during his stay. He will also operate as V31MW during the CQWW DX SSB Contest (October 24-25th) as a Single-Operator/All-Band/High-Power entry. Rich informs OPDX that he may be the only entrant on from Belize this year, so make sure you look for him. QSL via LoTW or direct with SASE.

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via VE3DZ. He will be there between October 21-26th.

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via VK6NE.

VP2M, MONTSERRAT. Operators George/K2DM, Peter/K3ZM, Glen/W4GKA and Jim/AD4J will be active as VP2MDG, VP2MZM, VP2MKA and VP2MIJ, respectively, from October 20-28th. The group will also be active as VP2MDG during the CQ WW DX SSB Contest (October 24-25th) as a Multi-Single entry. Also, look for VP2MDG on 6m SSB and VP2MZM on 160m CW outside the contest. QSL to their home callsigns.

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI), will once again be active as VP9KF from Baileys Bay, Hamilton Parish, between November 4-18th. Activity will only be CW on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/ Please, DO NOT send to the VP9 bureau.

VY1, CANADA (Yukon on 10 Meters!). "Yukon John", KL7JR, informs OPDX that plans are underway for the activation of Jacquot Island ("new one" in Kluane Lake) before and during ARRL's December 10 Meter Contest (December 11-13th). John states, "Hopefully the lake will be frozen enough to allow me to drive out to it! Can't seem to get there in summer- hi hi!" Look for VY1RST to concentrate on 10 meters for the contest and 14.260 (main) for non-contest activities. QSL via KL7JR by the CBA. LAST MINUTE ADD-ON: John/KL7JR and XYL Claire/WL7MY will be on 10-20 meters from Buckshot Betty's Cabins in Beaver Creek as VY1RST between November 19-23rd (before and during ARRL's November SS Phone Contest). E-mail for skeds at: KL7JR@...

W4, UNITED STATES (Special Event). As part of National Wildlife Refuge Week <http://www.nwrweek-radio.info/>, the South Florida DX Association (K4FK) will activate the Arthur R. Marshall Loxahatchee National Wildlife Refuge <http://www.fws.gov/loxahatchee> on Saturday, October 17th, from 1400-1830z, using the 1x1 call W4R. The station will be active on 20 and 40 meters SSB, and possibly CW. QSL via WA4WTG, with SASE.

WORLD WIDE DXPEDITION TROPHY (by Strange Radio Team). The Strange Radio Team presents the exclusive "WORLD WIDE DXPEDITION TROPHY" (WWDT) to the

DXpedition of the year that provided the greatest interest to the ham radio world. The DXPEDITION is chosen from a yearly survey which is available in many ham magazines (both Italian and international) and on the Web at: http://www.strangeradioteam.com
The current survey being taken is for DXpeditions which took place between June 1st, 2008, and June 1st, 2009. The survey will end January 31st, 2010. The DXPEDITION that is choosen/selected the most will be rewarded with a trophy. You can select or suggest a DXpedition at the following Web page at: http://www.strangeradioteam.com/wwdxt/index.asp
The award will be presented during the "International DX Convention" organized by Strange Radio Team. Currently, there are 70 DXpeditions to vote for.

YJ, VANUATU (OC-035). Tomas, VK2CCC, will be active as YJ0CCC between October 30th and November 5th. Activity will be limited, but operations will mainly be on 160/80 meters CW. Also, look for some activity on the new 60 meters band (5403.5 kHz USB). QSL via his home callsign, the bureau is preferred.

YS, EL SALVADOR. Members of the Club de Radio Aficionados de El Salvador (CRAS) will be active as YS1YS during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via YS1GMV. Operators mentioned are: Francisco/YS1FAF, Federico/YS1FEA, Mario/YS1GMV, Mario/YS1MAE, Jose/YS1MS and Florencio/YS1ZC.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) and the MDXC will be active as Z37M during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via Z37M, by the Bureau or from the info on QRZ.com. Operators mentioned are: Ant/IZ8CCW, Pasquale/IZ8IYX, Dario/IT9SSI, Antonello/IT9YVO, Gianni/IZ8CGS, Alex/IZ8MOQ, Dom/IZ8JAI, Venco/Z36W and Chris/Z35X. Look for more details on the MDXC Web page at: http://www.mdxc.org

11264. Ohio/Penn DX Special Bulletin #929.1

Yahoo group: DX-IS (2009)
Date: 2009-10-11 22:54:52 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 11264 Message: 11264

SB DX @ WW < KB8NW $OPDX.929.1
Ohio/Penn DX Special Bulletin No. 929.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 929.1
BID: $OPDX.929.1
October 11, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and Midway Island Web Page for the following DX information.

KH4, MIDWAY ISLANDS (Update). The K4M Web page is now reporting the following (as of 2100z, October 11th):
"Last night (as many of you know who watched N8E on flightaware.com) ended after only 1 hour in failure.

However, the flight last night was also a success in ruling out 7 swapped parts as not being the failure point. However they still didn't fix the problem. This morning they replaced the last of the possible parts. We have just returned from the hanger after visiting with the mechanics, who are tired of seeing our faces and are telling us so! They are pretty sure (yeah we heard that before) that they now have isolated the leaking part. They have replaced it and are about to run up the engine again. Following protocol they should be in the air within an hour to begin their test flight. Our destination is over open ocean and there are no emergency landing strips along the way. They can not take us to Midway until they know they can fly the distance without issue. We are also still frantically searching for alternatives, but there are no planes on Midway certified to fly there by F & W. There is a possible plane on the way to Hawaii from Las Vegas and we are pursuing this.
This is rare for a reason.
The minute we know this test flight is a success we will update the website and we are in a standby position. Wish us luck."

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-October, through Sunday, 11th-October there were 226 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/c, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FR, FR/g, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP6, VP8, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (QRT). The 3D20CR is now QRT as of October 8th. Last report is that the team made over 32k QSOs. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are most likely to be sent out in January 2010). For more details and possible updates, see their Web page at: http://www.conwayreef2009.de

Also watch QRZ.com for updates at: http://www.qrz.com/db/3d20cr

4O, MONTENEGRO. Tonno, ES5TV, will be active as 4O3A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. Activity will be from Ranko, 4O3A, superstation. QSL via 4O3A, direct or by the LoTW.

4S, SRI LANKA. Operators Heinz/DL1IH and Salvo/DH7SA are expected to be active as 4S7AAG and 4S7SAG, respectively, during a holiday DXpedition sometime in October. Stay tuned!

4X, ISRAEL. Yoshi, JE2EHP, will be active as 4X/K1HP from Tel Aviv and Jerusalem in Israel between October 29th and November 5th. Activity will be on all the HF bands and 6m, using CW, SSB and RTTY. QSL is via Bureau to his home callsign JE2EHP.

5B, CYPRUS. John, G4IRN, will be active as 5B/G4IRN between November 27-30th. Activity will include a CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (??) entry. QSL via LoTW or via G4IRN.

5Z, KENYA (IOTA Op). Operators Enrico/5Z4ES, Francesco/IK8TEO, Antonio/ IK8UHA and Anthonio/IK8VRH are planning to be in Kenya and activate two IOTA islands between February 10-20th (2010). Callsign will be 5Z0H (IK8VRH informs OPDX that this will be the only time [first time] the 5Z0 prefix will be used) and islands mentioned are Lamu Island (AF-040) and Wasini Island (AF-067). QSL via LoTW, by the Bureau or direct to IK8VRH: P.O. Box 173, I-80016 Marano (NA), Italy. Visit the 5Z4H Web page at: http://5z4h.sitonline.it

6V, SENEGAL. Just a reminder that Seb, F8IJV, will be on his honeymoon here between October 15th and November 1st. He plans to be active in the CQWW DX SSB Contest (October 24-25th). He will try to operate before and after the contest as 6V7Q on 160-6 meters, mainly on SSB and the Digital modes. He will be operating from Jean-Francois, 6W7RV, QTH in La Somone. QSL via F8IJV.

8Q, MALDIVES. Jim, G3VDB, will be active 8Q7EJ from Vilamendhoo Island (AS-013) between now and October 25th. Activity will be holiday style and subject to hotel permission and local conditions. Look for operations on CW, RTTY, PSK31 and possibly SSB. He will use 100 watts into wire antennas. QSL via his home callsign.

CM2, CUBA. Frank, CM2IR, informs OPDX that he is on 40 meters using BPSK31 on 7035 kHz (IOTA NA015 and GRID LOCATOR EL83tc). He is also on SSB around 7150 and 7170 kHz (times not provide). QSL via EB7DX, QSL Manager with 2 USDs or IRCs. QSL SENDING ONLY BY REQUEST!!!

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (??) entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (???) entry. He is testing wire yagis/beverages on lower bands. QSL via OH2BYS.

EA9, CEUTA AND MELILLA. A group of Spanish operators will be active as EE9Z during the CQWW DX SSB Contest (October 24-25th) as Multi-2 or Multi-Single entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jose/EA9CD, Enrique/EA9GW, Jose/EA9PY, Mariano/EA9LS and Jorge/EA9LZ.

EI, IRELAND (On the Bird!). Marc, W4MPS, will be active as EI/W4MPS from County Cork between October 16-26th. Most of the time he will be in Grid IO52, although he may also travel to IO42 and IO51 (if the family ever lets him out of the pub). Marc states that he uses a FT-60R at 5 watts and an Arrow antenna on AO-51.

FS, SAINT MARTIN (Possible PJ7). Craig, AH8DX, will once again be active as FS/AH8DX starting October 22nd. Activity will include the CQWW DX Contest (October 24-25th) as a Single-Op/All-Band entry. Operations outside of the contest will be on 160/80 meters CW and SSB. Look for 40 meters RTTY also. QSL via AH8DX direct or via LoTW. Craig may also be active as PJ7/AH8DX from St. Maarten.

FT/G, GLORIOSO ISLAND (QRT). The FT5GA team is now QRT and is happy that the goal of 50k QSOs was reached by a crew of 5 operators with two and sometimes three stations. The FT5GA went QRT on October 7th (a day earlier than expected due to the military flight schedule). According to their Web page, they have made a total of 50427 QSOs with 15250 unique callsigns (24235/CW, 21080/SSB and 5112/RTTY). For updated details, visit the FT5GA Web page at: http://glorieuses2008.free.fr
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA
LATE MINUTE ADD-ONS: Didier, F5OGL, states, "The logs of the FT5GA operation will be very soon on LoTW." Also, a couple of pictures of the operation are now available at: http://picasaweb.google.fr/MauriceF5NQL/FT5GA#

HC8, GALAPAGOS ISLANDS. A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal (SA-004, WLOTA L0094) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via W5UE.

HG0, HUNGARY (WFF Op). This October, members of the Regionalis Radios Sportklub Puspokladany plan to start a year long activation of different Hungarian National Parks that qualify for the WFF program (see the Web page at: http://www.wff44.com/en). The first event will take place from the Hortobagy National Park <http://www.hnp.hu/index_en.php> between October 12-18th. The area has a reference number of HAFF-006. They will use the special callsign HG0WFF. QSL by the Bureau is "OK", but their QSL Manager is HA0HW. Some of the operators will use their own callsign with mark /p.

HP, PANAMA. Members of the Radio Club de Panama (HP1RCP) will be active during the 2009 JOTA event, October 17-18th, from Panama City, Panama, Colegio La Salle assisting Troop 4.

ID9N VIDEO AVAILABLE ON YOU TUBE! Members of the Noantri DX & Contest Team that were active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001) in April, now have a video available on YouTube at: http://www.youtube.com/watch?v=iwbJb66leaM

INDIAN OCEAN GRIDS (On the Birds). Jim, ND9M/VQ9JC, sailing toward Diego Garcia (VQ9) at about 27, will be activating the following grids during the following AO-51 passes:
October 11th at 2258z - MI95 or MI96 (as ND9M)
October 12th at 1304z - MI84 (as ND9M)
October 12th at 2355z - MI63 (as either ND9M or VQ9JC)
October 13th at 1224Z - MI62 (as VQ9JC)
Jim will try to be active for AO-27 on Monday (October 12th/0757z) and Tuesday (October 13th/0906z). Those times are during his work schedule, and he may not be able to set up. Also, Jim "may" be active on SO-50 for very late passes Sunday (October 11th/1924z for MI96 or NI06) and Monday night (October 12th/1814z for MI73 or MI63). Jim is operating full duplex with an FT-897D (TX) and FT-817ND (RX).

IOTA NEWS.....
EU-038. Ben/DO1BEN and YL Barbara/DO1IQ will be active as PD/homecalls from Texel Island (WLOTA L0043) between October 16-22nd.
Activity will be on the HF bands, propagation permitting.
QSL via their home callsigns, the Bureau is preferred.

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG, Antonino/IT9SAZ and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545), between October 24-25th, for the CQWW DX SSB Contest as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-118. RARE IOTA! Operators Oscar/EA1DR, George/EC2ADN, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning a DXpedition to Flannan Isles (a extremely difficult island to land on) during sometime early/mid-June, 2010. Last activation was in 2002 (also in 1989 and 1995). QSL Manager will be M0URX. More details, the callsign and Web site will be forthcoming.

NA-036. Rob, VE7RSV, will be active from Vancouver Island (CISA BC001, WLOTA L0858) during the W/VE Islands QSO Party (October 17-18th). QSL via address on QRZ.com.

OC-142. Ray, K9LUK, will be active as K9LUK/VK4 from Frazer Island between October 18-23rd. QSL via his home callsign direct.

SA-008. Orlando, PY2TJ, will be active as LU/PY2TJ from Isla Tierra Del Fuego (WLOTA L2448) between November 1-7th. Activity

will be on all HF bands. QSL via PT2OP, direct is preferred
or by the Bureau.

SA-058. Members of the Grupo DX Caracas will be active as YW5F from
Farallon Centinela Island between November 6-9th. Activity
is to celebrate the 20th anniversary of the Caracas DX Group.
Operations will be on 80-2 meters using CW, SSB and FM. QSL
via DM4TI.

J5, GUINEA-BISSAU. Jose, CT1DSV, will be active as J5S between October
12-18th (especially between October 17-18th). QSL via his home callsign.

J8, ST. LUCIA. John, W5JON, will once again be operating from the hilltop
QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between
October 20-30th. His callsign will be J68JA. Reference numbers are: IOTA
NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including
60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into
the following antennas: Alpha Delta DX-LB and DX-EE Dipoles, and a 3
element yagi on 6m. Activity will also include the CQWW DX SSB Contest
(October 24-25th) as a Single-Op/All-Band entry. QSL via W5JON. John
adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

JT1, MONGOLIA (EME Op). Operators Jeremy/W7EME and Jim/K7YO are active
on 2 meter EME from Mongolia as JT1UN and JT1UN/JT5, and also JT1YO
and JT1YO/JT5 on 70cm, until October 14th. Activity will be from the
JT1KAA HQ station of the Mongolian Amateur Radio Society. This operation
will be the first Moon Bounce QSO from Mongolia. For more information,
please visit: http://www.w7eme.org/ulaanbaatar

KH4, MIDWAY ISLANDS (OC-030). On Saturday, October 10th, the following
press release was sent out from Tom, N4XP: "The entire team is in Honolulu.
On Thursday when the first members were to depart to Midway we were
informed of a problem with the plane involving an oil leak. We were
assured it was fixable. Friday several test flights were made that
determined that the repairs were unsuccessful. We are frantically
searching for alternative means. We discovered yesterday that there
are no available planes on the island that are either certified to fly
to Midway or large enough for us. We are negotiating with a company in
California for a jet as well. The plane we originally chartered is about
to take off on a test flight to determine if the repairs made overnight
were successful. The team is not giving up and exploring ALL options to
make this happen. Fish and Wildlife is being very supportive of our
efforts but in no way will they extend the end date of our operation
beyond the 19th due to the return of migratory species that have already
begun to return early. We will update this website in 5 or 6 hours when
the plane returns and is checked out. We are as frustrated as you."
On Sunday, just before going to print, a statement on the KH4 Web page
states, "(0400z) We have just learned our aircraft is in the air testing
repairs made in the past 24 hours. We are anxiously waiting the results."
For more details, updates, online log, frequencies and bios, go to:
http://www.midway2009.com

QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA 30620-9989 USA) or LoTW. See the above Web page for complete details.

KH6BZF PROPAGATION FORECAST/REPORT (For October 12-18th)....
Oct 12 AN SOLAR REFERENCE
Oct 13 AN ---------------
Oct 14 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 15 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 16 AN LN - Low Normal
Oct 17 AN
Oct 18 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Lee, KH6BZF, informs OPDX that a relief fund is now set up for American Samoa at: C/O BANK OF HAWAII, ATTN: AMERICAN SAMOA RELIEF, 111 SOUTH KING STREET, HONOLULU, HI 96813.

MU, GUERNSEY. Gerhard, OE3GEA, will be active as MU/OE3GEA from Guernsey (EU-114, WLOTA L0013) between October 27-29th. Activity will be on the HF bands using CW and low power only. QSL via his home callsign, direct or by the Bureau.

NYQP IS BACK! (After 25 years!) The Rochester DX Association looks forward to your support and participation in the 2009 New York QSO Party. The event takes place Saturday, October 17th, starting at 1800z (2:00 PM Eastern) for 12 hours. Check out the NYQP Web page for complete rules, FAQ's, Software, Forum, County maps and Log submissions at: http://www.NYQP.org Over thirty plaques to be awarded. <http://www.NYQP.org/sponsorship.php>

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. Operators mentioned are: Juha/OH1JT, Timo/OH1NOA, Jouko/OH1RX, Timo/OH1TM, Ari/OH5DX, Tomi/ OH6EI, Timo/OH6GLE and Juha/OH6XX. QSL via W0MM.

PJ2, NETHERLANDS ANTILLES. Members and non-members of the Caribbean Contesting Consortium (CCC) will activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. QSL via N9AG or LoTW. Operators mentioned are: Geoff/W0CG/PJ2DX, David/G3NKC, Martin/G4XUM, Kyle/WA4PGM, John/K6AM, Wayne/K8LEE, Joe/W9JUV, Kelly/N0VD and Richard/N0YY. Operators will sign as PJ2/homecall before the contest on all bands and modes. QSL via their home callsigns. Visit the CCC Web site at: http://www.pj2t.org

QSL INFO AND NEWS.....
TC1ELH via POB 73, Karakoy 34421, Istanbul, Turkey. There was activity by the TCSWAT from the Marmara Eregli Lighthouse (TUR059) during this past weekend. This was the first activation of the lighthouse. If you are interested in Lighthouse activities, please check the Web site for

upcoming TCSWAT events and awards at: http://www.tcswat.org

QSLS VIA LOTW: 5W0VK and XV3RRC

QSLS RECEIVED VIA MAIL: 6I7CQ, 6J2T, 7P8OK, A45WD, A61Q, EA9IB, T6AD, TO8YY, TU5JM, V51AS, XF4T, YS1MAE, Z29KM and ZK2V

QSLS RECEIVED VIA THE BUREAU: EZ8BO, EZ10BO, EZ21BO, EZ75BO, EZ56BO, EZ60SB, EZ3A, EZ75R, EZ21A, EZ56V, EZ10A, EZ8CW and EZ8-001

TC1, TURKEY. Club members for the TRAC Istanbul Branch (TA1KB) will activate their new club station using the special callsign TC1IEM between October 16-18th, for the "Istanbul Eurasia Marathon". The race will take place on October 18th, and it is the only marathon race that starts from Asia and ends in Europe. Details about the race are on: http://www.istanbulmarathon.org/en/index.php
The race course is only two hundred meters away from the new club station. Activity will be on the HF bands. QSL via the TA Bureau is preferred (or direct to TA1KB).

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQ WW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as Single-Op/Single-Band (40m) entries. QSL via LX1NO.

TK, CORSICA (Contest and IOTA Op). Paolo, IV3UHL, will be active as TK/IV3UHL during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/ Single-Band (20m) entry. QSL via IV3UHL. He states that he will probably activate EU-164 before the contest. He is also looking for one more operator. If interested, E-mail him at: iv3uhl1@...

TK, CORSICA. Salvatore, IK8UND, will be active as TK9R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Assisted entry. Look for activity on CW and RTTY before the contest. QSL via IK8UND direct ONLY.

TX3, CHESTERFIELD ISLAND. Operators George/AA7JV and Tomi/HA7RY report on their Web page that last minute tests and preparations are under way for the TX3A operation to take place between November 23rd and December 6th. Equipment is being packed and weighed. They have both weight and capacity constraints, and they like to keep things simple. Many improve-ments have been made to the equipment (antennas and radios). They have also loaded and tested RTTY hardware and software. There will be RTTY on Chesterfield Island, if they make it there! Read their complete update at: http://www.tx3a.com/news.html

TX5, AUSTRAL AND MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/ SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will be moving onto Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns will be TX5SPM. Remember, their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe

PSK31). The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V3, BELIZE. Rich, N0HJZ, will be active as V31MW from Placencia between October 17-26th. Activity will be on all bands during his stay. He will also operate as V31MW during the CQWW DX SSB Contest (October 24-25th) as a Single-Operator/All-Band/High-Power entry. Rich informs OPDX that he may be the only entrant on from Belize this year, so make sure you look for him. QSL via LoTW or direct with SASE.

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via VE3DZ. He will be there between October 21-26th.

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via VK6NE.

VP2M, MONTSERRAT. Operators George/K2DM, Peter/K3ZM, Glen/W4GKA and Jim/AD4J will be active as VP2MDG, VP2MZM, VP2MKA and VP2MIJ, respectively, from October 20-28th. The group will also be active as VP2MDG during the CQ WW DX SSB Contest (October 24-25th) as a Multi-Single entry. Also, look for VP2MDG on 6m SSB and VP2MZM on 160m CW outside the contest. QSL to their home callsigns.

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI), will once again be active as VP9KF from Baileys Bay, Hamilton Parish, between November 4-18th. Activity will only be CW on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/ Please, DO NOT send to the VP9 bureau.

VY1, CANADA (Yukon on 10 Meters!). "Yukon John", KL7JR, informs OPDX that plans are underway for the activation of Jacquot Island ("new one" in Kluane Lake) before and during ARRL's December 10 Meter Contest (December 11-13th). John states, "Hopefully the lake will be frozen enough to allow me to drive out to it! Can't seem to get there in summer- hi hi!" Look for VY1RST to concentrate on 10 meters for the contest and 14.260 (main) for non-contest activities. QSL via KL7JR by the CBA. LAST MINUTE ADD-ON: John/KL7JR and XYL Claire/WL7MY will be on 10-20 meters from Buckshot Betty's Cabins in Beaver Creek as VY1RST between November 19-23rd (before and during ARRL's November SS Phone Contest). E-mail for skeds at: KL7JR@...

W4, UNITED STATES (Special Event). As part of National Wildlife Refuge Week <http://www.nwrweek-radio.info/>, the South Florida DX Association (K4FK) will activate the Arthur R. Marshall Loxahatchee National Wildlife Refuge <http://www.fws.gov/loxahatchee> on Saturday, October 17th, from 1400-1830z, using the 1x1 call W4R. The station will be active on 20 and 40 meters SSB, and possibly CW. QSL via WA4WTG, with SASE.

WORLD WIDE DXPEDITION TROPHY (by Strange Radio Team). The Strange Radio Team presents the exclusive "WORLD WIDE DXPEDITION TROPHY" (WWDT) to the

DXpedition of the year that provided the greatest interest to the ham radio world. The DXPEDITION is chosen from a yearly survey which is available in many ham magazines (both Italian and international) and on the Web at: http://www.strangeradioteam.com
The current survey being taken is for DXpeditions which took place between June 1st, 2008, and June 1st, 2009. The survey will end January 31st, 2010. The DXPEDITION that is choosen/selected the most will be rewarded with a trophy. You can select or suggest a DXpedition at the following Web page at: http://www.strangeradioteam.com/wwdxt/index.asp
The award will be presented during the "International DX Convention" organized by Strange Radio Team. Currently, there are 70 DXpeditions to vote for.

YJ, VANUATU (OC-035). Tomas, VK2CCC, will be active as YJ0CCC between October 30th and November 5th. Activity will be limited, but operations will mainly be on 160/80 meters CW. Also, look for some activity on the new 60 meters band (5403.5 kHz USB). QSL via his home callsign, the bureau is preferred.

YS, EL SALVADOR. Members of the Club de Radio Aficionados de El Salvador (CRAS) will be active as YS1YS during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via YS1GMV. Operators mentioned are: Francisco/YS1FAF, Federico/YS1FEA, Mario/YS1GMV, Mario/YS1MAE, Jose/YS1MS and Florencio/YS1ZC.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) and the MDXC will be active as Z37M during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via Z37M, by the Bureau or from the info on QRZ.com. Operators mentioned are: Ant/IZ8CCW, Pasquale/IZ8IYX, Dario/IT9SSI, Antonello/IT9YVO, Gianni/IZ8CGS, Alex/IZ8MOQ, Dom/IZ8JAI, Venco/Z36W and Chris/Z35X. Look for more details on the MDXC Web page at: http://www.mdxc.org

Yes, Craig K9CT posted this to the SMC mailing list:

"We are boarding the plane for Midway soon. Departure at 0100Z. 4 and half hour flight. Cross your fingers! Watch www.midway2009.com for updates. We will have internet there. 73, Craig K9CT"

I hope Craig doesn't mind my posting it here.

11269. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-12 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11269

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 12 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 285 Issued at 2200Z on 12 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 11/2100Z
to 12/2100Z: Solar activity was very low. No significant flare
activity occurred. The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 11/2100Z to 12/2100Z:
Geomagnetic field activity was at quiet levels. The recurrent coronal
hole high-speed stream that commenced yesterday began to gradually
subside early in the period. Velocities gradually decreased from 435
to 350 km/sec during the period.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels during days 1 - 2 (13 - 14 October).
Activity is expected to increase to quiet to unsettled levels on day
3 (15 October) as an equatorward extension of the northern crown
coronal hole begins to influence the field.
III. Event Probabilities 13 Oct-15 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 12 Oct 070
Predicted 13 Oct-15 Oct 070/070/070
90 Day Mean 12 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 11 Oct 007/006
Estimated Afr/Ap 12 Oct 002/003
Predicted Afr/Ap 13 Oct-15 Oct 005/005-005/005-007/007
VI. Geomagnetic Activity Probabilities 13 Oct-15 Oct
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11270. 6W/OK1FZM on Midway

Yahoo group: DX-IS (2009)
Date: 2009-10-13 00:00:08 UTC
From: aburkefl
Topic: 11270 Message: 11270

Al, VE1AL, pointed out the other night that 6W/OK1FZM was bumping along quite nicely, with a good pileup and not getting spotted. Well, he's making up for it tonight!

He's been spotted numerous times as K4M! Doesn't seem to matter that his signal is peaking in the opposite direction from KH4 or that his call contains about three times as many letters as the K4M....

Additionally, I saw somewhere from a pilot station that their first effort would most likely be on 20 SSB.

I worked somebody there many years ago on 20 CW. Be nice to get some band fills - guess I'll have to slog through the BS to get them on SSB!

From: Paul M Dunphy
Topic: 11278 Message: 11278

It sure was nice to hear K4M on 30M today working stations at a good clip with minimal QRM and not many inappropriate DX Cluster spots. They came out of the noise just past dawn here, and peaked around 11:15 UTC or so, about 45 minutes earlier than I would have expected. The opening was about 90 minutes in total, although they were only workable for about half that time. At their strongest they were S7 in Nova Scotia.

As the saying goes, "Better late than never." I would think these guys are going to put a lot of QSOs in many of our logs over the next week. They sure have started off with a bang.

Oh, I'll bet they DO know! They just don't care!

Recently, an acquaintance of mine grinningly stated that he used to run well over 2kW when he was active. He currently resides in a retirement community and has a flagpole antenna. If he dared run 2kW from there, the RFI would be staggering.

:Issued: 2009 Oct 13 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 286 Issued at 2200Z on 13 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 12/2100Z
to 13/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 12/2100Z to 13/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels on day 1 (14 October). Activity is
expected to increase to quiet to unsettled levels on days 2 - 3 (15
- 16 October) as an equatorward extension of the northern crown
coronal hole begins to influence the field.
III. Event Probabilities 14 Oct-16 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 13 Oct 070
Predicted 14 Oct-16 Oct 070/070/072
90 Day Mean 13 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 12 Oct 001/002
Estimated Afr/Ap 13 Oct 001/003
Predicted Afr/Ap 14 Oct-16 Oct 005/005-007/007-007/007
VI. Geomagnetic Activity Probabilities 14 Oct-16 Oct
A. Middle Latitudes
Active 05/10/10
Minor storm 01/01/01
Major-severe storm 01/01/01

From: AD5VJ Bob
Topic: 11287 Message: 11287

I was fortunate to work Midway on 30 and 20 tonight.

The contact on 20 was SSB. Not bragging, just saying this to also say ---'beware'---

After I worked him on 20 phone I thought I would relax with a cup of coffee on the porch and just sit back and listen to the pile up
for a little while.

Never heard this before tonight, but some jerk recorded my calling and was retransmitting my signals from earlier.

Luckily he didn't have propagation to K4M and was not heard, but a person could potentially get disqualified from the log with a
jerk doing illegal garbage like this.

I hope he just had a wild hair and doesn't do it anymore, but beware and listen for your call should you make contact with the
Island or any other DXpedition I suppose.

Not sure how one would protect themselves from such shenanigans.

That happened to me some years ago, too. I believe it was that ZS op (Barry?) who was on ZL8 or ZL9 I was trying to work.

I guess some people have nothing better to do.

That was a "trick" used for many years on DX Nets by Net haters
to confuse and disrupt them. I've never heard it done on with a
DXPedition before. Sure is a mean spirited thing to do.

Like you say Zack, some people have nothing better to do. Oh
well, as I was told 25-30 years ago, Ham radio operators are a cross
section of the population just like any other group. There are the
super good, the good, the average, the poor and the down-right
mean. It was true then, and it is true now.

I listened to the K4M operation a little on 20 CW yesterday and was surprised at the size of the pileup! Is Midway a fairly rare DX entitity? Or is it just people there for the thrill of the chase or a new point for the CQ magazine DX marathon? Glad I have it confirmed on 20 and 10 CW already.

I've heard my callsign over the air a time or two. There was a guy in our area who was bored and would work the DX not only with his call but with any of his friends too. Some like it - I didn't and told him to quit doing it. I do have several CW contacts on 15 metres but never found out who was doing that. Wern't me as I've never made a CW contact on the air .... ..

It falls in somewhat the same category as KP1 and KP5,
John. Used to be active all the time when the US military had a base
there, but that has been gone for over a decade and the US Fish &
Wildlife Service restricted access. I think this is the first
operation in about 8-9 years. They had to go through a lot of
paperwork to get permission to even go for this short trip, and the
departure date of 19 October is cast in stone due to some migratory
bird pattern, I believe. That was the concern when they were stuck
in Honolulu . . . they had to leave on the 19th regardless of when
they got there, so every day lost in KH6 meant a day less operating.

As to the frenzy, DXers are Dxers. Few who can hear anything
rare like that will not jump into the pileups. (Some who can't hear
them jump in anyhow! :-)) I don't think the CQ Marathon has much
impact on people working DXpeditions. It has a bit, but of the tens
of thousands of DXers in the world, I don't think a very large
percentage participate in the DX Marathon. We work the DX because it
is there. The thrill of the hunt . . . even though we may have it
confirmed on that band/mode from previous DXpeditions.

John, my Midway confirmation is so old that LOTW shows NO band entity,
so I am looking to pick up band entities from this operation. So far
have 30(2 elements at 70 feet), and 20, & 15 worked with my ancient old
Cushcraft A3(over 20 years old) and my mighty 400 watts on 20 & 15. Not
a big gun here, but always remember: Age & treachery will overcome youth
& skill.

There may be others with the same goal.

Hi Mike,

What is it like having a 30 meter beam? I have found that 30 is an excellent band for DXing, and given that most people probably don't have a beam on that band, you should have a leg up on most of them. Wish I had the space for one.

Hi Paul,

I figured that and think pretty much the same way, although I do get into the CQ DX marathon each year which will have me chasing some fairly common countries just cause I need them each year. I was just surprised at the size of the pileup, it was larger than anyone other one I have heard recently, but I guess there are lots of new DXers who need KH4 since it has been 2001 or so when they were on last.

I'm in the same boat. I worked KH4/NH6D back in 1981 on 20M CW. Never heard Midway since then, although I was absent from the air for a big chunk of time (1987 - 2004). That lone CW contact (fortunately confirmed) was all I had until last night.

Marsha and I both managed to work them last night on SSB. When we came back from the grocery store, I jokingly/seriously told her condx would open up on 17 - condx out to the Pacific, including Japan, often improve here after dark, sometimes *well* after dark! Couldn't hear a peep on 17 (except for the ubiquitous frequency cops).

There was noise galore on 20M (14200) but K4M would rise and fall out of the muck and I finally convinced myself I could hear him well enough to try. I think it took around 30 minutes. He would ID with "K4M up 5" but he was working 'em from 5 to 15 up - I snared him about 9 up.

I hollered at Marsha and she came in to give it a whirl. I grabbed a book and sat off to the side while she grabbed my rig and started tuning. About 20 minutes later, she chuckled at something, and kept calling. A couple of calls later, she got through. I heard "QSL the 59, you're also 59. Thanks Kevin."

I asked her how she knew the guy's name was Kevin. She related what she'd heard a couple of minutes before when she was laughing. She heard the op say "The call is Kilo Four Mike" - pause - "I'm on Midway Island." - another pause - "My name is Kevin."

di-di-di-dit-di-dit!

Now for some more (hopefully!) band fills.

11298. DX Distances and Propagation

Yahoo group: DX-IS (2009)
Date: 2009-10-14 16:16:28 UTC
From: aburkefl
Topic: 11298 Message: 11298

This morning I saw a post/comment on the cluster alluding to the fact (opinion!) that KH4 isn't that much farther away than KH6. It's surprising that comments like this appear as often as they do. What appears to be just a few inches on the map....

From my location in central Florida, it's about 4,600 miles to Hawaii, as the crow flies (hopefully carrying some radio signals with him!). It's more than a thousand miles further to Midway!

Over the years, I can remember hearing and seeing comments from DXpeditioners (both casual and serious) in the Pacific arena who have received queries from hams like "...are you stopping in (fill in the blank), it looks real close to where you are, not having the foggiest idea that it's actually hundreds, if not thousands of miles away - and sparse transportation to get there!

During my 30+ years of hamming, I've tinkered with numerous propagation programs, including W6ELProp and VOACAP (upon which many propagation programs are based). My favorite was one I discovered several years ago - ACE-HF. I think it is also based on VOACAP. It is very colorful, has a modest learning curve, but very informative once you gain some proficiency with it. Regardless, none of the programs seem to deal very well with the conditions we're currently suffering.

The higher bands (those above 20M in terms of frequencies) seem very "susceptible" (for lack of a better word) to "spot-lighting." This is my term for propagation that seems incredibly selective (and sometimes not so incredibly selective). The cluster will show K4M on 17M somewhere in the SE US and there's not a peep in central Florida. Granted, a guy with a dipole at 30 feet might not hear much, but I have a 4-el SteppIR at 70 feet. It isn't exactly an RF sponge, but it's no slouch.

Sometimes it's even worse, in terms of coverage, when you see that someone 200 miles away is reporting the station at 5x5 and there's still no peep at your locale. In the current sunspot "trough," this "spot-light propagation" seems to occur sometimes on 17, more often on 15 and with much more regularity on 12 and 10 - the guy next door can hear, but you can't!

By contrast (and my wife has not been licensed long enough to experience this), when the solar flux gets well into triple digits, you get marvelous occurrences like discovering 10 meters open all night (certainly 20 being open all night!) and coverage being incredibly widespread on many bands.

What we have to hope for now is a series of "convergences," i.e., solar flux will go up big time, someone will want to revisit Midway when propagation is much better, the NWS will let them go there and we're all still alive to enjoy it!

Guess it depends on how you define "Hawaii". Kure, which is part of Hawaii, is only 50-75 miles from Midway.

Subject: [DX-IS] K4M strange happening after contact

I was fortunate to work Midway on 30 and 20 tonight.

The contact on 20 was SSB. Not bragging, just saying this to also say ---'beware'---

After I worked him on 20 phone I thought I would relax with a cup of coffee on the porch and just sit back and listen to the pile up
for a little while.

Never heard this before tonight, but some jerk recorded my calling and was retransmitting my signals from earlier.

Luckily he didn't have propagation to K4M and was not heard, but a person could potentially get disqualified from the log with a
jerk doing illegal garbage like this.

I hope he just had a wild hair and doesn't do it anymore, but beware and listen for your call should you make contact with the
Island or any other DXpedition I suppose.

Not sure how one would protect themselves from such shenanigans.

Hi John:

It's absolutely wonderful. I have had it up now for about 5 years. With only 100 watts, I rarely stand in line for more than 1-3 calls, even in a big pile-up. I think it took me two calls on K4M.

It's one that I designed & built, and a friend put up the tower for me. It has made it through two hurricanes here in East TX. I love 30 meters, since I don't have to deal with the usual collection of idiots on SSB, which I rarely work. I do some SSB on 6 meters, and very rarely on the other bands. On other than 6, I probably don't make more than 20 SSB contacts/year, except for the 160 meter phone contest. Go to my Call page on QRZ, or to my web site for a picture.

73,
Mike, W5UC

11302. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-14 22:21:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11302

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 14 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 287 Issued at 2200Z on 14 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 13/2100Z
to 14/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 13/2100Z to 14/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels on days 1 and 2 (15 - 16
October) as an equatorward extension of the northern crown coronal
holes begins to influence the field. Activity is expected be mostly
quiet by day 3 (17 October).
III. Event Probabilities 15 Oct-17 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 14 Oct 071
Predicted 15 Oct-17 Oct 072/072/072
90 Day Mean 14 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 13 Oct 002/002
Estimated Afr/Ap 14 Oct 001/003
Predicted Afr/Ap 15 Oct-17 Oct 007/007-007/007-005/005
VI. Geomagnetic Activity Probabilities 15 Oct-17 Oct
A. Middle Latitudes
Active 10/10/05
Minor storm 01/01/01
Major-severe storm 01/01/01

I guess when I think of Hawaii, I think of Honolulu, Diamond Head, Waikiki beach, etc.

Is it Kure that is technically the very last island in the Hawaiian chain?

Yes, Kure is the last island in the Hawaiian Islands, and is part of Honolulu County. From a geographic standpoint Midway Island is also part of the Hawaiian chain, but not from a political standpoint.

11305. Midway signal strength

Yahoo group: DX-IS (2009)
Date: 2009-10-15 02:12:19 UTC
From: John Geiger
Topic: 11305 Message: 11305

How are other stations hearing K4M? They have not been loud at all at my QTH, at least when I am listening-they are either at the noise level or completely unreadable. Are others finding them fairly weak as well? I know my antennas aren't much, but I heard TX5SPA with no problem and worked 3D2KJ easily on 30 meters last night.

73s John AA5JG

John,
I haven't heard them on any band except 40m.
They were anywhere from Q4 to armchair copy from 5 am to 9am (and I'm sure they were in there from 2 am to 5 am before I woke up).
That's on a 174' doublet up 50'

I heard K4M 120 mins past my sun rise on 80 and 40

I have managed to work them on 5 bands without any probs usually calling a couple of times to get them

80m was loud but 40m was blowing the socks off the meter

15/17/30/40/80 all in the log with cw and or cw/ssb on bands

I have no interest in 20m

waiting on 160 and I should be done

Great story Art!

I have a similar experience to you with KH4. I didn't get a QSL from the guy I worked there (WH6O/KH4 back in 84) and he later lost his logs in Hurricane Andrew....sad story all round...

I managed to get K4M on 20m SSB first call by chance, no skill involved but the amp was on and no one else was calling...

Worked them also on 15/20CW, so great operation so far.

They have had a good presence on 30/40/80 so far, I hope this continues and the piles subside...

Good luck to all,

73, Lance - VK6DU

Subject: [DX-IS] Re: Rarity of Midway

I'm in the same boat. I worked KH4/NH6D back in 1981 on 20M CW. Never heard Midway since then, although I was absent from the air for a big chunk of time (1987 - 2004). That lone CW contact (fortunately confirmed) was all I had until last night.

Marsha and I both managed to work them last night on SSB. When we came back from the grocery store, I jokingly/seriously told her condx would open up on 17 - condx out to the Pacific, including Japan, often improve here after dark, sometimes *well* after dark! Couldn't hear a peep on 17 (except for the ubiquitous frequency cops).

There was noise galore on 20M (14200) but K4M would rise and fall out of the muck and I finally convinced myself I could hear him well enough to try. I think it took around 30 minutes. He would ID with "K4M up 5" but he was working 'em from 5 to 15 up - I snared him about 9 up.

I hollered at Marsha and she came in to give it a whirl. I grabbed a book and sat off to the side while she grabbed my rig and started tuning. About 20 minutes later, she chuckled at something, and kept calling. A couple of calls later, she got through. I heard "QSL the 59, you're also 59. Thanks Kevin."

I asked her how she knew the guy's name was Kevin. She related what she'd heard a couple of minutes before when she was laughing. She heard

the op say "The call is Kilo Four Mike" - pause - "I'm on Midway
Island." - another pause - "My name is Kevin."

di-di-di-dit-di-dit!

Now for some more (hopefully!) band fills.

This seems to be one of those DXpeditions where the "black hole" you guys always talk about is actually getting better signals than we are here in the SE. I've heard them each morning on 30, 40 and 80, but came away empty-handed. When I see reports of them on 17 and 15 from numerous locations, we can hear nothing but whispers or nothing but noise.

Here in the BLACK HOLE of Central Illinois, K4M has never been above S-4 on 20 (with noise at S-3). Yesterday at 1758 UTC I did work them but they had to call me twice as I missed them the 1st time due to noise and fade. 40M SSB hasn't been good enough to try although I have spent several hours early this morning trying on 40 CW with no luck.

This seems to be one of those DXpeditions where the "black hole" you guys always talk about is actually getting better signals than we are here in the SE. I've heard them each morning on 30, 40 and 80, but came away empty-handed. When I see reports of them on 17 and 15 from numerous locations, we can hear nothing but whispers or nothing but noise.

I'm about 30 miles west of Dave (AA6YQ) in MA. No problem hearing them on 17-80. Missed them on 80ssb yesterday morning but that was the pileup. I should have them on all the other bands. Listening to them on 40ssb right now (59)

I had the same problem you are having with 3D20CR on the high bands. Horrible reception in spite of the forecasted propagation...must have something to do with the number of bounces since both groups have/had plenty of talent and gear.

Interesting but the banner ad on the top of this Yahoo page is being blocked by my AVG virus protection with the following message....

Danger: AVG Search-Shield has detected active threats on this page and has blocked access for your protection.

If this is true you would think that Yahoo would be a bit more careful in who it allowed to post ads. Haven't gone any deeper since I'd have to override AVG to see it...

Finally got them on 40 CW this morning after 45 minutes of calling. They hit S7 at times, by far the best I have heard them. Signals from them have been non-existant on 17m and 20m so far.

Decent to big signals on 40 and 80 this morning. The 40 pileup was immense - from 7.006 to as high as 7.030 at times with AA4NN at the helm. They focused on EU until at least 0700 or so then switched to NA. 0800-0930 was basically all JAs then the mayhem from 0930 until now. I still hear them Q5 on 40 but, the west coasters rule the pile right now.

I got them this morning (very early) on 80 after only about 2 minutes of trying. Good sig and the pileup was not large.

I think 40 is the money band for most the world so far and everybody was in the chase.

Thanks for the info, Rich.

At 1400 I see lots of spots but nada heard here. I'll try the afternoon/evening path on the higher bands and get up early tomorrow morning for 40 and 80. However, I'm not going to lose and sleep because I have it from the KM6 days as well as some KH4s, hi. I'd like some band fills though.

Hmm ... I'm using Avira Antivirus and it opens the hamdata site OK but it gives me a mesage

"http://www.hamdata.com/favicon.ico contains suspicious code HEUR/HTML.Malware"

Maybe it's only suspicious and not anything to be worried about.

Rene

The Home page and when you read a post (but not messages)
It sound like it is the hamdata ad from the other posts.

If you have opened it I sincerely hope you are loaded with Malware, antivirus, & spyware software. The last time I was hit with a virus that got through my protection (first in 40years) it took 2 months and required rebuilding the entire system with Microsoft's help.

I now prefer scanning webpages on my iTouch!

11327. Speaking of Apple's iTouch...

Yahoo group: DX-IS (2009)
Date: 2009-10-15 17:16:59 UTC
From: Robert
Topic: 11327 Message: 11327

While I am on the subject I should mention the following, however, I fully know that I do so with the expectation that I will enrage a few folks out there who are not supporters of packet networks!

I recently purchased one of the new Apple's iTouch Ipods (32G).
N7NC has a DX Packet cluster application for that product which is great. In addition there are a number of other applications I use like a maidenhead locator and converter, a CW practice program, and the CIA Data which resides locally. All on my in home wireless or public wireless...I am to cheap to pay AT&T for 3G.

Add this to music, movies, news, games, etc.

HamDXCluster works with AR-Cluster nodes right now, but Tom expects to add the other major protocols in the future.

So what does it do for me....
Could get 3D20CR on 15,17,or 20 during the day so at 3am I had the iTouch wake me up, two touches and I had all the recent spots, found they were working NA on phone, when down to the shack, logged them on the second call, and went back to bed. Got to love it.

73 Bob KB1JZU

PS Working on being able to remote the shack to this device HI

11328. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-15 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 11328

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 15 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 288 Issued at 2200Z on 15 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 14/2100Z
to 15/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 14/2100Z to 15/2100Z:
The geomagnetic field was quiet. At approximately 15/0500Z, ACE
satellite measurements observed increases in temperature, density
and velocity, all indicative of a CIR in advance of a weak coronal
hole wind stream. Wind speeds increased from a low of about 300
km/s to near 430 km/s, while the Bz component of the IMF indicated a
weak southward trend of near -5 nT.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be at quiet to unsettled levels on day 1 (16 October) as
the equatorward extension of the northern crown coronal hole
continues to influence the field. Activity is expected to be mostly
quiet on days 2 and 3 (17 - 18 October) as coronal hole effects
wane.
III. Event Probabilities 16 Oct-18 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 15 Oct 070
Predicted 16 Oct-18 Oct 072/072/072
90 Day Mean 15 Oct 069
V. Geomagnetic A Indices

11329. K4M on RTTY

Yahoo group: DX-IS (2009)
Date: 2009-10-15 23:48:57 UTC
From: Nelson Moyer
Topic: 11329 Message: 11329

I couldn't print K4M on 30 meters this morning well enough to call. The news from Midway has been sparse to say the least. Does anybody have a clue if and when K4M might come up on 17 or 20 meter RTTY for NA? I can't spend my entire life sitting in the shack waiting.

Nelson, KU0A

Well, unless you know something that we do not, Nelson, you'd
only have to wait in the shack 4 more days as they have to QRT on 19
October. Odds are you will live longer than that. :-)

Seriously, I don't think anyone knows but the operators
themselves when and where they will show on RTTY. Given the size of
the CW and SSB pileups that are still ongoing, I would think they
will be concentrating on them more than RTTY/ That is just a
guess. Probably the only place to look for a hint is their web site.

The web site hasn't been updated except for the log since they first got there, so that's no help. I guess I'll have to continue the vigil for another four days. RTTY is the last band/mode I have a chance to work them on given the fact that 10 and 12 are dead. The good news is that I already have them on 10 and 12.

Wish I could say that. I needed them everywhere except 20CW and 15CW going into this one, and still need them on the low bands. They were S5-S6 here for over an hour this morning on 160/80/40, but the pileups on those bands were huge. 160 was particularly frustrating because they were really loud and should have been workable. Problem was the stations between me and them literally had the needle pinned all the time from 1.829 to 1.835 MHz! Not a chance of finding a hole or tail-ending the "last guy."

I should have had them on 12/10 from previous operations but I didn't, and those bands are now virtually impossible with no sunspots.

On a positive note, I just checked the logs and I see that I made it on 30M RTTY this AM. I wasn't 100% sure, and thus I said nothing a couple of hours ago because the logs were not up to date. I got a clean print of VE1DX 599, but didn't see the confirmation when I sent my report because someone tuned on 10.140 MHz just at the right (or wrong) time. Thankfully it was a good contact.

So, I'm off to the low bands in the morning. Would be happy to just get 80/40, but like all DXers, I'll take everything I can. 160 would be the icing on the cake.

I did hear TX5SPA the other day on 10 CW so KH4 is possible. Luckily I don't need them on 10 or 20m, but RTTY would sure be nice. THey were putting a decent signal into OK today on 17m but not really moving the meter. No luck there yet, but getting them on 40CW today will be enough if that is all I get. Sure would like 80m though

Congrats as well, Bob. RTTY in this environment is hard. It gets messy with a rare one like this, and when they are not super loud. It was a nail-biter until I saw the logs. Hopefully some of the other list members made it, or will do so in the next few days.

Looking at their published log stats, it looks like they have 400+ QSOs on 30M RTTY and 200+ QSOs on 17M RTTY. I missed the spots for 17M RTTY and thought they were just on 10.1 MHz with that mode. Obviously they were QRV on two bands, and maybe they will show on 20 tomorrow. That band will be a zoo with all the 20M monobanders and stacks pumping kilowatts of teletype at them!

Nelson - KU0A - there apparently is hope for another shot at them, I would guess. 4 days left with multiple stations should translate to at least one or two good runs of RTTY somewhere. Good luck!

Good on ya John!

It has been very difficult for me to hear them on 40m so far, the RADAR is wiping them out on CW and I guess they must have some directional antenna for 40 SSB as I haven't yet heard them once.

Let's hope they will beam our way over the next few nights.

This seems to be one of those DXpeditions where the "black hole" you guys always talk about is actually getting better signals than we are here in the SE. I've heard them each morning on 30, 40 and 80, but came away empty-handed. When I see reports of them on 17 and 15 from numerous locations, we can hear nothing but whispers or nothing but noise.

Hello,

I'm convinced EU DXers have the highest proportion of idiots of all hobbygroups. This recording made on K4M freq is the proof:

www.hg6n.hu/ha1ag/misc/k4m_eu_zoo.mp3

Why should anybody arrange a DXpedition for these people? I would fully understand the DX ops to keep working JA and NA and let EU whine - forever.

73

zoli ha1ag

ps: this was made at 1430 GMT with a 2 ele HB9CV on 730m ASL.

Don't bother coming to NA if you think things are better here. Your recording sounds like K4M on 40M as received in NJ this morning at 1300Z. Can't blame EU for that.

11340. RE: [DX-IS] K4M zoo heard fm EU

Yahoo group: DX-IS (2009)
Date: 2009-10-16 18:07:38 UTC
From: Alan Leith
Topic: 11337 Message: 11340

I'm able to see the audio playing in Winamp but I cannot hear it. Anyone else have this problem???

73

Al, VE1AL

Subject: [DX-IS] K4M zoo heard fm EU

Hello,

I'm convinced EU DXers have the highest proportion of idiots of all hobbygroups. This recording made on K4M freq is the proof:

www.hg6n.hu/ha1ag/misc/k4m_eu_zoo.mp3

Why should anybody arrange a DXpedition for these people? I would fully understand the DX ops to keep working JA and NA and let EU whine - forever.

73

zoli ha1ag

ps: this was made at 1430 GMT with a 2 ele HB9CV on 730m ASL.

It is OK, Zoli. For some reason the audio has just started to work.

I am not at all surprised by what I hear -- but I hear the same thing here also.

I absolutely agree with you. People are getting crazier!

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3A - Gianni, I1UWF will be active as 3A/I1UWF from Monaco on 24 October for the CQ WW DX SSB Contest. He plans to operate mainly on 20 metres, with some activity on 15 and 10 metres, running 100 watts into a vertical antenna. QSL via home call. [TNX I1UWF]
4X - Yoshi, JE2EHP will be active as 4X/K1HP from Israel between 29 October and 5 November. He will operate SSB, CW and RTTY on the HF bands and 6 metres. QSL via JE2EHP, bureau preferred. [TNX JE2EHP]
5Z - Enrico/5Z4ES, Frank/IK8TEO, Tony/IK8UHA and Antonio/IK8VRH will be active as 5Z0H from Kenya between 10 and 21 February 2010, including operations from Wasini Island (AF-067) and Lamu Island (AF-040). They plan to have two stations active on 160-10 metres CW, SSb and RTTY. QSL via IK8VRH (direct, bureau and LoTW). The website for the operation is at http://www.ddxc.it [TNX IK8VRH]
D6 - Sam Serge, F6AML will be active as D68F from the Comoro Islands (AF-007) on 13-23 November. He will operate CW (1828, 3520, 7020, 10115, 14020, 18071, 21020, 24951 and 28020 kHz) and SSB (3775, 7075, 14265, 18140, 21265, 24960 and 28480 kHz), with a focus on the low bands. QSL via F6AML, direct or bureau. [TNX F6AJA and Les Nouvelles DX]
DU - Alex, DV1UBY will be active as 4D1N during the CW WW DX SSB and CW Contests. He will be also looking for DX contacts on 15, 20 and 40m with 10 watts until the end of the year. QSL via home call, direct or bureau. [TNX DV1UBY]
DU - Manfred,DL4IAS will be active as DV7/DL4IAS from Bantayan Island (OC-129) from 20 October to 5 November. He plans to operate PSK, SSB and CW on 40, 30 and 20 metres. QSL via home call. [TNX DX Newsletter]
EL - Chris de Beer, ZS6RI is working on a project in Liberia, and will hopefully be QRV in late October-early November. He will be working six weeks in Liberia, and then three weeks at home in South Africa, for the forseeable future. He plans to operate CW QRP with vertical and wire antennas; if there seems to be activity he might upgrade the antennas and the radio, and operate also SSB

and maybe digital modes. [TNX ZS6RI]
FK - Jean-Louis, F5NHJ will be active as VR2/F5NHJ from Cheung Chau (AS-006), Hong Kong on 21-23 October and as FK/F5NHJ from New Caledonia, either Grande Terre (OC-032) and Lifou or Mare (OC-033), from 26 October to 11 November. He plans to focus on 30 metres digital modes. QSL via F5NHJ. [TNX F5NQL]
G - Jeff, G4SOF will be running GB2BD for Bideford Devon Scouts for this year's Jamboree On The Air (17-18 October). Information on the 52nd JOTA can be found at http://www.scout.org/. [TNX G4SOF]
G - Mick, G3LIK reports he will be active as GB4RN (GB4 Royal Navy) on 1-28 November, which will include the RNARS CW Activity Contest (rules at http://www.rnars.org.uk/RNARS_Contest_2009.htm) on 21-22 November.
GI - Chris, M0DOL and Merv, MI0TMW will be active as GN4KPT/p and EI/GN4KPT/p from a number of castles in Northern Ireland and Eire between 25 October and 4 November. QSL via M0DOL. [TNX MI0TMW]
GM - Oscar Luis/EA1DR, George/EC2ADN, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning an operation to be held from rare IOTA group EU-118 (Flannan Isles) in June 2010. Further information is expected in due course. [TNX dx-hamspirit.com]
I - Look for IU1CL to be aired from Camogli Lighthouse (WAIL LI-015, ARLHS ITA-189) on 24-25 October. QSL via IZ1MLV, direct or bureau. [TNX IZ1MLV]
KH0 - AA6CM/KH0 (operator JA6CM), KH0UV (operator JR6DRH), KK6WW/KH0 (operator JA6EGL) and WH0AA (operator JA6GLD) will be active from Saipan on 22-26 October. They plan to operate CW, SSB and RTTY on 80-10 metres. QSL via home calls, direct or through the JARL bureau. [TNX The Daily DX]
KH0 - Yoshi, JK2VOC will be active as KH0/JK2VOC from the Northern Marianas (OC-086) on 23-26 October, including and entry in the CQ WW DX SSB Contest. Before the contest he will operate on 30, 17 and 12 metres. QSL via home call, direct or bureau. [TNX NG3K]
PA - Special callsign PB65BP will be in use on all bands SSB and digital modes until 11 November to commemorate the 65th anniversary of the liberation of Breda by the Polish 1st Armoured Division (29 October 1944). QSL via PA1WLB. [TNX K1XN]
PY - Jose/PY6HD, Beto/PY6RT and Nilzo/PY6AWU will be active as ZZ6Z from the Abrolhos Archipelago (SA-019) from 29 October to 2 November (dates may vary depending on Brazilian Navy schedules). Expect them to operate SSB on 80-10 metres. QSL direct to PY6HD. [TNX PY6HD]
PZ - Mike, AJ9C will be active as PZ5M from Suriname on 22-29 October. He plans to operate CW, SSB and RTTY on 160-6 metres, and to take part in the CQ WW DX SSB Contest. QSL via home call. [TNX NG3K]
SV5 - Martin, ON4PO will be active as J45PO from the SX5P contest station on Rhodes Island (EU-001) on 21-29 October, before and after the CQ WW DX SSB Contest. QSL via home call. [TNX NG3K]
V2 - Tom, K7ZZ will be active as V25Z from Antigua (NA-100) on 19-28 October, including an entry in the CQ WW DX SSB Contest. Outside the SSB event the will concentrate on CW. QSL direct to home call.

He will upload his log to LoTW. [TNX The Daily DX]
V3 - Pete, K8PT will be QRV as V31PT from Ambergris Cay (NA-073) from 24 November to 6 December. This will be a holiday style operation on 40-10 metres SSB, CW and RTTY. QSL via K8PT. [TNX K8PT]
V6 - JA7HMZ (V63DX) and JA7GYP will be active with a focus on the low bands from Pohnpei(OC-010), Micronesia on 25-31 October. QSL via home call. A part time participation in the CQ WW DX SSB Contest as V6B is being considered. [TNX NG3K]
VE - The Vancouver Olympics Amateur Radio Group (VOARG) is promoting and coordinating the operation of a series of special event callsigns to commemorate the Vancouver 2010 Winter Olympic and Paralympic Games to be held in February and March next year. Three special callsigns will be activated by amateur radio operators and groups resident in British Columbia as follows: VG7V (1 October-30 November 2009), VG7W (1 December 2009-31 January 2010), VG7G (1 February-31 March 2010). A web site with additional details is under construction. QSL direct (VOARG, 9362-206A St., Langley, BC V1M 2W6, Canada) or bureau. All of the QSOs will be uploaded to LoTW. [TNX http://dx-hamspirit.com]
VE - Yuri, VE3DZ plans to operate as VE2IM from Sept-Iles, Quebec (Zone 2) on 21-26 October, including an entry in the CW WW DX SSB Contest. QSL via VE3DZ. [TNX NG3K]
VK9X - Rene/DL2JRM, Tom/DL2RMC, Sid/DM2AYO and Harry/DM5TI will be active as VK9XX from Christmas Island (OC-002) from 21 November to 5 December, including an entry in the CQ WW DX CW Contest as VK9XW. They plan to have two stations up and running 24/7 on 160-10 metres, with a focus on the low bands and CW. QSL both callsigns via DL1RTL, direct or bureau. The logs will be uploaded to LoTW. Further information at http://www.dl2rmc.com/tom/VK9X2009/
VK9X - Phil, G3SWH and Jim, G3RTE will be active from Christmas Island (OC-002) on 20-27 February 2010. They will both use the single callsign of VK9X/G6AY, and they will operate CW only on 80-10 metres (no activity on 160 metres). Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. QSL via G3SWH, direct or bureau (requests for bureau cards can be submitted by using the relevant form on Phil's website). Please visit www.g3swh.org.uk/christmas-island.html for further information. [TNX G3SWH]
VP2M - George/K2DM (VP2MDG), Peter/K3ZM (VP2MZM), Glen/W4GKA (VP2MKA) and Jim/AD4J (VP2MIJ) will be active from Montserrat (NA-103) on 20-28 October, including a Multi-Single entry in the CQ WW DX SSB Contest as VP2MDG. Outside the contest look for VP2MDG on 6m SSB and for VP2MZM on 160m CW. QSL via home calls. [TNX OPDX Bulletin]
VP2V - Steve, KN5H and Art, N3DXX will be active from Tortola, British Virgin Islands on 21-28 October. They will participate in the CQ WW DX SSB Contest as a Multi-Single entry, and will operate CW, RTTY and on 30, 17 and 12 metres before the contest. QSL direct to KN5H. [TNX KN5H]
VP5 - Look for VP5/WA2VYA, VP5/W2WAS and VP5/N2VW to be active from Providenciales (NA-002), Turks and Caicos Islands on 20-27

October. They will participate in the CQ WW DX SSB Contest as
VP5T. [TNX The Daily DX]
XU - Peter, XU7ACY and Wim, XU7TZG will participate in the CQ WW DX SSB
Contest as XU7KOH from Koh Russei (Bamboo Island, AS-133), with
some CW activity before the contest. QSL via ON7PP (direct only).
[TNX NG3K]
YN - Mike, K9NW will be active from Nicaragua on 22-27 October,
including a SOAB entry in the CQ WW DX SSB Contest. Callsigns will
be HT2N (QSL via K9NW for this year's event only) during the
contest and YN2NW (QSL via K9NW) before and after the contest. [TNX
K9NW]
YV - The Grupo DX Caracas (http://gdxc.org/) will celebrate their 20th
anniversary by operating as YW5F From Farallon Centinela (SA-058)
on 6-9 November. They will be active on on 80-2 metres SSB, CW, FM
and digital modes. QSL via DM4TI. [TNX dx-hamspirit.com]
Z3 - IT9SSI, IT9YVO, IZ5MOQ, IZ8CCW, IZ8CGS, IZ8IYX and IZ8JAI, along
with Z36W and Z35X, will participate in the CQ WW DX SSB Contest
as Z37M. All of the QSOs will be confirmed automatically via the
bureau. Direct cards for this operation only should be sent to
IQ8MD (Mediterraneo DX Club, Ufficio Cosenza Veneto, Casella
Postale 360, 87100 Cosenza - CS, Italy). [TNX IZ8CCW]

425 DX NEWS MAGAZINE ---> The latest issue (September 2009) is now
available at http://www.425dxn.org/monthly/index.html. Articles and
pictures should be sent to Nicola Baldresca, IZ3EBA (iz3eba @ iz3eba.it)

DXCC NEWS ---> The recent FT5GA operation from Glorioso has been approved
for DXCC credit. [TNX NC1L]

NWRW 2009 ---> The National Wildlife Refuge Week (11-18 October)combines
Amateur Radio communication capabilities with enjoyment of the outdoors to
help others learn about the National Wildlife Refuge System. Amateur radio
stations (including K4M from Midway) are operating from a number of
wildlife refuges this week under guidelines established in cooperation with
the U.S. Fish & Wildlife Service. Information on this special event,
including details on the relevant certificate, can be found at
http://www.nwrweek-radio.info [TNX K4RT]

QSL HR9/WQ7R ---> Effective 14 October, the new QSL manager for HR9/WQ7R is
Erik, K5WW (no longer via AI4U). [TNX K5WW]

QSL ZC4VJ ---> Cards received at the PO Box address in Cyprus will continue
to be answered, but the new QSL route is via M0URX (QSLling details can be
found at http://www.m0urx.com). LoTW logs will continue to be uploaded by
Andy, ZC4VJ. [TNX ZC4VJ]

QSL VIA XQ1IDM ---> The following logs for Atacama Desert DX Group's IOTA activities (http://www.addxg.cl/) are still open: 3G1M (SA-069, October 2005), 3G1P (SA-085, March 2003), 3G2D (SA-086, November 2003), XR2G (SA-086, September 2004). QSL requests can b sent to XQ1IDM (Nicolas Herrera G., P.O. Box 345, Antofagasta, Chile). [TNX XQ1IDM]

+ SILENT KEYS + "Mr Svalbard", Mathias Bjerrang (JW5NM) died after a tragic accident on 11 October. He was 67.

QSLs received direct or through managers: 3DA0EL, 3DA0MH, 3DA0MM, 3DA0TB, 3DA0VA, 5V7PM, 6I7CQ, 6J2T, 7P8MM, 7P8OK, 7P8YI, 7X4AN, 9A7A, A45WD, A61Q, A73A, C21TI, C31PP, CC0Y, DU9/DL5SDF (OC-130), EA9/KH0AM, EA9IB, FJ/VE3EY, FW8AA, HK3CQ, JT1CO, K5D, KH7XS, KL1V, KL7J, LY20W, OH0R, OY2J, OY3AA, PX6T, PY0FF, S92LX, SG3U (EU-084), T6AD, TC098A (AS-098), TI2KI, TM0M (EU-065), TO8YY, TT8FC, TU5JM, TY5ZR, V51AS, V7XX, VC1W (NA-154), VE8EV, VK9GMW, VP2ETN, VQ9LA, XF4T, YI1AK, YL2BJ, YS1MAE, YT5W, Z29KM, ZK2V.

11346. Re: K4M zoo heard fm EU

Yahoo group: DX-IS (2009)
Date: 2009-10-16 20:59:34 UTC
From: aburkefl
Topic: 11337 Message: 11346

A well-known DXer and I exchanged e-mails recently, discussing the craziness we hear on the bands. The most interesting facet of what's going on is that *everyone* seems to be doing it!

Several times I've tuned the pile, looking for a "clear" spot to scream my lungs out (or blast the airwaves with CW!). It doesn't seem to matter who's calling or who's being called. The DX station says "who's the Bravo Uniform?" If you're lucky enough to hear anyone else in the pile, they are typically calling without a single letter in their call corresponding to what he was looking for. The most perplexing part? Many of those you hear calling are what one might consider experienced, knowledgeable DXers who should know better.

I guess the craziness is contagious! Perhaps it's only solarfluxitis or lackasunspotsitis.

Could also be that it works...

Ever hear when you are looking for the station worked the fellows
calling over the top were the next stations to be called? I have
and when that is happening it surely only encourages more of it. Fault
can be at either end...

11349. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-16 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 11349

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 16 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 289 Issued at 2200Z on 16 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 15/2100Z
to 16/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 15/2100Z to 16/2100Z:
The geomagnetic field was mostly quiet. A period of sustained
southward Bz (-3 to -4 nT) from 15/2100Z to 16/0600Z contributed to
an isolated unsettled period at 16/0600Z observed at middle
latitudes. Wind velocities steadily decreased through the period
from a high of near 440 km/s to a low of about 370 km/s.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be at mostly quiet levels for the next three days (17 -
19 October).
III. Event Probabilities 17 Oct-19 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 16 Oct 070
Predicted 17 Oct-19 Oct 072/072/072
90 Day Mean 16 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 15 Oct 003/004
Estimated Afr/Ap 16 Oct 003/005
Predicted Afr/Ap 17 Oct-19 Oct 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 17 Oct-19 Oct
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

To all radio amateurs

SB PROP ARL ARLP042
ARLP042 Propagation de K7RA

No sunspots appeared this week, although there were hopeful signs. Spaceweather.com reported on October 11 that a new sunspot was ''struggling to emerge'', but it faded quickly, and the sun has been blank since then.

We got a nice response from Dr. Joseph B. Gurman, Project Scientist on the NASA Solar Terrestrial Relations Observatory, or STEREO (see http://stereo.gsfc.nasa.gov/) regarding observing sunspots on the far side of the sun.

''Those bright spots are indicators of magnetic activity, which may or may not be associated with sunspot groups. Joe wrote, ''The bright areas you see, called 'plage' (pronounced 'plahj') in the solar physics business (thanks to some solar astronomer of yore who thought they looked like white-sand beaches, 'plage' being French for beach), represent areas higher in the solar atmosphere than the visible surface of the Sun where (1) magnetic fields are stronger than in their surroundings, and (2) material has been heated to higher temperatures than in their surroundings''.

''The two appear to go together, somewhat paradoxically when one considers that only a few hundred km lower in the atmosphere, sunspots are cooler than the surrounding photosphere. Plage is a feature of both active regions with sunspots (''sunspot regions'') and active regions without visible spots. Indeed, in the coronal extreme ultraviolet (EUV) lines (Fe IX, X; Fe XII; Fe XV) in which the STEREO images are obtained, we call anything of a certain size and that bright that persists for hours to weeks an active region, regardless of whether NOAA has assigned it a number''.

''If there are no spots, it may be 'old plage' from a region whose spots have disappeared, a new region that will eventually produce spots, or a modest active region that never shows more than tiny ''pores'' (spots without penumbrae), that are sometimes very difficult

to see from the ground''.

We also heard from William Thompson of NASA Goddard Space Flight Center in Greenbelt, Maryland, who wrote ''No, we can tell if there's an active region or not, but we can't determine from the EUVI data alone whether that active region will have a sunspot''.

Dr. Gurman also mentioned checking magnetic maps of the sun from the ground based GONG network (Global Oscillation Network Group) at http://gong.nso.edu/data/farside/, and animations of solar magnetic activity at http://soi.stanford.edu/data/full_farside/.
What I currently see using these tools is very little magnetic activity.

Robert Brock, K9OSC of Fridley, Minnesota expressed some frustration trying to install the free propagation prediction program W6ELprop on a PC running Microsoft Vista. This suggestion ran in this bulletin back in 2007, and the key is to be sure you are logged in to the PC as Administrator, then from Windows Explorer right-click the installation file, and from the drop-down menu select ''Run as Administrator''. This is just an annoyance caused by security features in the operating system. I haven't tried Windows 7, which is due to be released this week, but probably similar steps will be needed. You can download W6ELprop from http://www.qsl.net/w6elprop/. Information on running W6ELprop is at http://www.arrl.org/tis/info/pdf/W6elprop.pdf.

In April and May bulletins ARLP017 and ARLP018 mentioned WSPRnet, the Weak Signal Propagation Reporter Network, which looks to be a promising tool for looking at HF propagation. The October 2009 issue of CQ Magazine has an interesting interview with Nobel Laureate Dr. Joe Taylor, K1JT, the developer of WSPRnet and other weak signal signaling methods. You can read it online at http://www.cq-amateur-radio.com/Joe_Taylor_webOct09.pdf.

Also, Steve Nichols, G0KYA gave a talk on WSPR at the recent Radio Society of Great Britain convention. You can download his excellent PowerPoint presentation from http://www.infotechcomms.net/What_is_WSPR.ppt.

If you don't have PowerPoint, which is part of the Microsoft Office suite, you can download a free PowerPoint viewer from http://office.microsoft.com/en-us/powerpoint/HA100966951033.aspx#1.

After recent items in this bulletin about VHF propagation and fog banks, Len Halvorsen, WA2AMW wrote: ''The comments from Alan, KI6HPO, reminded me of an article I read many years ago about a VHF/UHF Propagation Enthusiast in Hawaii, who would search for (Tropo?) Propagation Ducts to the mainland by driving up the side of the volcano (the access road to the observatory telescopes) and stopping at various altitudes to test for existing propagation conditions to the west coast. He would often find paths to the mainland that were open only from within a narrow band of altitude on the side of the

volcano. Above and below that band the propagation corridor did not exist, nor was it accessible from his mobile/portable equipment''.

Carson Haring, AC0BU of Corydon, Iowa says he was surprised to see VHF fog propagation a subject of discussion, because he assumed it was common knowledge. ''Here in southern Iowa, where I work removing trees under the power lines from before the sun rises, I very often have assumed that fog influences propagation on 2 meters. Many summer mornings from the time we get to the work site until the fog burns off, (maybe 9 or 10 am) I can reliably use 2 meters for long distance QSOs from my bucket truck mobile''.

Also commenting on KI6HPO was Jug, WA6MBZ of Santa Barbara, California, who wrote, ''Until he died, we had an American who had been an AT&T employee who retired the moved to San Quentin, Mexico, about 250 miles below the US-Mexican border''.

''Every year for many years during the summer months etc, he would come on the Santa Barbara repeater on 146.790 MHz. He knew when the signal level was right and therefore when he could get into our repeater with a usable signal''.

''Our repeater is located on a hill near the beach called the Mesa. It is at about 400 feet above sea level. He could not get into our other repeaters that were located up at about 4,000 feet''.

''He was a very friendly guy and we used to talk to him for hours on end. I don't think any of our group ever asked him if he could get into other repeaters along the coast of Southern California''.

Thanks, Jug.

Also coming in this week were 6 meter sporadic-E reports. Jon Jones, N0JK reported from Kansas on Saturday, October 11 that he saw double-hop e-skip on 6 meters to beacons in Costa Rica, Bahamas and Florida. That same evening, which was October 12 at 0200z he worked WA4GPM in FN11 and N2LID in FN12 on 6 meters. On 10 meter CW on October 11, 2217-2236z he heard TX4SPA working N0RR, N4KG, KF6JOQ, W6QE, K1ZZI, KT4MM and W7DO.

For this week expect more of the same quiet geomagnetic conditions. Geophysical Institute Prague expects quiet to unsettled conditions today, October 16, then quiet conditions October 17-22. NOAA and USAF predict planetary A index today of 7, then back down to 5 for the foreseeable future. They expect solar flux to be up to 72 today through October 30.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed

explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for October 8 through 14 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 68.8, 69.2, 70, 70.4, 70.1, 69.8, and 70.9 with a mean of 69.9. Estimated planetary A indices were 2, 3, 2, 6, 2, 2 and 2 with a mean of 2.7. Estimated mid-latitude A indices were 1, 1, 0, 7, 1, 2 and 0 with a mean of 1.7.

Hello,

I'm convinced EU DXers have the highest proportion of idiots of all hobbygroups. This recording made on K4M freq is the proof:

www.hg6n.hu/ha1ag/misc/k4m_eu_zoo.mp3

Why should anybody arrange a DXpedition for these people? I would fully understand the DX ops to keep working JA and NA and let EU whine - forever.

OK that explains it then I didn't see that on the log page, guess I need to look for more information before worrying. Thanks guys
for the responses. One of mine was a 160 meter contact on the 16th in fact 4 contacts are before the posted time.

The three tonight I guess wont show up until tomorrow or Monday, who knows what their upload schedule is or what they have to go
through to be able to upload logs from there location. There have been some recent Dxpeditions that mentioned how often they would
upload, but I cant find that anywhere on their site.

This has been a really nice Dxpedition in my opinion.

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 17 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 290 Issued at 2200Z on 17 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 16/2100Z
to 17/2100Z: Solar activity was very low. No significant flare
activity was observed. However, isolated eruptive activity was
observed in a plage region near S28W01. EIT wave activity and weak
x-ray enhancements were associated with the eruptions. Thus far,
there are no indications of Earth-directed CME activity associated
with the eruptions.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 16/2100Z to 17/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels through the period (18 - 20 October).
III. Event Probabilities 18 Oct-20 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux

In the USA, unless the FCC decides to enforce the regulations, many hams run CaKWs [California Kilowatts].

How often can you read about ham amplifier for sale using 4-1000 tubes? [4 KV on the plates at 1 ampere]

When the FCC got out of enforcement, the me first generation got big amplifiers.

What you describe is basically what used to be known as "tail ending." Over the years, there were a number of well-known dxpeditioners who despised tail ending. The theoretical secret to tail ending is/was to NOT send your call until the other station had at least exchanged reports. Too many stations these days just start sending their call as soon as the DX station comes back to that guy. All that does, obviously, is slow things down, clobber the QSO, etc.

Another old "trick" is/was instead of blasting out your call immediately, wait a small fraction of time (preferably something somewhat longer than a nanosecond!) and THEN send your call - there was a chance that 32 other stations had completed their call and yours will be in the clear. Of course, that same theory is why so many stations keep calling and calling and calling... - they're hoping to be the last station in the clear. Even with a relatively small number of stations calling, this most often results in a continuing cacophony that's hard to decipher.

DXers have accidentally become their own worst enemy. The lack of discipline on virtually everyone's part just makes the whole process more difficult. It's ironic that most of what used to work did so before the days of the cluster! Statistically speaking, it just has to be because there were less people tuning on the appropriate frequency.

> >
> > Several times I've tuned the pile, looking for a "clear" spot to scream my lungs out (or blast the airwaves with CW!). It doesn't seem to matter who's calling or who's being called. The DX station says "who's the Bravo Uniform?" If you're lucky enough to hear anyone else in the pile, they are typically calling without a single letter in their call corresponding to what he was looking for. The most perplexing part? Many of those you hear calling are what one might consider experienced, knowledgeable DXers who should know

better.

11371. DXCC CW question

Yahoo group: DX-IS (2009)
Date: 2009-10-18 14:49:44 UTC
From: Richard F DiDonna NN3W
Topic: 11371 Message: 11371

In one of the IRC chat rooms the issue of the DXCC came up. I know that 30 meters used to not be valid for DXCC, but now is for contacts since 1945. Same with RTTY, SSB, and "mixed" mode. Satellite since 1965.

Why is CW DXCC valid for QSOs made only after January 1, 1975?

73 Rich NN3W

Dunno Rich, but it is. I always wondered that too. The foundation of Ham radio was/is CW, and yet there was no CW only DXCC award until 1975. Before that it was mixed and phone. (My CW one is #6,076 issued in 1993 and my Phone one is #20,214 issued in 1992 and my Mixed one is #30,144 issued in 1990.) The serial numbers clearly show CW certificates are a "new" addition. I don't know why they did not make CW QSOs retroactive back to 1945.

30M going back to 1945 makes no sense. 30M was the result of a WARC decision in the 80s, wasn't it? It would not have been possible to get DXCC on 30M (well, work 100 countries on 30M because the actual DXCC on 30M was a new thing ~2000) until at least 100 countries allowed 30M. I can't see why 30M contacts before the WARC decision to give us 30M would even be discussed.

Am I misinterpreting what you are saying? I didn't look up all the dates for the various bands/modes on the DXCC web site.

Rich,

I asked the ARRL DX desk this question a few years ago. I believe the answer was that the CW mode DXCC endorsement didn't exist before that time.

It was frustrating to have some perfectly good CW countries worked before that date not count for CW DXCC -- e.g. KP1.

In the USA, unless the FCC decides to enforce the regulations, many hams run CaKWs [California Kilowatts].

How often can you read about ham amplifier for sale using 4-1000 tubes? [4 KV on the plates at 1 ampere]

When the FCC got out of enforcement, the me first generation got big amplifiers.

My pair of 3 500Z's puts out 4KV at 1 amp - was 'real' necessary when I lived in Los Angeles and it was still difficult on 20m with a 4 el monobander to bust a pileup...

Hi Ron,
Yur right - you read it wrong. All I said it would've been difficult to break a pileup on 20m with a pair of 3-500Z's. That doesn't mean the Renegade had/has a 20m mono and a 40m monobander .... ..
10 metres rules (except on the downside of a sunspot cycle)

11376. RE: [DX-IS] DXCC CW question

Yahoo group: DX-IS (2009)
Date: 2009-10-18 17:38:31 UTC
From: Alan Leith
Topic: 11371 Message: 11376

If I remember correctly (and there is good reason to believe that I don't), the CW DXCC Award was issued as an entirely new award in 1975. No one could grandfather deleted countries and that put everyone on the proverbial "level playing field" at the moment of inception.

With the addition of 7O1YGF to my CW totals on Friday, I now have 334 confirmed for CW DXCC missing 3D2/C (I didn't even hear 3D20CR), JD/M, KH5K & P5. Of course I need P5 on any mode.
Including deletions since 1975, I have 344 on CW.

I think the idea to start in 1975 was a good one, although it appears there are lots who don't agree.

In one of the IRC chat rooms the issue of the DXCC came up. I know that 30 meters used to not be valid for DXCC, but now is for contacts since 1945. Same with RTTY, SSB, and "mixed" mode. Satellite since 1965.

Why is CW DXCC valid for QSOs made only after January 1, 1975?

73 Rich NN3W

Dunno Rich, but it is. I always wondered that too. The foundation of Ham radio was/is CW, and yet there was no CW only DXCC award until 1975. Before that it was mixed and phone. (My CW one is #6,076 issued in 1993 and my Phone one is #20,214 issued in 1992 and my Mixed one is #30,144 issued in 1990.) The serial numbers clearly show CW certificates are a "new" addition. I don't know why they did not make CW QSOs retroactive back to 1945.

30M going back to 1945 makes no sense. 30M was the result of a WARC decision in the 80s, wasn't it? It would not have been possible to get DXCC on 30M (well, work 100 countries on 30M because the actual DXCC on 30M was a new thing ~2000) until at least 100 countries allowed 30M. I can't see why 30M contacts before the WARC decision to give us 30M would even be

discussed.

Am I misinterpreting what you are saying? I didn't look up all the dates for the various bands/modes on the DXCC web site.

It is always so fascinating to me what people need to complete DXCC HR and what they worked early on in their DXing careers that was rare.

I still need 3Y/Bouvet, A5, A9, EP, P5, YA for all-time new ones. I worked the previous 3D/Conway operation as well as the recent one. JD/M was in my first 100, I believe, as was S2.

I'm having great trouble getting a card out of a 40 station. I've worked several but none of them are getting my cards or are not responding to them. :-(

Al,
I worked 8 countries in the 50s that have since been deleted.
But a DXCC award was issued in 1959 showing credit for those 8 countries.
And my recent submission of the countries worked after 1993 include the
8 dels.
Have things changed since then that they will now be deducted from my total?
I guess there have been articles/announcements that I missed about this
issue.

Those count towards DXCC but not CW DXCC, If you apply for CW DXCC
those will not count even as deleted countries, ONLY COUNTERS ARE
AFTER 1/1/75. CQ also has a similar rule for 5BWAZ. I have a WAZ
from the early 70s, but those cards do not count for 5BWAZ as that
STILL has a start date of 1/1/79. ARRL dropped the date back to 1945
for 5BDXCC but CQ did not follow suit with 5BWAZ.

I think you've hit on the fascination of DX, Zack. I have confirmed
all those you need, yet the half-dozen I need for HR I am sure you
already have. DX is different for everyone. Or, as someone wittier
than I once said, DX IS!

If your DXCC is Mixed, Frank, as far as I know, you should be OK. It would be the CW DXCC that eliminated credit for CW countries credited before 1975.

Great news Al,
I was confused by the previous post exceptions and rules.
It seemed to say cw was stuck with a new rule - but that didn't make
sense that they would single out cw and make it tougher on them.
Yours is much simpler!
BTW, I guess I've missed K4M - only heard them twice on 40m and only in
and out of noise for a few minutes those two mornings.
I hope you had better luck

Ohio/Penn DX Bulletin No. 930

The Ohio/Penn DX PacketCluster
DX Bulletin No. 930
BID: $OPDX.930
October 19, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KY1V, NC1L, NJ1Q, NG3K, N4AA & QRZ DX, K5WW, N5ZO, KH6BZF, WB6RSE, K8PT, K8YSE, K9NW, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, IZ5MOQ, LY4A, OZ5AAH, PA1WLB, Pete's-DX-Newsdesk, PT7WA, PY2SEX, RA3AUU, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), YB2TJV, YV5ANF and ZC4VJ (G3AB) for the following DX information.

DXCC COUNTRY/ENTITY REPORT:
According to the AR-Cluster Network for the week of Sunday, 11th-October, through Sunday, 18th-October there were 233 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FO/m, FP, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAIZILAND. Operators Andy/3DA0TM, Dave/ZS6AVM, Dave/ZS6GF and Daniel/ZS6JR will be active as 3DA0WW in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via 3DA0TM.

4L, GEORGIA. Operator Vaho, 4L8A, will be active in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) entry. QSL via K1BV.

4L, GEORGIA. Roli, LY4A, will be active as 4L3A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (80m) entry. QSL via LY4A. Visit Roli's Wen page at: http://www.ly4a.com

5B, CYPRUS. Stewart, G3RXQ, will be active as 5B/G3RXQ during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via G3RXQ.

5R, MADAGASCAR. Sam, G4OHX, will be active as 5R8HX from Madagascar (IOTA AF-013 and WLOTA L2455) between December 28th and January 3rd (2010). Activity will be mainly CW. QSL via his home callsign direct only.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW DX SSB Contest (October 24-25th) as Single-Op/All-Band/High-Power entry. QSL via NN1N.

A6, UNITED ARAB EMIRATES. Mohammed, A61BN, is a new ham in Dubai. He seems to be enjoying 20 meters on SSB between 1100-1330z. There has also been a report that he likes the Digital modes. He has a stateside QSL Manager who is Buzz, NI5DX. Buzz is expected to have the logs shortly, and QSL cards should be available in about a month or so. Mohammed is a good friend of Khalid, A61BK, who has been a great "Elmer" for him. Buzz is also the QSL Manager for A61BK.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQ World Wide DX SSB Contest (October 24-25th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, Masaki/JO1DFG, and Sato/JH7QXJ. QSL via JH7QXJ. ADDED NOTE: They suggest to listen to 7075-7100 kHz.

AH0, MARIANA ISLANDS. Operators Kuny/W1FPU (7L1FPU), Hajime/AH0BR, Moto/W1NDE and possibly others will be active as AH0BT from the Northern Mariana Islands during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via 7L1FPU, by the Bureau and direct (see QRZ.com). Watch an interesting AH0BT video on YouTube at: http://www.youtube.com/watch?v=wwcNHnCWmZA

AO8, CANARY ISLANDS (AF-004). Operators Pekka/OH1RY/EA8AH, Juan/EA8CAC, Manuel/EA8ZS, Salvador/EA5DY, Jaakko/OH1MA, Kari/OH3RB, Kari/OH5XT and Jussi-Pekka/OH6RZ will be active as AO8A during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via OH1RY.

CE9, SOUTH SHETLAND ISLANDS. A team of operators will be operating from Arturo Prat-Greenwich Island-South Shetland archipelago between January 10-24th. Team members mentioned are: Luis/XQ5CIE, Carlos/CE6UFF, Didier/F6DXE and Dagoberto/CE5COX. No other details were provided.

CN, MOROCCO. M'hamed, CN8NK, in Rabat, will be active as CN4P during the CQWW DX SSB Contest (October 24-25th) as a Single-Op entry. QSL via

EA5XX.

D6, COMOROS. Sam, F6AML, (F6KOP team member) will be active as D68F from the Union des Comores (AF-007) between November 13-23rd. Activity will be on 160-10 meters, including 30/17/12 meters, using CW and SSB. His suggested frequencies are:
CW - 1828(RX/1822), 3520, 7020, 10115, 14020, 18071, 21020, 24891 and 28020 kHz
SSB - 1828(RX/1822), 3775, 7075, 14265, 18140, 21265, 24960 and 28480 kHz
Sam will operate split (up 5 or down 5 kHz) using a FT857D w/amp. He plans to focus on the topband and lower bands. SUNRISE: 0240z SUNSET: 0215z. QSL via his home callsign, by the bureau or direct (QRZ.com). All the gear except the amplifier, will be given to the foundation for the future Radio Club of the Comoros Union.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
FT5GA - Glorioso Island; 2009 Operation

* YI/KV4EB DXCC CREDITS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports DXCC credit for this operation originally noted dates from April 20, 2003, to November 28, 2003. An update to this operation has been received and the DXCC approval dates are now from April 20, 2003, through January 9, 2004. If you had this operation rejected due to this date issue you can fix it in one of two ways:
1) Send an email to dxcc@...
2) Select it in your next LogBook of The World application as logs will soon be uploaded.
This is ONLY if your QSO falls within the date period noted above.

EI, IRELAND. Olivier, ON4EI, will once again be active as EI/ON4EI from Ireland (EU-EU-115, WLOTA 2484) near Fethard (IO62DL) on the top of Benneshill (170m ASL) between October 21-26th. Activity will include the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Low-Power/ Non-Assisted entry. It is suggested to look for him before the contest on 7150 lHz +/- QRM. His equipment is a Elecraft K3 w/100w into a 18m vertical top loaded monopole, inverted V for 160/80/40m and a Spiderbeam for 20/15/10m.

ES, ESTONIA. Ben, OZ5AAH/OZ5IPA, will be active as ES1/OZ5IPA from Tallinn and plans to participate again in the "The International Police Association's Contest", November 7-8th. Contest rules are available at: http://www.ipa-rc.de
Look for him to be on CW and SSB. All QSOs will be good for "Sherlock Holmes Award" and IPA awards. QSL via his home callsign direct to:
Ben Jakobsen, Gjethusparken 25, DK-3300 Frederiksvaerk, Denmark.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands (include topband). He has announced that he will be in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band or Single-Band (15 or 10m) entry. His activity will be "random style".

QSL via F8BPN, direct, by the bureau, LotW.

HQ2, HONDURAS. Dan, HR2DMR, will be active as HQ2W during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via HR2DMR (QRZ.com).

HT2/YN, NICARAGUA. Mike, K9NW, will again be active from Nicaragua between October 22-27th. His activity will include the CQWW DX SSB Contest (October 24-25th) using the callsign HT2N during the contest as a Single-Op/All-Band entry. Look for him as YN2NW before and after the contest. QSL YN2NW via K9NW. QSL HT2N via K9NW "ONLY" for the 2009 CQWW SSB Contest.

IOTA NEWS.....
EU-045. Mauro, IN3SAU, will be active as IB0/IN3SAU from Ponza Island for 10 days starting October 26th. Activity will be on 80-10 meters using SSB, RTTY and PSK31. QSL via his home callsign.

OC-129. Manfred, DL4IAS, will be active as DV7/DL4IAS from Bantayan Island in the Philippines between October 20th and November 5th. Activity will be on CW, SSB and PSK. QSL via his home callsign.

OC-130. Kouichi, JI1FGX, now living in Ozamiz Occidental on the Island of Mindanao, is active as JI1FGX/DU9. Activity is on 80/40/20/17/15/10/6 meters using SSB, SSTV and RTTY. QSL Manager is JF1LZQ: Yutaka Sakurai, P.O. Box 1, Suyama, SUSONO, SHIZUOKA, 410-1299, JAPAN. Please send your QSL requests to JF1LZQ via the following instructions below:
For JA stations - JARL Bureau, SASE, or SAE + 1 USD
For Non-JA stations - Bureau, or SAE + 2 USDs

OC-142. Ray, K9LUK, is expected to be active possibly as VK4/K9LUK from Fraser Island (OC-142, WLOTA L 2976), Queensland State, Australia, between now and October 23rd. Look for activity on all HF bands. QSL via his home callsign (QRZ.com).

OC-149. Operators Mike/KM9D and Jan/KF4TUG are reportedly staying on Liapari Island in the New Georgia Island Group. Length of stay is not known. Mike is signing H44MY and has been active on 160/80/40/15 meters CW. QSL via OM2SA.

SA-019. Operators Nilzo/PY6AWU, Jose/PY6HD and Roberto/PY6RT will be active as ZZ6Z from Abrolhos Archipelago between October 29th and November 2nd. The Brazilian Navy schedule could affect the dates. Activity will be on 80-10 meters SSB only. QSL via direct only to PY6HD.

JT, MONGOLIA. Marko, N5ZO, will be active as JT1ZO during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via OH0XX. Marko informs OPDX that he will be there between October 21-26th. Activity outside of the contest will be on the traditional HF bands probably most of the time (most likely very little if any 160m as there is no amp or

antenna present there) using CW and SSB.

KH4, MIDWAY ISLANDS (OC-030). This operation is ending fast. The following is a schedule that was posted on the K4M Web page:
October 18th (2000z) - Commence tear down; Operation reduced to stations operating 15□160 meters.
October 19th (0600z) - 15, 17 and 20 meter stations go QRT; Operation reduced to stations operating 30-160 meters
October 19th (1800z) - QRT
October 20th (0100z) - Depart Midway Atoll for Honolulu
As of early October 18th (0138z), there are over 49.3k QSOs with 15.5k unique callsigns (29584/CW, 17841/SSB and 1876/RTTY). For more details, updates, online log, frequencies and bios, go to: http://www.midway2009.com
QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA 30620-9989 USA) or LoTW. See the above Web page for complete details.

KH6BZF PROPAGATION FORECAST/REPORT (For October 19-25th)....
Oct 19 AN SOLAR REFERENCE
Oct 20 AN ---------------
Oct 21 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 22 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 23 AN LN - Low Normal
Oct 24 AN-HN
Oct 25 AN-HN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS. Operators David/N3XF, Ed/K1ZE and Rob/W1EQ will be active as KP2/homecall from St. Croix between November 4-11th. Activity will be on 160-10 meters using CW, SSB and possibly RTTY. Look for KP2M during the ARRL CW Sweepstakes Contest (November 7-8th). QSL KP2M via info on QRZ.com. All other QSLs via home callsign and LoTW.

LX, LUXEMBOURG. Philippe, LX2A, will be active as LX7I during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m)/High-Power entry. QSL is OK via LX2A, by the Bureau, direct and LoTW (no EQSL). His Web page is: http://www.lx2a.com

NEW CLUB FORMED. It was announced this past week that a new club called "Radio Club Isla de Margarita" (YV7RCM), located on the Island of Margarita (IOTA SA-012), was born. At the present, there are 40 active members and some others waiting for their callsigns. Board of directors are:
Rafael Arenas/YV5ESN/7 - President
Diego Ross/YV7KT - Vice President
Jose Luis Blanco/YV7BMZ - Secretary
David Fernandez/EB7DX - QSL Manager
Club's Web page is:
http://sites.google.com/site/radioclubislademargarita/home

E-mail address is: yv7rcm@...

OOOPPSSS DEPARTMENT! Small typo in last week's bulletin (OPDX.929).
Under the item "J8, ST. LUCIA.", the "J8" should have been "J6".

P2, PAPUA NEW GUINEA (Reminder/Update/IOTA Op). Operators Hans/SM6CVX (CW), Derek/G3KHZ (CW), Luis/CT1AGF (SSB/RTTY), Gordon/G3USR (SSB) and David/M0VTG are scheduled to activate three (possibly 6) Papua New Guinea IOTA islands between October 22nd and November 16th. The announced schedule and callsigns are as follows:
OC-102 - Tanga Island; callsign P29VCX (via SM6CVX); October 22-26th
OC-231 - Green Island; callsign P29VLR (via SM6CVX); October 27-31st
OC-205 - Woodlark Island; callsign P29NI (via G3KHZ); November 2-9th
Activity will be on 160-15 meters using CW, SSB and RTTY modes. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters. Hans, SM6CVX, will activate Hastings Island (OC-117) as P29VCX (QSL via SM6CVX) possibly between November 11-13th. Then if possible, D'Entrecasteaux Island (OC-116) as P29VCX (QSL via SM6CVX) between November 13-14th. Also, a one night operation is possible from Loloata Island (OC-240) as P29VCX (QSL via SM6CVX) between November 15-16th. A Web page is available for more details at:
http://www.425dxn.org/dxped/p29_2009/index.html

PA30, NETHERLANDS (Special Event). Members of the "International Police Association Radio Club" of the Netherlands (IPARC-PA) is celebrating their 30th anniversary by activating the special event station PA30IPA between now and November 6th. Look for IPA members of the IPARC to be active on HF, VHF and UHF on all modes, including PSK31 and RTTY. QSOs with PA30IPA counts for 2 points towards the Windmill Award. You need 3 points, so if you ask for a QSO with the operator with his home callsign, you collect all 3 points and can obtain the award. QSL PA30IPA via PA9LUC. For a scedule of the transmissions of PA30IPA see IPARC's Web site at:
http://www.iparc.nl

PB65, NETHERLANDS (Special Event). Look for special event station PB65BP to be active until November 11th. Operations will be on all bands and the Digital modes. Activity is to celebrate the 65th anniversary of the "Liberation of Breda" and the memory of the Poles -- soldiers of the First Polish Armored Division under General Stanislaw Maczek that released the city on October 29, 1944. The complete story can be found on QRZ.com under the callsign PB65BP. QSL via PA1WLB.

PJ4, NETHERLANDS ANTILLES. Don, W9JNY, will be active as PJ4/W9NJY from Bonaire (SA-006 and WLOTA L1279) between now and October 30th. Activity will be casual on all HF bands. QSL via his home callsign, direct or by the Bureau.

PJ4, NETHERLANDS ANTILLES. Jeff, KU8E, will once again be active as PJ4/KU8E from Bonaire (SA-006 and WLOTA L1279) during November (dates not provided). Activity will include the CQWW DX CW Contest (November 28-29th) as a Single-Op/Low-Power entry. QSL via K4BAI, direct or by the Bureau.

QSL INFO AND NEWS.....
STILL OPERATING AND STILL QSLING! Wim, PA0WRS, reported (edited):
"Today in the mail a QSL from W0ZTL North Dakota 160m. A new one
for my 160m WAS. Operator Alex will be 92 years old in November
and is QRV since 1939. I added 2 Greenstamps and Alex returned 1.
It's for sure that Alex still has FB ears..... Tks Alex"

NEW QSL MANAGER. Andy, ZC4VJ (G3AB), reports that he has a new QSL
Manager. The new QSL Manager is via M0URX. Cards received at the
P.O. Box address in Cyprus will continue to be answered. LoTW logs
will continue to be uploaded by ZC4VJ.

NEW QSL ROUTE. Erik, K5WW, reports that effective October 12th, he will
start doing the HR9/WQ7R QSL (so no longer via AI4U).

HAVE PATIENCE! More QSL cards were received this past week for the many
UA4WHX operations. Leslie, WF5E, from the "WF5E DX-QSL SERVICE" reported
receiving 600 QSL cards from Vlad, UA4WHX. He states, "Today (Oct. 17th)
I received my first shipment of QSLs from UA4WHX. 3 lbs. I still have
another 500 or so due later. I will process these and send them out
ASAP. Thanks Vlad." For more details about the "WF5E DX-QSL SERVICE"
go to: http://www.qsl.net/wf5e

QSLS VIA LOTW: 9M2CNC, CT3FQ, GW4BLE, HI3TEJ, HK1X, HK6P, IK0YVV, LX7I,
LY9Y, OE9GHV, OK2ZI, PA7LV, PF7M, S9MX, SV2BFN, TI5/NP3D, TO4X, TS7C,
UA3BS/3, UA3SAQ, UA3TCJ, YI/KV4EB, YL7X and YW4V

QSLS RECEIVED VIA MAIL: 5B/AJ2O, 5B4AII, 5K0T, 9H3QC, C31PP, CC0Y,
GI0KOW, GI0VJE, HA5JI, KL7J, LZ1JZ, OH0R, PY0FF, R7HQ, RW3RN, TO3R,
TO5AA, TO8YY, UM8LA, VK9GMW, VQ9LA, YI1RZ, YL2BJ, YL2KO and YT5W

QSLS RECEIVED VIA THE BUREAU: 4L7O, DP1POL, EP4HR, ES5NC, FJ5DX, H40FN,
LA9Z, OA4BHY/2, T88HM, TC2T, V51AS, V26MN, VK9XW, VP9400KD, XE1KK/XF1,
YJ0MM and ZL1WY/ZL7

SILENT KEY. It has been reported that well-known DXer Mathias Bjerrang,
JW5NM/LA5NM became a Silent Key (SK). Reports indicate that while in
Svalbard, Mathias slipped and fell while walking, hitting his head. He
was later found Sunday morning, cold and unable to speak. He was brought
inside where he later stopped breathing; he was unable to be resuscitated
and died. OPDX and its readers would like to send out our deepest sympathy
to the family and friends of JW5NM/LA5NM.

ST, SUDAN. Robert, S53R, will be active either as ST2KSS or ST2X (pending
license) during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/
Single-Band (15m, possibly 20m) entry.

T8, PALAU. Kozo, JR8DHE, will be active as T88KP between October 24-29th.
Look for activity in the CQWW DX SSB Contest (October 24-25th). QSL via
his home callsign.

TC7, TURKEY. Operators Hudaverdi/TA7OM, Ayhan/TA7N, Erkan/TA7CM, Bulent/
TA7Q, Ismail/TA7AO, Can/TA3GO and YL Elif/TA3YE will be active as TC7KA
during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry.

QSL via TA7KA.

TI5, COSTA RICA. Once again a large team of operators will be active as TI5N during the ARRL DX SSB Contest (March 6-7th) as a Multi-? entry. QSL via W3HNK. Operators mentioned are Brian/K9QQ, Mike/KA4RRU, Dan/W0CN, Denis/W4DC and Kyle/WA4PGM.

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and TI2ZM will be active as TI8M from Costa de Pajaros, during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via TI2KAC, direct preferred but bureau "OK".

TO7, MARTINIQUE. Dmitry, UT5UGR, will be active as TO7A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via UT5UGR.

TX5, MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will be closing up their TX5SPM Nuku Hiva Island (OC-027) operation in the Marquesas Islands group on October 22nd. As of Sunday, 4k QSOs are logged. The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V3, BELIZE (Update). Pete, K8PT, will be active as V31PT from Ambergris Cay (IOTA NA-073) between November 24th December 6th. He informs OPDX that this will be a holiday style operation on 40-10 meters only using SSB, CW and RTTY. QSL via his home callsign.

VG7, CANADA (Special Event). Members of the Vancouver Olympics Amateur Radio Group (VOARG) will be activating three special event stations to promote/commemorate the Vancouver Winter Olympic and Paralympic Games to be held in February and March of 2010. The special activity has began this October and will continue through March 2010. Operations will be on all bands and modes. The schedule for the three special 2x1 callsigns are as follows:
VG7V ☐ October 1st through November 30th
VG7W ☐ December 1st through January 31st (2010)
VG7G ☐ February 1st through March 31st (2010)
VOARG will be consolidating all contacts and intends to post them to the LoTW. In addition, commemorative QSL cards will be available at the conclusion of the events in April 2010. Direct QSL will require a self addressed envelope (SAE) and 2 green stamps to cover postage sent to the following address: VOARG, 9362 - 206A St., Langley, BC, Canada V1M 2W6 Cards received via the QSL Bureau will be returned the same way. A VOARG Web site will be operational in the very near future with more details.

VK9L, LORD HOWE ISLAND. There have been a few 40m QSNs reported by VKs that Lewis, VK2AHL, is active as VK2AHL/VK9L and is on holiday there. No way to check before going to print, but WFWL..... We will keep you posted.

VK9X, CHRISTMAS ISLAND. Operators Phil/G3SWH and Jim/G3RTE will be active from Christmas Island between February 20-27th (2010). Christmas Island counts as OC-002 for IOTA purposes. The 2008 "Most Wanted" survey by the DX Magazine shows Christmas Island at #66 world-wide for DXCC purposes. They will both use the callsign VK9X/G6AY. Their activity will be on CW only on all bands 80-10 meters. There will be no 160 meters activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many bands as possible. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's Web site <http://www.g3swh.org.uk> for a bureau reply or via the bureau. There is more information at: http://www.g3swh.org.uk/christmas-island.html

VR2, HONG KONG (Also FK). Jean-Louis, F5NHJ, will be active as VR2/F5NHJ from Hong Kong (AS-006) between October 20-25th. He will also be active from New Caledonia (FK) between October 26th and November 11th. His callsign will be FK/F5NHJ from Grande Terre (OC-032) and also from Lifou or Mare Island (OC-033). Activity from both places will be focused on 30 meters using the Digital modes. He will use a FT-857 and a Buddipole. QSL via F5NHJ, direct or LoTW. For more details, see his Web page at: http://www.f5nhj.fr

WRTC-2010 NEWS. Harry, RA3AUU, member of the WRTC-2010 Organizing Committee, announced that the list of team leaders have been chosen for WRTC-2010. To see the list of the 44 team leaders, please visit the WRTC-2010 Web page at: http://www.wrtc2010.ru/

XU7, CAMBODIA (IOTA/Contest Op). Wim, XU7TZG, will once again be active as XU7KOH from Koh Russei (IOAT AS-133, aka Bamboo Island). Peter, NO2R (XU7ACY) will also be with him. Both will be active in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via ON7PP direct only (w/2 USDs and SAE). Donations appreciated to QSL Manager to cover expenses. There will be limited CW operations before the contest.

YB, INDONESIA. Members of the ORARI Daerah Jawa Tengah Contesting Team will be active as YE2R from Semarang on the Island of Java (IOTA OC-021, WLOTA L1660), during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via EB7DX. Operators mentioned are: Hans/YB2DX, Seno/YB2LSR, Warno/YB2BOB, Jon/YB2ECG, Dani/YB2TJV, Taryono/YB2OBL, Partono/YB2CPO, Herry/YB2SSB, Deta/YB2VTO, Buntoro/YB3PXF, Adhi/YB3MM, Rudi/YC2KME, Bobby/YC2BBY, Dharmoko/YC2JVX, Sapto/YC2JKG, Udi/YC2PQW and Danis/YD2DNA.

YJ, VANUATU (Update/IOTA Op). The Croatian team of Ante/9A4DU, Nikola/9A6DX and Marko/9A8MM will be active as YJ0XX, YJ0DX and YJ0MM, respectively from Efate Island (OC-035) between January 21-28th (2010). Activity will be on 160-10 meters using CW, SSB and RTTY. QSL Manager will be 9A8MM. More details and updates are available at: http://vanuatu.rkp.hr

YOUNG HAM'S SELECTED FOR 2009 CQWW. David, KY1V, reports (edited): "We have finished the selection process for this year's Young Ham Contest Program. Having received dozens of essays from 5 continents we discovered we had a rich pool of excellent young CW operators from which to choose.

This year, we decided to go back to our roots and sponsor CW operators for the CQWW CW Contest which we haven't done since 2004 when then 14 year old Daniel Bradke, W2AU, was selected as the first ever recipient of this opportunity at VP5X. Thanks to my partner Krassy, K1LZ, and a generous donation from a Texas amateur (whom we'll announce later with permission), we decided to select 4 young hams to comprise the base team for 6Y1V's CQWW CW operation. With myself as the 5th team member, we have one spot open for a 6th team member. If you're interested in participating in this once in a life time adventure, let me know ASAP. Congratulations to the following four lucky young hams:
K0DXC - Cal Darula of Jackson, Ohio**
EA3ALZ - Roger Caminal of Sabadell, Spain
OZ7AM - Alex Hansen of Vallensbaek Strand, Denmark
RV9LM - Alexander Bezmenov of Tyumen, Russia
See you in Jamaica in November!"
** PLEASE NOTE: David, KY1V, later reported: "It is with great regret that I report Cal Darula, K0DXC, cannot join us for CQWW CW in November due to a prior commitment to K3LR. Not only is Cal a wonderful kid, but he is a stand up guy that places priority on previous commitments! You'll go far in life Cal. Krassy and I are extending you a special invitation to operate in ARRL DX next spring. Yes, we'll pick up your expenses! This leaves us with an open seat for another lucky young ham. We'll announce our selection within 24 hours!"

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. Activity will be on 160-10 meters. QSL via VU2PAI direct (QRZ.com address).

YW0, AVES ISLAND. On the YW0A Web page, it was announced that "The DXpedition will be scheduled by the Venezuelan Army for January 2010, in 3 or 4 weeks. We are working and coordinating with them, to obtain less days of operation. No one operator or team member can stay for a long time on the island." For updates, watch:
http://yw0a.4m5dx.info/home.html

Z3, MACEDONIA (Update/Correction). Members of the Radio Club "Nikola Tesla" (Z37M) and the MDXC will be active as Z37M during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via the Bureau or direct only to the MDXC H.Q. at: MEDITERRANEO DX CLUB, BOX 360, 87100 Cosenza, Italy. Operators mentioned are: Ant/IZ8CCW, Pasquale/IZ8IYX, Dario/IT9SSI, Antonello/IT9YVO, Gianni/IZ8CGS, Alex/IZ5MOQ, Dom/IZ8JAI, Venco/Z36W and Chris/Z35X. Look for more details on the MDXC Web page at:
http://www.mdxc.org

ZP0, PARAGUAY. Mike, NT6X, plans to be active as ZP0R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via ZP5AZL. Mike will be operating from Tom's, ZP5AZL, QTH located in the borders of Asuncion, the capital city of Paraguay. Operations prior to the contest, Mike will sign ZP6/NT6X.

ZY0T, TRINDADE AND MARTIM VAZ ISLANDS (Update/Delay). Members of the
Rio DX Group are now active from Trindade Island (SA-010) as ZY0T until
October 20th. QSL via PY1NB DIRECT ONLY. See OPDX.927 for more details,
or visit their Web page at: http://riodxgroup.dxwatch.com/trindade-2009

From: Alan Leith
Topic: 11371 Message: 11385

Good, Frank. Am glad you got it figured out.

I didn't fare much better with K4M. I did manage an SSB QSO on 20 and a CW QSO on 17. The latter was a new band. Heard them on 17 SSB once, faintly on 15 SSB once and nowhere else.

I also missed 3D20CR which would have been a new mode (CW), and managed only one QSO with TX5SPA on a band I didn't need.

Better days ahead :-).

73

Al, VE1AL

Great news Al,
I was confused by the previous post exceptions and rules.
It seemed to say cw was stuck with a new rule - but that didn't make sense that they would single out cw and make it tougher on them.
Yours is much simpler!
BTW, I guess I've missed K4M - only heard them twice on 40m and only in and out of noise for a few minutes those two mornings.
I hope you had better luck

11386. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-18 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11386

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 18 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 291 Issued at 2200Z on 18 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 17/2100Z
to 18/2100Z: Solar activity was very low. A southern plage region
(S28W14) produced a two-ribbon flare around 17/1900Z associated with
a minor x-ray enhancement and an EIT wave. LASCO images showed a
faint, slow-moving (around 230 km/sec), Earth-directed partial-halo
CME was also associated with the flare.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 17/2100Z to 18/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels through the period (19 - 21 October).
No significant field effects are expected from the CME mentioned
above.
III. Event Probabilities 19 Oct-21 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 18 Oct 070
Predicted 19 Oct-21 Oct 070/070/070
90 Day Mean 18 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 17 Oct 000/002
Estimated Afr/Ap 18 Oct 002/005
Predicted Afr/Ap 19 Oct-21 Oct 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 19 Oct-21 Oct
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11387. Plasma TV interference

Yahoo group: DX-IS (2009)
Date: 2009-10-19 01:39:38 UTC
From: John Geiger
Topic: 11387 Message: 11387

I was trying to run the Illinois QSO party today and 40m was getting clobbered by something causing an S9 noise level. I wonder if it is a plasma TV in the area. Does anyone on the list have experience with this type of RFI? The interference I had was a buzzing/hash type noise that covered about 40khz of bandwidth. It would occassionally disappear for a few seconds and then come back. The 40khz of bandwidth that it did cover would move up or down the band slightly across time. Does this sound like plasma TV RFI, or does anyone have an idea of what could be causing a noise like this?

73s John AA5JG

Not directly, John, but several months ago I was working a
station in the Middle East and he told me plasma TVs in his city/town
were "wiping out 20 and 40 metres." He did not elaborate. I thought
most modern equipment like TVs, computers, etc., were more RF
friendly than older stuff due to LSI and surface mount technology,
but that was at least one report I got specifically pointing to plasma TVs.

I don't have one, so I have no direct knowledge. I do have 2
computers in the shack and 4 others running it the house for a total
of 6 within 100 feet of my antennas and I do not see the white noise
background hash that I used to get 10-15 years ago with older
gear. Early computers were notorious for generating white noise and birdies.

If this is a big issue (plasma TVs causing RFI), I would expect
it is well publicised and discussed within the Ham community. I'd be
interested in knowing, because if I have to decide between watching
the Yankees on a plasma TV or digging a P5 out of the noise, the
Yankees are out of luck!

Well, I did watch that 5+ hour game last night (all 13 innings)
that didn't get over until past 2:15 AM local time. However, the
bands were closed. Had I been hearing the K4M guys on 160M, it would
have been a tough call.

I know at least one of the K4M team members is a huge Yankee fan,
so I suspect I would have been forgiven if I made the "wrong" choice! :-)

As I recall, within the last 6 months, one qrz.com there was a weekly news item that reported the FCC ordering a consumer not to use their plasma TV because of the Ham Band interference it was causing.

If you search you will find it.

John

That's the info I was interested in, John. It's also good to hear that the FCC is enforcing their RFI emission standards. I'm sure Canada will follow suit. I will have a look on QRZ.COM's message board for that discussion.

Hi John,

Yes, I have a neighbour with two plasmas. One has been tested and it's a 50 inch plasma, I can send the model and details on if you wish.

The offending units are just under 20m from my station and the QRM is horrendous! On certain frequencies, QRM around S9. Most of the time I cannot work the DX through the QRM, occasionally if it's a good signal and on CW, it's possible.

I find the QRM is a constant buzz or brrr sound and stays very constant, perhaps slightly moving upwards over hours. Some of the frequencies affected are 14010 - 14015. Plus and minus 14250 ...could not hear the ZY0T there! +/- 18083, all of 30m and most of 40m.

Anyone reading this, whatever you do, do NOT buy a plasma TV and don't recommend them, they are energy thirsty and QRM machines. Fortunately the technology is changing and they should be out of date shortly...

Subject: [DX-IS] Plasma TV interference

I was trying to run the Illinois QSO party today and 40m was getting clobbered by something causing an S9 noise level. I wonder if it is a plasma TV in the area. Does anyone on the list have experience with this type of RFI? The interference I had was a buzzing/hash type noise that covered about 40khz of bandwidth. It would occassionally disappear for a few seconds and then come back. The 40khz of bandwidth that it did cover would move up or down the band slightly across time. Does this sound like plasma TV RFI, or does anyone have an idea of what could be causing a noise like this?

It sounds like a bunch of old angry farts out there! Where's their dignity gone? Where's the respect for others gone?

If you have a problem with not getting through to the DX, well, flamin' well switch your rig off for a while, walk away! Let someone else get them.

We're not playing for sheep stations here! It's a hobby. The DX will be back another day. Good grief reef will surface again!

And while I am at it, would somebody please send a message to the RADAR operator on 40m, it's a simple message, "switch that blasted thing off"!

Subject: [DX-IS] Re: K4M zoo heard fm EU

A well-known DXer and I exchanged e-mails recently, discussing the craziness we hear on the bands. The most interesting facet of what's going on is that *everyone* seems to be doing it!

Several times I've tuned the pile, looking for a "clear" spot to scream my lungs out (or blast the airwaves with CW!). It doesn't seem to matter who's calling or who's being called. The DX station says "who's the Bravo Uniform?" If you're lucky enough to hear anyone else in the pile, they are typically calling without a single letter in their call corresponding to what he was looking for. The most perplexing part? Many of those you hear calling are what one might consider experienced, knowledgeable DXers who should know better.

I guess the craziness is contagious! Perhaps it's only solarfluxitis or lackasunspotsitis.

is it just me ? why is it that the people that praise a DXpedition,

are always the ones that have worked it on a majority of the available slots ? I am not complaining, I think that given the conditions they have to work with there doing a Good job, NOT excellent but ok.
I managed to work them on 15,17 & 20 phone, and if it wasnt for the ASS qrming them I would have added 40 meters also.

just an observation.

I think you would have seen more band/modes slots if they had more time. They did (IIRC) somewhere near 60,000 QSOs in about 6.5 days. I think that number is very high. We'll get detailed stats as the days progress, but looking at some of the zone combos, there are hams in Europe (the opposite side of the world who worked them 10 or 12) times.

If demand from the opposite side of the world can be met on 7 different bands, I believe they have succeeded.

The comments on the Florida Contest Group reflector seem to indicate it was the lower bands (particularly 80M) that suffered from the impact of a plasma TV in the neighborhood.

Marsha and I have had our eye on a 55" LED - unbelievably awesome picture and about 1" thick. We figure if it causes RFI to our rigs, we'll just turn it off! hi hi

I didn't get to work them on any band/mode. No big deal as I've worked previous Midway operations.

Granted I didn't have a lot of time to spend calling but I was running a barefoot rig to poor antennas and couldn't crack the pileups. I spent about one hour on 30m one day, three hours on 80 CW one night and another hour on 40 CW on another night. What I really wanted was an 80m QSO.

The ops seemed excellent and were rattling off QSO's as fast as anyone around. They did well for the time they had available on the island. The lids were present but not nearly as bad as those QRM'ing the FT5GA operation.

Maybe Navassa is next?

Subject: Re: [DX-IS] Re: K4M Midway

I didn't get to work them on any band/mode. No big deal as I've worked previous Midway operations.

Granted I didn't have a lot of time to spend calling but I was running a barefoot rig to poor antennas and couldn't crack the pileups. I spent about one hour on 30m one day, three hours on 80 CW one night and another hour on 40 CW on another night. What I really wanted was an 80m QSO.

The ops seemed excellent and were rattling off QSO's as fast as anyone around. They did well for the time they had available on the island. The lids were present but not nearly as bad as those QRM'ing the FT5GA operation.

Maybe Navassa is next?

Incredible timing!

A couple of minutes ago on the cluster are the following announcements:

K6KOZ: Congratulations to the entire K4M Midway dxpedition crews for "A Job Well

K6KOZ: Job Well Done, K4M Dxpedition Crew. 73's

TI8II: K6KOZ i wonder if you say something if you dont working??

I guess the translation is "I stumbled around like a wuss and finally they heard my signal. What a great team." This is obviously the antithesis of "What a horrible dxpedition, these guys couldn't generate a QSO on a net!" (Meaning: boo-hoo, I haven't been able to work 'em!"

DX IS!

I worked the last one but from conversations with newer DXer's I know there are an awful lot of people who don't have Navassa. BTW one of my cards is on the web! :-)

http://hamgallery.com/qsl/country/Navassa/nf6s.htm

I'd liek to get it on 80m, too. NF6S told me after the last one in 1993 that the QRN was so bad on 80 then that the only people they could work on that band were the really loud stations.

11409. Comparative Results for Recent DX'peditions

Yahoo group: DX-IS (2009)
Date: 2009-10-19 15:17:27 UTC
From: Nelson Moyer
Topic: 11395 Message: 11409

As K4M winds down with more than 60K Qs in less than seven days, the temptation to compare K4M to FT5GA is irresistible. I'm looking forward to the final stats for both operations, and I suspect that an analysis could be highly instructive to future operations. Of particular interest to me will be how the antipodes and difficult paths faired for both operations. Preliminary data strongly suggest that EU did much better with K4M than NA did with FT5GA.

As for the cops and jammer kids, it seems to me that the better the DX operators, the fewer the problems with the jammers. FT5GA got into trouble with the lids the first day by running a wide 20 meter pileup in the General portion of the band, disturbing many nets and creating havoc. They were sitting ducks after that.

Another observation, the DX'peditions that emphasize CW are less prone to lid interference than those emphasizing phone bands. K4M was blessed with several excellent CW ops.

Worked them this morning on 30m after about 5 minutes of calling. Good signal here also. It is amazing, though, how many people don't know how to work a pileup. On both 30 today and 40m on Thursday AM when I worked them the op had a very predictable pattern-find the station they just worked, slide down a little to just below the pile, and call. Many callers never figured this out and they would call on the same frequency the whole time even though K4M was listening down a few KHZ from where they were calling. Hope I didn't just give away my secret to all!

I must've picked the wrong times to call them. I rapidly figured that pattern out but evidently so did many others with bigger signals than I had. Whenever they came back to someone else, he was always on the exact frequency I'd called them on.

11412. Ground mounting vs roof mounting verticals

Yahoo group: DX-IS (2009)
Date: 2009-10-19 16:13:55 UTC
From: John Geiger
Topic: 11412 Message: 11412

Most of the discussion I see about verticals assumes ground mounting, and I guess that it is because of ease of installation. However, ground mounting also requires an extensive radial system. How do ground mounted verticals compare in performance to roof mounted verticals, say at a height of 20 feet or so, with 4 quarter wave radials per band?

Are most verticals ground mounted because they also perform better with such a mount? Or will a roof mounted vertical with the 1/4 wave radials be an equal or even better performer?

Hi Art,

Large difference between today and the old days. What is
going on today is not even close to "tail ending". Tail ending is
almost impossible today. In days of "olde" the QSO's had ID's and
people "tail ended" over the ID. Today when after the DX OP replies and
gives a call the station sends just 599 TU there is really no
opportunity to tail end.

On CW if a lot more stations used break in that almost all
of todays rigs are capable of that could help. As soon as the DX
station replied it would be heard and there would be a dramatic
improvement. My old TS930 and my K2 both have it and operate break in
with a modified SB220 so I can stop in the middle of my call.

Regarding the "programmed delay" in the response that may
still be a valid method. And Yes, I do it. If I observe the DX OP
having a typical 4 second response time I'll delay 3 seconds before
I'll dump my call in the pileup.

73,
Bob

aburkefl wrote:
> What you describe is basically what used to be known as "tail ending." Over the years, there were a number of well-known dxpeditioners who despised tail ending. The theoretical secret to tail ending is/was to NOT send your call until the other station had at least exchanged reports. Too many stations these days just start sending their call as soon as the DX station comes back to that guy. All that does, obviously, is slow things down, clobber the QSO, etc.
>
> Another old "trick" is/was instead of blasting out your call immediately, wait a small fraction of time (preferably something somewhat longer than a nanosecond!) and THEN send your call - there was a chance that 32 other stations had completed their call and yours will be in the clear. Of course, that same theory is why so many stations keep calling and calling and calling... - they're hoping to be the last station in the clear. Even with a relatively small number of stations calling, this most often results in a continuing cacophony that's hard to decipher.
>
> DXers have accidentally become their own worst enemy. The lack of discipline on virtually everyone's part just makes the whole process more difficult. It's ironic that most of what used to work did so before the days of the cluster! Statistically speaking, it just has to be because there were less people tuning on the appropriate frequency.

What a Jabroni! First off, KL5O wasn't in any contests, so don't know what his problem was. Plus, if he is a real oldtimer, he wouldn't be on 17m anyways since we didn't get that band until 1989.

Yesterday,

 KL5O was on 18.145 for the Alaskan Anniversary. there was an OLDTIMER,... .... that kept on trying to cover him up and kept repeating that 17 meters wasnt for contests. he didnt do any REAL damage but he sure did try !

Maybe the person was old enough to be losing some of his mental faculties
and doesn't know what the difference between a contest and a special event
station is. I know of nothing that prohibits special event stations from the
"WARC" bands.

I'm an "oldtimer." I got my Novice in 1967, my General in 1968 and my Extra
in 1971. And I'm active (somewhat at least) on all bands from 160 meters
thru 3 cm.

Zack,

My elmers, would have called you a young whipersnapper !

they were licensed before WW II..... however, I lost the last of them last year. I sure miss those guys.

:-)

I was going to guess that most of your elmers are gone (as mine are). I miss them too. But I guess yesterday's whippersnappers become today's and tomorrow's oldtimers. There are still a lot of people around who have been licensed longer than me.

But I do predate the "WARC bands" (I always thought we should just call them "the newer bands"). I can recall getting on 30m for the first time with a modified FT101E.

Actually there is nothing in the rules that prohibit contests from the WARC bands. That was just an ARRL decision that seemed to catch on with the other contest sponsors.

I modified my FT101B to get on 30 meters soon after it was released as well! It will really be progress when 30, 17, and 12 don't get any special name-just seen as other HF bands. And where does 60m fall in since it isn't a WARC band? It is the real "new band"

I just wanted to relate --

My Elmer used to tell me stories of operating spark on banana bats in and out of South America. Pretty interesting stuff. Later he worked for Consolidated-Vultee.

I am incredibly fortunate to have his bug. I haven't put it on the air yet - but I will!

Topic: 11430 Message: 11436

That's why we use UTC. It was once called Greenwich Mean Time because it's based on the time at Greenwich Observatory in England. So I can note my time in UTC and send it on my QSL to anyone in the world who also logs in UTC and we should have the same date and time logged, plus or minus small errors in clock time. (We don't all use "atomic clocks"!)
:-)

From: RICHARD SOLOMON
Topic: 11437 Message: 11437

Someone posted the procedure the Postal Clerk uses to exchange IRC's.

I filed it (really !!), but so good I can't find it.

Can someone kindly post it again ? I got the "Thousand Yard" stare today !!

Thanks,

73, Dick, W1KSZ

I am amazed and disappointed at the vituperation spewed forth by
members of this group. Condemning an entire group of people just
because they may not understand some obscure section of the
Postal Regulations (which by the way makes the Tax Code look
like a pamphlet), is contrary to the Amateur's Code.

Just because the USPS Management has not chosen to educate
the Postal Clerk in every nuance of the PR's is no reason to condemn
them as a whole.

Let me remind you that the Reg's on IRC's are only important to the few
of us who may try to exchange them and are not mainstream to the
USPS Charter.

As for the Postal Clerks I know (at the Vail PO), they are the nicest and
most helpful folks I know.

This might be what you were looking for, courtesy of Duane WV2B:

Here are the instructions provided by a POS clerk who knows how to
redeem IRCs. Take these instructions when you go to the PO to discuss
with PM/clerk:

1. Stamps & Mdse
2. Exchange
3. Redeem Foreign IRCS
4. Enter .98 (cost of the stamp)
5. Scan and sell 1 international .98 stamp
6. the balance owed will show 0

Last time IRC's expired, I took all of mine (about 100) in to our local USPS, after making an appointment with the postmaster, telling him how many I had and asking to exchange them. There was no problem doing it this way since he was very knowledgeable on IRCs or at least had time to check the International Mail Manual.

When I called and asked to speak to the postmaster I asked him should I just take them to the window or what? He said no, most window clerks probably don't know what an IRC was (and our window clerks know me too), but he was thoroughly familiar with IRCs and asked me what time would be convenient with me to bring them in for exchange. Again the postmaster asked me when it would be convenient for me, not him.

That was what I call service

You can usually find the name of the local postmaster at the USPS web site. First locate the USPS facility for your ZIP code, then click on location and that should give you the name of the postmaster or person in charge, plus a local phone number (not the 1-800 number listed in the phone book), and as I did call and ask them about exchange/redeeming IRCs.

"Most" postmasters have been with the USPS long enough to know about how to redeem them.

Subject: [DX-IS] USPS Info: re: IRC Exchange

Someone posted the procedure the Postal Clerk uses to exchange IRC's.

I filed it (really !!), but so good I can't find it.

Can someone kindly post it again ? I got the "Thousand Yard" stare today !!

Thanks,

73, Dick, W1KSZ

I did the same thing. At larger post offices in the US you don't necessarily have to take it up with the Postmaster. I called the Counter Supervisor before I came in and, given a few day's notice, she was well prepared for me, too.

Just don't hit a poor counter clerk with them cold. It's bad enough they are supposed to know the entire Domestic Mail Manual, but the whole International Mail Manual, too? Give them a break.

Dick:

Colleyville has only maybe 25,000 residents and is completely landlocked by other cities in the Dallas-Fort Worth area so it was easy to see the postmaster no problem. He said if I had IRCs to redeem in the future, just call him and he'd take care of it, again that was service.

Called them for hours on the low bands and they were a cracking signal last night on 40, but nada.

Oh well, I'll wait for the next team. Happy to have worked them on SSB and CW. RTTY will be next time.

This morning on 40 CW some jerk was send "UP" over and over and over and over...

Fortunately (even though I didn't get through), the signal from K4M was significantly louder than the QRMer.

Hi Lance,

Too bad you didn't make it. Interestingly enough I heard the call of one of the K4M ops "breaking the pileup" several times. His home QTH is 30 miles from here. Yeah it's legal. The moral is if you need KP1, go there and work your home station.

I don't know what it was, but it was much more difficult than expected to get across from the East Coast. 20M should have been a chip shot but they were always weak. Only occasionally they were reasonably loud on other bands.

160M was nearly impossible. Those darn western US stations kept getting in the way. That band has become like any other these days. Too many guys with too much real estate and $$ for big antennas and high powered rigs. There seems to be no correlation between wealth and good operating skills.

From: aburkefl
Topic: 11395 Message: 11456

Any comparisons between K4M and FT5GA should be tempered significantly by factors you're already aware of:

(1) K4M was sitting on a giant frisbee in the middle of the Pacific - takeoff angles were good in any direction
(1A) - The FT5GA crew was told where they had to set up. They were forced to establish their stations in less-than-optimum locations. Takeoff angles to NA were severely restricted.
(2) The crew on K4M were all volunteers, many of whom have reasonably impressive credentials
(2A) - The FT5GA crew consisted of four French army men who happen to be amateur radio operators. Whether experienced or not, their desire to get the job done was what made the trip come off in the first place.
(3) The crew of K4M was there exclusively for a dxpedition and consisted of between 2 to 3 times the size of the FT5GA boys.
(3A) - 4 army guys whose primary function there was military

I'll bet there are other considerations as well - the power restrictions demanded of FT5GA, for example.

I consider myself fortunate to have been able to work anything at all from the FT5GA group. Maybe one day the French economy will collapse and they'll need to sell Glorioso. You can buy it and organize your own dxpedition.

11457. Re: Ground mounting vs roof mounting verticals

Yahoo group: DX-IS (2009)
Date: 2009-10-20 12:22:39 UTC
From: aburkefl
Topic: 11412 Message: 11457

I'll offer two viewpoints:

Not too long ago, I heard an address by a well-known multi-station owner/operator. He said for a number of years he utilized an elevated vertical with few radials. He further stated that he now recommends that for all his competitors. That recommendation came after he ground-mounted another vertical with lots of radials.

Commercial AM installations are all ground mounted and typically with 120 radials (one every three degrees). Studies indicate these radials make the ground look like it's made of metal. If an elevated radial worked as well or better, why wouldn't more commercial installations have the feedpoint elevated and a lot less radials?

Yes, 12, 17 and 30 meters were the bands granted via the World Administrative Radio Coference (WARC - hence WARC bands) in 1979. If I remember correctly, they were not all instituted at the same time.

After a long absence from the air (1988 - 2003) I was quite surprised (and pleased) to hear DXCC permission granted for those bands while I was absent. Oh yeah, around the same time DXCC was permitted, CQ allowed the bands for WPX awards.

The circumstances surrounding their being there were also different. For Glorioso, it is an inhabited island but it happens to be inhabited by the French military and they evidently will only give permission for military personnel to operate there. It probably didn't cost the operators a whole lot of money to do the operation. A single person might be given permission to operate from there next month for all we know, and he might stay for months. I believe something like that was the case with FR5HG many years ago.

For Midway, it is not inhabited and is controlled by the US Fish & Wildlife Service. They are probably more stringent on who gets permission to go there than the French military in the case of the FR islands. It is also very expensive for each operator to make the trip. We might not see another operation from there for another 10 years.

Well, I think everyone besides me ought to use an MFJ-1798. 10
bands with no radials. This thing is a DXer's dream. It's a one
call pileup buster because of the low take-off angle:

http://www.mfjenterprises.com/Product.php?productid=MFJ-1798

It looks nice too. Click on the picture for a larger
view. What DXer wouldn't be proud to have on in his front yard?

Well, I think everyone besides me ought to use an MFJ-1798. 10
bands with no radials. This thing is a DXer's dream. It's a one
call pileup buster because of the low take-off angle:

http://www.mfjenter prises.com/ Product.php? productid= MFJ-1798

It looks nice too. Click on the picture for a larger
view. What DXer wouldn't be proud to have on in his front yard?

From: John Geiger
Topic: 11464 Message: 11464

I see that 4U1UN seems to be having a DXpedition of sorts going on right now-operating on multiple bands and modes-just worked them on 20 RTTY for a new RTTY country. This gets me thinking (usually not a good thing). What radio regulations are in effect for 4U1UN? DO they follow FCC regulations? If not the FCC, do they have their own set of operating rules? Does anyone know if they can run 60 meters? If they aren't under FCC rules, they could run 1.5kw SSB on 30 meters from the heart of NYC.

Speaking of these types of antennas, remember the Uni-Hat? Do they still make those things? How well did they perform on 160?

They seemed kind of overpriced to me but I may have to get creative and put together something similar if I want to get on 160 from home.

Brian,

Your comment on 160 Mtrs misses the point. I could say the same thing about trying to contact of stations in Africa (and FT5GA). Not the eaisest to work from CO; I seem to compete fairly well with the CA guys into the Pacific, but have found it harder to break thru the "East Coast" wall with all those "guys with too much real estate and $$ for big antennas and high powered rigs".

I would have sure liked to work FT5GA on both 160 and 10, but I never did hear them. Having lived in GA, CA and now CO, I will say that CO seems to be a pretty good compromise. If money was no object, the best situation would be to own a home on both coasts!

However, I will agree with you about no correlation between wealth and good operating skills; but a team of highly skilled operators can make a world of difference in handling the lids, kids, and space cadets that make life difficult for us!

Hi Lance,

Too bad you didn't make it. Interestingly enough I heard the call of one of the K4M ops "breaking the pileup" several times. His home QTH is 30 miles from here. Yeah it's legal. The moral is if you need KP1, go there and work your home station.

I don't know what it was, but it was much more difficult than expected to get across from the East Coast. 20M should have been a chip shot but they were always weak. Only occasionally they were reasonably loud on other bands.

160M was nearly impossible. Those darn western US stations kept getting in the way. That band has become like any other these days. Too many guys with too much real estate and $$ for big antennas and high powered rigs. There seems to be no correlation between wealth and good operating skills.

I have never bothered to use anything but the built in features of WinXP.
It sets the clock with time.windows.com once a week. However it is trival to
change it to the time server of your choice. I use time.nrc.ca the source
for CHU and a simple reg edit changes the frequency that the time is set to
once/hour. By doingit that way I don't have software running in the
background the uses system resources and memory. Check out the
Configuring the Windows Time service to use an external time source section
in http://support.microsoft.com/kb/314054

Hope it helps

DX Bulletin 41 ARLD041
>From ARRL Headquarters
Newington CT October 15, 2009
To all radio amateurs

SB DX ARL ARLD041
ARLD041 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MIDWAY ISLAND, K4M. The K4M operation is in full swing. Suggested frequencies are: 28475, 28024, 28080, 24945, 24894, 21295, 21024, 21080, 18145, 18074, 18100, 14200, 14024, 14080, 10104, 10140, 7078, 7004, 7040, 3799, 3504, 1826.5, 50115, 50115 kHz. See the K4M web site for QSL information.

UNITED NATIONS, 4U. 4U1UN Activity Week will be held October 19 to 25 with operations on all bands and modes with an international team of DX and contest operators. Activity will be from 1200-0400Z each day. All-night activity is planned for October 23 and 24. They will also be active in the CQ WW SSB Contest in the two transmitter M2 category. QSL via HB9BOU.

MONTENEGRO, 4O. Tonno, ES5TV will be active as 4O3A during the CQ WW DX SSB Contest as a Single-Op/All-Band entry. QSL via 4O3A, direct or by the LoTW.

SRI LANKA, 4S. Operators Heinz, DL1IH and Salvo, DH7SA are expected to be active as 4S7AAG and 4S7SAG, respectively, during a holiday DXpedition sometime in October.

ISRAEL, 4X. Yoshi, JE2EHP will be active as 4X/K1HP from Tel Aviv and Jerusalem between October 29 and November 5. Activity will be on all HF bands and 6 meters, using CW, SSB and RTTY. QSL via the Bureau to his home call sign, JE2EHP.

CYPRUS, 5B. John, G4IRN will be QRV as 5B/G4IRN from November 27 to 30. Activity will include the CQ WW DX CW Contest. QSL via LoTW or via G4IRN.

MALDIVES, 8Q. Jim, G3VDB will be active as 8Q7EJ from Vilamendhoo Island (AS-013) until October 25. Activity will be holiday style and subject to hotel permission and local conditions. Look for operations on CW, RTTY, PSK31 and possibly SSB. He will use 100 watts into wire antennas. QSL via his home call sign.

CUBA, CM2. Frank, CM2IR is on 40 meters using BPSK31 on 7035 kHz. He is also on SSB around 7150 and 7170 kHz. QSL via EB7DX, with 2 USDs or IRCs.

MOROCCO, CN. Jim, W7EJ will be active as CN2R during the CQ WW DX SSB Contest. QSL via W7EJ.

CANARY ISLANDS, EA8. Mauri, OH2BYS will be QRV as EA8CMX from Galdar, Isla de Gran Canaria during the CQ WW DX SSB Contest. He is testing wire yagis/beverages on lower bands. QSL via OH2BYS.

CEUTA AND MELILLA, EA9. A group of Spanish operators will be active as EE9Z during the CQ WW DX SSB Contest as a Multi-2 or Multi-Single entry. QSL via EA9LZ.

IRELAND, EI. Marc, W4MPS will be active as EI/W4MPS from County Cork until 26. Most of the time he will be in Grid IO52, although he may also travel to IO42 and IO51. Marc uses a FT-60R at 5 watts and an Arrow antenna on AO-51.

SAINT MARTIN, FS. Craig, AH8DX will be active as FS/AH8DX starting October 22. Activity will include the CQ WW DX Contest as a Single-Op/All-Band entry. Operations outside of the contest will be on 160 and 80 meters using CW and SSB. Look for 40 meter RTTY also. QSL via AH8DX direct or via LoTW. Craig may also be active as PJ7/AH8DX from St. Maarten.

GALAPAGOS ISLANDS, HC8. A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal during the CQ WW DX CW Contest as a Multi-Multi entry. QSL via W5UE.

PANAMA, HP. Members of the Radio Club de Panama, HP1RCP, will be active during the 2009 JOTA event, October 17 and 18, from Panama City, Panama, Colegio La Salle assisting Troop 4.

TRINDADE ISLAND, ZY0. The RioDXGroup, with ops PY1NB, PY1ON, PY1YB and PY1ZV will be QRV as ZY0T from October 17 to 20. QSL via PY1NB, direct only.

GUINEA-BISSAU, J5. Jose, CT1DSV will be active as J5S until October 18. QSL via home call sign.

GUERNSEY, MU. Gerhard, OE3GEA will be active as MU/OE3GEA between October 27 and 29. Activity will be on the HF bands using CW and low power only. QSL via home call sign, direct or by the Bureau.

ALAND ISLAND, OH0. OH0Z will be QRV in the CQ WW DX SSB Contest as a Multi-Multi entry. QSL via W0MM.

TURKEY, TC1. Members of the TRAC Istanbul Branch (TA1KB) will activate their new club station using the special call sign TC1IEM between October 16 and 18, for the Istanbul Eurasia Marathon. QSL via the TA Bureau is preferred, or direct to TA1KB.

ICELAND, TF. Siggi, TF3CW, has announced that he will be active in the CQ WW DX SSB Contest and the CQ WW DX CW Contest as Single-Op/Single-Band 40 meter entries. QSL via LX1NO.

The following operation is approved for DXCC credit: FT5GA, Glorioso Island - 2009 Operation.

THIS WEEKEND ON THE RADIO. The Fall VHF Sprints, Great Pumpkin Sprint, JARTS WW RTTY Contest, QRP ARCI Fall QSO Party, Iowa QSO Party, Stew Perry Warmup Contest, Worked All Germany Contest, W/VE Islands QSO Party, 10-10-10 Feld-Hell Sprint and the Asia-Pacific Sprint are all on tap for this weekend. The Illinois QSO Party is October 19. Please see October QST, page 78, and the ARRL and WA7BNM Contest web sites for details.

Hello John and the group,

http://www.southgatearc.org/news/october2009/4u1un_activity_week.htm

there is some description of the current operations.

AFAIK they are directly under ITU-regulations (for the region they are in), wherever one of the UN-stations is operable. Also see 4U1VIC (Vienna) and 4U1ITU (Geneva)

11473. ZY0T DXpedition

Yahoo group: DX-IS (2009)
Date: 2009-10-20 22:30:29 UTC
From: Robert
Topic: 11473 Message: 11473

Well I guess noone but me needed this one since last look had me as #11 on the leader board for the US as they shut down.

Big thing for my little station but the interesting thing was that they used the leader board on Club Log BUT it was set so that the only way to accumulate score was the number of bands and how quick you go them. Deductions were given for duplicates on a band. No all mode/all band score!

Liked this alot better. It made the pileups reasonable without very large station working them again and again and again...

John

One antenna I use is a BigIR Vertical. First time I used it was on top of Sugarload mountain in Maine (4300ft) for a RTTY contest. Laid down ground radials and couldn't tune the antenna. Finally got it to run with a huge common mode coke.

Basic problem was that given the granite & elevation the ground radials were acting like elevated radials. Once we could tune it, it worked great. (not a beam but did the job)

When I installed it in my back yard I also put it on top of a 30ft rock ledge. What I did was put down a ground screen of about 60-quarter wave wires on the lowest frequency (40m) They are just there to enhance ground conductivity. Then I installed 2 sloping elevated radials for each of the 8 bands I operate on and tuned them to 1.1-1.2 SWR.

Works like a champ..no tuner needed.

Alway wanted to try this over a metal roof but the logistics were to much to manage for me.

Regards

Bob KB1JZU

Topic: 11473 Message: 11475

It seems I've worked several Trindade stations over the years. Guess it's a moderately rare one, at least for the USA. JA's may feel differently! :-)

I recall there was an operation to St. Peter and Paul's Rocks at the same time as 3Y0PI. One night the Peter I gang went QRT from 40 CW to refuel (or maybe to FIND the generator and then refuel) so I tuned around and heard ZY0SP calling CQ. I was the first taker. I think there have been more operations to PY0T than there have been to PY0SP since then.

I have 6 different QSOs with PY0T, including three with PY0TUP from whom I have never received a QSL for our QSOs in April, May and June of 1994. My two confirmations are on 20M CW & SSB, and
there has never been a response from PY0T/PY2TG from 1989.

In general, I find that it is extremely difficult to get any cards out of Brazil.

I heard ZY0T only one night when he was strong enough to call on 40M CW. However, even though I could hear him, he didn't hear me through the pile-up.

Another day, another time.

Subject: Re: [DX-IS] ZY0T DXpedition

It seems I've worked several Trindade stations over the years. Guess it's a moderately rare one, at least for the USA. JA's may feel differently! :-)

I recall there was an operation to St. Peter and Paul's Rocks at the same time as 3Y0PI. One night the Peter I gang went QRT from 40 CW to refuel (or maybe to FIND the generator and then refuel) so I tuned around and heard ZY0SP calling CQ. I was the first taker. I think there have been more operations to PY0T than there have been to PY0SP since then.

Well I guess noone but me needed this one since last look had me as #11 on the leader board for the US as they shut down.

Big thing for my little station but the interesting thing was that they used the leader board on Club Log BUT it was set so that the only way to accumulate score was the number of bands and how quick you go them. Deductions were given for duplicates on a band. No all mode/all band score!

Liked this alot better. It made the pileups reasonable without very large station working them again and again and again...

Dale,
I don't think you (we) can screw it up unless we try to get creative.
IMHO, the GMT time and date of the QSO from our perspective is what
should be in our log and on our qsls.
It's the DX responsibility to find that date in their logs.
Since I'm wrong more than right on many things - this is just my take on
the issue.
73,
frank w0ecs

Ah! Your keen sense for the obvious is as sharp as my own! hi hi

Yes, that's it in a nutshell. His experience indicates his opinion that the full-blown radial concept works much better. In his book Low Band DXing, ON4UN also espouses the full-blown radial instead of the elevated radial concept.

I think it's a little like the argument that you can load a 50-ohm resistor, but it might not radiate very well!

I had a GAP Titan for a while. Not a single one of my amateur friends thought it was aesthetically pleasing, in fact, they all stated it definitely was ugly! It was also a PITA to assemble.

K9OM has a home both up north (Wisconsin) and here in Florida. His home here in Florida borders the ICW (Intra-coastal Waterway). He has one of those IR verticals mounted on the dock with a large-gauge wire running down into the salt water. He says it's dynamite on the low bands.

Tragic Accident - C6APR

From: <mailto:paul@...>paul@...
To: <mailto:cq-contest@...>cq-contest@...
Sent: 10/21/2009 4:46:27 P.M. Eastern Daylight Time
Subj: [CQ-Contest] Tragic Accident - C6APR

It is with great sadness that I have to inform the community of a
tragic accident this morning at 630am EST.

The C6APR team, consisting of Pete, W2GJ, Ed, K3IXD, Randy K4QO and
Dallas W3PP were all killed this morning as their aircraft crashed on
take-off from Summerville Airport, SC on their way to Crooked Island,
Bahamas. They were on their way to operate in the CQWW contest this weekend.

Our thoughts are with their families in this tragic time!

More as it made available!

This is awful. There is always risks in life but you never expect them when doing normal activities like flying to a popular destination.

I also extend my condolences to the families. All four will be missed by the Ham community.

SB DX ARL ARLD042
ARLD042 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SWAZILAND, 3DA. Operators Andy, 3DA0TM, Dave, ZS6AVM, Dave, ZS6GF and Daniel, ZS6JR will be QRV as 3DA0WW as a Multi/Single entry in the CQ WW SSB DX contest. QSL via 3DA0TM.

UNITED NATIONS HQ, 4U_UN. Operators NN1N, KR2Q, PY5EG, JK3GAD, OH0XX and OH2BH will be QRV as 4U1UN as a two transmitter entry in the CQ WW SSB DX contest. QSL via HB9BOU.

CYPRUS, 5B. Stewart, G3RXQ will be QRV as 5B/G3RXQ in the CQ WW SSB DX contest as a Single-Op/All-Band/High-Power entry. QSL via G3RXQ.

BARBADOS, 8P. Tom, W2SC will be QRV as 8P5A during the CQ WW SSB DX contest as Single-Op/All-Band/High-Power entry. QSL via NN1N.

MOROCCO, CN. M'hamed, CN8NK will be QRV as CN4P during the CQ WW SSB DX contest as a Single-Op entry. QSL via EA5XX.

CANARY ISLANDS, EA8. Operators Pekka, OH1RY, Juan, EA8CAC, Manuel, EA8ZS, Salvador, EA5DY, Jaakko, OH1MA, Kari, OH3RB, Kari, OH5XT and Jussi-Pekka, OH6RZ will be QRV as AO8A during the CQ WW SSB DX contest as a Multi-2 entry. QSL via OH1RY.

HONDURAS, HR. Dan, HR2DMR will be active as HQ2W during the CQ WW SSB DX contest as a Single-Op/All-Band/High-Power entry. QSL to home call.

MONGOLIA, JT. Marko, N5ZO will be active as JT1ZO during the CQ WW SSB DX contest as a Single-Op/All-Band entry. QSL via OH0XX.

MARIANA ISLANDS, KH0. Operators Kuny, W1FPU, Hajime, AH0BR, Moto, W1NDE and possibly others will be QRV as AH0BT from the Northern Mariana Islands during the CQ WW SSB DX contest as a Multi-2 entry. QSL via 7L1FPU.

LUXEMBOURG, LX. Philippe, LX2A will be QRV as LX7I in the CQ WW SSB DX contest as a Single-Op/Single-Band/High-Power entry on 20 meter. QSL to home call.

SUDAN, ST. Robert, S53R will be QRV as either ST2KSS or ST2X in the CQ WW SSB DX contest as a Single-Op/Single-Band entry on either 20 or 15 meters. QSL via operator's instructions.

PALAU, T8. Kozo, JR8DHE will be QRV as T88KP until October 29. This includes being an entry in the CQ WW SSB DX contest. QSL to home call.

TURKEY, TA. Operators Hudaverdi, TA7OM, Ayhan, TA7N, Erkan, TA7CM, Bulent, TA7Q, Ismail, TA7AO, Can, TA3GO and Elif, TA3YE will be QRV as TC7KA as a Multi/Single entry in the CQ WW SSB DX contest. QSL via TA7KA.

INDIA, VU. Pai, VU2PAI will be QRV as a Single-Op/All-Band entry in the CQ WW SSB DX contest. QSL direct to home call.

INDONESIA, YB. Members of the ORARI Daerah Jawa Tengah Contesting Team will be QRV as YE2R from Semarang on the Island of Java, IOTA OC-021, as a Multi-2 entry in the CQ WW SSB DX contest. QSL via EB7DX.

MACEDONIA, Z3. Members of the Radio Club Nikola Tesla and the MDXC will be QRV as Z37M in the CQ WW SSB DX contest. QSL via the bureau.

PARAGUAY, ZP. Mike, NT6X plans to be QRV as ZP0R in the CQ WW SSB DX contest as a Single-Op/All-Band entry. QSL via ZP5AZL.

THIS WEEKEND ON THE RADIO. The CQ Worldwide SSB DX Contest, NCCC Sprint, 10-10 International Fall CW Contest, 10-10 International Fall Digital Contest and the 50 MHz Fall Sprint are all scheduled for this weekend. The SKCC CW Sprint is scheduled for October 28. Please see October QST, page 78, and the ARRL and WA7BNM contest web sites for details.

#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 295 Issued at 2200Z on 22 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
Geomagnetic field activity was at mostly quiet to unsettled levels.
An isolated period of minor storm levels was observed at 22/1200Z. A
geomagnetic sudden impulse occurred at 22/0019Z (11 nT, as measured
by the Boulder USGS magnetometer). This activity was associated with
a faint partial-halo CME which was observed around 17/1900Z.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be quiet on day one (23 October). Quiet to unsettled
levels are expected on days two and three (24 - 25 October) in
response to a recurrent coronal hole high speed stream.

I don't run more than 100 watts so power handling isn't an issue. I have looked at the TS32jr but need something with shorter elements.

Take a look at the MA-5B, got good turn radius

Also look at reviews on eHam

Subject: Re: [DX-IS] Mosley question

I don't run more than 100 watts so power handling isn't an issue. I have looked at the TS32jr but need something with shorter elements.

the " JRs " wont handle full power !

 but they are relatively easy to come by and cheap used.

Joey

Subject: [DX-IS] Mosley question

Has anyone on the list used a Mosley Mini 32 or Mini 33 tribander. I am looking for a reduced size beam to install on a roof tripod and wonder how the Mosley performs and how easy it is to tune. From a DXing standpoint, is it worth the money?

73s John AA5JG

There's a name for this..

Narcisstemic Clusteritis Bingosis or NCB

"After posting something on the cluster and you find your erection won't go down after 4 hours, stop using the cluster and consult a doctor. Other symptoms may include incessant need to post more on the cluster which can lead to an addiction, excited voice, constipation, and tingling in the fingers prohibiting radio tuning. If you or someone you know has exhibited any of the signs, seek Dr Phil immediately."

My antennas evidently don't do so well with the solar flux being so low as it has been. When it was above 100 I always did fine.

I generally work search-and-pounce in the contests from home. I never rely on packet. I call who I can hear and work those who can hear me.
:-)

24 October 2009 A.R.I. DX Bulletin
No 964
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

A3 - Paul, A35RK "originally thought his new A35A call had restrictions and was to be used for contest and special events, however that is not the case". Effective immediately, Paul has chosen A35A as his new permanent callsign. QSL via W7TSQ, direct or bureau or LoTW. [TNX The Daily DX]
A3 - Ramon, XE1KK will participate in the CQ WW DX SSB Contest as A31KK from Fafa Island (OC-049), Tonga, on 20 metres. All of the QSOs will be confirmed automatically via the bureau. The log will be uploaded to LoTW.
F - F5IL, F5IRC, F5THW and F5UBH will be active as TM5SN from Sein Island (EU-068) from 30 October to 2 November. They will operate CW, SSB and digital modes on the HF bands. QSL via F5IL, direct or bureau. [TNX F5NQL]
FP - Eric, KV1J and Tom, W8TOM have rescheduled their activity from Miquelon [425DXN 961], which has been postponed to 7-15 November. They will operate as FP/KV1J and FP/W8TOM on 160-6 metres SSB, CW, RTTY and PSK31. QSL via home calls, direct or bureau. Their logs will be uploaded to LoTW and eQSL. Further information at http://www.kv1j.com/fp/october09.html
FT5W - Flo, FT5WO will be active from Alfred Faure Base on Ile de la Possesson, Crozet Islands [425DXN 916] until 14 or 15 November. Usually he can be found on 17 and 20 metres during the weekends between 6 and 13 UTC. Look for him on or around 14260-14280 and 18165 kHz. QSL via home call (F4DYW), direct or bureau. [TNX The Daily DX]
HA - Radio Club Puspokladany (HA0KHW) will be active as HG0WFF/p from the Orseg National Park on 22-29 October. QSL via HA0HW. [TNX HA0HW]
I - Mauro, IN3SAU will be active as IB0/IN3SAU from Ponza Island (EU-045) for about ten days starting on 26 October. He plans to operate SSB, RTTY and BPSK31 on 80-10 metres. [TNX IN3SAU]
JT - Celebrating the 75th anniversary of the Mongolian Border Service Institute, special event station JU75BSI will be active on 23

October-20 November, including an entry in the CQ WW DX SSB Contest. QSL via JT1CH and LoTW. [TNX JT1CD]
P2 - Rough seas and bad weather conditions are delaying the voyage to the Tanga Islands (OC-102). The team (CT1AGF, G3KHZ, G3USR, M0VTG and SM6CVX) sheltered in Putt Putt cove on New Britain Island (OC-008) and operated as P29VSR (QSL via G3USR), then reached Muliama harbour on New Ireland (OC-008). Their estimated time of arrival to Tanga is now around 2 UTC on 24 October. Bookmark www.425dxn.org/dxped/p29_2009/index.html for updates.
ST - Robert, S53R, will be active as either ST2KSS or ST2X (pending license) during the CQWW DX SSB Contest, on 15 or 20 metres. [TNX NG3K]
T6 - David, CT1DRB has been active as T6AG from Afghanistan since 21 October. He will remain there for about six months. He operates CW only, for the time being on 30 metres (hopefully other bands will follow, but he might have problems with 20 and 80 metres). QSL via EA3GHZ, direct or bureau. Updates and logsearch will be available at http://t6ag.nra.pt/ [TNX EA3GHZ]
T8 - Kozo, JR8DHE will be active as T88KP from Koror (OC-009), Palau on 24-29 October, including activity during the CQ WW DX SSB Contest. QSL via home call. [TNX http://dx-hamspirit.com/]
TF - Rene, DL2JRM will be active as TF/DL2JRM/p from Iceland (EU-021) from 31 October to 2 November. He will operate CW on 160-10 metres. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
TZ - Mac, TZ6JA will be back to Mali on 26 October for one month, and hopes to operate SSB only during his early morning and late evening hours between 2 and 23 November. He will have two transceivers, a small amplifier, a 2-element beam for 40 and 20 metres and a G5RV. QSL direct only to Makoto Obara, P.O. Box 59, Tama, Tokyo, 206-8691 Japan. [TNX JA1ELY]
YJ0 - Tomas, VK2CCC (LY1DF) will be active as YJ0CCC from Efate Island (OC-035), Vanuatu from 30 October to 5 November. It will be a part time operation focused on 80 metres CW, with some 160 and possibly 40m activity. He will also give 60 metres a try (5404.5 kHz USB). QSL via VK2CCC, direct or bureau. He will upload his log to LoTW. Updates will be posted to qrz.com under YJ0CCC. [TNX NG3K]
VK - VK6IOA is the callsign to be used from the Houtman Abrolhos (OC-211) [425DXN 953] between 31 December and 4 January. For the time being the team includes Wally/VK6YS, Nigel/VK6NI and Bruce/KD6WW, but they are still looking for a fourth operator, ideally with reasonable CW skills. Please contact Wally (vk6ys@...) if interesed. Current plans are for two stations operating simultaneously, with a Spiderbeam for 20, 17 and 15 metres, a vertical dipole for 40-10 metres and a 1/4 wave vertical for 40/30 metres. QSL via VK4AAR.

DXCC NEWS ---> The following operations have been approved for DXCC credit: T6AB (Afghanistan, 2008 and 2009 operation), T6AF (Afghanistan, current operation) and TX3A (Chesterfield Islands, 2009 operation). Also, DXCC credit for YI/KV4EB has been extended through 9 January 2004 (originally it covered the period from 20 April to 28 November 2003). [TNX NC1L]

JD1BNA ---> Toshi, JA1ELY says that the station signing JD1BNA on 17 metres CW between 9 and 13 September was a pirate.

QSL OQ50USA ---> The OQ50USA log (year 1994) will be closed on 1 January 2010. QSL cards can still be requested direct from Paul Demelle, ON6DP. [TNX ON6DP]

QSL VK7ACG ---> Cards should be sent direct to G0WFH (no bureau):
Christopher Gresswell, 121 Gramby Court, Milton Keynes, MK1 1NG, England.
[TNX G0WFH]

QSL VIA IK3GES ---> Gabriele reports that all of the direct requests for this year's IOTA operations have been processed and mailed. He says that 1 IRC can be redeemed for a postage that covers up to three QSL cards in the same envelope. After 31 December direct requests with IRCs expiring on that date will be processed via the bureau. The list of callsigns Gabriele is the QSL manager of can be found at qrz.com under IK3GES.

VK9 CALLSIGNS ---> The Australian Communications and Media Authority (ACMA) has decided to discontinue the use of a VK9 callsign suffix letter to denote each of the six External Territories that are DXCC Entities (VK9C for Cocos/Keeling Island, VK9L for Lord Howe Island, VK9M for Mellish Reef, VK9N for Norfolk Island, VK9W for Willis Island and VK9X for Christmas Island). From 1 November, callsigns for the VK9 DX entities will fall in line with the practice for issuing callsigns for all other VK call areas, with the suffix only to denoting the class of licence issued (Advanced, Standard or Foundation). Under the provisions of the Amateur Licence Conditions Determination, portable operation is permitted with a radio amateur using their home callsign /VK9 and stating their location.
[http://amateurradio.com.au/node/856]

+ SILENT KEYS + The amateur radio and contest community worldwide mourns the tragic loss of the entire C6APR team. Edwin F.Steeble (K3IXD/C6AXD), James R. "Randy" Hargenrader (K4QO/C6AQO), Peter Radding (W2GJ/C6APR) and E. Dallas Carter (W3PP) lost their lives on 21 October when their aircraft crashed and burst into flames shortly after take-off from Summerville, South Carolina. They were headed to Crooked Island, Bahamas, where they expected to take part in the CQ WW DX SSB Contest.

To all radio amateurs

SB PROP ARL ARLP043
ARLP043 Propagation de K7RA

A tiny cycle 24 sunspot group numbered 1028 emerged briefly on Tuesday, October 20, then was gone. This is another brief phantom sunspot, teasing us with hints of the expected increase in activity that never seems to manifest. Of course the silver lining in the low solar activity is low geomagnetic activity. While folks in Alaska miss dramatic aurora, HF hams in the northern latitudes can enjoy the bands without all the disruption that comes with geomagnetic storms.

A couple of coronal holes are spewing enough plasma to activate some aurora, but remember that most of the photos you see of beautiful displays in the sky are actually very long exposures taken from a rock-steady tripod mount. Many times the unaided eye cannot perceive the more dramatic details. As a result of solar wind from coronal holes, geomagnetic indices rose yesterday, on Thursday, with planetary A index at 14, mid-latitude A index as measured in Virginia at 12, and the College A index at Fairbanks, Alaska way up to 25.

The College A index has been quiet for a long time, and the last time the index was nearly this high was on August 30, 2009 at 24. Prior College A index readings higher than Thursday's were July 22, 2009 at 27, February 4, 2009 at 36, December 6, 2008 at 26, and November 8, 2008 at 30.

You can look back at daily geomagnetic and solar indices from 1994 to the present at http://www.swpc.noaa.gov/ftpmenu/indices/old_indices.html. In fact, it is instructive when bemoaning the present lack of solar activity to reflect on times when there was so much geomagnetic activity, that HF propagation was difficult. At http://www.swpc.noaa.gov/ftpdir/indices/old_indices/1994_DGD.txt see 1994 College and Planetary A index numbers, and how there were extended periods of heightened activity. In fact, you can see

stretches for weeks at a time when there are only spotty records of the College A and K index, and I seem to recall that during these times their instruments were knocked out of service by energy from geomagnetic storms concentrated in polar regions.

The activity on Thursday was not predicted by USAF and NOAA in their daily 45-day forecast at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html. In the days prior to Thursday (check October 20 and 21) they were still expecting a Planetary A index of 5 for Thursday. Then in the October 22 prediction they show a Planetary A index of 8 for October 23-25, the weekend for the CQ World Wide SSB DX Contest.

Geophysical Institute Prague has a little more detailed forecast for the contest weekend. They expect quiet conditions for October 23, quiet to unsettled October 24, unsettled on October 25, and back to quiet for October 26-29. OK1HH of the Czech Propagation Interest Group expects a bit higher activity, with quiet conditions for October 23, and unsettled to active geomagnetic conditions for October 24-25.

Scott Craig, WA4TTK has an updated data file for his Solar Data Plotting Utility. This is useful if you are not yet running the program and collecting the data. The data can be updated semi-automatically each week from this bulletin, and manually as well. The new data file has daily solar flux and sunspot numbers from January 1, 1989 through October 7, 2009. Download it for free at http://www.craigcentral.com/sol.asp. This is a good way to visually realize the difference between the previous solar minimum and this extended quiet period we are in.

Brian Webb, KD6NRP of Ventura County, California notes that even with no sunspot activity, using low power and a simple antenna he hears and works many stations overseas on 17 meters. On October 19 at 1556z he worked PA3HP on PSK on 17 meters, after answering his CQ. Brian's antenna was a horizontal delta loop, about 50 feet on each side, and fed with 300 ohm twinlead and 100 watts. I noted that between his location and the Netherlands on that date there was a good chance of an opening from 1600-1730z, according to W6ELprop.

Ed Stokes, W1KOK of Randolph Center, Vermont asks if there is a W6ELprop version for Macintosh. No, there isn't, although Ed says he would like to port it to Mac. In the 2008 ARLP049 (http://www.arrl.org/w1aw/prop/2008-arlp049.html) we answered a similar question, and were pointed toward DX Toolbox at http://www.blackcatsystems.com/software/dxtoolbox.html, and also a site at http://www.machamradio.com/software/software.html for Macintosh ham radio software.

This week an interesting piece about sluggish flow inside the sun appeared, authored by two scientists on the GONG project. Read it at http://spie.org/x37587.xml?highlight=x2418&ArticleID=x37587.

Carl Luetzelschwab, K9LA, has another monthly column on propagation in the latest November issue of the now online-only WorldRadio Magazine. It is free, and you can download it in small parts or one big file at http://www.cq-amateur-radio.com/. Just click on the big WorldRadio Online button. Carl's column this month is on Short-path Summer Solstice Propagation, and begins on page 22. Also from that page you can click a link to see the rules for the CQ World-Wide DX Contest this weekend (Phone) and November 28-29 (CW).

Next week K7RA will be on the road, and it probably won't be practical to get the bulletin to Newington by Friday morning. Instead, we expect to have Steve Nichols, G0KYA of Wymondham, England pitching in. Steve is on the Propagation Studies Committee of the Radio Society of Great Britain. Steve was the author of the PowerPoint presentation on WSPR he gave at the RSGB convention, which we referenced in last week's bulletin.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for October 15 through 21 were 0, 0, 0, 0, 0, 11, and 0 with a mean of 1.6. 10.7 cm flux was 70.4, 69.6, 70.7, 70.1, 70.9, 71, and 71.3 with a mean of 70.6. Estimated planetary A indices were 4, 4, 2, 1, 1, 1 and 1 with a mean of 2. Estimated mid-latitude A indices were 3, 3, 0, 0, 1, 0 and 1 with a mean of 1.1.

Ohio/Penn DX Bulletin No. 931

The Ohio/Penn DX PacketCluster
DX Bulletin No. 931
BID: $OPDX.931
October 26, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, W2YR, NG3K, W3VT, N4AA & QRZ DX, KH6BZF, K8YSE, W9VG, A35A, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1JQJ/IK1ADH & 425 DX News, JT1CD, OH2BH, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM6DEC, VA3RJ & ICPO, VE7BC, VHF-DX-Portal (MMMonVHF) and VK2HV for the following DX information.

** TAKE A MINUTE TO REMEMBER THEM THIS WEEKEND! If you haven't heard, four radio amateurs were killed in plane crash while enroute to operate in the CQWW DX SSB Contest from Crooked Island, Bahamas. The tragedy happened just after take-off, around 6:30 AM on Wednesday, October 21st, when the twin-engine Piper PA-23 plane carrying the four contesters crashed into the woods only 250 yards off the end of the runway in Jedburg, South Carolina, about 20 miles northwest of Charleston. The four radio amateurs were:
Peter Radding/W2GJ (C6APR) SK - North Charleston, SC; Pilot/Owner
James "Randy" Hargenrader/K4QO (C6AQO) SK - Summerville, SC
Edwin F Steeble/K3IXD (C6AXD) SK - Summerville, SC
E. Dallas Carter/W3PP SK - Laurel, DE
Details about this tragedy can be found on the Web at:
http://www.journalscene.com/news/Plane-crashes-at-Summerville-Airport
http://www.arrl.org/news/stories/2009/10/21/11157/?nc=1

* Since their signal will be missing during the CQWW DX SSB Contest, OPDX is requesting/suggesting (out of respect and memory) that the contesters world-wide take a pause for 1 minute (complete silence on the bands for the one missing station; 15 seconds for each "SK" operator) from 0000-0001z, Sunday, October 25th. PLEASE, pass the word around.... OPDX and its readers would like to send out deepest sympathy to the family and many friends of the above Silent Keys...

* C6APR Memorial CQWW SSB Station. It was announced that in memory of C6APR, the Trident Amateur Radio Club (TARC) will be operating the CQWW SSB Contest using the clubs callsign N4EE. They will be operating

a single station out of W3VT in Summerville, SC, on 75m, 40m, and 20m, other bands as conditions permit. Frequencies and times will be published at a later time. A special QSL card will be made to memorialize the C6APR team's accomplishments and tragic loss. Please join them during this weekend's contest to remember their fallen friends and pass on condolences to their families. Charleston area hams are invited to assist with operations. Please contact W3VT for info. QSL will be direct with SASE - For LoTW and EQSL confirmation please note on QSL. Condolences thread can be found here:
http://forums.qrz.com/showthread.php?t=222654

*** EDITOR'S SPECIAL NOTES (by Tedd, KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 16th-October, through Friday, 23rd-October there were 235 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/m, FP, FR, FS, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9L, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf, 3V4-002, will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DXX SSB Contest (October 24-25th) as a Single-Op/Single-Band (15)/Low-Power entry. QSL via IZ8CCW. Also, read about Ashraf on the following Web pages at:
http://ashraf3v4002.wordpress.com
http://www.qsl.net/3v4-002/

4K, AZERBAIJAN. Member of the 4K7Z Radio Club will be active during the CQWW DX SSB Contest as a Multi-Single/All-Band entry. QSL via UA3FDX.

4U1UN IN THE CQWW SSB CONTEST. A press release from Martti, OH2BH, states: "A six-man team of NN1N, KR2Q, PY5EG, JK3GAD, OH0XX and OH2BH will be participating in the CQ World Wide DX SSB Contest in the two-transmitter category providing this DXCC entity and unique multiplier to a large

group of their fellow hams globally. The station has a few new antennas. They include a SteppIR Vertical, a Butternut vertical for 40, 80 and 160 meters and 6M yagi. As usual, QSL service will be handled by HB9BOU either via the bureau or direct. The logs will also be uploaded to LoTW after the operation has concluded."

9Y4, TRINDADE AND TOBAGO. Chris, 9Y4D (ex-9Y4NZ), will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (possibly 20m like last year)/High-Power entry. QSL via info on QRZ.com.

A35, TONGA (News and Contest Ops). Paul Kidd, well-unknown as A35RK, informs OPDX that he has been thinking about if-and-when to use his special A35A. Paul states, "I had the initial impression that A35A was restricted to contest/special event use. But that's not the case....it's a regular every-day callsign, now that the rules have been changed. I had a chat this morning with Fe'ao Vakata (the radio licensing officer) about this, and here's what he said: It is his intention to issue A31x callsigns for visiting contest and special event operations. Basically, that prefix block is reserved for 'groups', not individuals. The A31xx block is reserved for other short-term visitors, yachties, etc. The A35x and A35xx blocks are intended for resident operators, like me. When he issued me the A35A license, it was with the understanding that I could use it any way I choose....as a 'regular' call, or as a special event/contest call. Fe'ao said that it's entirely up to me, and he has no objections to my using it anyway I want to. Therefore.....Effective immediately, A35A will be my 'fulltime' callsign....for DXing, contests, ragchewing, the whole coconut. HI......
QTH remains the same: Lifuka Island, Ha'apai Group, IOTA OC-169
QSL A35A via W7TSQ, W7 Bureau, or LoTW (No direct mail to Tonga, no A3 Bureau)..... 73, Paul Kidd, A35A (A35RK)"

Look for A35A to be active in the upcoming CQWW DX Contests:
CQWW SSB - Single-Op/Single-Band/Low-Power (probably 15M)
CQWW CW - Multi-Sigle, Operators Paul/A35A and Dave/W6ZL (A35KL)
In both cases, QTH Ha'apai Group (OC-169). QSL via LoTW (additional QSL arrangements pending).

A35, TONGA. Ramon, XE1KK, will be active as A31KK from Fafa Island in the Tongatapu Group (OC-049) during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) entry. QSLs will automatically be sent via the Bureau. Also, QSL via LoTW.

AH6, HAWAII (Update). Once again the members of the "Coconut Wireless Contest Club" will be active as AH6XX in the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. Operators mentioned are: Rich/K2WR, Tetsuo/AH7C and Kan/JA1BK (KH6BK). QSL via LoTW, or direct to K2WR.

C4, CYPRUS. Andy, LZ2HM, and possibly others will be active as C4I during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via LZ2HM.

C91, MOZAMBIQUE. Mike, ZS6TAF, who works in Maputo from time to time, operate mobile using the callsign C91BA. He uses Yaesu 857D and Watson Multiranger mobile antenna for 80/40/20/15/10/6 meters. He was heard this past week on 7083 kHz at 1539z. QSL via his home callsign.

CCF/OHDXF CONTEST & DX CONFERENCE. Dates for the CCF/OHDXF Contest and DX conference have been announced by the Contest Club of Finland(CCF) and OH DX Foundation (OHDXF). It will be held between January 22-24th (2010). Look for more details to become available on the following Web page at: http://contestclubfinland.com/CCF

CE9, SOUTH SHETLAND ISLANDS (Update). A team of operators will be operating from Arturo Prat-Greenwich Island-South Shetland archipelago (IOTA AN-010, WW Loc. GC07FQ), between January 10-24th. Team members mentioned are: Luis/XQ5CIE, Carlos/CE6UFF, Didier/F6DXE and Dagoberto/CE5COX. Their callsign will be XR9JA. Activity will be on 160-6 meters using CW, SSB, PSK31 and the AO-51 Satellite. QSL via CE5JA. For more information, go to: http://www.ce5ja.cl

CQ3, MADEIRA ISLAND (AF-014). Members of the CT3 Friendly DX Group will be active as CQ3Z during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via CT3AB. Operators mentioned are: Filipe/CT3AB, Norberto/CT3FH, Jose/CT3IP, Dinora/CT3JJ and Nelio/CT3KO.

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via CQ9K. Operators mentioned are: Jose/CT3BD, Luis/CT3DL, Jose/CT3DZ, Jose/CT3EE, Antonio/CT3EN, Jose/CT3IA, Eusebio/ CT3KU, Jose/CT3KY, Jos/CT3NT and Jos/CT4NH.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
TX3A - Chesterfield Island; 2009 Operation
T6AB - Afghanistan; 2008 and 2009 Operation
T6AF - Afghanistan; Current Operation
K4M ☐ Midway Island; 2009 Operation; Plans are for K4M to use LoTW for QSO confirmations, see the K4M web site for more details.

E7, BOSNIA-HERZEGOVINA. There will be a few stations active from here during this weekend's CQWW DX SSB Contest. Look for the following:
E71A - Emil as a Single-Op/Single-Band (80m) entry.
E73M - Daniel as a Single-Op/All-Band/Assisted entry.
E77DX - Emir as a Single-Op/All-Band entry.
E77XZ - Suad as a Single-Op/Single-Band (15m) entry.

EA9, CEUTA AND MELILLA (Update). A group of Spanish operators will be active as EE9Z or possibly ED9NA during the CQWW DX SSB Contest (October 24-25th) as Multi-2 entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jose/EA9CD, Manuel/EA9BW, Jose/EA9PY, Mariano/EA9LS and Jorge/EA9LZ.

EE6, BALEARIC ISLANDS. Biel, EA6DD, will be active as EE6E during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (40m) entry. QSL via EA6DD.

ER4, MOLDOVA. Serge, UT5UDX, will be active as ER4DX during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via RA4LW.

FT5W, CROZET ISLAND. Florentin, F4DYW, currently active as FT5WO, is expected to be on the air until November 15th, but will leave the island on November 23rd. He is usually on 20 or 17 meters during Saturdays and Sundays between 0600-1300z usually between 14260-14280 kHz. QSL via F4DYW.

GJ/MJ, JERSEY (EU-013). Operators Rich/N6AA and Jim/N6TJ will lead a group to activate GJ2A during the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. See QRZ.com for QSL info.

HG0, HUNGARY (WFF Op). Members of the Regionalis Radios Sportklub Puspokladany (HA0KHW) will once again activate another Hungarian National Park between October 22-29th. Look for them to be active as HG0WFF/p from Orseg National Park (HAFF-009). The team leader is Geza, HA4DX. QSL by the Bureau is "OK", and their QSL Manager is HA0HW. Some of the operators will use their own callsigns with a mark /p (maybe).

HS0, THAILAND. John, W2YR, informs OPDX that Winit, HS1CKC, is making a big effort to organize operators and get the Radio Amateur Society of Thailand club station HS0AC ready for a Multi-Multi entry in the CQWW DX SSB Contest this coming weekend. Remember, Thailand has a very restrictive band allocation on 80 meters, and as a result, they will be required to operate in the very lower portion of the band. They may operate on or about 3.539 MHz and will listen up in the band for callsign. John states, "These are a great bunch of guys, and I am sure they will welcome schedules made on other bands during the contest." MORE UPDATED DETAILS: Contest/Club station will be a Multi-? entry in the contest. QSL via HS0ZFZ. Operators mentioned are: Winit/HS1CKC, Nathan/HS0ZHG, Swen/HS0ZFZ, Sam/HS0ZDY, Son/HS6NDK, Champ/E21EIC and possibly others.

IOTA NEWS.....
EU-068. Operators Jean-Claude/F5IL, Juan/F5IRC, Luis/F5THW and Christophe/F5UBH will be active as TM5SN from Sein Island (DIFM 007, DMF 29-015 le moulin de Sein CP 29990 Sein, WLOTA 2721 PB 1003 and PB218 Men Brial Lighthouse IN78NA or Sein Lighthouse PB106 IN78NB) between October 30th and November 2nd. Activity will be on the HF bands using CW, SSB and the Digital modes (RTTY and possibly others). QSL via FIIL, direct (SAE + postage) or by the French REF-Union Bureau (please only this Bureau).

NA-029. Mike, W7ASF, will be active as VY2/W7ASF from Prince Edward Island (CISA PE-001, WLOTA 0523) between November 18-24th. Activity will include an entry in the ARRL Sweepstakes Phone Contest (November 21-23rd). QSL via his home callsign, direct or by the Bureau.

JU1, MONOGOLIA. Members of the JTDXA Contest Team will be active as JU1DX during the CQWW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as a Multi-Op/Two-Transmitter entry. Location is 100 miles from Ulaanbaatar, capital city of Mongolia. Team members mentioned are: Naran/JT1BV (Team Leader), JT1BL, JT1BS, JT1BZ, JT1CH, JT1DR and JT1CZ. QSL via info on QRZ.com.

JU75, MONGOLIA (Special Event and Contest Op). Look for special event station JU75BSI to be active in the CQWW DX SSB Contest (October 24-25th) as a Multi-Op/Single-Transmitter/High-Power entry. Operators mentioned are JT1CH and JT1BZ. This special event station is active to celebrate the 75th anniversary of the Mongolian Border Service. A special QSL is available with a SASE. Also, QSL via LoTW or direct to JT1CH.

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power/ Assisted entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

***KH6BZF PROPAGATION FORECAST/REPORT (For October 26th-November 1st)....
Oct 26 AN SOLAR REFERENCE
Oct 27 AN ---------------
Oct 28 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 29 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 30 AN LN - Low Normal
Oct 31 AN
Nov 1 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MARCONI NOBEL 100 AWARD. To celebrate the 100th anniversary of Marconi receiving the Nobel Prize, listen for and work 10 different special event "SI" stations between November 9th and December 10th. The following special anniversary callsigns will be on the air: SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM. Other SM stations may be using the special prefix SI, but only the above stations count. Each anniversary station counts once per band. No endorsements. The fee is 50 SEK, 5 Euro or 5 USDs. Apply with log entry to SSA Awards Manager, Bengt Hogkvist, Ostbygatan 24 C, SE-531 37 Lidkoping, Sweden.

OY3, FAROE ISLANDS. Tom, OZ1AA, will be active as OY3AA during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSl via OZ1ACB. His Web page is: http://www.oz1aa.com

P3, CYPRUS. Operators Sandy/RW4WR, Dmitry/RX3DCX, Andrei/RA6LBS, Harry/ RA3AUU, Jack/RW3QC, Igor/UA2FZ and Roman/UR0MC will be active as P33W during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via RA3AUU.

P4, ARUBA (SA-036). John, W2GD, will be active as P40W during the CQ WW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power

or QRP entry with limited antennas. QSL via N2MM. Logs will be loaded on LoTW upon his return to USA.

P4, ARUBA (SA-036). Andy, AE6Y, will be active as P49Y during the CQ WW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High (or Low)-Power entry. QSL via AE6Y.

PJ4, NETHERLANDS ANTILLES (Correction). Doc, W9NJY, (not Don, W9JNY) will be active as PJ4/W9NJY from Bonaire (SA-006 and WLOTA L1279) between now and October 30th. Activity will be casual on all HF bands. QSL via his home callsign, direct or by the Bureau.

QSL INFO AND NEWS.....
VE7/VA7 INCOMING QSL BUREAU. Please note that the QSL Manager of the VE7/VA7 Incoming QSL Bureau has a new callsign. It is now VE7BC (old callsign was VE7UQ). The Bureau's E-mail address is now: ve7bc@...
All other information is unchanged. The Bureau Web site is at: http://www.qsl.comm.sfu.ca

QSLS VIA LOTW: NONE REPORTED THIS WEEK!

QSLS RECEIVED VIA MAIL: 4S7NE, 5K0T, 5W0JT, 6W/DL4SJ, 9Y4W, C52C, N7RO/p, T88ZS, VK9DWX, VK9GMW, VO2/NF6J, YB0DJ and ZF1A

QSLS RECEIVED VIA THE BUREAU: 4J0DX, 4K7Z-Club, 5I3A, 8N750MCS/7, AO7DMR, CN2BC, CT9L, DS1REE, EA8/OH2BAD, EG5T, EK0B, ER4DX, EU5ROPE, EV6ZK, EV7DP, EV8DP, EV9P, EX8AP, HB0/DJ1AIB, HB75F, HE8EFGJ, HE8MH, IA6IPY, II1ANT, IQ8OM, IU3SRT, JT3Y, JW/OK1IPS, JW/OK1IPS, LY2IJ, OH3GZ/P, OL140PS, OL4A, P40MH, PD1DX, PI9NOZ, SN90PR, SO9DX, SP1918PR, T2UF, TC2009UC, TO3R, UA3FDX, UN7MMM and UW0G

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via DK4VW.

T30, WESTERN KIRIBATI. Operators David/N1EMC and Mike/N1IW will be active as T30KI and T30IW, respectively, between November 10-16th. Activity will be on 60-6 meters as conditions permit using SSB/CW. QSL via N1EMC.

T6, AFGHANISTAN. David, CT1DRB, will be active as T6AG from here the next 6 months as of October 21st. Activity will only be CW. QSL via EA3GHZ direct.

TZ, MALI. Mac, JA8SLU, will once again return to Mali and be active as TZ6JA between November 2-23rd. Activity will be SSB only. QSL direct only to: Mac Obara, P.O. Box 59, Tama, Tokyo, 206-8691 JAPAN.

TS9, TUNISIA. Operators Hrane/YT1AD, Dragan/YT3W, Markovic/YU1AU, Vladeta/YU1KX, Alea/???? and possibly others will be active as TS9A during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single or Multi-2 entry. QSL via YT1AD, direct or by the Bureau.

V3, BELIZE. Wil, AA4NC, will be active as V31RR between February 17-23rd. Activity will be on the HF bands including 30/17/12m using CW, SSB and RTTY. His activity will also include the ARRL DX CW Contest (February 20-21st) as a Single-Op entry. QSL via his home callsign or LoTW.

VE2, CANADA (Zone 2). Operators Andrew/KD3RF, Irwin/KD3TB, William/K3FMQ, Ken/N3PSJ and Sebastien/VE2GTZ will be active as VE2DXY during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via KD3RF. This is their 8th year as a Multi-2 operation in Zone 2. Visit their Web site at: http://www.wix.com/andyvavra/VE2DXY

XV, VIETNAM (Update/IOTA Op). Operators Manfred/DK1BT, Wolf/DL4WK, Andy/ DL5CW, Sigi/DL7DF and Frank/DL7UFR will be active as XV4D from Phu Quoc Island (AS-128) between November 4-17th. Activity will be on 160-10 meters using CW,SSB,RTTY,PSK and SSTV. QSL via DL7DF, direct or by the Bureau.

YN, NICARAGUA. Eric, K9GY, will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the 2010 ARRL DX CW Contest (February 20-21st) as a Single-Op/All-Band/Low-Power entry. He will be there between February 18-22nd. Outside of the contest, look for CW activity on 30/17/12 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 24-25th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 CQWW DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

☐
Hope Springs Eternal! The good ole days - yup - vaguely remember that. That's where I worked 200+ countries and 39 zones on the CQWWSSB weekend and without spotting devises. That means I tuned the band and found my own DX;-)

73 de Rene
p.s. I think most of us would like the SFI above 150 .... ..

11505. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-23 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11505

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 23 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 296 Issued at 2200Z on 23 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 22/2100Z
to 23/2100Z: Solar activity was very low. No flares were detected.
New Region 1029 (N14E14) was numbered. Region 1029 is a nine-spot
bi-polar sunspot group.
IB. Solar Activity Forecast: Solar activity is expected to be very
low to low.
IIA. Geophysical Activity Summary 22/2100Z to 23/2100Z:
Geomagnetic field activity was at quiet to active levels. Solar wind
speed ranged from approximately 370 to 400 km/s, while Bz reached a
minimum of -9 nT.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be mostly quiet to unsettled with isolated active
periods for the next two days (24 - 25 October) in response to a
recurrent coronal hole high speed stream. Quiet conditions are
expected on day three (26 October).
III. Event Probabilities 24 Oct-26 Oct
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 23 Oct 073
Predicted 24 Oct-26 Oct 072/072/072
90 Day Mean 23 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 22 Oct 012/014
Estimated Afr/Ap 23 Oct 010/010
Predicted Afr/Ap 24 Oct-26 Oct 010/010-010/010-005/005
VI. Geomagnetic Activity Probabilities 24 Oct-26 Oct
A. Middle Latitudes
Active 15/10/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11507. A new award

Yahoo group: DX-IS (2009)
Date: 2009-10-25 13:36:59 UTC
From: Paul M Dunphy
Topic: 11507 Message: 11507

One of the Local QRPers was by yesterday. He beat his way up the hill and pulled up a chair on the veranda. The spring weather was here, and the temperatures were warming up. This particular QRPer looked like he'd had a few extra helpings at the dinner table during the cold months, for he was puffing and sweating a bit more than usual. He had the knowing look of someone who had just discovered a secret.

He looked around a bit, and then he began in a soft voice, "I've got two more", he said quietly, holding up his hand with two fingers raised to emphasize his point, "the two I've been waiting for." He was starting to smile, and he had the look of one who had just found out he'd won something.

We patted him on the back and said, "Congratulations! Once you get past the 200 mark, new ones are hard to come by. What ones were they? Did you work them in the contest?" The QRPer looked around for a moment and then said, "No, no! Not two new ones. Two more that don't count. Remember that operation from the Pacific last fall? The DXCC desk is sending back the cards indicating there is no documentation. As it stands now, they don't count for DXCC!"

We were confused, for in past years when this QRPer had cards rejected, he was particularly upset, often threatening to not renew his membership in the ARRL. "And why is this a good thing?", we asked, "a lot of Dxers worked those islands, and if they don't count, everyone will be disappointed."

"That's because they do not know about the new award!", he said quickly, jumping up and then catching himself quickly, and sitting down again. "Shhh!", he whispered, putting his finger over his lips. "We have to be careful or word will get out, and we want to be the first few to get it. Imagine! Being in among the first few serial numbers! A lot of the fellows tear up their QSLs when they find out they don't count. I kept all of mine, and I had almost 100 since I began in 1985. I just needed two more, and these ones do it!"

"Huh?" we asked, "what award? If they are not counters, they are no good. No one is going to give you an award for that. Where did you hear that nonsense?" "After the DX Club meeting last night!", he whispered, "I got it directly from one of the fellows who used to be a field checker for the DXCC program, and he got it from the guy who used to live next door to the guy who was the ARRL section manager until a couple of years ago. And he said that it came directly from NC1L. It doesn't get any better than that!"

We were starting to think that this was a lot more than hearsay . . . it was hearsay times three! But we put forth our poker face and said, "Tell us more." He looked around again and said, "OK, but this is just between you and me. Apparently the DXCC is trying to drum up a bit more activity, and they are getting ready to announce the new award come the first of the April. It's the DCNG award! It stands for Doesn't Count, No Good. And like the DXCC, you need 100 bad ones to get a certificate."

"I saved all my no-counters. I have all of the ones Romeo sent out, and all of the ones from those African and Middle East countries that the DXCC rejected. Most DXers only have P5RS7 `cuz that was the most famous one. But I have all the ones from the false starts when Eritrea became a new country. The ones before Carl and Martha activated it for the first counter. I even have a few from those South African Homelands that everyone thought would be good ones! And one from a 5R station who had no license. I have a card from Bougainville. I even have the first KH8SI QSL from 2005. My last ones were the Montenegro QSLs dated before 4 July 2006. I have 7 of those! And these two make an even 100!"

"That's ridiculous!" we replied, not taking the care to keep our voice down, "why do you believe all of this stuff? The ARRL isn't going to give you a certificate for QSLs that are no good."

"Don't talk so loud!", he snapped, waving his finger back and forth. "If you don't want to send in for it, fine. If you don't have enough bad cards, too bad. I'm sending mine in by registered mail and as soon as the arrival date is logged into the DXCC computer, I'll have a low serial number. Maybe even #1 !!"

"When did you say this became effective?, we asked. "April 1st" was the quick reply. "That's interesting", we said, "and why do you suppose the fellow at the DX Club told you that date?"

The QRPer stared at us with a knowing look, "Everyone can figure that one out", he said with a condescending smirk, "it's the start of the new fiscal year. All big organizations, even governments, run from the end of March one year until the end of March next year. It's the start of the 20010-2011 fiscal year. That's the main reason why I know it's for real!"

And with that he was off down the hill, ready to take his package of useless cards to the post office. We watched him clear the end of the lane and make his way around the turn. Some times it is best to let nature take its course, and this was one of them. We were starting to wonder how Bill would react when he got 100 bad QSLs with the package dated April 1st. Son of a Gun! These are trying times when the flux is at the bottom and the Low Days of DXing are upon us. The QRPers are uneasy, and it doesn't take a lot to get them stirred up. DX IS!

Hopefully 7O1YGF wasn't in his pile of "No Good, Doesn't Count" QSLs. If it was, he just lost his #100.

And with that he was off down the hill, ready to take his package of useless cards to the post office. We watched him clear the end of the lane and make his way around the turn. Some times it is best to let nature take its course, and this was one of them. We were starting to wonder how Bill would react when he got 100 bad QSLs with the package dated April 1st. Son of a Gun! These are trying times when the flux is at the bottom and the Low Days of DXing are upon us. The QRPers are uneasy, and it doesn't take a lot to get them stirred up. DX IS!

Guess those of us who didn't make a donation will have to wait years for a confirmation on LoTW. That's the price of being poor.

Years? Absolutely not Al.

As the website says, we will do all LOTW qsls when the bulk of the online QSLing workload is over. Years, hardly. Months? Most likely.

Large expensive dxpeditions rely on donors. The only way to repay their support is to support them back. This is not new, and a practice being followed by most of the dxpedition groups for the past few years.

YES but if you belong to INDEXA,.....

they dont Give the DXPEDITION there membership roster, we STILL have to wait ! I complained about that but they dont seem to care,
so I am joining the Magnolia DX ASS..... I suppose INDEXA has there reasons.

I know that, Don!!! I was jus' pullin' a chain or two. But, on a more serious level, I want to congratulate you guys on a job well done. I only managed one SSB QSO and that was on 20M, one CW QSO on 17M and just couldn't cut the mustard anywhere else. Having grown up in the age when QSLs didn't come for months/years after the QSO, I have no objection to waiting.

IF I do run into some cash, it will be donated to my antenna fund!!! Extra cash beyond that can go to my fellow DXers. After all, if I can't work 'em I won't likely donate :-).

BTW, I think the idea of making on-line donations is wonderful and, given the financial opportunity, I will make mine.

Had quite a wind overnight and lots of leaves have taken new positions in my yard. However, it is a balmy 60F right now. Before it was politically incorrect, I believe we called this Indian Summer.

Al,

You bring up a good point. For those of us who started DXing before Algore invented the internet, we were used to waiting months or longer to get a QSL, and that was the only way you know you made it in the log-no on line log searches to see if your QSO made earlier that day was good. You just worked them and hoped for the best.

.....& in the days of Box 88 one could wait upwards of two (2) years for a card. I worked many a 'new' one without a backup contact hoping to have made a good contact. As I recall I've only had four NILs and two SL1M's (slim) out of 342 countries confirmed. One NIL was a guy mobile who didn't have a log book. Did work and confirm P5RS7 along with XZ5A for a couple NFG's.

To: DX IS!
Subject: [DX-IS] A new award

One of the Local QRPers was by yesterday. He beat his way up the hill and pulled up a chair on the veranda. The spring weather was here, and the temperatures were warming up. This particular QRPer looked like he'd had a few extra helpings at the dinner table during the cold months, for he was puffing and sweating a bit more than usual. He had the knowing look of someone who had just discovered a secret.

He looked around a bit, and then he began in a soft voice, "I've got two more", he said quietly, holding up his hand with two fingers raised to emphasize his point, "the two I've been waiting for." He was starting to smile, and he had the look of one who had just found out he'd won something.

We patted him on the back and said, "Congratulations! Once you get past the 200 mark, new ones are hard to come by. What ones were they? Did you work them in the contest?" The QRPer looked around for a moment and then said, "No, no! Not two new ones. Two more that don't count. Remember that operation from the Pacific last fall? The DXCC desk is sending back the cards indicating there is no documentation. As it stands now, they don't count for DXCC!"

We were confused, for in past years when this QRPer had cards rejected, he was particularly upset, often threatening to not renew his membership in the ARRL. "And why is this a good thing?", we asked, "a lot of Dxers worked those islands, and if they don't count, everyone will be disappointed."

"That's because they do not know about the new award!", he said quickly, jumping up and then catching himself quickly, and sitting down again. "Shhh!", he whispered, putting his finger over his lips. "We have to be careful or word will get out, and we want to be the first few to get it. Imagine! Being in among the first few serial numbers! A lot of the fellows tear up their QSLs when they

find out they don't count. I kept all of mine, and I had almost 100 since I began in 1985. I just needed two more, and these ones do it!"

"Huh?" we asked, "what award? If they are not counters, they are no good. No one is going to give you an award for that. Where did you hear that nonsense?" "After the DX Club meeting last night!", he whispered, "I got it directly from one of the fellows who used to be a field checker for the DXCC program, and he got it from the guy who used to live next door to the guy who was the ARRL section manager until a couple of years ago. And he said that it came directly from NC1L. It doesn't get any better than that!"

We were starting to think that this was a lot more than hearsay . . . it was hearsay times three! But we put forth our poker face and said, "Tell us more." He looked around again and said, "OK, but this is just between you and me. Apparently the DXCC is trying to drum up a bit more activity, and they are getting ready to announce the new award come the first of the April. It's the DCNG award! It stands for Doesn't Count, No Good. And like the DXCC, you need 100 bad ones to get a certificate."

"I saved all my no-counters. I have all of the ones Romeo sent out, and all of the ones from those African and Middle East countries that the DXCC rejected. Most DXers only have P5RS7 `cuz that was the most famous one. But I have all the ones from the false starts when Eritrea became a new country. The ones before Carl and Martha activated it for the first counter. I even have a few from those South African Homelands that everyone thought would be good ones! And one from a 5R station who had no license. I have a card from Bougainville. I even have the first KH8SI QSL from 2005. My last ones were the Montenegro QSLs dated before 4 July 2006. I have 7 of those! And these two make an even 100!"

"That's ridiculous!" we replied, not taking the care to keep our voice down, "why do you believe all of this stuff? The ARRL isn't going to give you a certificate for QSLs that are no good."

"Don't talk so loud!", he snapped, waving his finger back and forth. "If you don't want to send in for it, fine. If you don't have enough bad cards, too bad. I'm sending mine in by registered mail and as soon as the arrival date is logged into the DXCC computer, I'll have a low serial number. Maybe even #1 !!"

"When did you say this became effective?, we asked. "April 1st" was the quick reply. "That's interesting", we said, "and why do you suppose the fellow at the DX Club told you that date?"

The QRPer stared at us with a knowing look, "Everyone can figure that one out", he said with a condescending smirk, "it's the start of the new fiscal year. All big organizations, even governments, run from the end of March one year until the end of March next year. It's the start of the 20010-2011 fiscal year. That's the main

reason why I know it's for real!"

And with that he was off down the hill, ready to take his package of useless cards to the post office. We watched him clear the end of the lane and make his way around the turn. Some times it is best to let nature take its course, and this was one of them. We were starting to wonder how Bill would react when he got 100 bad QSLs with the package dated April 1st. Son of a Gun! These are trying times when the flux is at the bottom and the Low Days of DXing are upon us. The QRPers are uneasy, and it doesn't take a lot to get them stirred up. DX IS!

2 years was a pretty good turn around rate for Box 88. Got KP1 confirmed on 15 CW a few months ago 24 years after the QSO.

.....& in the days of Box 88 one could wait upwards of two (2) years for a card. I worked many a 'new' one without a backup contact hoping to have made a good contact. As I recall I've only had four NILs and two SL1M's (slim) out of 342 countries confirmed. One NIL was a guy mobile who didn't have a log book. Did work and confirm P5RS7 along with XZ5A for a couple NFG's.

Al,

You bring up a good point. For those of us who started DXing before Algore invented the internet, we were used to waiting months or longer to get a QSL, and that was the only way you know you made it in the log-no on line log searches to see if your QSO made earlier that day was good. You just worked them and hoped for the best.

I know that, Don!!! I was jus' pullin' a chain or two. But, on a more serious level, I want to congratulate you guys on a job well done. I only managed one SSB QSO and that was on 20M, one CW QSO on 17M and just couldn't cut the mustard anywhere else. Having grown up in the age when QSLs didn't come for months/years after the QSO, I have no objection to waiting.

IF I do run into some cash, it will be donated to my antenna fund!!! Extra cash beyond that can go to my fellow DXers. After all, if I can't work 'em I won't likely donate :-).

BTW, I think the idea of making on-line donations is wonderful and, given the financial opportunity, I will make mine.

Had quite a wind overnight and lots of leaves have taken new positions in my yard. However, it is a balmy 60F right now. Before it was politically incorrect, I believe we called this Indian Summer.

Years? Absolutely not Al.

As the website says, we will do all LOTW qsls when the bulk of the online QSLing workload is over. Years, hardly. Months? Most likely.

Large expensive dxpeditions rely on donors. The only way to repay their support is to support them back. This is not new, and a practice being followed by most of the dxpedition groups for the past few years.

I have to add on to this note;

Was forced into retirement in 07....maybe better than some but worst than others.

If I work a big Dxpedition knowing their expenses I try to donate at least $10 or $20 US. I have never run into a team that didn't appreciate the effort to help independent of the actual amount. If everyone did just that these folks could possibly approach a break even.

I especially like the electronic QSL which lets my mailing cost drop right to them.

It probably costs as much in electricity for your amp to get to them..

Support DX! a thought that shouldn't have to be noted in this reflector.

That's great - I usually give $5 or if it's really rare, $10 and for
stateside along with the SASE I usually enclose at least a dollar and one
year I sent a full page of current postage as the postage was going up and
many would've sent the wrong amount. KU9C comes to mind, forgot the other.

Yahoo group: DX-IS (2009)
Date: 2009-10-25 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11527

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 25 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 298 Issued at 2200Z on 25 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar activity was low. Region 1029 (N14W12) produced
several B-class events and a C1.5 flare at 25/0226Z. Region 1028
(N24W10) continues to decay.
IB. Solar Activity Forecast: Solar activity is expected to be low
with a slight chance of an M-class flare.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
Geomagnetic field activity was quiet to unsettled.
IIB. Geophysical Activity Forecast: Geomagnetic activity is
expected to be quiet through the forecast period (26-28 October) due
to the coronal hole high speed stream rotating out of a geoeffective
position.
III. Event Probabilities 26 Oct-28 Oct
Class M 05/05/05
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 25 Oct 076
Predicted 26 Oct-28 Oct 075/075/075
90 Day Mean 25 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 24 Oct 005/008
Estimated Afr/Ap 25 Oct 008/010
Predicted Afr/Ap 26 Oct-28 Oct 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 26 Oct-28 Oct
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Ah, Mike -- you had to say that! Way up here in the northeast, I found conditions to be considerably less than spectacular. Yes, 15 was open, but there was nothing out of the ordinary that would not have been there except for the contest. I didn't even bother to look at 10M.

On the other hand, I'm glad you enjoyed it and I hope tomorrow will be better and that I, at least, will see some of the residual :-).

Wish it had been better for you. Pretty nice here. I even broke down &
made quite a few SSB contacts in the contest. On 10 meters, the
Caribbean was quite good, and on 15 that was also the case, but worked
several JA, a couple of VK & ZL along with KH6s and 9M6, all with no
more than 100 watts, so, condx were very good. I hope this stays with
us for a while.

Topic: 11535 Message: 11535

Am using contest log from N3FJP and wrote my .cab file. Seems that it has fell into a big black hole. Emailed Scott and he says that he has had no reports of problems with Vista.

Can't find the little dog to search for them (real easy when by date) either. Know it is probable a little off subject, but anyone else had this problem?

Dale K8TS

I don't know as that it is totally correct that you had to make a donation prior to their departure. I made my donation via PayPal towards the end of their operation and my QSO's showed up in LOTW. The only other posibilty was the DX club I belong to (Mile High DX Assn) made a donation.

In any case, it was sure nice to see the confirmation so fast!

For those who made a Pre-Expedition donation to K4M, the LOTW files have
been uploaded. I uploaded my contacts this evening and the
confirmations are there.

11537. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-26 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11537

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 26 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 299 Issued at 2200Z on 26 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 25/2100Z
to 26/2100Z: Solar activity was low. A C1 flare was observed at
26/1906Z from Region 1029 (N16W29).
IB. Solar Activity Forecast: Solar activity is expected to be low
with a slight chance of an M-class flare.
IIA. Geophysical Activity Summary 25/2100Z to 26/2100Z:
Geomagnetic field activity was quiet.
IIB. Geophysical Activity Forecast: Geomagnetic activity is
expected to be quiet.
III. Event Probabilities 27 Oct-29 Oct
Class M 05/05/05
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 26 Oct 081
Predicted 27 Oct-29 Oct 075/075/075
90 Day Mean 26 Oct 069
V. Geomagnetic A Indices
Observed Afr/Ap 25 Oct 003/005
Estimated Afr/Ap 26 Oct 005/005
Predicted Afr/Ap 27 Oct-29 Oct 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 27 Oct-29 Oct
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 00/00/00
```

Date: 2009-10-27 20:39:37 UTC
From: Alan Leith
Topic: 11543 Message: 11546

Gotta agree, Zack. I heard an ST2 on 17 CW just before the contest last weekend and was in the process of making a QSO (I have a puny signal on that band). A W1 ignored the ST2s attempt to complete my QSO and worked him over the top of me and then spotted him. I fault the OK operator for not completing the QSO with me but after the spot all hell broke loose in milliseconds and he was never able to get my call. I lost out on a new band/mode country on 17 because of the f*%*#&g cluster.

And today the cluster has been virtually useless as well. Just look at the brag spots for FT5GA, the phoney P5 spots, the K2s spotting EU on 17 and W4s spotting the Caribbean on 17, etc. If you live on the east coast you simply don't spot every day run-of-the-mill Europeans on ANY band.

You do if they are on 160 or 6 . . . :-)

It also depends on what your goal is. We call it a DX Cluster,
and that is our focus. However, the cluster technology was designed
by contesters for contesters. In an IARU contest, for example, a VE1
is in Zone 9 and that isn't too common. So a W4 spotting me or thee
would be appropriate.

Also, it seems appropriate in QSO parties and SS for NA to spot
NA. I spot stuff I don't need or collect like weird prefixes as
well. I don't think we'll agree on this, Al. I know you feel only
rare/semi-rare DX need be spotted. That is a lofty goal! And even
then you were upset with the W1 spotting the ST2 before you logged
him. It's hard to set a "standard" that pleases everyone.

I tend to spot "easy" stuff and rarely (never?) spot
DEXpeditions because the DXpedition has already been spotted 38 times
with "BINGO!" and "TNX 18TH BAND!!!!" in the comment section.

11552. RE: [DX-IS] Fw:False Spots

Yahoo group: DX-IS (2009)
Date: 2009-10-27 21:58:44 UTC
From: Alan Leith
Topic: 11543 Message: 11552

WELL!!!

As you know, Paul, I don't operate on either 160 or 6M. They hold no interest for me and I have filtered them out of my spots. But what you say is true, I have to admit.

However, all last weekend I sat here, when I was available, and watched the spots fly past my eyes at amazing speed. I could not follow them. And I expect with the contest season upon us, every weekend will be similar. What we call the DX cluster will be absolutely useless during the Sweepstakes weekends. So, instead of reading what I can of the spots, I simply tune the bands looking for what interests me.

My biggest dislike of the cluster system is based on the dependence we have on spots. We have lost the ability to tune and listen. On the other hand, most of the time when you find a pile up, the station causing it doesn't give his call often enough and this results in "who's the DX?" on phone or "?" on CW which brings out the cops. So you can sit listening to the DX and not know who it is for many, many minutes. The result is often very frustrating. More annoying than anything else, I feel, is the spotters who either don't know the call of the station they're spotting or the typographical errors that make it to the cluster.

I'm somewhat ambivalent about the cluster. I use it, yes, and I do spot those stations that I feel are of interest to the DX community. But, given my location, I will not, under any circumstances, spot a common EU station on any band from 80-10M, unless there are extenuating circumstances -- which are, sadly, subjective. Given the subjectivity of spotting, perhaps I should simply stop spotting completely. I'll have to consider that.

What the hell did we do before the spotting network became essential to our every day operating? There are too many guys operating today who simply don't know and far too many of us who appear to have forgotten. Even though you have a computer program that will instantly take your rig to the spotted frequency, there's still a big knob on the front of the radio that allows manual tuning of the radio.

Sometimes technological advances are not at all what they should be.

be spotted. That is a lofty goal! And even then you were upset with the
W1 spotting the ST2 before you logged him. It's hard to set a "standard"
that pleases everyone.

I tend to spot "easy" stuff and rarely (never?) spot DEXpeditions
because the DXpedition has already been spotted 38 times with "BINGO!" and
"TNX 18TH BAND!!!!" in the comment section.

Topic: 11543 Message: 11554

For most of us with average stations (with a amp and tri-band beam a 50' or QRP and vertical) the cluster spots are not a real time aid.... but I've found the spot history of DX stations when reviewed and analyzed has led me to discover when and where to be to work many new ones. That includes P5/4L4FN, VK0LD, SV2ASP/A, and a bunch of others.

Sometimes though its the spots from some distant place that lets me know the DX is operating and where so I can figure out if I might be able to work him later even though I can't now. DX, like other things in life, is a matter of pace; take a deep breath, it isn't a sprint, it's a Marathon!

If you live on the east coast you simply don't spot every day run-of-the-mill Europeans on ANY band.

73

Al, VE1AL

You do if they are on 160 or 6 . . . :-)

It also depends on what your goal is. We call it a DX Cluster, and that is our focus. However, the cluster technology was designed by contesters for contesters. In an IARU contest, for example, a VE1 is in Zone 9 and that isn't too common. So a W4 spotting me or thee would be appropriate.

Also, it seems appropriate in QSO parties and SS for NA to spot NA. I spot stuff I don't need or collect like weird prefixes as well. I don't think we'll agree on this, Al. I know you feel only rare/semi-rare DX need be spotted. That is a lofty goal! And even then you were upset with the W1 spotting the ST2 before you logged him. It's hard to set a "standard" that pleases everyone.

I tend to spot "easy" stuff and rarely (never?) spot DEXpeditions because the DXpedition has already been spotted 38 times with "BINGO!" and "TNX 18TH BAND!!!!" in the comment section.

WELL!!!

As you know, Paul, I don't operate on either 160 or 6M. They hold no interest for me and I have filtered them out of my spots. But what you say is true, I have to admit.

However, all last weekend I sat here, when I was available, and watched the spots fly past my eyes at amazing speed. I could not follow them. And I expect with the contest season upon us, every weekend will be similar. What we call the DX cluster will be absolutely useless during the Sweepstakes weekends. So, instead of reading what I can of the spots, I simply tune the bands looking for what interests me.

My biggest dislike of the cluster system is based on the dependence we have on spots. We have lost the ability to tune and listen. On the other hand, most of the time when you find a pile up, the station causing it doesn't give his call often enough and this results in "who's the DX?" on phone or "?" on CW which brings out the cops. So you can sit listening to the DX and not know who it is for many, many minutes. The result is often very frustrating. More annoying than anything else, I feel, is the spotters who either don't know the call of the station they're spotting or the typographical errors that make it to the cluster.

I'm somewhat ambivalent about the cluster. I use it, yes, and I do spot those stations that I feel are of interest to the DX community. But, given my location, I will not, under any circumstances, spot a common EU station on any band from 80-10M, unless there are extenuating circumstances -- which are, sadly, subjective. Given the subjectivity of spotting, perhaps I should simply stop spotting completely. I'll have to consider that.

What the hell did we do before the spotting network became essential to our every day operating? There are too many guys operating today who simply don't know and far too many of us who appear to have forgotten. Even though you have a computer program that will instantly take your rig to the spotted frequency, there's still a big knob on the front of the radio that allows manual tuning of the radio.

Sometimes technological advances are not at all what they should be.

I've addressed that to deaf ears. Many today rely on the clusters for their DX and don't realize how the spot got there and god forbid the cluster goes down, they then go to work or the store or yard work. I'm glad I started prior to all that - but the one ringer was around...

Working 15 (I think) on Sunday and ran upon a huge pile......so I stopped to through my call into the bucket (I'm a S & P guy). Lets tail end the calls and be the last heard. His next call "3's only" and he ID' rather infreakingly (sp?). Still needed him so I thought I would hang around. He diddle-dattled around to the 6's, 7's AND then went QRZ! I guess 8-9-0 are not used in his country.Being rather PO'ed, I stuped down to the level of a lid, and said a few things (with the mic on, and intended to be) about his operation. Lost half an hour on this jerk.

Going by the numbers in a contest?

As I twattled down the band, I found another station from his country and worked him within a few minutes.

An it was just a Central American country.......I just happened to need it.

New kind of LID maybe?

Its off and on and when on ---

It sounds like a huge engine cranking up slowly and then increasing in rpm. Very broadbanded.

I listened outside to see if there was a truck or something new around, heard nothing but the night birds.

I am recording it now.

Hmm ... I've had my rcvr parked on that frequency for over an hour while sitting here winding some toroids. Heard my friend K0PFX work an LZ. No unusual noise heard here.

Thema: [DX-IS] D44TXO

Has anyone received a QSL? I sent a card to DJ2VO's Bonn address listed for
44TXO on QRZ.com (that page was created last March at the time of his operation
n D4), but it was returned as "insufficient address". There is a different
onn address for DJ2VO on QRZ.com. My email to his darc.de address got no
eply.

To all radio amateurs

SB DX ARL ARLD043
ARLD043 DX news

This week's bulletin was made possible with information provided by NC1L, VK5ZD, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TANZANIA, 5H. Harald, DL7VSN will be QRV as 5H1HS beginning November 1. Activity will be on 160 to 10 meters using mostly CW and RTTY. QSL to home call.

GUYANA, 8R. Operators Edi, PU8TEP, Abilio, PV8AZ, Paulo, PV8DX, Anderson, PY2TNT, Alex, PY2WAS, Iva, PV8IG and Ivan, PY1YB will be QRV as 8R1PY from Lethem city from October 31 to November 4. Activity will be on 160 to 6 meters using CW, SSB, RTTY and PSK31. QSL via PY2WAS.

MOZAMBIQUE, C9. Mike, ZS6TAF is QRV as C91BA from the capital of Maputo. Activity is generally on 80 to 6 meters. QSL to home call.

EASTER ISLAND, CE0. Operators Marco, CE6TBN, Leszek, NI1L, Zbig, SP7HOV, Art, PA3C, Stan, SQ8X and Victoria, SV2KBS will be QRV as XR0Y from October 31 to November 15. Activity will be on all bands with three stations active simultaneously with an emphasis on 160, 80 and 40 meters using mainly CW, with some SSB and RTTY. QSL via operators' instructions.

CROZET ISLAND, FT/W. Florentin, F4DYW is QRV as FT5WO and is active until November 15. He is generally active on 20 and 17 meters between 0600 to 1300z. QSL to home call.

GUINEA-BISSAU, J5. Joao, CT2GQA is QRV from here for the next five years. He is active as J5JUA on 80 and 40 meters and J5GQZ on 20 and 17 meters. QSL to home call.

MONGOLIA, JT. Special event station JU75BSI is QRV until November 30 in celebration of the 75th anniversary of the Mongolian Border Service Institute. QSL via JT1CH.

NETHERLANDS, PA. Special event call PB65BP is QRV until November 11 in celebration of the 65th anniversary of the liberation of Breda. QSL via PA1WLB.

ICELAND, TF. Rene, DL2JRM will be QRV as TF/DL2JRM/p from October 31 to November 2. Activity will be on 160 to 10 meters using CW. QSL to home call.

MALI, TZ. Mac, JA8SLU will be QRV as TZ6JA from November 2 to 23. Activity will be on the HF band using only SSB. QSL direct to home call.

AUSTRALIA, VK. Special event station VI50LZ will be QRV from October 31 to November 8 in celebration of the 50th anniversary of the Elizabeth Amateur Radio Club. Activity will be on all HF bands. QSL via bureau.

MONTSERRAT, VP2M. Operators Tom, DL2RUM, Rudi, DM2XO and Jan, DJ8NK will be QRV as VP2MUM, VP2MXO and VP2MNK, respectively, from November 3 to 15. Activity will be on 160 to 10 meters using CW, SSB and RTTY. QSL to home calls.

VIET NAM, XV. Operators Manfred, DK1BT, Wolf, DL4WK, Andy, DL5CW, Sigi, DL7DF and Frank, DL7UFR will be QRV as XV4D from Phu Quoc Island, IOTA AS-128, from November 4 to 17. Activity will be on 160 to 10 meters using CW, SSB, RTTY, SSTV and PSK. QSL via DL7DF.

VANUATU, YJ. Tomas, VK2CCC will be QRV as YJ0CCC from Efate Island, IOTA OC-035, from October 30 to November 5. Activity will be on 160 an 80 meters using mainly CW. QSL to home call.

ZIMBABWE, Z2. Fernando, EA4BB is QRV as Z21BB and is active from Harare for two years while on work assignment. He plans to be active on 80 to 10 meters using CW and SSB. QSL via W3HNK.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Conway Reef, 3D20CR and 3D2CV, 2009 operations; Midway Island, K4M, 2009 operation.

THIS WEEKEND ON THE RADIO. The NCCC Sprint and High Speed Club CW Contest are all on tap for this weekend. The ARS Spartan CW Sprint is scheduled for November 3. Please see October QST, page 78, November QST, page 86, and the ARRL and WA7BNM contest web sites for details.

---

31 October 2009 A.R.I. DX Bulletin
No 965
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - Harald, DL7VSN (5H1HS) will be touring Tanzania in November, and will operate mainly CW and RTTY on the HF bands with 100 watts and various dipoles. He will be QRV probably from 1 November from the Kilimanjaro area, and from 18 November from Serengeti and Tarangire National Park. If flight/boat plans go well, he will also try to go and operate from an IOTA group for one or two days. QSL via home call. [TNX dx-hamspirit.com]
9J - Niko, S53A will be active again as 9J3A from Zambia on 25-30 November, CQ WW DX CW Contest included. QSL direct to S57S. [TNX NG3K]
CE_ant - Celebrating the 200th anniversary of the indipendence of Chile, the Radio Club de Concepcion (http://www.ce5ja.cl/) will operate as XR9JA from the Chilean Navy Base "Arturo Prat" on Greenwich Island, South Shetlands (AN-010) on 10-25 January 2010. The operators will be Dago/CE5COX, Carlos/CE6UFF, Luis/XQ5CIE and Didier/F6DXE. They plan to operate on all bands SSB, CW and PSK31, plus Satellite AO-51. QSL via CE5JA, direct or bureau. [TNX CE1KR]
CE0Y - Announced frequencies for the 31 October-15 November XR0Y DXpedition to Easter Island [425DXN 957] are as follows:
CW 1826, 3505, 7005, 10120, 14005, 18073, 21005, 24893, 28023
RTTY 3580, 7034, 14091, 18102, 21083, 24923, 28085
SSB 1843, 3725, 7075, 14200, 18140, 21295, 24935, 28480
There are three QSL routes. [1] Stan, SQ8X will handle cards for Europe, Asia, Africa and Oceania (direct and bureau). [2] The Radio Club de Chile will handle cards for North, Central and South America (direct and bureau). [3] An Online QSL Request System (OQRS) will be activated on the expedition's website when XR0Y gets on the air. In addition, the XR0Y logs will be uploaded to LoTW and eQSL sometime in 2010. Please visit http://rapanui2009.org/ for updates, further information and details on QSLling policy.
ES - Ben, OZ5AAH will operate CW and SSB as ES1/OZ5IPA from Estonia for the International Police Association Contest (7-8 November, rules at http://www.ipa-rc.de). QSL via OZ5AAH. [TNX The Daily DX]

F - The Radio Club Havrais (F8KHN) will be active as TM1TJV will be activated on 4-8 November for the Transat Jacques Vabre, the yachting race on the coffee trading route between Le Havre (France) and Puerto Limon (Costa Rica). [TNX F8REF]
F - Look for Didier, F4ELJ/p to be active from Wrac'h Island (not IOTA) and lighthouse on 7-8 November. QSL via home call, direct or bureau. [TNX F4ELJ]
FK/C - The TX3A license for the Chesterfield DXpedition [425DXN 962] has been extended, and AA7JV and HA7RY will be able to use that callsign from 2 November until 6 December. George and Tomi left Gladstone (Queensland) on 26 October and reached Suamarez Reef the day after. They had to stop there to wait for the weather to improve; hopefully the voyage will be resumed on Saturday with TX3A being expected to be QRV by 3 November in the local evening hours. QSL via HA7RY. Bookmark http://tx3a.com/ for regular updates.
GD - Tom, GM4FDM and Ronald, PA3EWP will be active as GD4FDM and MD/PA3EWP from the Isle of Man (EU-116) on 6-9 November. They will concentrate on the low bands CW, and Tom will do some RTTY as well. QSL GD4FDM via GM4FDM, QSL MD/PA3EWP via PA7FM. [TNX The Daily DX]
HB0 - Kazik (DL2SBY), Tomi (HA4DX) and Laci (HA0HW) will be active as HB0/homecall from Masessa, Liechtenstein on 6-13 November. They plan to operate CW and some SSB with three stations, and to concentrate on 160, 80 and 40 metres. QSL via home calls, bureau preferred. [TNX HA0HW]
KP2 - Look for KP2/K1ZE, KP2/N3XF and KP2/W1EQ to be active from St. Croix, US Virgin Islands on 4-11 November. QSL via home calls and LoTW. They will operate CW, SSB and possibly RTTY on 160-10 metres, and will participate in the ARRL CW Sweepstakes (7-9 November) as KP2M (QSL via AI4U). [TNX NG3K]
LY - Orlando, PY2TJ, will be active on the HF bands as LU/PY2TJ from Tierra del Fuego (SA-008) on 1-7 November. QSL via PT2OP. [TNX www.dx-hamspirit.com]
PY - Special callsign PW2SIDC will be in use from several Brazilian States, including Fernando de Noronha, until 22 November to celebrate the V Seminario Internacional de Defesa Civil to be held in Sao Paulo. QSL via PS7YL, direct or bureau. [TNX PS7YL]
PY - Fred, PY2XB and Alex, PY2WAS will be active as PW2IO and PW2TA respectively from Cabras Island (SA-071) on 19-23 November. They will operate SSB and CW with two separate stations, mainly on 15, 17, 20, 30 and 40 metres. Landing on the island is difficult and the operation may be postponed in case of bad weather. QSL PW2IO via PT7WA, QSL PW2TA via PY2WAS. [TNX PT7WA]
SM - Celebrating the 100th anniversary of the Nobel Prize in physiscs awarded to Guglielmo Marconi, eight special callsigns (SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM) will be aired from Sweden between 9 November and 10 December. Details on the relevant award offered by the Swedish Amateur Radio Society can be found at http://awardmanager.se/

T8 - Pista, HA5AO will be active as T88CI from Koror (OC-009), Palau between 25 November and 10 December. He plans to operate holiday style mainly CW on 80-10 metres, and to participate in the CQ WW DX CW Contest. QSL via home call, direct or bureau, and LoTW. Logsearch will be available at http://ha5ao.novolab.hu/ [TNX HA0HW]
UA_ant - Mike, RW1AI expects to depart St. Petersburg aboard the oceanographic research ship "Akademik Fedorov" on on 1 November and to reach Progress station (Antarctica) around 16 December. He plans to be active from the local club station (R1ANP) throughout 2010. [TNX The Daily DX]
VK - Special event callsign VI50LZ will be in use on the HF bands between 31 October and 8 November to celebrate the 50th anniversary of the Elizabeth Amateur Radio Club. QSL via VK5LZ, direct or bureau. [TNX W1AW]
VP2M - Tom/DL2RUM (VP2MUM), Rudi/DM2XO (VP2MXO) and Jan/DJ8NK (VP2MNK) will be active from Montserrat (NA-103) on 3-15 November. They will operate CW, SSB and RTTY on 160-10 metres. QSL via home calls, direct or bureau. [TNX OPDX Bulletin]
VP9 - Look for Paul, VP9KF to operate CW only from Hamilton Parish, Bermuda (NA-005) on 4-18 November. QSL direct only to W4/VP9KF (Paul Evans, 6809 River Road, Tampa, FL 33615, USA). Further information can be found at http://vp9kf.com
XV - Manfred/DK1BT, Wolf/DL4WK, Andy/DL5CW, Sigi/DL7DF and Frank/DL7UFR will be active as XV4D from Phu Quoc (AS-128), Vietnam on 4-17 November. They will operate on 160-10 metres with two stations for CW and SSB, and a third station for RTTY, PSK31 and SSTV. Bernd, DF3CB will be the pilot for the expedition. QSL via DL7DF, direct or bureau. Further information and updates at http://www.dl7df.com/
YU - Alex/HA7JJS (YU9JJS), Laci/HA6NL (YU9NL), Laci/HA7PL (YU9PL) and Zsolt/HA6PS (YU9PS) will be active from Serbia from 30 October to 8 November. Special callsign YT36QRP will be used during the HA-QRP Contest on 80 meters CW (1-7 November). QSL YT36QRP via YU7CM, others via home calls (direct or bureau). [TNX HA0HW]
Z2 - Fernando, EA4BB has been active as Z21BB from Harare, Zimbabwe for a few days and expects to remain there for the next couple of years. "For the time being I have only dipoles and delta loops for 10, 15 and 20", he says. "I plan to build new antennas for WARC bands as well as two loops for 40 and 80, and maybe to increase power (for the time being I am limited to 100W). Also, later in the year I hope I will put up a 3-element beam for 10, 15 and 20. For now I am mostly on CW, but I will scale up SSB operations as I improve my antenna system". QSL via W3HNK. [TNX Z21BB]

DXCC NEWS ---> 3D20CR and 3D2CV (Conway Reef, 2009 operations) and K4M (Midway Island, 2009 operation) have been approved for DXCC credit. [TNX NC1L]

MONGOLIAN DX CONTEST ---> The Mongolian Amateur Radio Society (MARS) invites licensed amateurs and SWLs to participate in the Mongolian DX Contest, to be held on 160-10 metres CW, SSB and RTTY on 21-22 November (from 00.00 UTC on Saturday through 23.59 UTC on Sunday). Please e-mail jt1kaa@... fro further information. [TNX JT1CD]

PIRATE ---> The station signing TL8/IZ2EVL on 26 October was a pirate. The genuine Emanuela, IZ2ELV was in Italy and she does not operate CW.

QSL VIA F4EFI ---> Gwenael, TU5KG operated from France as TM0C and TM0T during this year's CQWW RTTY and CQWW SSB respectively. The QSL manager for both these activities is F4EFI, direct or bureau. [TNX TU5KG]

QSL VIA W3HNK ---> W3HNK is taking over as QSL manager for either CR3E (to be QRV during the CQ WW DX CW Contest) and CT3NT. [TNX CT1BOH]

+ SILENT KEYS + Recently reported Silent Keys include Tito Livio Esteves Xavier (CT1VM), Odoardo Tiberi (I0TIC), Dorando Guidotti (I5BKB), Raffaele Cafaro (IZ8CET), George Hanna Hakim (OD5RL), Boleslaw R Stolkowski (SP2CCO), Viktor I. Mudrenko (UA0LDX) and Paul Vydareny (WB2VUK).

QSLs received direct or through managers: 4S7NE, 5B/AJ2O, 5B4AIF, 5B4AII, 5C5W, 5H3EE, 5K0T, 5Q1A, 5W0JT, 5X1VB, 6W/DL4SJ, 7P8R, 9H3QC, 9N7JO, 9Y4W, A71A, AM8IL, C31PP, C52C, CC0Y, EP3PTT, EP3UN, FP/G3ZAY, FP/M0TDG, FY5PO, HI3/LY3UM, KG4NL, KL7J, N7RO/p (NA-169), NH8/K3LP, OD5NJ, OF200AD (EU-140), OH0R, OY2J, PY0FF, PZ5TT, R7HQ, RW2F, T6AB, T77NM, T88ZS, TO3R, TO5AA, TO5AA, TO8YY, UM8LA, V31XX, V51AS, VK9DWX, VK9GMW, VO2/NF6J, VP2MSJ, VQ9LA, XU7TZG, XU7XXX, YB0DJ, YI1RZ, YL2BJ, YL2KO, YT5W, ZF1A, ZK2V, ZP8VAO.

ZCZC AP44
QST de W1AW
Propagation Forecast Bulletin 44 ARLP044
>From Steve Nichols, G0KYA
Wymondham, England October 30, 2009
To all radio amateurs

SB PROP ARL ARLP044
ARLP044 Propagation de G0KYA

The propagation bulletin this week is written by Steve Nichols, G0KYA, of the RSGB's Propagation Studies Committee in the English county of Norfolk. K7RA is out of town and will return next week for the November 6 Propagation Forecast Bulletin ARLP045.

Well, what a week it has been. The solar flux hit 82.3 on Tuesday, the highest recording yet since the first observed "new cycle sunspot" in January 2008, which was the "official" visual start of Sunspot Cycle 24.

Even as I write this, the flux is still at 80, thanks to sunspot region 1029, so let's hope that it is a sign of better things to come.

The region (1029) produced several B-class solar flare events and a single C2.2 class flare on the 28th, but luckily CQ World Wide SSB was unaffected for the most part.

NASA's STEREO "behind" spacecraft is not showing any new spots coming around the solar rim, but we live in hope. I was lucky enough to record a Podcast with Carl Luetzelschwab, K9LA at the RSGB's Convention in the UK where he talked about Solar Cycle 24 and the possible effect of galactic cosmic rays on Top Band propagation. You can hear the Podcast at, http://www.g0kya.blogspot.com.

In the UK a combination of sporadic-E and F2 layer propagation made 10 meters a "must have" band for contesters last weekend. The 28 MHz band was full of European stations and I personally worked more than 25 countries in two hours of casual operation. Longer DX included 4X (Israel) and ZS9 (South Africa) with signal strengths peaking at 59 with very simple antennas. I can't remember the last time 10 meters was so active, although it was interesting to note that on Monday the band was completely clear. It just shows that you should call CQ once in a while.

Tim, K6GEP reports that he and other Southern California amateurs worked YO4ATW on 10 meters around 1930z on October 25 during CQ World Wide SSB. No other European countries were heard on the band at that time. Only 100 watts and modest tri-band yagis were used at both ends.

Marcel, YO4ATW was a single band entry on 10 meters, and made over 340 contacts, including some in South America. On another day this week, he worked some Brazilians around 1800z. Multi-hop Es or F layer? Let's hope it is a pointer towards better things to come.

Al, AB2ZY also found 21 MHz wide open. From the Adirondacks in upper New York state with a single ground-mounted Butternut HF6V vertical with lots of radials, an ICOM 756 Pro III transceiver and an old Yaesu FL-2100B amplifier, he was hearing Western European stations well after their sundown.

At the other end of the spectrum 80 meters was also a great band with many US and Canadian stations giving novice European operators their first trans-Atlantic QS0s around 3.8 MHz. K3LR in PA was still audible more than one hour after sunrise in the UK.

Let's hope we get similar conditions for CQ World Wide CW in November.

K7RA--and normality--will be back next week.

73 de Steve G0KYA

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for October 22 through 28 were 0, 30, 21, 28, 29, 29, and 26 with a mean of 23.3. 10.7 cm flux was 71.6, 72.9, 75.6, 75.5, 81.3, 81.5, and 79.9 with a mean of 76.9. Estimated planetary A indices were 14, 8, 8, 5, 3, 3 and 2 with a mean of 6.1. Estimated mid-latitude A indices were 12, 7, 5, 3, 3, 2 and 3 with a mean of 5.

11588. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-10-30 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11588

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Oct 30 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 303 Issued at 2200Z on 30 Oct 2009
IA. Analysis of Solar Active Regions and Activity from 29/2100Z
to 30/2100Z: Solar activity was very low. Region 1029 (N16W84)
produced two B-class flares during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 29/2100Z to 30/2100Z:
Geomagnetic field activity was at quiet to active levels. This
increase in activity was most likely the result of a sector boundary
crossing.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be mostly quiet for the next three days (31 October - 02
November).
III. Event Probabilities 31 Oct-02 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 30 Oct 075
Predicted 31 Oct-02 Nov 075/075/073
90 Day Mean 30 Oct 071
V. Geomagnetic A Indices
Observed Afr/Ap 29 Oct 005/007
Estimated Afr/Ap 30 Oct 008/010
Predicted Afr/Ap 31 Oct-02 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 31 Oct-02 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

11589. A rather short cycle

Yahoo group: DX-IS (2009)
Date: 2009-10-30 22:17:51 UTC
From: Paul M Dunphy
Topic: 9721 Message: 11589

> > Predicted 31 Oct-02 Nov 075/075/073 <<

Well, cycle 24 was a blast! Peaked with a flux of 82 a few days
ago. It looks like a steep decline. Can't wait for cycle 25 to begin.

73, Paul VE1DX

11590. Re: [DX-IS] A rather short cycle

Topic: 9721 Message: 11590

C'mon Paul! You know that sun rotates on a 25 day cycle and therefore the SFI is a variable.

You're going to get a lot of people confused :-)

11593. IRCs availability

Yahoo group: DX-IS (2009)
Date: 2009-10-31 14:08:07 UTC
From: Michael W Elliott
Topic: 11593 Message: 11593

I received call back that my local Post Office (Branch) has received a generous supply of IRCs. Will pick up 30 of them this morning.

I have the sweetess Supervisor in the world working with me.

She knows the regulations and will keep me in supply.

Hope the rest of you guys find a professional Postal Employee like I did.

I asked if she could supply others not in area and her answer was how many and where. You would prob have to pay postage to your home address but that is not much and not cost of gas and a negative response from your own Post Office not willing to help

Let me know if you need info.

thanks and 73 and good dxing to all

Well, cycle 24 was a blast! Peaked with a flux of 82 a few days
ago. It looks like a steep decline. Can't wait for cycle 25 to begin.

My last post on IRC availability

Guys here is the latest information on my New IRC purchase.

My Post Office had 100 New type IRCs on hand when I got there this morning.

I bought 50 of them. THey will restock whenever they get low or when I notify them I am coming in to purchase.

Left 50 of them over there for somone else to purchase -- hi hi

Good luck to the rest of you ---

Make sure you get the stamp on the left side of the IRC in case you want to cash them in the future for non-use -- tell the clerk it must have the stamp !!

I received call back that my local Post Office (Branch) has received a generous supply of IRCs. Will pick up 30 of them this morning.

I have the sweetess Supervisor in the world working with me.

She knows the regulations and will keep me in supply.

Hope the rest of you guys find a professional Postal Employee like I did.

I asked if she could supply others not in area and her answer was how many and where. You would prob have to pay postage to your home address but that is not much and not cost of gas and a negative response from your own Post Office not willing to help

Let me know if you need info.

thanks and 73 and good dxing to all

Don't worry! Paul knows how to re-awake the temporarily dimming SFI. Just wait a week or two and you will be amazed at how much influence he has. :-)

I hope you're right, Bob. They are ridiculously expensive. There's one QSL mgr on here who discounts them a whopping 20%. I like the few guys who'll sell them for what they're worth at the PO with 10-15% added on. But there aren't many of those.

I'm going to take the few I have left to my PO and exchange them for stamps.

Cost of the new fangle IRCs are $2.10.

So until the qsl managers get them in and sell at a reduced rate or you get them direct from a foreign country you will pay $2.10..

Still cheaper than what it costs to mail an International letter from Germany.

Al, was it your or somebody else that I bought for
not too long ago?

I can always repeat that. My post office here
in DC has lots of them (or at least, it usually does).

And just how much did these new fangled IRCs cost you,
Mike? Here in Canada they will be at least 50% more. Perhaps I'll
get some sent up here to me.

My last post on IRC availability

Guys here
is the latest information on my New IRC purchase.

My Post Office
had 100 New type IRCs on hand when I got there this morning.

I
bought 50 of them. THey will restock whenever they get low or when
I notify them I am coming in to purchase.

Left 50 of them over
there for somone else to purchase -- hi hi

Good luck to the rest of you ---

Make sure you get
the stamp on the left side of the IRC in case you want to cash them in
the future for non-use -- tell the clerk it must have the stamp !!

see-ya on TB as I am outta here on this

I received call back that my local Post Office
(Branch) has received a generous supply of IRCs. Will pick
up 30 of them this morning.

I have the sweetess
Supervisor in the world working with me.

She knows the
regulations and will keep me in supply.

Hope the rest of
you guys find a professional Postal Employee like I
did.

I asked if she could supply others not in area and
her answer was how many and where. You would prob have to pay
postage to your home address but that is not much and not cost
of gas and a negative response from your own Post Office not
willing to help

Let me know if you need
info.

thanks and 73 and good dxing to all

Yeah, I agree wait on the Managers if you can. Will be interesting to see what they discount for.

  But things are going to go slow at fiirst getting them. $2. us dollars vs $2.10 for an IRC its your choice. I never liked sending cash international through the mail.

I like buying them from the Managers at reduced cost but I also have some friends who need them for the latest expeditions.

Nothing is cheap. Always the buyer choice.

Good luck guys.

$2.10 us dollars$2.10 us dollars is what the new price is for an IRC

You may decide to wait it out until Manager start stockpiling them. THat is your choice.

I love it -- guys complain about availability from Post Office then want to buy them cheaper. So wait until next year that is the answer for some. For me its not going to kill me to spend $2.10 at the moment. I want to make a submission to ARRL this year for 160/80/40 and (12meters especially for my 9 band DXCC)

I will deal with getting them cheaper later from a source I have been dealing with over the years. That individual only had 1 onhand and I bet he uses that for himself.

I use to work for Postal for 38 years and retired in 2003. Basically I know how to get around or work with the system.

Take care Alan and the very best to you.

If all fails maybe you can send me the money and I will purchase locally for you.

Well, my congratulations to the members of the Wireless Institute of Australia folks and the government bureaucracy for joining the ranks of the morons who administer amateur radio callsigns in the rest of the world. That includes Canada, the United States, Britain, France and others.

This lunacy adds to the frustration of world amateur radio DXers who also have to deal with nut cases on their bands because governments have abdicated their role in policing this service.

Well who needs them? I have extra VK9's over the years.

No takers, they can then go up on e-Bay....

Personally, I don't see the removal of a letter after the VK9 prefix as anything to get upset about. It's an administrative nuisance for whoever issues the calls. Ham radio call signs, and Ham radio in general, are a *very* insignificant part of what government agencies have to deal with. 25-30 years ago, there was little to no satellite and cable TV, no cell phones and no Internet. Radio, be it short wave or regular AM broadcasts, were a primary means of communication. Technology changed dramatically in the ensuing decades.

Government agencies tasked with administering communications were not given more resources. They were given satellite and cable TV, cell phones the Internet to regulate. Thankfully (for them) radio usage declined just as dramatically as the new technology ballooned. (For example, I can tune the entire AM broadcast band here in the Halifax area and there is not one single station left.) Commercial shortwave broadcasting has taken the same route. Most of it is transmitted via satellite or the Internet. Radio no longer needs the strict regulation it did in 1970.

As to VK9 calls, in 1970 I had to wait a week to get WA6AUD's DX Bulletin to find out where VK9DX was. Today, it will be spotted 37 times on the DX Cluster system in their first hour of operation. It will be pre-announced weeks in advance in every electronic form imaginable. If I miss all of that I will go to QRZ.COM and look it up in seconds. It doesn't have to be VK9XDX for me to find out it is on Christmas Island.

K4M is a call that did not indicate where it was. However, I wonder if there is a single member of this list who did not know all about the Midway operation weeks before it occurred.

We don't like change, and we can complain about it. It won't help. The Australian (and every other country) government puts a much higher priority on looking after satellite and cable TV, cell phones the Internet than radio. What they do dedicate to radio is limited to important things like aircraft and marine frequencies, not to us eccentric few trying to exchange 1800 vintage code with some other eccentrics camped out on an obscure clump of rocks off

shore. We can and do continue to do this, but we can't expect the
same strict regulations from our governments that we had in decades past.

DX IS! :-)

And yeah, I have all the VK9 QSLs I'll ever need too. And a few
extra, Mine are going for half what you are asking for yours, Bob! :-) :-)

Drat! I just finished a similar post when you posted yours Paul. Beat me to it. I couldn't agree more.

Was there anyone who thought that K4M was in North Carolina?

On the other hand, if this is all there is to complain about I guess things are going pretty well.

I agree with Art...these are the guys [and/or gals, but I doubt it] who are out to rip us off. Having said that, I was recently in Germany, and I took some cards with me that were sent to German managers. Obviously, I had to buy German postage to get my card back. The cost for Airmail postage from Germany to Canada [read North America] was ?1.70. When I left for Europe, I bought 100 euros at my bank. They cost $158 and change Canadian. That works out to about $2.60 CAD; call it $2.50 USD. Can't put one green stamp into a direct card to Europe any more--those European managers who are asking for $2 USD are NOT trying to rip us off--we don't know when we are well off.

11626. Re: [DX-IS] Re:New IRCs availability

Yahoo group: DX-IS (2009)
Date: 2009-11-01 19:27:36 UTC
From: Axel Schernikau, DL6KVA
Topic: 11595 Message: 11626

Hello Phil,

wondering about Your calculations ...

The fees from Germany for 20g letters are the following:

a) to inside DL - 0.55 EUR
b) to inside EU (outside DL) - 0.70 EUR
c) to outside EU - 1.70 EUR

Now we take the current exchange rate (official bank rate) 1.47 USD for
1 EUR (was already up to 1.50 USD last week) and do a calculation:

1 USD = 0.68 EUR
2 USD = 1,36 EUR
3 USD = 2.04 EUR

So it's easy to see that even 2 USD are NOT enough to get Your QSL
returned directly from Germany. Many guys here volountair it themself
(not asking 2 USD for direct inside EU p.e.) but if You think about
managers who handle quite a good amount of requests it's not possible to
answer directly to requests with 2 USD to North America etc.

For the IRC it's easier as You can gave Your letter together with 1 IRC
to the post office and have it send for it. But there's no way to redeem
them for money or stamps here.

73 & gl,

Axel Schernikau, DL6KVA

I have received QSL cards from Germany that were franked with much less postage. They were marked Drucksack or something like that. I don't have any envelopes to research this, But I remember sending some GS's and thinking that the stamps on the envelope were much less than I sent.

From: Axel Schernikau, DL6KVA
Topic: 11595 Message: 11628

yes, Drucksache -> printed matter

May be some guys do this but it's not correct in that case.

I know people nearby the border to SP, OK, LX etc. try to send batches
from there too.

From: Dale Cole K8TS
Topic: 11615 Message: 11629

Well group, heres the way I see it.;

The VK9 cards I got out will come, time is another issue

If ZK1 and ZK2 are seperate enities, and KL7 and KH6 are not American enities, and K5K, K4M, and N8S are all different enities.....

AND WAE makes a further mess of things......

How can VK9N or VK9L make it any worse?

And with the UN recognizing some 600 + countries and the DXCC only 338..

Why sweat the small stuff? WFWL, then figure out who they are during a slow sunspot cycle.

11631. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-01 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11631

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 01 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 305 Issued at 2200Z on 01 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 31/2100Z
to 01/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 31/2100Z to 01/2100Z:
Geomagnetic field activity was quiet.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be quiet for the next three days (02 - 04 November).
III. Event Probabilities 02 Nov-04 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 01 Nov 072
Predicted 02 Nov-04 Nov 073/073/070
90 Day Mean 01 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 31 Oct 001/001
Estimated Afr/Ap 01 Nov 005/005
Predicted Afr/Ap 02 Nov-04 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 02 Nov-04 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th-October, through Sunday, 1st-November there were 227 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/g, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U1A, SWITZERLAND (Awareness about HIV/AIDS through Amateur Radio). According to UNAIDS (the Joint United Nations Programme on HIV/AIDS), estimates, there are now 33.2 million people living with HIV, including 2.5 million children. During 2008, some 2.5 million people became newly infected with the virus. Around half of all people who become infected

with HIV do so before they are 25 and die of AIDS-related illnesses before they are 35. Around 95% of people living with HIV reside in developing countries. However, HIV today is a threat to men, women and children throughout the world. Started on December 1st, 1988, the aim of "World AIDS Day" is to raise money, increase awareness, fight prejudice and improve education. "World AIDS Day" is important in reminding people that HIV has not gone away, and that much still needs to be done.
A special amateur radio station will be operating at UNAIDS HQ in Geneva, Switzerland, from December 1-7th, 2009, with the special event callsign 4U1AIDS. They invite people to observe the "World AIDS Day" and demonstrate global HIV awareness.
International World Aids Day 2009 Amateur Radio Certificate: Those amateur radio stations which have a radio contact with 4U1AIDS on any 3 amateur radio bands, will awarded a special commemorative certificate ☐World AIDS Day Award☐.
Amateur radio stations that have radio contact with 4U1AIDS on 5 amateur radio bands will be awarded a special commemorative UNAIDS pennant.
Special QSL card: For each radio contact with 4U1AIDS, a special QSL card will be sent.
QSL information: For further information, please get in contact with:
Andrey Fedorov, UNAIDS, 20 Avenue Appia, CH-1211, Geneva 27, Switzerland.
WEB sites: Official UNAIDS WEB site: http://www.UNAIDS.org
Amateur Radio 4U1AIDS WEB site: http://www.DX-World.com/4u1aids

5H, TANZANIA. Harald, DL7VSN, is once again heading to Tanzania and will probably be active as 5H1HS, this time from the Kilimanjaro area, starting on November 1st. His length of stay was not mentioned. Activity will be 160-10 meters using mainly CW and RTTY. He will use various dipoles with 100 watts. If all plans go well, Harald may activate his 5th IOTA group from this DXCC entity for one or two days. Harald will also be in the Serengeti and Tarangire National Park starting November 18th, and hopes to be active from these areas. QSL via his home callsign.

5R, MADAGASCAR (Update/Also ZS5). Sam, G4OHX, will be active as 5R8HX from Madagascar (IOTA AF-013 and WLOTA L2455) between December 28th and January 3rd (2010). Activity will be mainly CW. He will also be active from South Africa as ZS5/G4OHX between January 4-17th. QSL via his home callsign direct only.

8R, GUYANA (Update). Paulo, PV8DX, a member/part of the "Amateur Brazilian Team", will be active as 8R1PY from Lethem, between now and November 4th. He states that he will try 160 meters. However, there is no electricity during the night, and he will use a generator, which is noisy. Other activity will be on 160-6 meters, including 30/17/12 meters, using CW, SSB, RTTY and PSK31. Other operators mentioned are: Edi/PU8TEP, Abilio/PV8AZ, Ivan/PV8IG, Ivan/PY1YB, Anderson/PY2TNT and Alex/PY2WAS. QSL via PY2WAS.

9J, ZAMBIA. Niko, S53A, will once again be active as 9J3A from The Hippo Lodge, (see http://www.hippolodge.com), Kafue National Park, between November 25-30th. He also plans to be active during the CQWW DX CW Contest

(November 29-30th) as a Single-Op/Low-Power entry. His equipment will be a IC-7000, spiderbeam for the high bands (20-10m), 80m vertical, and a 40m 2 element wire delta loopa. QSL via S57S direct to: Aleksander Zagar, Golisce 132, SI-1281 SLOVENIA.

9V, SINGAPORE. James, 9V1JP, is a new operator from here and has been active on 20 meters. He states on QRZ.com that he is "in a very challenging environment and is trying hard to put out a decent signal on HF." He also states, "If you need a QSL card, please be patient. I am in the process of designing them, and they should be good and ready in the spring of 2010."

BA4, CHINA. Yoshihiro, JK2VOC, will be active from Dale's, BA4TB, QTH between November 27-30th. He will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via JK2VOC.

C4, CYPRUS. Operators Andy/LZ2HM, Ken/G0ORH and possibly others will be active as C4I during the CQWW DX CW Contest (November 28-29th). QSL via LZ2HM.

CARIBBEAN TOUR. Mike, DF8AN, will once again be active from the Caribbean. This time from two DXCC entities. He should be on the air by the time you read this. His schedule is as follows:
Galapagos Islands (HC8) - HC8/DF8AN between now and November 7th
Netherlands Antilles (PJ4) - PJ4/DF8AN from the Island of Bonaire between November 7-16th.
Activity will be mainly CW. He will be using wire antennas. QSL via DF8AN, by the Bureay or direct.

CE0, EASTER ISLAND (SA-001). Roberto, YV5IAL, will be active as CE0/YV5IAL between January 8-11th. This will be a QRP, portable, holiday style operation. Activity will be on PSK31 digital mode on 14070.15 kHz from 2200-0100z, and occasionally on 40/30/15 meters. QSL via his home callsign.

CR3/CT3, MADEIRA ISLANDS (Update/QSL Change). Jose, CT1BOH, will be using the special callsign CR3E during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. He will use the callsign CT3NT before the contest starting November 24th. All QSOs will be uploaded into LoTW. QSL Manager, Joe, W3HNK, is now taking over QSL chores for CT3NT and CR3E. See his Web page and station at: http://www.qsl.net/ct1boh

CR3/CT9, MADEIRA ISLANDS. Operators Ulrich/DJ2YA, Walter/DJ6QT, Arno/DL1CW, Ulf/DL5AXX and George/SV1RP will be active as CR3L during the CQWW DX CW Contest (November 28-29th) as a Multi-2 entry. QSL via DJ6QT. Operators will be active as CT9/homecall between November 24th and December 3rd.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
3D20CR - Conway Reef; 2009 Operation
3D2CV - Conway Reef; 2009 Operation

E4, PALESTINE. There is a E4X callsign listed on QRZ.com, but no other details are provided. Stay tuned!

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (???) entry. QSL via OH2BYS.

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969) during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/ High-Power entry. QSL via UA3DX.

EL, LIBERIA. Chris, ZS6RI (aka-ZS8IR, ZD9IR, 5H9IR), is expected to be here for about six weeks starting at the beginning of November. His callsign will be EL8RI. Activity will be QRP on the HF bands (mentioned 40/20/30m) using CW, SSB and the Digital modes. After his 6 week stay, he will return home and then return to EL-land after 3 weeks. QSL EL8RI via ZS6RI.

GD/MD, ISLE OF MAN. Operators Ron/PA3EWP and Tom/GM4FDM will be active as MD/PA3EWP and GD4FDM, respectively, between November 7-9th. Activity will be on the HF bands. QSL MD/PA3EWP via PA7FM and GD4FDM via GM4FDM.

GU, GUERNSEY. Bob, GU4YOX, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via GU4YOX, direct or LoTW.

HB0, LIECHTENSTEIN. Operators Kazik/DL2SBY, Tomi/HA4DX and Laci/HA0HW will once again operate from Masessa between November 6-13th. Their main focus will be to do as many QSOs as possible on the 160, 80 and 40 meter bands. They will have 3 radios (2 with amplifiers). On 160m, they will use a 18m Spiderpole inverted L; on 80m an inverted Vee and a loaded GP; and on 40m a GP on another 12m Spiderpole. For the upper bands they will have a Spider beam on top of a 11m mast. Operations will be mostly CW, but some SSB also expected. QSL by the Bureau to each appropriate operator.

HC8, GALAPAGOS ISLANDS (Update). A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal (SA-004, WLOTA L0094) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. Some of the operators mentioned (and the bands that they will be on) are: Dave/N3RD (40m), Bob/W6RGG (20m), Dennis/K2SX (10m) and possibly others. QSL via W5UE.

HS, THAILAND (Good News). John, W2YR (aka-HS0ZDJ), informs OPDX that he just received this information from the International Secretary of the Radio Amateur Society of Thailand: FYI - the NTC is the National Tele-communications Council akin to our FCC in the USA -- "Hi, Good news (just received from Narissara, HS1CHB): the NTC has approved the RAST request made recently for the expansion of the 7-MHz for amateur radio on a primary basis in Thailand from 7.0-7.1 to 7.0-7.2 MHz. (This had been approved internationally at the WRC-03 conference and was to be

effective March 29 this year, pending approval on a country-by-country basis.) This becomes effective "next Friday," which I take to be November 6th, 2009."

IOTA NEWS.....

EU-031. Operators Alfredo/IK7JWX, Alessandro/IW8EHK, Leopoldo/I8LWL and Titti/IK8GQY (YL) will join Raul/IC8ATA and be active as IC8/homecall from Procida Island (I.I.A. NA-002, Grid JN70BR) between November 6□8th. Activity will be on all HF bands and 6 meters using SSB, RTTY and PSK31. It is possible that the group may operate from Ischia (Grid JN60XR) and Vivara Islands (Grid JN70AR) also.

NA-062. (Update/Reminder) Mark, KG8DP, will once again activate Grassey Key between November 2-9th. Operations will be stationary at Grassey Key (on the beach) and mobile as he travels to Key West and all points on the ocean. He will use the callsigns KG8DP, KG8DP/M, NA8KD or NA8KD/m. This will be a week trip. QSL all callsigns via info on QRZ.com (w/SASE). Mark will be using an IC-7000, 1.2 kw amp mobile and GLA-1000B portable amp. Antenna will be Tarheel M-100's. ADDED NOTES BY MARK: He states, "This trip will have plenty of ham radio, but he will be announcing an engagement of marriage to his future wife to be on 10/10/10. Look for him on the trip heading back as he will be activating different counties for the county hunters. Frequencies will be the county hunters, 14.336 and 7.188 MHz and the normal IOTA frequencies. Any scheds for needed IOTA QSOs can be made via E-mail at: kg8dp@...

SA-062. (Update) With the support of the Island Radio Expedition Foundation (IREF), the Araucaria DX Group and the ForDX, a group of operators will be activating Coroa Vermelha Island and Coroa Da Barra Island, including the Lighthouse (ARLHS BRA-029), as PW6C between November 11-18th. Activity will be on 80-10 meters, including 17 and 12 meters, using CW and SSB. The team members are Leo/PP1CZ, Andre/PY0FF, Renner/PY7RP, Jim/PY7XC, Ciro/PY7ZY and Mike/K9AJ. QSL via K9AJ. QSL is valid for the South American Lighthouses Award issued by the Radio Club Grupo DX Bahia Blanca. For more details, visit their Web site at: http://www.pw6c.com

SA-071. (RARE IOTA) Operators Fred/PY2XB and Alex/PY2WAS will activate Cabras Island between November 19-23rd. IOTA SA-071 continues to have a high demand among IOTA program participants. They will use the callsign PW2IO (PY2XB) and PW2TA (PY2WAS), operating two separate stations running 300w and 100w, respectively. The antennas will be a yagi for 20/17/15m, and a multi-band ZEP. The team guarantees that at least one station will be on the air around the clock. Both stations will work CW and SSB. The main bands to be used are 40/30/20/17/15 meters on the IOTA frequencies. Alternative frequencies

may be used if necessary. As far as they know, Cabras Island
has never been activated. The team will need to take a lot
of supplies to the island, including fuel, generator and
batteries for energy. The landing on the island is difficult
and the operation may be postponed in case of bad sea. Updates
will be forwarded through Luke, PT7WA. Additional information
will be available at QRZ.com. QSL routes are: PW2IO via PT7WA
and PW2TA via PY2WAS.

J5, GUINEA-BISSAU. Joao, CT2GQA, will be here for the next five years.
He will be using two different callsigns (reason not given), but look
for the following to be used: J5GQZ - on 20/17 meters
J5JUA - on 80/40 meters
QSL both callsigns via his home callsign.

JD, OGASAWARA. Kirk, JF3MYU, will be active as JD1BNN between March
28-31st (2010). He is expected to be there with three other operators
who will be staying long (hopefully more details will be forthcoming).
Kirk's activity will be focused on the WARC bands. QSL is "OK" via
JARL Bureau, but write JD1BNN on your QSL (so it can be sorted easily).
Also, you can receive his QSL direct if you send your QSL to his address
in Kobe, JAPAN: Kirk Itaya, 5-1-35, Daikaidori, KOBE, 652-0803 JAPAN.
Please enclose SAE plus sufficient return postage. For NA, SA, EU and
AF include one new IRC or 2 USDs. For Asia, one IRC or 1 USD.

K0,UNITED STATES (Special Event). Members of the EARS (Emporia Amateur
Radio Society - KB0SSR) will activate special event station K0V on November
7th and on Veterans Day, November 11th, to honor U.S. Veterans. The special
event station will be located adjacent to the Emporia All Veterans
Memorial. Operating times will be as follows:
November 7th - 1900-2300z (1-5PM CST)
November 11th - 1400-2400z (8AM-6PM CST); on Veterans Day
Suggested frequencies are: 14268, 7262 and 3920 kHz (+/- 20 kHz). Other
frequencies may be used depending on QRM and/or propagation. They may
also try some Digital QSOs, especially on Saturday, November 7th. Operating
hours maybe extend on the 11th beyond 2400z (6PM CST), depending on various
factors (such as operator fatigue, band conditions and the need for a QSO).
Special QSL cards will be available and will require a SASE sent to:
EARS, c/o Connie Steinel/K0UER, 950 Oxford Drive, Emporia, KS 66801-5439/.
Visit Ears Web page at: http://www.qsl.net/emporiaars/

KH6, HAWAII. Jim, N6TJ, will be active as KH6ZN (the Pu'u O'o Radio Club
callsign), from Hawaii's Big Island, during the CQWW DX CW Contest (November
28-29th) as a Single-Op/All-Band/High-Power entry. QSL via QSL via AI4U.

KH6, HAWAII (Special Event). Operators Claire/WL7MY and John/KL7JR will be
operating special event station "N7I" from Honolulu (Oahu Island HI-008S),
February 4-10th (2010). Activity is in celebration of the 16th anniversary
of the U.S. Islands Awards program. Main frequency will be: 28460 or 14260
kHz. They use a TS-50 and a vertical on mag mount. QSL Manager is KL7JR.
For additional info: http://www.usislands.org

KH6BZF PROPAGATION FORECAST/REPORT (For November 2-8th)....
Nov 2 AN SOLAR REFERENCE
Nov 3 AN ---------------
Nov 4 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 5 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 6 AN LN - Low Normal
Nov 7 AN
Nov 8 AN GEOMAGNETIC REFERENCE

MARCONI NOBEL 100 AWARD (Correction/Update). To celebrate the 100th anniversary of Marconi receiving the Nobel Prize, listen for and work 5 different special event "SI" stations (not 10 as first announced -- DX stations work only 3 special "SI" stations) between November 9th and December 10th and earn a special "Marconi Nobel 100 Award". The following special anniversary callsigns will be on the air: SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM. Other SM stations may be using the special prefix SI, but only the above stations count. Each anniversary station counts once per band. No endorsements. The fee is 50 SEK, 5 Euro or 5 USDs. Apply with log entry to SSA Awards Manager, Bengt Hogkvist, Ostbygatan 24 C, SE-531 37 Lidkoping, Sweden.

OH0, ALAND ISLAND. Tomi, OH6EI, will once again be active as OH0Z. His activity will include the CQWW DX CW Contest (November 28-29th). He will be a Single-Op/All-Band/High-Power entry. QSL via W0MM.

OQ3, BELGIUM. Mar, ON4RU, will be using his contest callsign OQ3R in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via his home callsign.

OX, GREENLAND. Members of the Spanish "DX4DX Team" will be active as OX/EA7SB and OX/EA4NA from the main island (NA-018) between November 12□19th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. The group will be using FT-857s w/amps into vertical antennas. Operators mentioned are: Paco/EA4NT (SSB/Digi), Emilio/EA7AAW (CW), Ramon/EA4NA (CW) and Salvador/EA7SB (SSB/Digi). Pilot stations will be Jose/EA4DB and Txema/EA5BWR. QSL via EA4BT, direct or by the Bureau. This is the same group who was active as TK9Z and C57R. Visit the group Web page at: http://www.dx4dx.com/index1.html

PW2, BRAZIL (Special Event). Special event station PW2SIDC has been active (from several Brazilian states, including Fernando de Noronha Island) since October 22nd and will be on the air until November 22nd. Activity is in celebration of V DEFENCIL - V International Conference of Civil Defense - to be held between November 17-20th, at Anhembi - Meeting & Conventions of Sao Paulo City, with the participation of RENER - National Emergency Network Amateur Radio. QSL via PS7YL, by the Bureau, eQSL or direct to: Monica Freitas, Av. Sao Miguel dos Caribes 31,

Natal, RN 59086-500 Brazil.

QSL INFO AND NEWS.....
3D20CR QSLS. From the 3D20CR Web page: "As promised, QSLs have already been mailed confirming Conway Reef QSOs with donors who made donations that were received on or before September 23, 2009."

4W6FR AND VK9LA OQRS PROBLEMS. QSL MANAGER Bill, VK4FW, announced this past weekend (October 31st): "Today, out of the blue, my faithful laptop has given up the ghost, worse is that the external backup stick drive has also collapsed (all suspected from an AC surge). So now all OQRS files for 4W6FR are at this time lost as well as any OQRS VK9LA files for the last 4 days..... if any of you have sent for QSL a request for the above, please kindly resend me full details to: vk4fw@... "
His address is: Bill Horner, PO Box 612, Childers, 4660, Australia.

FT6GA ON LOTW. Didier, F5OGL, announced on Tuesday, October 27th, that the FT5GA log has been uploaded to the LoTW at 1235z. He states (edited), "Of course some stations will not find one or several of their QSOs on LoTW. To these hams I say 'don't worry!'. Every situation will be checked with big care. It had been possible, in the huge pile ups, that some mistakes happened. However, know also that FT5GA was pirated a lot of times, even on the scheduled DXpedition frequencies. These malevolences are not of our fact, and we ask the community to understand us if some QSOs will be rejected for having not be found in the log."

NCDXF PRESS RELEASE (K4M and LoTW). "NCDXF (Northern California DX Foundation) will be sending the K4M webmaster, Don, N1DG, a complete list of all contributors for K4M LoTW upload. Any NCDXF contributor in the last *eighteen* months will be included. This will be done as soon as we have booked October contributors which should be by November 4th. You *DO NOT* have to E-mail N1DG to make this happen, so please do not. 73, The Board of NCDXF"

NEW ADDRESS. QSL Manager Gene, UA9AB, who is a manager for several stations, says that his address has changed to:
Gene Shcumat, PO Box 18527, Chelyabinsk 454021, RUSSIA
Gene said that his old address is still valid for the immediate future.

DID YOU WORK KP4AO on November 1st? Special event station KP4AO was activated by the A.R.C. Arecibo Observatory. Activity was to celebrate 46th anniversary of operations at the Arecibo Observatory Radio Telescope (still the single largest radio telescope antenna in the world). Also, they will commemorate the 35th anniversary of the Arecibo Message, which was sent on November 16, 1974, in binary code and transmitted to the globular star cluster M13, for if it is received by intelligent life, it will let them know about our existence..... For every QSL received, a special certificate will be issued, so please include a #10 BUSINESS SIZE SASE with your QSL. QSL via W3HNK. Official Web site for the Arecibo Observatory is: http://www.naic.edu

QSL KP4KE via OK1DOT (For the recent 2009 CQWW DX SSB Contest and older QSOs as well).

VK9GWM QSL CARDS. It has been reported by Chris, HA5X/HG5XA, that he hopes all of you have received your VK9GMW cards by now, especially direct and OQRS requests. He states, "Although designing and printing the cards took a bit longer than expected, the OQRS system helped a lot in processing the requests. Tomi, HA7RY, was very busy the past few months processing all remaining requests for VK9WWI, 5K0T and VK9GMW QSL cards, and even if somebody had sent a request for only one of the expeditions, he checked if the same callsign was there in the other expedition logs and automatically sent a card for that expedition as well. Cards and OQRS requests for VK9GMW are still coming in and they will be processed after Tomi has returned from the currently ongoing TX3A expedition."

QSLS VIA LOTW: FO/G3BJ, FT5GA and K4M

QSLS RECEIVED VIA MAIL: 5B4AIF, TL0A, V51AS, VK9DWX, XU7TZG and ZB3B

QSLS RECEIVED VIA THE BUREAU: E4/OM2DX, EY7AF, FG/OM3LA, FP/KV1J, T32OU, T32Z, TA2MW/0, TI50DX, V25OP, V73NS, VO1IMD, VP5T and VY1JA

SOTA DAY. The North American "Summits on the Air" (SOTA) activation day, is Saturday, November 14th. The four North American associations of "Summits on the Air" are planning a multi-summit activation spanning the North American continent. Portable, mountain top stations will be operating from the VE2, W1, W2, and W6 call areas. The operators will be using the extensive spotting and alerting system devised by the SOTA organization. Seasoned "summit chasers" all over Europe will have the opportunity to work expeditions on SOTA's western frontier, and a new group of North American chasers will get a chance to work multiple summits. To join in the fun, visit the SOTA Web site at <http://www.sota.org.uk/> and set aside Saturday morning, November 14th, for Summits on the Air.

T8, PALAU. Pista, HA5AO, will once again be active as T88CI from the Island of Koror (OC-009) between November 25th and December 10th. This will be a holiday style operation, and his activity will be on the HF bands 80-10 meters, possibly 160m, mainly on CW. There is a chance he may also be on SSB and RTTY. Pista will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. A log search will be available on his Web site at: http://ha5ao.novolab.hu QSL via HA5AO, direct, by the Buraeu or LoTW.

TM1, FRANCE (Special Event). Members of the Havre Radio Club (F8KHN) will be active using the special callsign TM1TJV between November 4-8th. Activity will be on all HF bands using several different modes. The special event is to celebrate the departure of some 30 trans-Atlantic sailing ships during the "Transat Jacques Vabre 2009" race between Le Havre, France and Costa-Rica's Caribbean coast. QSL by the Bureau or direct to: Radio Club Havrais, BP101, 76050 Le Havre, Cedex, FRANCE. For more details on the race, visit the following Web page at: http://www.jacques-vabre.com/en/s01_home/s01p01_home.php#

TX3, CHESTERFIELD ISLAND. By the time you read this, TX3A should be close to Chesterfield Island (expected to arrive early Monday morning) and may be on the air possibly Monday or Tuesday. Operators George/AA7JV and Tomi/HA7RY have had to fight rough seas and had to anchor at Saumarez Reef on October 27th for a fews day, but left again on October 31st. Latest reports -- "2 to 3 meter seas, with the boat rolling heavily." The good news that was announced this past week was the TX3A license has been extended, and they will be able to use the callsign between November 2nd and December 6th. For more detailed information and updates, visit their Web page at: http://www.TX3A.com

UR, UKRAINE (Contest/Mountain Op). Operators Alex/R7IRK, Vladimir/US5ID, Valery/UU1JN, Anatol/UU5JA, Elena/UV5ESZ and Roman/UY7IQ will be active as homecall/p from Crimea on Karaby Mountain (1000m high ASL) between November 2-9th. Activity will be on 160-10 meters, and the group will take part in the Ukrainian DX Contest as UU5JZA. Reference numbers for the Ukrainian Flora Fauna Award (UFF) is 201 and for the Ukrainian Regional Districts Award (URDA) is KR07. QSL UU5JZA via UY7IQ.

VI5, AUSTRALIA (Special Event). Members of the Elizabeth Amateur Radio Club will activate the special event callsign VI50LZ between October 31st and November 8th. Activity is to celebrate the club's 50th anni-versary. Operations will be on all HF bands. Check out the club's Web site each day for exact operating times, frequencies and modes at: http://www.earc.org.au

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via VK6NE.

VK9 C, L, M, N, W & X DELETED FROM DX EQUATION. The Australian Communi-cations and Media Authority (ACMA) has decided to discontinue the use of a VK9 callsign suffix letter to denote each of the six Australian external territories, each a DX entity. The long-standing prefixes included VK9C for Cocos (Keeling) Island, VK9L Lord Howe Island, VK9M Mellish Reef, VK9N Norfolk Island, VK9W Willis Island and VK9X Christmas Island. For more details, please refer to the Amateur Radio Victoria Web page at: http://amateurradio.com.au/node/856

VP2M, MONTSERRAT (Update). Operators Tom/DL2RUM (as VP2MUM), Rudi/DM2XO (as VP2MXO) and 3D20CR op Jan/DJ8NK (as VP2MNK) will operate from here between November 3-16th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns per the QRZ.com address or by the Bureau.

VP8, FALKLAND ISLANDS (Update/Reminder). Members of the CRAM and the Uruguay DX Group will be active from Port Stanley between November 14-21st. They hope to start operations at their local sunset on the 14th, starting on 40 meters, depending on transportation matters. The group will sign VP8BUH on SSB and VP8BUG on CW/Digital modes. Their activity will focus on the lower bands, Digital modes and the 30/17/12 meter bands. They plan to have 3 stations on around the clock. Operators mentioned include: Gus/CX2AM (CW), Gus/CX3CE (Low-Bander), Bert/CX3AN (CW/SSB), Mario/CX4CR (CW, SSB and Digital), Luis/CX4AAJ (Digital - CQWW RTTY

Winner) and Horacio/CX3BH (who is 91 years young!). QSL Manager is David, EB7DX. Pilot and Web master: Carlos, CX8ABF. For more details, see: http://www.qsl.net/vp8bug

VP9, BERMUDA. Mark, AA1AC, will be operating from the Hamilton Parish, Bermuda, as VP9/AA1AC from December 6-12th. QSL via to his home callsign, direct or via the bureau.

XR0, EASTER ISLAND (Update/Reminder). By the time you read this, an international team of operators will be active as XR0Y from Rapa Nui between now and November 15th. This will be a lite and small DXpedition with 6 operators. Operators are: Marco/CE6TBN, Leszek/NI1L, Aart/PA3C, Zbig/SP7HOV, Stan/SQ8X and Victoria/SV2KBS. Their priority will be working Europe on 30 meters CW (since there is an incredibly high demand on 30m), and also 40 and 80m during the first 7 days of the DXpedition. This means their focus will be on the European during the first half of their activity. The second part of the DXpedition will be dedicated to all continents (especially Africa and Asia [other than JA]). For more details, please see their Web page at: ttp://rapanui2009.org
They plan to have three stations on the air at the same time (two of them with amps) mainly on CW, but also on SSB and RTTY. Their suggested band plan is as follows:

BAND/MODES	CW	RTTY	SSB
160m	1826 up	2-5 EU N/A	1843 up
	up 5-10 NA	N/A	1843 up
	dwn 6-11 JA	N/A	1843 up
80m	3505 up	2-5 3580 up	1-5 3725 up
40m	7005 up	7034 up 1-3	7075 up + 7145 RX NA
30m	10120 up	N/A	N/A
20m	14005 up	14091 up	14200 up
17m	18073 up	18102 up 1-5	18140 up 5-15
15m	21005 up	21083 up	21295 up
12m	24893 up	24923 up 1-5	24935 up
10m	28023 up	28085 up 1-5	28480 up

QSL policy and routes as follows:
* Europe, Asia, Africa, Oceania: direct/bureau via Stan, SQ8X:
Stan, P.O.Box 8, 38-600 Lesko, POLAND
* North, Central & South America: direct/bureau via RCCh:
Radio Club de Chile, P.O.Box 13630, 330996 Santiago, CHILE

They will have 2 QSL card types and 3 QSLing routes to chose voluntary from:

1] REGULAR QSL TYPE.
Direct requests: Cards received with 2 USDs or 1 VALID IRC (NO COINS PSE) + SAE = returned via direct. ATTENTION: Your IRC must be a NEW TYPE IRC VALID UNTIL 2013 (cards will be replied in 2010) and must be stamped IN A COUNTRY OF DESTINATION. For instance they can't reply to a card received from Japan if the IRC received from

Japan is stamped in the USA etc. ☐ Their Post Office refuses such
IRCs. If coins, no SAE, invalid or incorrectly stamped 2010 IRC or
insufficient funds to cover postage received = returned via bureau.
KEEP IN MIND THE CORRECT QSL ROUTE DEPENDING ON YOUR LOCATION!

Bureau requests: Cards received via bureau = returned via bureau.

OQRS direct requests: 5 USDs or 4 EUROs via OQRS = returned via
direct. OQRS will become available once XR0Y gets on the air.

2] SPECIAL, LIMITED EDITION QSL CARD.
There will be an unique, extraordinary QSL card designed and printed
in a very limited amount ☐ available on voluntary request only via
OQRS. Due to special arrangements regarding printing this type of
cards, rates for this OQRS will be announced as soon they arrange
printing conditions. No doubt it will be something amazing in your
QSL collection!

LoTW & eQSL - They will upload logs to LoTW and eQSL after the DXpedition
in several months in 2010.

ONLINE LOG - Once they upload their first log, it will become available
at: http://www.clublog.org/charts/?c=XR0Y
They plan to upload their logs at this subpage once a day
around local midnight or morning hours (so approx. 6.00 or
12 UTC hours each day of the DXpedition). Online log is
subject to change due to conditions they will meet at the
island (Internet accessibility etc).

LAST MINUTE UPDATE: Reports indicate that the team is missing some of
the radio equipment which did not arrive on the island with the team
(an Icom 756 pro III and RTTY units). Refer to their Web page for updates.

Z2, ZIMBABWE. Fernando, EA4BB (ex-ST2BF, TU5JL, D2BB, 9Q5BB), informs
OPDX that he has obtained his license in Zimbabwe and is "already making
some QRM from Harare." His callsign is Z21BB, and he hopes to be
using it for the next two years or so. Fernando states, "For the time
being I have only dipoles and delta loops for 10, 15 and 20 meters. I
plan to build new antennas for the WARC bands as well as two loops for
40 and 80 meters, and maybe to increase power (for the time being I am
limited to 100W). Also, later in the year I hope I will put up a 3-element
beam for 10, 15 and 20 meters. For now I am mostly on CW, but I will
scale up SSB operations as I improve my antenna system. My QSL Manager
is Joe, W3HNK. Best regards from Zimbabwe, and CU on the air."

ZB2, GIBRALTAR. Jorma, OH2KI, will be active as ZB2X during the CQ
World Wide DX CW Contest (November 28-29th) possibly as a Single-Op/
Single-Band or Single-Op/All-Band entry. QSL via OH2KI.

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during
the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry.

QSL via K6AM, direct or by the Bureau or LoTW. ADDED NOTE: John will also be active during the ARRL DX CW Contest (February 20-21st, 2010) as a Single-Op/All-Band entry.

ZL, NEW ZEALAND. Rick, AI5P, will once again be active as ZL/AI5P between November 1-6th. Activity will be from New Zealand's main island, North Island (OC-036). Rick usually works mostly CW on 40-17 meters running an IC-706 into wire antennas. QSL via AI5P.

There seemed to be quite a few who did not know K4M was working split. Tnx to the cluster every nitwit out there with a keyer thinks he's a DXer. Just my 2 cents...

Just found XR0Y lonly calling CQ on 3505. Worked him with one call. Posted him to the cluster and all hell broke loose.

From: aburkefl
Topic: 11595 Message: 11635

I believe in donations as well and I do "sponsor" many dxpeditions. But 2 IRCs is now over $4 U.S. and a manager should not ask for 2 IRCs when a single IRC should get the job done.

Am I to understand that you cannot exchange IRCs for stamps at your post office? I thought Germany was one of the signatories of the international postal agreement, i.e., you could use IRCs.

After all the negative comments I've seen about the cluster, I found him on 3505 as well, worked him and didn't spot anything at all. If I could find him with my G5RV, I guess just about anyone could find him!

11638. Laugh of the Day

Yahoo group: DX-IS (2009)
Date: 2009-11-02 12:10:16 UTC
From: aburkefl
Topic: 11638 Message: 11638

This morning I woke up well before sunrise. Thinking TX3A just might be on 40 or 80, I forced myself out of bed and into the shack. No evidence of the TX3A, but XR0Y was very much in the clear on 3505, listening up.

After setting up for split, I tuned around 3 or 4 kHz above his xmit freq and found the pack. After half a dozen calls, I had found two or three he was working and there didn't seem to be any pattern, so I looked for a "quiet" sliver of the band and called. A few minutes later I worked him.

Out of curiosity, I fired up the cluster. There were a few spots for him, but not many. But there were two interesting spots.

KJ2S had a "spot" on 3795: XR0Y 3795 PSE QSY FOR QUICK CONTACT TU

On the announcements page (I use CCUser and announcements are broked out nicely on a separate page from the spots - try it, you'll like it!), K4ZJ posted "KJ2S, thanks for laugh of the day"

Perhaps he didn't think that was adequate, so he made his own "spot" that looked like: "XR0Y PSE QSY to 146.52 MHz for QSO?"

Perhaps proving that if you summed up their IQ's you'd get a number less than the age of either one of 'em! Yeah, gotta love that cluster - how could you DX without it?

I guess that callsign has been recycled? I have a QSL AND a coffee cup
(which I just filled with coffee for the fun of it after reading this post)
for the 1995 XR0Y Easter Island DXpedition.

ZCZC AP44
QST de W1AW
Propagation Forecast Bulletin 44 ARLP044
>From Steve Nichols, G0KYA
Wymondham, England October 30, 2009
To all radio amateurs

SB PROP ARL ARLP044
ARLP044 Propagation de G0KYA

The propagation bulletin this week is written by Steve Nichols, G0KYA, of the RSGB's Propagation Studies Committee in the English county of Norfolk. K7RA is out of town and will return next week for the November 6 Propagation Forecast Bulletin ARLP045.

Well, what a week it has been. The solar flux hit 82.3 on Tuesday, the highest recording yet since the first observed "new cycle sunspot" in January 2008, which was the "official" visual start of Sunspot Cycle 24.

Even as I write this, the flux is still at 80, thanks to sunspot region 1029, so let's hope that it is a sign of better things to come.

The region (1029) produced several B-class solar flare events and a single C2.2 class flare on the 28th, but luckily CQ World Wide SSB was unaffected for the most part.

NASA's STEREO "behind" spacecraft is not showing any new spots coming around the solar rim, but we live in hope. I was lucky enough to record a Podcast with Carl Luetzelschwab, K9LA at the RSGB's Convention in the UK where he talked about Solar Cycle 24 and the possible effect of galactic cosmic rays on Top Band propagation. You can hear the Podcast at, http://www.g0kya.blogspot.com.

In the UK a combination of sporadic-E and F2 layer propagation made 10 meters a "must have" band for contesters last weekend. The 28 MHz band was full of European stations and I personally worked more than 25 countries in two hours of casual operation. Longer DX included 4X (Israel) and ZS9 (South Africa) with signal strengths peaking at 59 with very simple antennas. I can't remember the last time 10 meters was so active, although it was interesting to note that on Monday the band was completely clear. It just shows that you should call CQ once in a while.

Tim, K6GEP reports that he and other Southern California amateurs worked YO4ATW on 10 meters around 1930z on October 25 during CQ World Wide SSB. No other European countries were heard on the band at that time. Only 100 watts and modest tri-band yagis were used at both ends.

Marcel, YO4ATW was a single band entry on 10 meters, and made over 340 contacts, including some in South America. On another day this week, he worked some Brazilians around 1800z. Multi-hop Es or F layer? Let's hope it is a pointer towards better things to come.

Al, AB2ZY also found 21 MHz wide open. From the Adirondacks in upper New York state with a single ground-mounted Butternut HF6V vertical with lots of radials, an ICOM 756 Pro III transceiver and an old Yaesu FL-2100B amplifier, he was hearing Western European stations well after their sundown.

At the other end of the spectrum 80 meters was also a great band with many US and Canadian stations giving novice European operators their first trans-Atlantic QS0s around 3.8 MHz. K3LR in PA was still audible more than one hour after sunrise in the UK.

Let's hope we get similar conditions for CQ World Wide CW in November.

K7RA--and normality--will be back next week.

73 de Steve G0KYA

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for October 22 through 28 were 0, 30, 21, 28, 29, 29, and 26 with a mean of 23.3. 10.7 cm flux was 71.6, 72.9, 75.6, 75.5, 81.3, 81.5, and 79.9 with a mean of 76.9. Estimated planetary A indices were 14, 8, 8, 5, 3, 3 and 2 with a mean of 6.1. Estimated mid-latitude A indices were 12, 7, 5, 3, 3, 2 and 3 with a mean of 5.

Heehee - so did he work XE0Y on 3795? Something tells me there's a big
difference between XE0 and XR0 ...

I saw that same post this morning as well. Another one of those situations where pleading on the cluster can't do much good. The guys on Easter Island *do* have internet access, but it's very limited. It's apparently available to them only at some not-to-distant internet cafe. They're apparently using it only to upload logs - which they've done once already.

11647. Re: What is your problem

Yahoo group: DX-IS (2009)
Date: 2009-11-02 23:00:38 UTC
From: CSM(r) Gary Huber - AB9M
Topic: 11647 Message: 11647

Leif - LA9BM,

There have been many other European amateurs who have thanked me for spotting their PSK-31 stations. For those of us who have hearing impairments which has lessened our ability to enjoy the CW and SSB DX we once enjoyed, PSK-31 DX remains a possibility. The world wide DX Cluster provides a way of passing the information... though SM and ON may not be DX to you, they can be a new band mode entities for those who are chasing the ARRL DXCC Challenge.

I am well aware that I am sharing the DX Cluster with many who may not be interested in PSK-31 spots; each week I spot only a small portion of what I see at my station however I usually start on Monday and apparently you saw me spot twenty DX stations including OD5YY, J28KO, and VR2XLN (all PSK-31) over the course of an hour this morning.

There are several ways to filter spots of no interest. You may be interested in http://www.dxcluster.org/main/filtering_en-6.html#ss6.4 or http://www.dxcluster.org/main/filtering_en-6.html#ss6.5 which provide ways to reject spots you are not interested in.

Leif, I do not wish to diminish your enjoyment of DX, however I do want to see more DXers use PSK-31 from more DX entities.

Best regards,

CSM(r) Gary Huber - AB9M

Subject: What is your problem

AB9M Gary

Why are you spotting all the PSK31 on 20 meter? Do you think we all are interested only in PSK31? This cluster is to inform about DX. Do you think you are alone on this cluster? There are other people like to put info on the cluster regarding real DX. SM and ON are not dx of interest.

STOP your crazy rape on the cluster. You only make QRM

Leif

11649. WTB: Mini Quad antenna

Yahoo group: DX-IS (2009)
Date: 2009-11-03 02:37:16 UTC
From: John Geiger
Topic: 11649 Message: 11649

It is time to get something directional back up for DXing and contesting, so due to space limitations I am looking for a TGM or Mini Products MQ-1 Mini Quad, if anyone has one for sale after upgrading to a larger antenna.
I have owned one of these before and had pretty good luck with it and am familiar with the setup and performance of it.

I can pay with paypal or a MO. Let me know the price shipped to ZIP 73507 (Lawton, OK). I could also pick it up in the Oklahoma or Northern Texas area.

From: CSM(r) Gary Huber - AB9M
Topic: 11650 Message: 11650
Attachments: 1 described; binary payloads are missing from this source WARC

Thank you for the email response Leif. You are correct; we most likely will not agree about how to use the cluster. As a former SYSOP of a DX-cluster / DXSpider station I've seen many opinions on what should or should not be allowed.

If you are connecting over a RF link, you may want to consider the filter I suggested previously to reduce the overhead of your local network. If you are connecting over the internet, similar filters will reduce the unwanted spots and let your computer run just a bit faster. I have no interest in the WARC bands so I use a band filter but I could also use a mode filter if I did not want CW or SSB spots. There is much information and much junk on the DX-cluster system. And with the world-wide interconnection what may be valuable information at one location, is little use elsewhere so filtering is the key.

With 341/336 verified by the ARRL, I still have DX to work and continued interest in the DX-cluster system. May you continue to have success in your DX endeavors.

73 ES DX,

Gary - AB9M

Subject: SV: [DX-IS] Re: What is your problem

Good morning

I am sure there are HAMs who prefer that 30 - 40% of the cluster is occupied by your announcement Gary. But you totally misunderstand the purpose with a DX CLUSTER. The cluster give us an idea of the conditions AND info about rare DX on the band. If you spot a couple of EU station on 20 meter, we know there are conditions between USA and EU. Why fill up the whole cluster telling us that DL1AA, DL1BB, F1CCC aso are on the band? I rather like to know when TX3A is QRV and other rare DX.

Well, no use to spend time discussing this matter anymore. From experience, I know that we will not agree upon the use of a DX Cluster.

And if it helps my argumentation, I can also send this E-mail to many friends and get their acceptance to my opinion. But you will probably not be convinced or impressed if I send you the copy from my fellows, like you are doing Gary.

Please keep the cluster clean without a lot of garbage and uninterested info.

This is my last E-mail regarding the cluster.

Fra: WB6PSY/N6AXK [mailto:tagteam@...]
Sendt: 3. november 2009 02:53
Til: Leif Breie
Emne: Re: [DX-IS] Re: What is your problem

(this was sent on my own volition)

Leif - I've read both your message to Gary and his response, both below. You are a despicable lowlife for your vile attack on a ham radio operator who, perhaps, doesn't share your views. Is it possible that there are others in this world who work PSK-31 or do you think Gary is the only one? I used to listen to our DX repeater and hated when someone spotted RTTY but I had to accept that RTTY is a part of ham radio.

Let me give you an example of who I am. I am a DXer who only works 10 metres so, obviously, there's not much these days. During the height of the sunspot cycle I have worked over 200 countries and 39 zones on the CQWWSSB weekend, and guess what?, I did it without any cluster or spotting devises. Why? Because I'm a real DXer who can find his own DX. I have 342 countries confirmed and none came from a cluster, list or net. Clusters are a crutch much the same as lists and nets are, which you probably sign in to. If the cluster is the only way you can work DX, then more power to you. I don't condemn the cluster as it is a tool for the vast majority of ham radio operators and also shows what part of the world has propagation but I don't choose to use it as, again, I can find my own DX.

My best advise to you is to turn the f*ckin' cluster off as it seems to raise your blood pressure and gets you irritated.

With sincerest regards;-)

The world wide DX Cluster provides a way of passing the information... though SM and ON may not be DX to you, they can be a new band mode entities for those who are chasing the ARRL DXCC Challenge.

I am well aware that I am sharing the DX Cluster with many who may not be interested in PSK-31 spots; each week I spot only a small portion of what I see at my station however I usually start on Monday and apparently you saw me spot twenty DX stations including OD5YY,

J28KO, and VR2XLN (all PSK-31) over the course of an hour this morning.

There are several ways to filter spots of no interest. You may be interested in http://www.dxcluster.org/main/filtering_en-6.html#ss6.4 or http://www.dxcluster.org/main/filtering_en-6.html#ss6.5 which provide ways to reject spots you are not interested in.

Leif, I do not wish to diminish your enjoyment of DX, however I do want to see more DXers use PSK-31 from more DX entities.

Best regards,

CSM(r) Gary Huber - AB9M

Subject: What is your problem

AB9M Gary

Why are you spotting all the PSK31 on 20 meter? Do you think we all are interested only in PSK31? This cluster is to inform about DX. Do you think you are alone on this cluster? There are other people like to put info on the cluster regarding real DX. SM and ON are not dx of interest.

STOP your crazy rape on the cluster. You only make QRM

Leif

11651. FO/F6CTL

Yahoo group: DX-IS (2009)
Date: 2009-11-03 14:56:23 UTC
From: Alan Leith
Topic: 11651 Message: 11651

On June 24, 2006 I worked FO/F6CTL on 20M SSB. My DXbase log says it is Marquesas. It looks as if I didn't QSL and I need a phone QSL for this country. Two questions:

1. can anyone confirm that he was, indeed, on the Marquesas?

2. can anyone offer a good QSL route or an e-mail for F6CTL or his manager?

I await a response(s) with bated breath.

Bernie McLenny's DailyDX, http://www.dailydx.com/Issues/10-118.asc, says
it's Marquesas.

IK3QAR, http://www.ik3qar.it/manager/man_result.php?call=FO/F6CTL, says
to qsl via F6CTL and gives his address.

DailyDX says he was on OC-027. But, the listing had a ..."/M"... after
the call. I hope he wasn't on the boat !!
Also, Pathfinder has an address but it won't let me cut and paste it.

Thanks, Ted. Yes, I saw that in a Google search but wanted to make sure that is the latest information. Since my log notes that the QSO was "flaky" I was hoping to e-mail first to confirm that I am in the log before sending off a request for the QSL. However, if that's the only way to find out I suppose I'll have to invest $5.00 to find out the answer :-(.

Appreciate the info, Dick. No, I don't think he was on a boat with that /M
-- perhaps a motorbike or a small car :-).

One more question before my $5.00 investment: did anyone ever receive a QSL
for the operation?

Getting those is only part of the secret...

You need the correct cords too...

I've been getting excellent audio reports on my TS930 and also the
Elecraft K2
once I got these with the receptacles.

From: Paul Dunphy
Topic: 9721 Message: 11663

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 03 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 307 Issued at 2200Z on 03 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 02/2100Z
to 03/2100Z: Solar activity was very low. The SOHO/LASCO imagery
observed a slow coronal mass ejection (CME) off the southwest limb
at 0501 UTC on 31 October. The CME appears to be earth directed
with a plane-of sky speed of 380 km/s.
IB. Solar Activity Forecast: Solar activity is expected to be low.
IIA. Geophysical Activity Summary 02/2100Z to 03/2100Z:
Geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on day 1 (4 November). Unsettled conditions
are expected on day 2 (5 November) due to possible effects from the
CME observed on 31 October. Quiet levels are expected to return on
day 3 (6 November).
III. Event Probabilities 04 Nov-06 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 03 Nov 072
Predicted 04 Nov-06 Nov 070/070/070
90 Day Mean 03 Nov 070
V. Geomagnetic A Indices
Observed Afr/Ap 02 Nov 002/002
Estimated Afr/Ap 03 Nov 005/005
Predicted Afr/Ap 04 Nov-06 Nov 005/005-008/008-005/005
VI. Geomagnetic Activity Probabilities 04 Nov-06 Nov
A. Middle Latitudes
Active 05/15/05
Minor storm 01/01/01
Major-severe storm 01/01/01

From: Bob
Topic: 11656 Message: 11664

I am a little wary of the comments from some of the "Users!"

Audio & Video Enthusiast from Melbourne, Australia

I have to say, I was disappointed at first when the UPS man failed to deliver my Wattgate 381 socket without a signature. A few days later, I had that hot little baby in my hands. And ,oh what a difference from the older Wattgate 351 model! Wow.
A little more disappointment when I went to install the 381 and found that I did not have the proper metric Phillips screwdriver a short trip to Sears solved that. (IMHO- the website should tell you that you need a special tool or it should be included for a nominal fee.)

We do not, so far as I am aware, have Sears in Australia.

Bob

Topic: 11665 Message: 11665

What are the TX3A ops thinking? At 0800Z this morning they were on 40CW loud and working one about every 10 or 15 seconds. Then at 0900Z they decide to switch to 160M where they are barely audible on my 100ft tall Inverted-L and working contacts at the rate of about 1 every two minutes? Seems to me if you wanted to give as many people as possible a new one you would stick with a pileup that was very productive. Oh well, off my soap box now.

(A) Their intent on this trip (there are only two guys) is to focus on the low bands.
(B) At the time they went QSY to 160 (I was listening to them as well) their location was smack on the gray line - a perfect time to go to 160.

I agree with you for the most part. I was listening to them on 40 - excellent signal down here in central Florida - and he was working people from all over - Japan, South Korea, Australia, U.S.

When he suddenly stopped and then announced his QSY to 160 I was also disappointed, but it was unfortunately understandable.

He did have them spread somewhat wide - he was working 1 to 10 up!

I have to say, I was disappointed at first when the UPS man failed to deliver my Wattgate 381 socket without a signature. A few days later, I had that hot little baby in my hands. And ,oh what a difference from the older Wattgate 351 model! Wow.
A little more disappointment when I went to install the 381 and found that I did not have the proper metric Phillips screwdriver a short trip to Sears solved that. (IMHO- the website should tell you that you need a special tool or it should be included for a nominal fee.)

We do not, so far as I am aware, have Sears in Australia.

Oh darn it, I thought Wholesale Tools would have one because I just got a "5% off on your next order" card from them.
:-)

I might as well get metric pliers and a metric crescent wrench too once I find a source for the metric screwdrivers. Maybe 160 meter antennas perform better when assembled with metric pliers.

The best thing about this socket is when there is a power outage (such as happens in the winter or during one of Kansas' famous spring storms) it still works.

Rene
p.s I'm gonna order a whole house full - especially now I know they work during power outages which we have quite frequently in NorCal...

I worked about 150 countries with an FT101E. That was 1993-1994. Mostly on 40 meters because that's the only antenna I had up then. I would tune it for other bands with an antenna tuner but it performed best on 40m.

The only problem was it didn't have "split" and I didn't have the external VFO. I could split about 1.5 kHz using the RIT but for some DX I had to keep spinning the dial back and forth and hoped I'd end up on the same transmit frequency each time. I managed to work 3Y0PI with it on 40 CW with a 45 kHz split. I think I was one of the people referred to in the 3Y0PI book about this.

My first real rig was a Yaesu FT101B and I probably worked about 130 countries or so on it with a ground mounted vertical with no radials. That was sure a fun setup. Only got rid of it because I got a deal on a TS130SE in 1985 that was too good to pass up. Would love to get another FT101 someday just for old times sake. Maybe a FT101F due to the rarity of it.

I worked about 150 countries with an FT101E. That was 1993-1994. Mostly on 40 meters because that's the only antenna I had up then. I would tune it for other bands with an antenna tuner but it performed best on 40m.

The only problem was it didn't have "split" and I didn't have the external VFO. I could split about 1.5 kHz using the RIT but for some DX I had to keep spinning the dial back and forth and hoped I'd end up on the same transmit frequency each time. I managed to work 3Y0PI with it on 40 CW with a 45 kHz split. I think I was one of the people referred to in the 3Y0PI book about this.

From: Zack Widup
Topic: 11685 Message: 11690

I've worked several semi-rare DX stations in the past that I sat and watched the cluster for and no spots ever showed up.

I worked TL8NG on 40 CW once. Gene had been calling CQ with no takers. I ragchewed with him for a bit. I spotted him on the cluster. I sat and listened. He called CQ for another 10 or 15 minutes with no takers and went QRT. This was at about midnight local time in Illinois.

If it had mech filters, at least for CW, I would consider looking at it.
But you know that isn't going to happen. Guess I will be using my 1k MPV
until death do us part.

Rumors are about concerning a new YAESU rig, the FTDX5000MP.

That should give the Yaesu-Bashers some new fodder.

As for me, I can't wait to see some data on it.

From: Lee ZL2AL
Topic: 11660 Message: 11697

Q: What's the difference between Phillips, Pozidrive and Robertson (square) screws?

A: Philips drive screws are the screws that have cross-slots that look like an X, stamped into the head. Patented in the 1930's, these were a vast improvement over the antique "slotted" screw, which tended to cam-out easily and were difficult to drive with power drivers.

Robertson (square) drive screws were patented in Canada in 1908 and address problems that the Phillips driver doesn't quite solve. They allow the screw to be placed on the driver prior to the screw being placed in position. What this meant was that for the first time you could start a screw overhead or in a tight spot without an extra hand holding the screw onto the driver.

Pozidrive screws are the European answer to the Phillips shortcomings. The differences are subtle. At first glance it appears to be a Phillips, but on closer examination you'll notice a second set of cross-blades at the root of the large cross-blades. These added blades are for identification and match the additional makings on the head of Pozi-drive screws, known as "tick" marks. So the marks are for identification. Identification of what?

Two features of the Pozi-drive screw and driver combination make it unique, and superior to the Phillips. First, the tip or the Pozidrive driver is blunt, which also helps it to seat better into the recess in the screw, unlike the Phillips which comes to a sharper point. This becomes a problem as the tooling that forges the recess in the head of the screws begins to show signs of wear. The recess becomes more and more shallow, which means the driver will bottom-out too soon and will cause the driver to cam-out.

The second unique feature is the large blades on the driver have parallel faces, where the Phillips blades are tapered. The straight sides of the driver allow additional torque to be exerted without fear of cam-out. Knowing this, we can see why a Phillips driver will have problems driving a screw with a Pozi-recess, as a Pozi-driver would have little luck driving a Phillips head screw. One more tip. In a pinch it is possible to drive Pozi-drive screws with a Phillips driver, but you will need to grind down the tip slightly, and expect some slipping to occur.

I've worked several semi-rare DX stations in the past that I sat and watched the cluster for and no spots ever showed up.

I worked TL8NG on 40 CW once. Gene had been calling CQ with no takers. I ragchewed with him for a bit. I spotted him on the cluster. I sat and listened. He called CQ for another 10 or 15 minutes with no takers and went QRT. This was at about midnight local time in Illinois.

While we're on this subject, someone emailed me asking if I had a Whitworth crescent wrench but I don't have one.

Now, as propagation isn't great and my radio wasn't working very well, I put some frequency grease on the antenna to help the signal slide through but it didn't help.

Any suggestions?

From: Dale Cole K8TS
Topic: 11660 Message: 11706

Rene;

As propagation is only a relative thing, being that the antenna efficently, ground waves, phyicial location, and number of cards hanging on the wall, your antenna grease might work well in another set of given valiables. Where did you get the stuff?

While we're on this subject, someone emailed me asking if I had a Whitworth
crescent wrench but I don't have one.

Now, as propagation isn't great and my radio wasn't working very well, I put
some frequency grease on the antenna to help the signal slide through but it
didn't help.

Any suggestions?
Rene

From: WB6PSY/N6AXK
Topic: 11660 Message: 11707

Dale,
I suspect I got the grease at the three stooges, Many, Moe & Jack's store whilst still living in L.A. I remember bringing up blinker fluid, muffler bearing grease, antenna grease which is high frequency (10m) as opposed to low frequency grease (80m). When the grease is applied it must comply with MIL-TFD-1111. I also brought up an A/C battery for deicing the antenna.
Cheers from NorCal
Rene

11708. RE: [DX-IS] Re: TX3A

Yahoo group: DX-IS (2009)
Date: 2009-11-05 07:50:37 UTC
From: Lance Martin
Topic: 11665 Message: 11708

Hi Art,

I was disappointed when they suddenly went from 40m to 160m too (as I don't have an antenna on 160m currently). But they have to do what they have to do.

I did manage to get them on 30m for a new one this morning! And will wait patiently for their return to 40m. I see they are there now but 1) I am at work still and 2) it's too early for VK6, anyway...

They will be there for a while longer yet, you will get them.

Good luck guys,

73, Lance - VK6DU

Subject: [DX-IS] Re: TX3A

(A) Their intent on this trip (there are only two guys) is to focus on the low bands.
(B) At the time they went QSY to 160 (I was listening to them as well) their location was smack on the gray line - a perfect time to go to 160.

I agree with you for the most part. I was listening to them on 40 - excellent signal down here in central Florida - and he was working people from all over - Japan, South Korea, Australia, U.S.

When he suddenly stopped and then announced his QSY to 160 I was also disappointed, but it was unfortunately understandable.

He did have them spread somewhat wide - he was working 1 to 10 up!

> What are the TX3A ops thinking? At 0800Z this morning they were on 40CW loud and working one about every 10 or 15 seconds. Then at 0900Z they decide to switch to 160M where they are barely audible on my 100ft tall Inverted-L and working contacts at the rate of about 1 every two minutes? Seems to me if you wanted to give as many people as possible a new one you would stick with a pileup that was very productive. Oh well, off my soap box now.

Maybe,

if you go to the radio shop and get 12 /24 oz cans of vacuum, and inject them in the vfo ?
of course it would have to be HF certified.

11711. Re: Busted Call?

Yahoo group: DX-IS (2009)
Date: 2009-11-05 12:25:41 UTC
From: aburkefl
Topic: 11685 Message: 11711

A friend related this to me not too long ago.

He was on SSB one afternoon and a "new" guy came along (no one recognized who he was). He asked if it was a private net or could anyone join in. They welcomed him and he joined the round-table.

About half an hour the group started breaking up. The new guy wanted to know if it was all right to ask a question. No one objected and the new guy said "Why are all you guys off frequency?" There was a moment's pause and someone else asked "What do you mean - we're all off frequency?" The new guy responded "Everybody's on 14332.43 instead of 14332!"

Any of those will suffice. But be sure to avoid it if it says "marine." Those are much more expensive.

□

Dale,
I suspect I got the grease at the three stooges, Many, Moe & Jack's store whilst still living in L.A. I remember bringing up blinker fluid, muffler bearing grease, antenna grease which is high frequency (10m) as opposed to low frequency grease (80m). When the grease is applied it must comply with MIL-TFD-1111. I also brought up an A/C battery for deicing the antenna.
Cheers from NorCal
Rene

Rene;

As propagation is only a relative thing, being that the antenna efficently, ground waves, phyicial location, and number of cards hanging on the wall, your antenna grease might work well in another set of given valiables. Where did you get the stuff?

While we're on this subject, someone emailed me asking if I had a Whitworth crescent wrench but I don't have one.

Now, as propagation isn't great and my radio wasn't working very well, I put some frequency grease on the antenna to help the signal slide through but it didn't help.

Any suggestions?
Rene

I think the K3 comes the closest to simulating those mech filters you used to find in the Collins' rigs. I have a couple of "standard" filters for SSB and a pair for CW - one at 400 Hz and one at 250 Hz.

Don't remember the last time I experienced overloads from robust signals. My Pro III works quite well for chasing DX, but the K3 works better in a contest. In really weak-signal dxing it's fun too. I have squeezed the CW BW down to well under 100 Hz without ringing.

Yeah, I don't work 160 either. They did the same thing again this morning. Their signal wasn't quite as good on 40 this morning as it was on 40 yesterday morning.

According to their web site and what I've read via The Daily DX, they plan to be there for a minimum of three weeks. Maybe after a week or so, the clamor on the freq will die down a little and they'll be able to work a little tighter spread on their split. Thus far they've been running splits up to 10 kHz wide.

I heard them briefly late yesterday afternoon on 20 CW, but he didn't stay very long. If they're focusing on the low bands, they may be taking their rest during the middle of the day. As there's only two of them, it's difficult to expect miracles! Frankly, I can't imagine spending three weeks in a tent on an island the size of a picnic ground!

I need 'em for a new one as well.

I am probably one of those old guys that is set in his ways, Art. I do have a hearing problem, though. And with a noise canceling headset and a pair of Inrad 250 Hz filters I seem to do my best work. Wish I new someone around here that had a K3 that I could play with.

Hearing the XV4D team this morning on 80, but all EUs at the moment. Have great hopes of working the TX3A guys on 30 while they are there. Guess I should start listening for them, HI.

11719. Noise cancelling headphones

Yahoo group: DX-IS (2009)
Date: 2009-11-05 13:53:16 UTC
From: Paul M Dunphy
Topic: 11673 Message: 11719

At 09:04 AM 11/5/2009, Win W0LZ wrote, in part:

<snip>

>Win, W0LZ

These things can be a bit pricey (noise cancelling headphones), but in my opinion they are worth it. I don't have any hearing problems that I am aware of, but they sure do what they are supposed to, It's like magic when you flip the switch and 80% or more of the ambient noise in the room is gone. I got a pair about a year ago, and I couldn't live without them now. All the fan noise from amps, etc. is gone.

If you travel, they get rid of about 80% of the "jet noise" on planes. Once I had the "pleasure" of quadraphonic babies crying on a flight, and it cancelled almost all of that out too.

The downside is they require batteries that last about 2-3 days. Most run on a single AAA, so I got a pair of rechargeable and I cycle them as they run down. They sure are a great addition to the Ham shack. If you don't already have a set, and the XYL is looking for something to get you for Xmas, this is something to consider.

Years ago I had a Drake B-line - nice stuff. It was referred to in those days as "the poor man's Collins." My first decent SWL receiver was a Drake SW-4A, followed by an SPR-4. Neither of those were suitable for CW, so I gravitated to something else. Despite all today's radios being digital readout, the old-style dial accuracy of both Drake and Collins was pretty darned good.

From: Richard J. Fiero II W5TFW
Topic: 11673 Message: 11721

I own a complete C line.

they usually reside on 17 meters, I hate to keep retuning them.
I also have a couple of boxes of spare parts. :-)

I mainly chase DX on a FT-920 and its been a REALLY good radio,..
NOT perfect,..... but a good radio. I got hurt really bad in april of 2007 on a tower that fell down,..... so I have LOTS of time to play on the radio, now.

11722. ZY0T QSLs

Yahoo group: DX-IS (2009)
Date: 2009-11-05 15:36:06 UTC
From: aburkefl
Topic: 11722 Message: 11722

On the web site, the QSL route for the recent ZY0T trip (Trindade and Martim Vaz Is.), a PY is listed as the "only" route for QSL.

However, this morning, I saw a note on the cluster where someone claimed they received LotW confirmation. I double-checked mine, but no soap.

Does anyone know if that group is following somewhat of a trend and "rewarding" sponsors/donors?

Art - N4PJ

11726. Re: [DX-IS] Re: Busted Call?

Yahoo group: DX-IS (2009)
Date: 2009-11-05 16:45:32 UTC
From: John Geiger
Topic: 11685 Message: 11726

I remember reading on eham.net a couple of years ago that somehow many new hams believe that you just be on xxx.00 frequency, meaning rounded off to the KHZ frequency. Don't know where this stupid idea came from (but I can guess) but it does explain something- Occassionally I would get people calling me slightly off frequency when I was running a frequency on 6m. Now I know why-they had to round to the closest KHZ.

11727. Strange Sunspot Observed

Yahoo group: DX-IS (2009)
Date: 2009-11-05 18:37:19 UTC
From: AD5VJ Bob
Topic: 11727 Message: 11727

Looks like we may have a new sunspot being born for this cycle.

One thing wrong, however, this one looks like it might suck radio waves from earth instead of propagate them.

Time to get out your wave keepers from storage or you may loose it all.

http://www.solarcycle24.com/
"A new sunspot may be trying to form in the northern hemisphere of the sun. The magnetogram shows it has reverse magnetic polarity
compared to what a Cycle 24 normally would have."

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set - don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted for a few minutes on startup.

11731. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-05 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11731

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 05 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 309 Issued at 2200Z on 05 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 04/2100Z
to 05/2100Z: Solar activity was very low. Region 1030 (N25E04) was
numbered today as a Cro beta sunspot group with 5 spots. No flares
were observed during the past 24-hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low, with a slight chance for a C-class flare.
IIA. Geophysical Activity Summary 04/2100Z to 05/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on days one and two (06-07 November). Quiet to
unsettled conditions are expected on day three (08 November) as a
weak recurrent coronal hole high-speed stream moves into a
geoeffective position.
III. Event Probabilities 06 Nov-08 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 05 Nov 071
Predicted 06 Nov-08 Nov 070/070/070
90 Day Mean 05 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 04 Nov 001/000
Estimated Afr/Ap 05 Nov 002/002
Predicted Afr/Ap 06 Nov-08 Nov 005/006-005/005-006/006
VI. Geomagnetic Activity Probabilities 06 Nov-08 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

DX Bulletin 44 ARLD044
>From ARRL Headquarters
Newington CT November 5, 2009
To all radio amateurs

SB DX ARL ARLD044
ARLD044 DX news

This week's bulletin was made possible with information provided by NC1L, PS7YL, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SENEGAL, 6W. Stan, EI6DX will be QRV as 6W/home call from Somone from November 7 to 16. Activity will be on the low HF bands using CW. This includes being an entry in the upcoming Japan DX contest. QSL via RX3RC.

EAST MALAYSIA, 9M6. Steve, 9M6DXX and John, 9M6XRO are QRV as home calls/p from Pulau Labuan, IOTA OC-133, until November 9. Activity is on 80 to 10 meters using SSB, and 160 to 10 meters using CW and RTTY, respectively. QSL via bureau.

EASTER ISLAND, CE0. A group of operators are QRV as XR0Y from Rapa Nui until November 15. Activity is on 160 to 10 meters using CW, SSB and RTTY. QSL via operators' instructions.

LIBERIA, EL. Chris, ZS6RI plans to be QRV as EL8RI for about one to two months. Activity will be mainly on 40, 30 and 20 meters running QRP power. QSL to home call.

FRANCE, F. Members of the Havre Radio Club are QRV using special event call TM1TJV until November 8 to celebrate the departure of some 30 trans-Atlantic sailing ships during the ''Transat Jacques Vabre 2009'' race between Le Havre, France and Costa-Rica's Caribbean coast. QSL via bureau.

CHESTERFIELD ISLAND, FK. Tomi, HA7RY and George, AA7JV are QRV as TX3A until December 6. Activity is on all HF bands with an emphasis on the low bands. QSL via HA7RY.

ISLE OF MAN, GD. Operators Ron, PA3EWP and Tom, GM4FDM will be QRV as MD/PA3EWP and GD4FDM, respectively, from November 7 to 9. Activity will be on all HF bands. QSL MD/PA3EWP via PA7FM and GD4FDM via GM4FDM.

LIECHTENSTEIN, HB0. Operators Kazik, DL2SBY, Tomi, HA4DX and Laci, HA0HW are QRV as HB0/home calls from Masessa until November 13. Activity is on the HF bands using mostly CW with some SSB. QSL to home calls.

GALAPAGOS ISLANDS, HC8. Mike, DF8AN is QRV as HC8/home call until November 7. Activity is on the HF bands using mostly CW. QSL direct to home call.

THAILAND, HS. Thailand's National Telecommunications Commission has approved a request by the Radio Amateur Society of Thailand to expand 40 meters. Effective November 6, E2 and HS stations will have primary use of 7.0 to 7.2 MHz.

ST. PIERRE AND MIQUELON, FP. Eric, KV1J and Tom, W8TOM will be QRV as FP/home calls from Miquelon, IOTA NA-032, from November 7 to 15. Activity will be on 160 to 6 meters using CW, SSB, RTTY and PSK. QSL to home calls.

US VIRGIN ISLANDS, KP2. David, N3XF, Ed, K1ZE and Rob, W1EQ are QRV as KP2/home calls until November 11. Activity is on 160 to 10 meters using CW, SSB and RTTY. This includes being active as KP2M in the ARRL CW Sweepstakes. QSL KP2M direct and all others to home calls.

DENMARK, OZ. A group of operators are QRV as 5P3WW from Moen Island, IOTA EU-171, until November 9. QSL via DL1YAW.

BONAIRE, CURACAO, PJ2. After his Galapagos operation, Mike, DF8AN will be QRV as PJ4/home call from Bonaire, IOTA SA-006, from November 7 to 16. Activity will be on all bands using mostly CW. QSL direct to home call.

BRAZIL, PY. Special event callsign PW2SIDC is QRV until November 22 from several Brazilian states, including Fernando de Noronha, to mark an international conference for civil defense to be held in Sao Paulo. QSL via PS7YL.

WEST KIRIBATI, T30. David, N1EMC and Mike, N1IW will be QRV as T30KI and T30IW, respectively, from Abatao Islet, IOTA OC-017, on the Tarawa atoll from November 10 to 16. Activity will be on 60 to 6 meters using CW and SSB. QSL both calls via N1EMC.

UKRAINE, UR. Operators Alex, UR7IRK, Vladimir, US5ID, Valery, UU1JN, Anatol, UU5JA, Elena, UV5ESZ and Roman, UY7IQ are QRV as home calls/p from Crimea on Karaby Mountain until November 9. Activity is on 160 to 10 meters. This includes being active as UU5JZA in the Ukrainian DX contest. QSL UU5JZA via UY7IQ and all others to home calls.

SERBIA, YT. Operators HA7JJS, HA6NL, HA7PL and HA6PS are QRV as YU9JJS, YU9NL, YU9PL and YU9PS, respectively, until November 8. They will also be active as YT36QRP for the annual HA QRP 80-Meter contest. QSL YT36QRP via YU7CM and all others to home calls.

VENEZUELA, YV. Members of the Caracas DX Group are QRV as YW5F from Farallon Centinela Island, IOTA SA-058, until November 9 as part of their 20th anniversary. Activity is on 80 to 2 meters using CW, SSB, FM and various digital modes. QSL via W4SO.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Chagos Island, VQ9JC, current operation. This operation was previously rejected as a shipboard operation. DXCC exchanged correspondence with the operator and determined that this operation was actually land-based thereby satisfying the conditions of DXCC Rule 8; Timor-Leste, 4W6AL, 2009 operation; Afghanistan, T6AG, current operation.

THIS WEEKEND ON THE RADIO. The ARRL CW Sweepstakes Contest, ARRL EME Contest, NCCC Sprint, IPARC Contest, Ukrainian DX Contest, NA Collegiate ARC CW Championship, HA QRP 80-Meter CW Contest, SKCC Weekend CW Sprint and the DARC 10-Meter Digital Contest will certainly keep contesters busy this weekend. Please see November QST, page 86, and the ARRL and WA7BNM contest web sites for details.

He's not going to find the answer to that question in any book. I
just hope you made him feel welcome and treated it as an honest
question from a new ham.

Hi
If they continue to devote an hour or so to 30m daily, I think that is
the best propagation.
They were on 10112.5 from approx 2005z to 2110z.
Here in GA, they peaked very strong (real 579) from 2015 to about 2035.
I only called for about 5 mins on 10116 before I got lucky at 2026z.
They are as good as any dx operator I've ever heard.
Good luck everyone!

My early Multi Elmac, AH-4 I believe, would drift from 28.800 to 28.950 in a 2 minute QSO. It was 'normal'.

If one wanted stability, one used an XTAL. :-) 28.000.000 CPS [before a rental car company got into the act]

☐

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set - don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted for a few minutes on startup.

I remember reading on eham.net a couple of years ago that somehow many new hams believe that you just be on xxx.00 frequency, meaning rounded off to the KHZ frequency. Don't know where this stupid idea came from (but I can guess) but it does explain something- Occassionally I would get people calling me slightly off frequency when I was running a frequency on 6m. Now I know why-they had to round to the closest KHZ.

Well, the story was related to me by someone else - I wasn't there.
However...

I try politely to do just what you advise. However (yet again!)...

Over the last few days P29NI was working 40M SSB. He was apparently transmitting way down in the band and listening around 7180 - 7181 for NA contacts. W1IT got in a real snit and a real broohaha took place - at least two days in a row. I listened parts of both days. In this particular case, I sympathize with both sides of the issue. It's one of those situations where we need to learn better "how to just get along." I went to QRZ.COM to see if I could obtain the e-mail address of W1IT and wrote him a note. It bounced. Another sign of the times.

QRZ.COM doesn't require you to have an e-mail at all. If you really don't want e-mail, the answer is simple - DON'T PROVIDE ONE AT ALL!

Personally, I've made my e-mail pretty much available to anyone. I would rather delete the junk and throw away dozens of e-mails each day, rather than suffer the possibility I might really miss something important or interesting.

In the meantime, I guess W1IT temporarily gave up. Besides, P29NI won't be there forever.

I think these are the same two guys who were on Mellish Reef back in April. They both appear to be very good CW ops. I can't remember if they ever did any SSB or not.

I *think* I got 'em on 20 CW yesterday - signal was up and down and the pile was really spread out again. Their latest log update came a couple hours short of the time for my possible QSO.

SB PROP @ ARL $ARLP045
ARLP045 Propagation de K7RA

ZCZC AP45
QST de W1AW
Propagation Forecast Bulletin 45 ARLP045
>From Tad Cook, K7RA
Seattle, WA November 6, 2009
To all radio amateurs

SB PROP ARL ARLP045
ARLP045 Propagation de K7RA

Thanks so much to Steve Nichols, G0KYA for writing the Propagation Forecast Bulletin last week. See his blog at, http://g0kya.blogspot.com/.

In addition to the sunspot group 1029, which graced us from October 23-30, a new one (1030) just emerged on Thursday. It is currently in a maximally geo-effective position (in other words, in the center longitudinal meridian as viewed from earth), and may provide some enhancement for the ARRL CW Sweepstakes Contest this weekend. On Thursday the daily sunspot number was 15. Of course, this is a new Cycle 24 spot.

Geomagnetic indices continue to stay very quiet. Checking numbers at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt you can see that the planetary K index and the college K index were a solid 0 for all of November 3-4 and most of November 5. One strange (to me) set of numbers is on November 5, when the K index in all three zones was exactly the same. It was 0 all day, then for one three hour period it was 1, then back to 0 for all three, planetary, college and mid-latitude. The A index is calculated using the K index data, and the A index for that day was 0 at mid-latitude and high latitude, but was 1 for planetary numbers. Why was that?

Expect geomagnetic conditions to remain quiet and stable. NOAA and the US Air Force predict planetary A index at 5 for today, November 6, and 7 for November 7, then back to 5 for November 8-19.

Geophysical Institute Prague predicts quiet to unsettled conditions November 6-7, and quiet conditions November 8-12.

October had some good numbers, with an average daily sunspot number of 7.0. That is the highest level since March 2008. Our three-month moving average showed 4.64 for August through October, centered on September. This was up from 4 centered on both July and

August. Three month averages centered on January through September 2009 were 2.19, 2.02, 1.49, 2.01, 4.22, 5.2, 4, 4 and 4.64.

Tom Morton, CX7TT in La Paloma, Rocha, Uruguay sent a message on October 30 concerning the CQ World Wide SSB DX Contest, and his operation on 10 meters. He wrote, "Around 1:00 PM local Saturday, 10 meters opened with a bang and propagation was awesome to EU then later the US. I expected 10 to shut down on Sunday so spent a lot of time Saturday milking the band. Even though I did foray down to 15 meters on both days, I wound up with 1000 QSOs, 93 countries and 22 zones. What a blast!"

Jim Brown, W5ZIT of Farmersville, Texas had a question about propagation that surprised him on 17 meters. Jim wrote, "I thought I would drop you a note concerning an unusual QSO I had on 10/30/09. At 2350 UTC I worked AE5PW in Newport Arkansas on 17 meters using the Olivia mode. Signals were 20 over 9 for a few minutes and then faded down to S5 before we signed. I am located near Farmersville, TX, about 30 miles NE Dallas. This distance was something like 250 miles or less, and I thought this very unusual at the time. I was wondering what type propagation would support this short skip on 17 meters. It would seem to be too short even for sporadic-E. I was using a 550 ft loop up 30 ft at the time."

I took the addresses for W5ZIT and AE5PW from FCC records, and calculated the distance at 297 miles. But note that for an antenna, Jim is using a 550 foot wire strung in a loop, 30 feet above the ground. Perhaps there is some high angle radiation going on, and the change in signal strength was due to some drifting patch of ionosphere above the two stations. This was on the last day of an 8 day run of sunspots.

Jim said he is using Olivia, which is a robust digital mode for HF. See http://www.oliviamode.com and http://hflink.com/olivia for more info.

I thought perhaps the 550 foot figure was a typo, but I checked out Jim's QTH at http://tinyurl.com/yk8d95s (clicked on "Bird's eye," then zoomed in) and saw there is plenty of room to stretch out.

Clay Melrose, WA6LBU of Wellston, Oklahoma and Chuck Kershner, W1EMQ of Clinton, New York were both pleased by long distance contacts on 40 meters on November 1.

W1EMQ worked UU1CC in Crimea on CW at 0050z with good signals using an old 4BTV vertical in wet soil and a Drake TR4. WA6LBU worked ZS3D running 25 watts SSB with a MP-25 manpack military radio into a G5RV at 0600z. ZS3D was using a 40 meter hex beam.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for October 29 through November 4 were 19, 13, 0, 0, 0, 0, and 0 with a mean of 4.6. 10.7 cm flux was 76.7, 75.2, 75.1, 72.3, 71.4, 71.5, and 71.4 with a mean of 73.4. Estimated planetary A indices were 7, 11, 1, 2, 2, 0 and 0 with a mean of 3.3. Estimated mid-latitude A indices were 5, 8, 1, 2, 2, 1 and 1 with a mean of 2.9.

1430z must be a bad time to try their web site - constant timeouts.

One thing wrong, however, this one looks like it might suck radio waves from earth instead of propagate them.

Time to get out your wave keepers from storage or you may loose it all.

I'm in the log! - That's almost as satisfying as working them!
They updated their logs at 2105 UTC 05 November 2009
That's a half hour after I worked them - they must have done it right
after they quit 30M.

Yes, my 160M QSO has shown up now too. Paul worked them on 160 the first morning and was in the first upload. All-time new one for him but I've confirmed two previous operations, both on 10M. We're both happy campers.

DD - you'll have to clarify XTAL. My FT101E has four xtals for 10m and one each for the other bands plus a xtal for 10 mhz WWV. It drifts on warmup. I used to have a xtal for 28.507 which was a popular fixed freq. for VK novices in the days they could only use fixed xtals. I'm sure that xtal would drift a bit too but don't remember.

☐

My early Multi Elmac, AH-4 I believe, would drift from 28.800 to 28.950 in a 2 minute QSO. It was 'normal'.

If one wanted stability, one used an XTAL. :-) 28.000.000 CPS [before a rental car company got into the act]

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set - don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted for a few minutes on startup.

I remember reading on eham.net a couple of years ago that somehow many new hams believe that you just be on xxx.00 frequency, meaning rounded off to the KHZ frequency. Don't know where this stupid idea came from (but I can guess) but it does explain something- Occassionally I would get people calling me slightly off frequency when I was running a frequency on 6m. Now I know why-they had to round to the closest KHZ.

I guess Paul was right. Cycle 24 only lasted a few days.
:-)

OK,

I have a Halli SX 111 & HT 37 and when I put it on the air you should just sit back & Hear the comments I get..... I always get a laugh out of that. One ham broke into tell me I was drifting OFF freq and the guy I was talking to shot back at him ! God, I hope so !
its funny to listen to people who have never even heard of thoe radios making comments.

Joey

DD - you'll have to clarify XTAL. My FT101E has four xtals for 10m and one each for the other bands plus a xtal for 10 mhz WWV. It drifts on warmup. I used to have a xtal for 28.507 which was a popular fixed freq. for VK novices in the days they could only use fixed xtals. I'm sure that xtal would drift a bit too but don't remember.

☐
My early Multi Elmac, AH-4 I believe, would drift from 28.800 to 28.950 in a 2 minute QSO. It was 'normal'.

If one wanted stability, one used an XTAL. :-) 28.000.000 CPS [before a rental car company got into the act]

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set -

don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted for a few minutes on startup.

I remember reading on eham.net a couple of years ago that somehow many new hams believe that you just be on xxx.00 frequency, meaning rounded off to the KHZ frequency. Don't know where this stupid idea came from (but I can guess) but it does explain something- Occassionally I would get people calling me slightly off frequency when I was running a frequency on 6m. Now I know why-they had to round to the closest KHZ.

*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9L - The VooDoo Contest Group (this year's operators are Ned/AA7A, Nick/G3RWF, Fred/G4BWP, Bud/N7CW and Gary/ZL2IFB) will participate in the CQ WW DX CW Contest as 9L5A (Multi-Two or Multi-Multi) from Sierra Leone, on all six contest bands. There may be some activity on 30, 17 and 12 metres before and/or after the contest. The main callsign is 9L5A (QSL via G3SXW), G3RWF may activate his 9L1NH call (QSl via home call) and AA7A his 9L7NS call (QSL via home call). There will be no daily logs, but LoTW upload will be soon after returning home. [TNX G3SXW]
D2 - Paulo, CT1ITZ is active as D2PJB from Porto Ambo, Angola until 29 November. He operates SSB only on 80-10 metres and "be aware he likes to ragchew". QSL via CT1IUA. [TNX The Daily DX]
E51 - Henrik, OZ6TL is active as E51TLA from Raratonga (OC-013), South Cook Islands until around 25 November. He operates holiday style using mainly RTTY. QSL via home call. [TNX The Daily DX]
ER - Moldova became an indipendent principality in 1359. Celebrating the 650th anniversary of that event, ER650M (QSL via ER1DA) and ER650MD (QSL via ER4DX) are currently active until 30 November. [TNX ER1DA]
FK/C - George and Tomi dropped anchor in the lagoon of Chesterfield in the local morning of 2 November and became QRV at 11.17 UTC on the 3rd. As a reminder, while TX3A will not disregard the higher bands, this expedition is heavily focussed on the low bands. On 160 metres look for them on 1830.5 kHz, listening below 1825 for Japan and above 1825 kHz for the rest of the world. QSL via HA7RY. Updates and log search (currently 2922 QSOs until 21.05 UTC on 5 November) can be found at http://tx3a.com/
I - Look for IC8ATA, IC8/IK7JWX, IC8/IW8EHK, IC8/I8LWL and IC8/IK8GQY to be active from Procida Island (EU-031, IIA NA-002) on 6-8 November. They will operate SSB, RTTY and PSK31 on the HF bands and possibly 6 metres. Side trips to the islands of Ischia and Vivara are being considered. [TNX IK7JWX]
I - Fabio, IK0IXI and other INORC members will operate as II0TRM on

16-22 November to commemorate the 70th anniversary of Theodore R. McElroy's (W1JYN) code receiving record (75.2 wpm: corrected to today's standard, that would be 72.2 wpm). QSL via IK0IXI, direct or bureau. [TNX I0LYO]
KC4 - Bill, K7MT will be returning to McMurdo Station (KC4USV)on Ross Island (AN-011), Antarctica between 15 November and 20 February 2010. He expects to be QRV for Europe at 18 UTC on Saturdays; he also plans to be on 14243 kHz on Sundays at 00.00 GMT, and to operate PSK-31 (14070 kHz) and CW (14043 kHz) as well, if time permits. QSL via K1IED. [TNX dx-hamspirit.com]
OX - Paco/EA4BT, Ramon/EA4NA, Emilio/EA7AAW and Salvador/EA7SB will be active as OX/homecall from Narsarsuaq, Greenland (NA-018) on 12-19 November. They will operate CW, SSB and digital modes on 160-10 metres. QSL via EA4BT, direct or bureau (e-mail requests for bureau cards can be sent to dx4dx@...) and LoTW. The web pages for the expedition are at http://www.dx4dx.com/ox/index.html [TNX EA5BWR]
T30 - Dave, N1EMC (T30KI) and Mike, N1IW (T30IW) will be active from Tarawa, West Kiribati (OC-017) on 10-16 November. They will operate SSB and CW on 6, 10, 12, 15, 17, 20, 30, 40 and 60 metres (no activity on 80 or 160m). QSL via N1EMC (direct) and LoTW. Their web page is at http://dx.t30dx.net/ [TNX The Daily DX]
TA - The TC Special Wireless Activity Team (www.tcswat.org) will be active as TC1YLH from Yesilkoy Lighthouse between 6 and 23 November, mainly during the weekends. QSL via TA1HZ. [TNX TA1HZ]
UA - Oleg, UA0ZAL has been a resident on Bering Island (AS-039) since September 2007. In recent times he was active mainly on 40 metres CW. QSL via RV1CC, direct or bureau.
UA - Vasily, RA9LI will soon relocate to Troynoy Island (AS-086), where he expects to operate in his spare time as RA9LI/0 for one year. QSL via UA9LP. [TNX I4EAT]
VE - After his recent and memorable trip to the Ottawa Islands, Cezar (VE3LYC) will attempt to activate East Pen Island (NA-231, new one) for three days between 26 and 31 March 2010. Intended callsign will be VY0V, which will be applied for in due course. Cezar reminds everyone that an earlier try he undertook with G3OCA in July 2007 was unsuccessful. The outcome of this new attempt will be determined by local conditions, weather and safety factors. At this time, Cezar is looking for group and individual donors who understand and appreciate the nature of this difficult project and are willing to join in the effort. Support for this project is welcome via PayPal at tiberius.trifu@... [TNX VE3LYC]
VP8_ant - VP8DMH is the callsign issued to Mike, M0PRL, who is currently stationed at Rothera Base on Adelaide Island (AN-001), Antarctica. [TNX http://dx-hamspirit.com/]
VP8_fal - CX2AM, CX3AN, CX3BH, CX3CE, CX4AAJ and CX4CR will be active as VP8BUH (SSB) and VP8BUG (CW and digital modes) from Port Stanley, Falkland Islands (SA-002) on 14-21 November. They will have three stations and plans are to focus on the low bands as well as on 30,

17 and 12 metres. QSL via EB7DX. Further information and logsearch
at http://www.qsl.net/vp8bug [TNX CX3AN]

PACIFIC TOUR ---> Gerhard/DJ5IW, Norbert/DJ7JC, Andrea/IK1PMR, Franz/OE2SNL,
Wil/PA0BWL and Claudia/PA3LEO will operate CW, SSB and RTTY from Samoa,
Tonga, New Zealand, the South Cook Islands and Singapore in November-
December. Their schedule is as follows:
11-18 Nov Upolu (OC-097) DJ5IW, DJ7JC, IK1PMR, PA0BWL and
PA3LEO under individual 5W callsigns
19 Nov-1 Dec Tongatapu (OC-049) A31IW, A31JC, A31LEO, A31MR, A31SN
and A31WL, plus A31A for the CQ WW
DX CW Contest
2-5 Dec Waiheke Island (OC-201) ZL/DJ5IW, ZL/DJ7JC, ZL/IK1PMR, ZL/
OE2SNL, ZL/PA0BWL and ZL/PA3LEO
5-12 Dec Rarotonga (OC-013) E51BWL, E51LEO, E51NAA, E51PMR,
E51SNL and E51XIW
15-17 Dec Singapore (9V) 9V1/DJ7JC, 9V1/IK1PMR, 9V1/PA0BWL
and 9V1/PA3LEO
On Upolu, Tongatapu and Rarotonga they will have four stations, and plans
are to focus on Europe, the low bands, 12, 17 and 30 metres and RTTY. QSL
for all callsigns via PA3LEO. QSLling instructions, logsearch and further
information can be found at http://www.pacificdxpedition.com

SOUTH AMERICA TOUR ---> Alain, F6BFH and his wife Danielle will be visiting
Chile and Argentina between 6 November and 15 December. It will be a
"backpacker style" travel and Alain plans to operate CW (14040, 18098 and
21040 kHz) and some SSB (14260, 18146 and 21206 kHz). His current plans
include IOTA activities from an island in the SA-085 group (along with
CE6TBN, sometime around 9-10 November), Chiloe Island (SA-018, 22-26
November) and Ushuaia, Tierra del Fuego (SA-008, soemtime between 6 and 11
December). QSL via F6BFH, direct or bureau. Updates will be posted on
http://alan-f6bfh.blogspot.com/ [TNX F5NQL]

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9G5TT & 9G5XX ---> The pilot for the 13-27 November DXpedition to Ghana
[425DXN 951] is Arturo, IK7JWY. He can be contacted through the dedicated
forum at http://www.hamradioweb.org/forums/forumdisplay.php?f=45

DXCC NEWS ---> VQ9JC (Chagos Island, current operation) has been approved
for DXCC credit. This operation was previously rejected as a shipboard
operation. DXCC exchanged correspondence with the operator and determined
that this operation was actually land-based thereby satisfying the
conditions of DXCC Rule 8. If you had this operation rejected send an
e-mail to dxcc@... to receive credit. [TNX NC1L]

NCDXF ---> At a board meeting this week, the Northern California DX Foundation (NCDXF) elected officers for 2010. Bruce Butler (W6OSP) will remain as President, Glenn Johnson (W0GJ) will remain as Vice President and Tom McShane (NW6P) will remain as Secretary/Treasurer. The NCDXF Board of Directors reluctantly accepted the retirement of Len Geraldi (K6ANP) and Al Burnham (K6RIM) from the Board of Directors after many years of excellent leadership. At the present time, the NCDXF Board is planning on operating with 9 directors.
The NCDXF's website (http:/www.ncdxf.org) has been upgraded and newsletters are now available in electronic format and can be downloaded from the website. The latest newsletter features "the rest of the story" and an excellent summary of the 7O1YGF Yemen operation, which was only recently approved for DXCC.
Please note that the NCDXF mailing address has been recently changed: NCDXF, P.O. Box 2012, Cupertino, CA 95015-2012, USA. [TNX W0GJ]

OQRS FILES LOST ---> On 31 October Bill, VK4FW lost both his laptop and the external backup stick drive, "all suspected from AC surge", he says. So "all Online QSL Request System files for 4W6FR are at this time lost, as well as any OQRS VK9LA files for the last 4 days. If any of you have sent for QSç request for the above, please kindly resend me full details to vk4fw@...".

QSL VIA W8ZA ---> Bob is taking over the QSL chores from the late K3IXD for C6APR, C6AXD and K3IXD cards. His address is Bob Biss, 680 Wren Lane, Harpers Ferry, WV 25425-4938, USA [TNX The Daily DX]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Twelve different galleries include cards for the ten Most Wanted DXCC Entities (315 QSLs), the 58 deleted DXCC entities (978 QSLs), obsolete prefixes (2681 QSLs), stations from Magrebh from 1947 to 1962 (324 QSLs), Antarctic bases (795 QSLs) & TAAF (Terres Australes and Antarctiques Francaises, 255 QSLs), the various French DXCC island Entities in the Pacific Ocean (285 QSLs) & the Indian Ocean (94 QSLs), pre-1945 countries (719 QSLs), French Departments (569 QSLs) and USA (50 QSLs), plus a gallery for cards not accepted by DXCC (112 QSLs). Several cards are still needed and your participation is encouraged - please visit http://LesNouvellesdx.fr and send your comments to lesnouvellesdx@... [TNX F6AJA]

THAILAND ---> Thailand's National Telecommunications Commission has approved a request by the Radio Amateur Society of Thailand to expand 40 metres. Effective 6 November, E2 and HS stations will have primary use of 7.0 to 7.2 MHz. [TNX ARRL DX News]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

+ SILENT KEYS + Recently reported Silent Keys include Artur Gil Machado (CT2HNI), Len R. Borley (G4LIK), Anatoly M. Bakharev (RV6BO), Valerij

Buhtiarov (UA0AGAI, "Subbu" K.P. Subramanya (VU2FF) and Robert Allen Craft, Jr. (W6FAH).

☐

OK,

I have a Halli SX 111 & HT 37 and when I put it on the air you should just sit back & Hear the comments I get..... I always get a laugh out of that. One ham broke into tell me I was drifting OFF freq and the guy I was talking to shot back at him ! God, I hope so !
its funny to listen to people who have never even heard of thoe radios making comments.

Joey

11753. Re: [DX-IS] Re: Busted Call?

Yahoo group: DX-IS (2009)
Date: 2009-11-06 20:47:31 UTC
From: Deacon Dave
Topic: 11685 Message: 11753

Some crystals set an operating frequency band: as in the Collins S line, the drake C-line, etc. Other crystals stuck you on one frequency, like 28,800 CPS

Rental car => HERTZ

BTW: my memory improved while I was in prison. The mobile rig was a Multi-Elmac A-54H, an 807 modulated by 2 6L6s. Prison and Jail do wonders for a 'faulty memory'.

☐

DD - you'll have to clarify XTAL. My FT101E has four xtals for 10m and one each for the other bands plus a xtal for 10 mhz WWV. It drifts on warmup. I used to have a xtal for 28.507 which was a popular fixed freq. for VK novices in the days they could only use fixed xtals. I'm sure that xtal would drift a bit too but don't remember.
73 de Rene
p.s. rental car?

☐
My early Multi Elmac, AH-4 I believe, would drift from 28.800 to 28.950 in a 2 minute QSO. It was 'normal'.

If one wanted stability, one used an XTAL. :-) 28.000.000 CPS [before a rental car company got into the act]

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set - don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted

for a few minutes on startup.
28.500 - 28.500.8 Rene

I remember reading on eham.net a couple of years ago that somehow many new hams believe that you just be on xxx.00 frequency, meaning rounded off to the KHZ frequency. Don't know where this stupid idea came from (but I can guess) but it does explain something- Occassionally I would get people calling me slightly off frequency when I was running a frequency on 6m. Now I know why-they had to round to the closest KHZ.

Topic: 11747 Message: 11754

I have an old station also. Two winters ago I reconditioned a Hammarlund HQ-145X to full spec compliant performance and rejuvenated an old Heathkit DX-40 and VF-1. The DX 40 puts out a full power [40 watts] on 80/40/20/15 and 10 meters.

The most difficult part was finding a non-modified D-104 for the DX-40. Second most difficult was finding a DPDT 115 VAC Dow Key Coax relay at reasonable $$$.

Used the station on 40/20 CW for over a year. Yep, the VF-1 drifted just like the olden days :-)

DD, W1MCE and OOOTC 55+ years on the air.

DD - you'll have to clarify XTAL. My FT101E has four xtals for 10m and one each for the other bands plus a xtal for 10 mhz WWV. It drifts on warmup. I used to have a xtal for 28.507 which was a popular fixed freq. for VK novices in the days they could only use fixed xtals. I'm sure that xtal would drift a bit too but don't remember.

My early Multi Elmac, AH-4 I believe, would drift from 28.800 to 28.950 in a 2 minute QSO. It was 'normal'.

If one wanted stability, one used an XTAL. :-) 28.000.000 CPS [before a rental car company got into the act]

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set - don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted for a few minutes on startup.

From: Zack Widup
Topic: 11747 Message: 11755

I still have my Novice station - a Heathkit Mohawk RX-1 receiver and a Hallicrafters HT-40 transmitter. I built a VFO out of a military surplus ARC-5 transmitter for the HT-40.

It's at my mom's house and I don't know what condition it's in these days. Maybe next time I'm there I'll check it out.

11756. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-06 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11756

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 06 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 310 Issued at 2200Z on 06 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 05/2100Z
to 06/2100Z: Solar activity was very low. Region 1030 (N24W07) was
a simple beta group with 6 spots. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 05/2100Z to 06/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: Solar activity is expected to
be quiet on day one (07 November). Quiet to unsettled levels, with a
slight chance for active conditions at high latitudes, are expected
on day two (08 November) in response to a weak recurrent coronal
hole high-speed stream. Activity is expected to decrease to quiet
levels on day three (09 November).
III. Event Probabilities 07 Nov-09 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 06 Nov 071
Predicted 07 Nov-09 Nov 070/070/070
90 Day Mean 06 Nov 070
V. Geomagnetic A Indices
Observed Afr/Ap 05 Nov 000/001
Estimated Afr/Ap 06 Nov 000/001
Predicted Afr/Ap 07 Nov-09 Nov 005/005-007/007-005/005
VI. Geomagnetic Activity Probabilities 07 Nov-09 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Some crystals set an operating frequency band: as in the Collins S line, the drake C-line, etc. Other crystals stuck you on one frequency, like 28,800 CPS

Rental car => HERTZ

BTW: my memory improved while I was in prison. The mobile rig was a Multi-Elmac A-54H, an 807 modulated by 2 6L6s. Prison and Jail do wonders for a 'faulty memory'.

☐

I have an old station also. Two winters ago I reconditioned a Hammarlund HQ-145X to full spec compliant performance and rejuvenated an old Heathkit DX-40 and VF-1. The DX 40 puts out a full power [40 watts] on 80/40/20/15 and 10 meters.

The most difficult part was finding a non-modified D-104 for the DX-40. Second most difficult was finding a DPDT 115 VAC Dow Key Coax relay at reasonable $$$.

Used the station on 40/20 CW for over a year. Yep, the VF-1 drifted just like the olden days :-)

DD, W1MCE and OOOTC 55+ years on the air.

OK,

I have a Halli SX 111 & HT 37 and when I put it on the air you should just sit back & Hear the comments I get..... I always get a laugh out of that. One ham broke into tell me I was drifting OFF freq and the guy I was talking to shot back at him ! God, I hope so !
its funny to listen to people who have never even heard of thoe radios making comments.

I still have my Novice station - a Heathkit Mohawk RX-1 receiver and a Hallicrafters HT-40 transmitter. I built a VFO out of a military surplus ARC-5 transmitter for the HT-40.

It's at my mom's house and I don't know what condition it's in these days. Maybe next time I'm there I'll check it out.

I have an old station also. Two winters ago I reconditioned a Hammarlund HQ-145X to full spec compliant performance and rejuvenated an old Heathkit DX-40 and VF-1. The DX 40 puts out a full power [40 watts] on 80/40/20/15 and 10 meters.

The most difficult part was finding a non-modified D-104 for the DX-40. Second most difficult was finding a DPDT 115 VAC Dow Key Coax relay at reasonable $$$.

Used the station on 40/20 CW for over a year. Yep, the VF-1 drifted just like the olden days :-)

DD, W1MCE and OOOTC 55+ years on the air.

OK,

 I have a Halli SX 111 & HT 37 and when I put it on the air you should just sit back & Hear the comments I get..... I always get a laugh out of that. One ham broke into tell me I was drifting OFF freq and the guy I was talking to shot back at him ! God, I hope so !
  its funny to listen to people who have never even heard of thoe radios making comments.

Joey

DD - you'll have to clarify XTAL. My FT101E has four xtals for 10m and one each for the other bands plus a xtal for 10 mhz WWV. It drifts on warmup. I used to have a xtal for 28.507 which was a popular fixed freq. for VK novices in the days they could only use fixed xtals. I'm sure that xtal would drift a bit too but don't remember.

One thing I noticed over the years is how hams hear ya and come back sounding like Donald Duck. Then when you tune them in you're up a bit and then they come back even higher. Moral to that story was to get a Siltronics or Driftronics as we called them. For the newer set - don't concern yourself - we did. Boy, have we come a long way since. Even My FT101E drifted for a few minutes on startup.

I remember reading on eham.net a couple of years ago that somehow many new hams believe that you just be on xxx.00 frequency, meaning rounded off to the KHZ frequency. Don't know where this stupid idea came from (but I can guess) but it does explain something- Occassionally I would get people calling me slightly off frequency when I was running a frequency on 6m. Now I know why-they had to round to the closest KHZ.

Some crystals set an operating frequency band: as in the Collins S line, the drake C-line, etc. Other crystals stuck you on one frequency, like 28,800 CPS

Rental car => HERTZ

BTW: my memory improved while I was in prison. The mobile rig was a Multi-Elmac A-54H, an 807 modulated by 2 6L6s. Prison and Jail do wonders for a 'faulty memory'.

When I was one of those "newbies", I knew you could change the frequency of a xtal by sanding it down. I sanded and sanded with no results on a 80 xtal. I showed it to my "Elmer" and told him it just won't work. He pointed out to me that you can't sand down the CORNER of the xtal and expect anything to happen. :)

From: Paul Dunphy
Topic: 9721 Message: 11766

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 07 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 311 Issued at 2200Z on 07 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 06/2100Z
to 07/2100Z: Solar activity was very low. Region 1030 (N25W25)
decayed into a spotless plage region today. No flares were observed
during the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 06/2100Z to 07/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled, with a slight chance for an
active period at high latitudes, on day one (08 November). The
increase in activity is due to a weak recurrent coronal hole
high-speed stream. Quiet levels are expected on days two and three
(09-10 November).
III. Event Probabilities 08 Nov-10 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 07 Nov 071
Predicted 08 Nov-10 Nov 070/070/070
90 Day Mean 07 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 06 Nov 000/000
Estimated Afr/Ap 07 Nov 000/003
Predicted Afr/Ap 08 Nov-10 Nov 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 08 Nov-10 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

From: Bob
Topic: 11767 Message: 11767

Really impressed with the small group down on Easter Island.

All modes, all bands even with weather, power outages, & loss of equipment during trasportation.

In addition they have an amazing web site which is constantly updated, a online log updated daily, and twitter updates to keep us current.

Well planned out, good ops, and working hard get to everyone.

Doesn't get better than that!!!!

Bob KB1JZU

11768. DXpeditions

From: WB6PSY/N6AXK
Topic: 11768 Message: 11768

Interesting article in the November CQ magazine on page 32, Medical Considerations for DXpeditions written by K9SQ, the medical officer for Peter Uno and Desecheo.

He gives great insight to what it takes to get to some places which, hopefully, one will get a deeper appreciation as to what it takes. So, for those that bitch about the DXpeditions, please consider going to a place like Peter Uno (if you even qualify).

11769. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-08 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11769

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 08 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 312 Issued at 2200Z on 08 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 07/2100Z
to 08/2100Z: Solar activity was very low. No flares were observed.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 07/2100Z to 08/2100Z:
The geomagnetic field was at quiet to unsettled levels, due to a weak
recurrent coronal high-speed stream. Wind speeds increased from 260
km/s to 451 km/s at 08/1934Z. The interplanetary magnetic field
(IMF) showed an enhancement of total field of 11 nT, while the
southward component reached -9 nT.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet, with a chance for an isolated unsettled period
early in the period, on day one (09 November). Quiet levels are
expected for days two and three (09-11 November).
III. Event Probabilities 09 Nov-11 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 08 Nov 071
Predicted 09 Nov-11 Nov 070/070/070
90 Day Mean 08 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 07 Nov 000/001
Estimated Afr/Ap 08 Nov 007/007
Predicted Afr/Ap 09 Nov-11 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 09 Nov-11 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11770. Ohio/Penn DX Bulletin #933

Ohio/Penn DX Bulletin No. 933

The Ohio/Penn DX PacketCluster
DX Bulletin No. 933
BID: $OPDX.933
November 9, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, AH7C, K8YSE, K9WZB, W0GJ, Algarve STAR DX Team, AT International, CO8ZZ, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, GM3WOJ, I1JQJ/ IK1ADH & 425 DX News, IK7JWX, OH9MM, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VE3LYC and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-November, through Sunday, 8th-November there were 219 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FK/c, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VP2M, VP2V, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4L, GEORGIA. Operator Vaho, 4L8A, will be active in the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via K1BV.

4L, GEORGIA. Dick, N6AA, will be active as 4L0A during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry.

QSL via EA7FTR.

5W, WESTERN SAMOA. Steve, WB2IQU, will be active (possibly) as 5W2IQU between November 18□22nd. Operations will be low key using an Icom 706 into a small MFJ antenna tuner and a 20m dipole.

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH between January 21st and March 21st, 2010. Activity will be on the HF bands. Nick prefers CW and likes the Digital modes (PSK and RTTY), but may work SSB whenever signals are good enough. QSL via his home callsign.

9G, GHANA. Just a reminder that a team of Italian operators will be active from Busua Beach between November 13-27th. The group will also activate Abokwa Island (AF-084), during their stay with one station on 20 meters only. The time of operation on the island will be planned day by day, pending the sea condition and weather forecast. Activity will be on all HF bands and modes, 80-10 meters. The callsign 9G5TT will be used from the mainland while the callsign 9G5XX will be used from Abokwa Island. Operators mentioned are: Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/ IK2HKT, and Donato/IZ2CHO. QSL via I2YSB, direct only. More information can be found at: http://www.i2ysb.com

9L, SIERRA LEONE. Members of the VooDoo Contest Group will be active during CQWW DX CW Contest (November 28-29th), signing 9L5A. This year the operators are Ned/AA7A, Nick/G3RWF, Fred/G4BWP, Bud/N7CW and Gary/ ZL2IFB. They will enter the contest as a Multi-Two or Multi-Multi category. Their activity in the contest will be on all six contest bands (CW only). For pre-contest activity, there may also be some operations on 30/17/12 meter bands. QSL 9L5A via G3SXW (see QRZ.com). G3RWF may also activate his 9L1NH callsign, and AA7A his 9L7NS callsign. Please QSL via their home callsigns. There will be no daily logs, but LoTW upload will be done soon after returning home. No cash donations are requested for this project just the usual USD/IRC for direct cards.

AU8, INDIA (Special Event). Dattatry, VU2DSI, states that he will be operating the special event station AU8JCB between November 28th and December 1st. Suggested frequencies are: 7070, 14270, 14200, 21280 and 28510 kHz. Activity is to commemorate the 151th anniversary of Sir Jagadish Chandra Bose -"Father of Radio Communication". QSL direct to VU2DSI: Dattatry Deogaonkar, Surabhi Meherabad, Ahmednagar 414006, INDIA. ADDED NOTE: Other Indian Hams are expected to operate possibly with other special callsigns.

CN, MOROCCO. Jim, W7EJ, will once again be active as CN2R during the CQWW DX CW Contest (November 28-29th) as a Single-Op and possibly as a Single-Band (??) entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

D2, ANGOLA. Paulo, CT1ITZ, will be active as D2PJB from Porto Amboim, 300km from the capital Luanda, until November 29th. Activity will be on 80-10 meters SSB only. Most of his activity so far has been on 20

meters. He is using an Icom 706 and a Windom antenna. QSL via CT1IUA. Direct QSL, please send 2 USDs or one new IRC (ending 2013). QSLs without enough postage will go via Bureau.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
VQ9JC - Chagos Island; Current operation
This operation was previously rejected as a shipboard operation. DXCC exchanged correspondence with the operator and determined that this operation was actually land-based thereby satisfying the conditions of DXCC Rule 8. If you had this operation rejected send an email to <dxcc@...> to receive credit.

* DXCC YEAR-END SUBMISSIONS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "This is a reminder that the cut off date to have submissions in for the 2009 DXCC Annual and Honor Roll Listings is December 31, 2009. Applications must be postmarked by this date. December is expected to be a heavy period so applicants are encouraged not to wait until the last minute to get their submissions in. Also, with the holiday season approaching mail handling will sharply increase.
Applicants are strongly encouraged to check the 'List of DXCC Applications Received' link on the DXCC web site to assure that their applications were logged in for 2009. With the mail being heavy in DXCC, last minute applications received after December 31st, may get logged in for 2010. Also, the USPS postmarks are often unreadable so this could also affect last minute submissions. If you find on this page that your 2009 submission was logged in for 2010, you must contact DXCC by February 1, 2010, to get this corrected. DXCC is not responsible for 2009 applications that are logged in for 2010 after February 1, 2010.
We expect for December that the turnaround will increase in excess of 12 weeks. This is normal for this time of yea,r and we appreciate your patience and understanding as we work to get all 2009 applications completed.
The 2009 DXCC Yearbook is expected to be in the mail by late May or early June 2010. Please remember that in order to receive the free copy you must:
- Be a member of ARRL
- Submit an application within the 2009 calendar year, or
- Be current on the DXCC Honor Roll (329 current entities or higher)
If you did not qualify for the yearbook, copies will be avaliable from the ARRL catalog. Send questions to: dxcc@... "

E2, THAILAND. Operator Tony, E21IZC, to be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via E21IZC direct (QRZ.com).

E4, PALESTINE (Update). Antonio, EA5RM, has announced that he has received the callsign E4X and license from the National Palestine Authority officials from Telecommunication Ministry. Operation will take place in 2010. QSL via EA5RM. No other details are available, but a Web page is up and running at: http://www.dxfriends.com/e4x/index.php
Stay Tuned!!!!

E51, SOUTH COOK ISLANDS. Henrik, OZ6TL, is now active as E51TLA from Raratonga Island (OC-013) until the end of November. Activity will be holiday style, and most of his operations so far as been mainly on RTTY 20 meters. QSL via his home callsign.

FP, ST. PIERRE AND MIQUELON (Rescheduled Op). Operators Eric/KV1J and Tom/W8TOM are now active as FP/homecall from Miquelon (NA-032, DIFO FP-002 WLOTA 1417, WW Loc. GN17TC) between November 7-15th. Activity will be on 160-2 meters and 70cm (Satellite AO-51), using CW, SSB, RTTY and PSK31, generally on the highest frequency band that is open (no permission for 60m). QSL via their home callsigns, direct or by the Bureau. Visit Eric's Web page for more details at: http://www.kv1j.com/fp/october09.html

GD, ISLE OF MAN. Dave, G3NKC, will be active as MD6V during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m) entry. He will be active outside of the contest using GD3NKC/P. QSL via G3NKC.

GS, SCOTLAND (Year Long Special Event - Yaesu Heritage Year 2010). Using their club callsign GS2MP (North of Scotland Contest Group GM7V), operators Chris GM3WOJ/ZL1CT and Jim/GM0NAI will be operating their vintage Yaesu transmitters/receivers and transceivers during the year 2010. Each calendar month they will use a different Yaesu radio, and amateurs worldwide are invited to work GS2MP and earn points towards the "Yaesu Heritage Year Award". Operation will mostly be on 40 and 20 meters, SSB and CW, using classic radios like the FT-dx-100 (original), FT-200, FT-dx-401, etc. Yaesu (UK) Ltd are kindly sponsoring the event by supplying special QSL cards, small trophies and a special prize to the overall 'winner' of this year-long fun event. More details to follow soon - please visit the following Web site for some photos of the vintage radios at: http://www.gm7v.com/yaesu2010.htm

HI7, DOMINICAN REPUBLIC. Ronny, ON4ARV/OT4R, will once again be active as HI7/OT4R from Punta Cana between May 1□22nd (2010). Activity will be mainly on 20/15/10 meters SSB. Suggested frequency for 20 meters maybe 14300 kHz. QSL via OT4R. Visit his Web page at: http://www.ot4r.net/index.html

IOTA NEWS.....
AF-019. Claudio, I1NVU, will be active as IG9U from Lampedusa Island during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via I1NVU.

AS-086. Vasily, RA9LI, will be active as RA9LI/0 from Troynoy Island for about a year. Activity will be on the HF bands. QSL via UA9LP.

EU-031. (Update) Operators Alfredo/IK7JWX, Alessandro/IW8EHK, Leopoldo/
I8LWL and Titti/IK8GQY (YL) will join Raul/IC8ATA and be active
as IC8/homecall from Procida Island (I.I.A. NA-002, Grid JN70BR)
between November 68th. Activity will be on all HF bands and
6 meters using SSB, RTTY and PSK31. It is possible that the
group may operate from Ischia (Grid JN60XR) and Vivara Islands
(Grid JN70AR) also. QSL via IK7JWX, direct or by the Bureau.
Visit their Web page at: http://www.iz8gdo.it/aristabia

NA-153. Operators Zalo/XE3N, Jose/XE3PP, Benigno/XE2WK and Juan/XE3RR
will be active as XF3RR from Isla Cerrito between December
4□14th. This operation is organized by the Radio Club Cancun,
and it will be a low scale operation as the island is a
protected area. More details are forthcoming.

NA-231. (NEW/RARE IOTA). After his recent and memorable trip to
Ottawa Islands (NA-230 as VY0O), Cezar, VE3LYC, will attempt
to activate East Pen Island, Nunavut, for three days during
the period between March 26-31st, 2010. Intended callsign will
be VY0V which will be applied for in due course. East Pen
Island is located in CQ Zone 4. Cezar would like to remind
everyone that an earlier try he undertook with Ken/G3OCA in
July 2007 was unsuccessful. The outcome of this new attempt
will be determined by local conditions, weather and safety
factors. At this time Cezar is looking for group and individual
donors who understand and appreciate the nature of this
difficult project and are willing to join in the effort. Support
for this project is welcome via PayPal at:
tiberius.trifu@...

JD1, OGASAWARA (Update). Operators Ted/K8AQM, Stan/AC8W, Brian/KG8CO and
possibly others will be operating from the Island of Chichijima (AS-031)
in the Ogasawara Island group, starting March 28th, for two weeks as
JD1BNM, JD1BNK and JD1BNJ, respectively. Activity will be on 160-10 meters
using CW, SSB and RTTY. JD1BNJ will be active only on RTTY and PSK. QSL
via LoTW or to K8AQM, direct or by the Bureau.

KH6, HAWAII. Tom, N1CE, will be active as N1CE/KH6 from Oahu Island
(OC-019, HI-008S) between December 17th and January 6th. He states that
his activity will be mobile using a Kenwood TS-480 w/100 watts, and it
will be SSB only on this trip. Tom will use a bunch of Ham Sticks, G5RV
and some end fed 1/2w dipoles (possibly a 160m dipole). QSL only direct
to his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For November 9-15th)....
Nov 9 AN SOLAR REFERENCE
Nov 10 AN ---------------
Nov 11 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 12 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 13 AN LN - Low Normal
Nov 14 AN
Nov 15 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS (Special Event). Operators Garry/K9WZB and Sharon/K7WZB will be operating from Saint Croix Island (NA-106) as K2V between December 2-14th, as a special "Christmas Festival" event. Activity will be on all bands 160-6 meters. They will be monitoring 6 meters most of the time for openings to the U.S. and Europe. Operations will be on SSB, RTTY, CW and PSK31. See QRZ.com under K2V for more information. QSL direct only via K9WZB (No Bureau QSLs); SAE outside of USA with USDs or 2 Euros...Please no IRCs. A special QSL will be available after their return. Log updates daily at: http://www.clublog.org/logsearch/K2V

MD, ISLE OF MAN. Martin, G4XUM, will be active as MD4K during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (15m) entry. QSL via G3NKC.

NCDXF PRESS RELEASE (Dated November 5th). "At a board meeting this week, the Northern California DX Foundation (NCDXF) elected officers for 2010. Bruce Butler, W6OSP, will remain as President. Glenn Johnson, W0GJ, will remain as Vice President. Tom McShane, NW6P, will remain as Secretary/ Treasurer. The NCDXF Board of Directors reluctantly accepted the retirement of Len Geraldi, K6ANP, and Al Burnham, K6RIM, from the Board of Directors after many years of excellent leadership. At the present time, the NCDXF Board is planning on operating with 9 directors.
The <http:/www.ncdxf.org> Web site has been upgraded and newsletters are now available in electronic format and can be downloaded from the Web site. The latest newsletter features 'the rest of the story' and an excellent summary of the 7O1YGF Yemen operation which was only recently approved for DXCC.
Please note that the NCDXF mailing address has been recently changed:
NCDXF, P.O. Box 2012, Cupertino, CA 95015-2012, USA
Please contact me if any questions..... 73 Glenn W0GJ <w0gj@...>"

OH9, FINLAND (Special Event - This one is for the kids!). Once again Santa's own amateur radio station OH9SCL will be active from Santa Claus Land (SCL) in the Arctic Circle, during the month of December. Activity will be on 160-10 meters using CW, SSB and the Digital modes. Among Santa's helpers, the following operators will be there operating: Raimo/OH3BHL, Erkki/OH9KL, Kimmo/OH9MDV, Juha/ OH9MM and Aaro/OH9RJ. QSL via OH9UV: Santa Claus Land, Napapiirin Yhdeksikot Ry, PL 50, 96101 Rovaniemi, Finland. A special "Santa Claus Land" award is available. For more information about the award, please visit the SCL Web page at: http://kotisivu.dnainternet.net/rakarttu/OH9SCL_2007/OH9SCL_2007

PC60, THE NETHERLANDS (Special Event). Fred, PA0FAW, will activate special event station PC60TROLLEY between 2300z, November 17th and 2300z, December 15th. Activity is to celebrate Arnhem 60th anniversary of the city's use

of Trolleybusses. It is the only city in The Netherlands to have them. Fred will use CW, SSB and the Digital modes. QSL via PA0FAW, direct, by the Bureau, LoTW and e-QSL. SWLs are welcome. Fred states, "I will ask for a special EPC-number and will try to be in at least 1 ISWL-SSB net."

QSL INFO AND NEWS.....
4W6AL QSL CARDS. The Algarve STAR DX Team reported that the 4W6AL picture QSL cards are now available for viewing at: http://algarvedx.com
A double-sided QSL card will be sent for direct request and a single cards for bureau request. QSLs were printed by LZ3HI. They also mentioned that all documents were sent this week to DXCC desk.

QSLS VIA LOTW: 9M2CNC, 9M6XRO, AO8A, CT3EN, CT3FQ, CQ9T, EA1AP, EA8/OH6CS, FO/G3BJ, GW4BLE, HI3TEJ, HK1X, HK6P, IK0YVV, K4M, LA/DL6JZ, LA9Z, LX7I, LY4L, LY9Y, OA4AI, OE9GHV, OG6N, OK1CF, OK2ZI, ON4QX, P49X, PA7LV, PF7M, PR1T, RW0LT, RZ9HT, SV2BFN, TI5/NP3D, TO4X, TS7C, UA3BS/3, UA3SAQ, UA3TCJ, V31MW, VK4MA, WH2X, XE1CQ, YL7X, YO9HP, YW4V, ZM2M and ZY0T

QSLS RECEIVED VIA MAIL: 3XM6JR, 4L5O, 9V1VV, HA5JI, J6/WB4WXE, KL5O, J79ZG, K9AJ/VY0, KD6WW/VY0, LA/DL6JZ, LA/DM2AUJ, LA1CI, LA9IAA, OK1DVM, OX3XR, RI1OP, TA1AN, TA3D, TU2/F5JJW, VC8B and YS1MAE

QSLS RECEIVED VIA THE BUREAU: 4W6R, 9M6/JF2OZH, A35ZS, D68WL, DL0CS, EB1LA, JA7COI, LZ1RAY, UN7MMM, V73WN and YJ0MM

T31, CENTRAL KIRTIBATI. Doug, NH6ZA, is in the process of putting together a DXpedition to Kanton Island using the callsign T31ZA. No other details available. Watch QRZ.com under T31ZA.

T4, CUBA. Members of the "Las Tunas Contest Crew" in Las Tunas will be active as T48K during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. Operators mentioned are: CO8DM, CO8DL, CO8KA, CO7RR and CO8ZZ. QSL via DK1WI.

T8, PALAU. Junichi "Jun", JJ1BMB, will be active as T88AA from Palau Island, Micronesia, between November 9-22nd. He will be there for diving and ham radio. Activity will be on 80-10 meters using CW and SSB. The best days to look for him, and he plans to spend most of his time on the radio, is November 14th, 15th, 21st and 22nd. QSL via his home callsign, direct or by the Bureau.

TC1, TURKEY (LH Activity). Members of the Turkish group called TCSWAT (TC Special Wireless Activity Team) in collaboration with the Directorate General of Coastal Safety
<http://www.kiyiemniyeti.gov.tr/default.asp?id=0&lng=en>
will activate the special callsign TC1YLH from Yesilkoy Lighthouse (TUR 055) between November 6-23rd. Activity will be mainly during the weekends on the HF bands using SSB and VHF-UHF on FM. This is the group's fifth leg of seven lighthouses to be activated for the Marmara Lighthouses On The Air (MLOTA) Award by TCSWAT; details can be found at:
http://www.tcswat.org/awards/MLOTA/index.html

Yesilkoy Lighthouse is one of the distinctive historical landmarks of Istanbul. See: http://culturecityistanbul.spaces.live.com/Blog/cns!3E86C71118DDDCE5!524.entry Operators mentioned are: Urcun/TA0U, Leonardo/TA1FR, Tevfik/TA1HZ, Erhan/ TA2DJ, Serkan/TA2JN and Bekir/TA2RX. For more details and information about the stations, see QRZ.com, and the TCSWAT Web page at: http://www.tcswat.org Also see: http://www.ta0u.com/detay.asp?id=4303

TX3, CHESTERFIELD ISLAND.. Operators George/AA7JV and Tomi/HA7RY are now active as TX3A until December 6. Activity will be on all HF bands with an emphasis on the lower bands. QSL via HA7RY. For more detailed information and updates, visit their Web page at: http://www.TX3A.com

V4, ST. KITTS (NA-104). Andy, N2NT, will once again be active as V47NT from the QTH of V47KP during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via W2RQ.

V8, BRUNEI (OC-088). Hans, SM3TLG, will be active as V88/SM3TLG between November 16-20th. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau.

VP2V, BRITISH VIRGIN ISLANDS. Gerd, DL7VOG, will be active as VP2V/DL7VOG from Anegada Island (NA-023) between November 15th and December 2nd. Activity will be on the HF bands, including 160m, mainly on CW and RTTY. QSL via his home callsign, direct or by the Bureau.

VY1, CANADA (Yukon Territory). Steve, N6QEK, has announced that he is planning a DXpedition to the Canadian Yukon Territory. He states, "I am going to be activating VY1 during the American Radio Relay League 2010 RTTY Roundup. I will be based in Whitehorse in a cabin that I have rented." Steve hopes to be on the air by December 30th (he arrives in Whitehorse on December 29th). He plans to operate before and after the contest on 80-10 meters (including 17/12m and possibly 160m) using RTTY, PSK31 and SSB. Operations will cease about January 4th. Check out his DXpedition Web page at: http://www.n6qek.com

XR0, EASTER ISLAND (Update). The international team of operators continue to be active as XR0Y from Rapa Nui until November 15th. For more details, please see their Web page at: http://rapanui2009.org
Read their QSL policy and routes on their Web page or refer to OPDX.932. LAST MINUTE UPDATE: The XR0Y team will be off-the-air between 1500z Monday, November 9th and 0100z Tuesday, November 10th. The team will take this time to see/visit the entire island and take team pictures. They were also invited by the local community to give an interview at Radio Rapa Nui!

YB0, INDONESIA. Pri, YB0ECT, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via K3AIR.

ZL, NEW ZEALAND (We Stand Corrected). Last week we mentioned that Rick, AI5P, will once again be active as ZL/AI5P between November 1-6th, from New Zealand's North Island (OC-036). We stated that North Island was the

main island. This is incorrect per Phillip, ZL2TZE, who informed us that the main Island in New Zealand is the South Island also known as the Main Land.

Yes Bob, I would have to agree.

XR0Y guys have been going great guns.

I think the VP2M guys are doing well too.

TX3A guys seems to be loving 160, I called for 2 hours on 80m last night and nothing. But the pileups have been huge. Some VKs did get through from the east coast, so I reckon by the end of it they might hear my meagre sigs. I did get them on 30m for an all time new one, so very happy with that.

Looking forward to some FP sigs down this way. Hopefully they will start to show on 20m SSB from 1230z for VKs.

Coupl'a more sunspots and we'll all be laughin!

73, Lance - VK6DU

Really impressed with the small group down on Easter Island.

All modes, all bands even with weather, power outages, & loss of equipment during trasportation.

In addition they have an amazing web site which is constantly updated, a online log updated daily, and twitter updates to keep us current.

Well planned out, good ops, and working hard get to everyone.

Doesn't get better than that!!!!

Lance

I'll try to get that request to Eric KV1J over at FP. He and I worked together for a number of years and I know him well.

As far a TX3A goes I'm going to bite my lip and keep hoping. I am a lousy CW op and am collecting SSB & RTTY DXCCs. Missed them on Mellish since they never effectively worked other modes. Oh well!

From: Alan Leith
Topic: 4050 Message: 11773

In a word, conditions this morning from my QTH are PHENOMENAL. I haven't heard signals so strong across 20M for a very long time. And 17 is great also.

Considering today's current SFI of 71 and an A index of 7, I'm blown away. What will an SFI of 85 bring?????

I also heard VE1DX (less than 200 miles southwest of me) on 17. However, Paul didn't hear me :-(.

I see that the RSGB has taken a group to task for their QSL Policy and
their not so blatant demand for GS. They have disallowed their QSL Cards
for the IOTA Program.

Maybe some other organizations will follow suit ??

Date: 2009-11-09 16:48:45 UTC
From: RICHARD SOLOMON
Topic: 11776 Message: 11776

Does anyone know what they are using for a receiving antenna on 160 ?
They seem to hear very well.

On another note, yesterday morning they had a booming signal into
Arizona around 1100Z. This morning, I could barely hear them.

Don't you just love propagation !!

They were spotted yesterday a couple of times. The first time it turned out not to be them at all - it was XR0Y on Easter Is.

Later in the evening they were on 17 CW, but I never could hear them well enough to try calling. Have them a single time on 20 CW and that's it so far.

I don't think they worked any SSB when they were on Mellish and have been assuming they're not going to do any this time either. It would be nice if they did come up on phone - it's an all time new one for me and at least two modes would be nice.

Yes, I saw some comments on the cluster earlier today about C91VM. He was asking $5 for *every* QSL card. The page I saw seems to indicate the RSGB will not honor his "selling the QSLs" practice. Good for them!

It's one thing to seek donations, but this guy seemed pretty blatant about selling the cards.

If someone is asking for a fair amount for return postage I have no qualms about sending it. $5 seems excessive for return postage from anywhere that I know of.

Not to disagree with anyone on this point but if you go to the C91VM web site Marco is asking for postage plus a $5 or up donation to the
Mozambique School charity he is involved in.

Even though it may disqualify him, the intent here appears to be a noble one rather than a profit making activity.

Check the facts... not everthing is black and white...

It still ain't kosher. I fully agree with RSGB/IOTA and when I saw the DEMAND on QRZ.com I simply refused to get involved -- even if I do need the IOTA. If it had been suggested that a donation to the school would be welcomed, I might have considered it.

Hi Alan,

Felt the same way about $3 German requests when their govt raised rates
beyond all reason. Missed lots of rare QSL's because of boycotting
German managers. It's only a matter of who is the crook.

Recent article I ran across says the unification of E/W Germany has been
at a total cost to date of 1 trillion bucks.

Guess my boycott didn't make a dent.

I didn't know that. That reminds me of the 9G1AA operation in 1993. They were raising funds for an addition to a hospital in Dormaa. I gave them considerably more of a donation than I do to most operations.

P.S. The Dutch hams who activated 9G1AA did not demand anything. They asked for donations of extra money to help the hospital and they got it. It was the way it was presented, I think.

Dick

Take a look on their web site (I think under equipment). They have a good breakdown on both their transmit and recevie ant system.

Subject: [DX-IS] TX3A Receiving Antenna ?

Does anyone know what they are using for a receiving antenna on 160 ?
They seem to hear very well.

On another note, yesterday morning they had a booming signal into
Arizona around 1100Z. This morning, I could barely hear them.

Don't you just love propagation !!

I think Alan VK0MM did this for at least part of his operation
from Macquarie, and donated every cent to a good cause. I guess
it depends how you word the request - rather than the demand...

Not to disagree with anyone on this point but if you go to the C91VM web site Marco is asking for postage plus a $5 or up donation to the Mozambique School charity he is involved in.

Even though it may disqualify him, the intent here appears to be a noble one rather than a profit making activity.

Check the facts... not everthing is black and white...

Not to defend, Google German Postal rates. There postal system is very different than ours. You even get next day delivery with out paying extra. Post offices are very much like oiur "C" stores, carring every thing.

Don't get me wrong.....I shutter every time I sase to DK land.

Hi Alan,

Felt the same way about $3 German requests when their govt raised rates
beyond all reason. Missed lots of rare QSL's because of boycotting
German managers. It's only a matter of who is the crook.

Recent article I ran across says the unification of E/W Germany has been
at a total cost to date of 1 trillion bucks.

Guess my boycott didn't make a dent.

No! The Liberal's in the USA Congress want to bankrupt us.

A $5 donation to a charity won't bankrupt anyone. Here in NH, USA, it cost more than $7 for a pack of cigarettes. That's significantly more than a donation to a charity.

Uh huh, just like the "generator fund" Tom Christian had years ago on Pitcairn!

11800. Re: QSL GS Demands

Yahoo group: DX-IS (2009)
Date: 2009-11-10 10:59:32 UTC
From: aburkefl
Topic: 11774 Message: 11800

I went to Mozambique with one of Frosty's African DX Safari trips (K5LBU). It is so difficult in places like that to actually get the funds where they belong - as is so often the case in countries where aid is sent. Instead of collecting money or sending items, we carried as many supplies as possible with us and donated them to the school we were helping.

In many countries like that (I intentionally hesitate to refer to it as a "third world county") the corruption is rampant and aid many times never ends up where you intend. Even if there's no corruption, the red tape is often enormous and too many times the aid (or money) doesn't end up in the hands of those who really need it.

Since we didn't have to lug very much in the way of equipment, we had more room to carry school supplies.

Ask anybody I worked from rare grids on 6 meters this past summer and you might be surprised -- I sent QSLs IMMEDIATELY, or at least as soon as I got home and could get more cards out of the box, HI!

The only QSL I feel bad about is one the post office didn't treat right.

I don't send QSL's as postcards. I was even told by a postal employee they have high rates of postcards being chewed up by machines. I send them in an envelope.

Every once in a while I'll get a chewed up envelope too, but it's less common than the postcards.

I have dozens of QSL postcards that I received but it's been a long time ago - probably before postal machines and never got one destroyed.

I didn't send as postcards MUCH -- maybe a couple as an experiment. Figured I didn't like doing it that way.

11808. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-11-10 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 11808

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Nov 10 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 314 Issued at 2200Z on 10 Nov 2009
IA. Analysis of Solar Active Regions and Activity from 09/2100Z
to 10/2100Z: Solar activity was very low for the past 24 hours.
Region 1030 (N24W62) has decayed to an Axx-beta group with three
spots. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low for the next three days (11-13 November).
IIA. Geophysical Activity Summary 09/2100Z to 10/2100Z:
The geomagnetic field has been quiet for the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet for the next three days (11-13 November).
III. Event Probabilities 11 Nov-13 Nov
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 10 Nov 073
Predicted 11 Nov-13 Nov 072/072/073
90 Day Mean 10 Nov 071
V. Geomagnetic A Indices
Observed Afr/Ap 09 Nov 002/004
Estimated Afr/Ap 10 Nov 001/005
Predicted Afr/Ap 11 Nov-13 Nov 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 11 Nov-13 Nov
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

11809. Ham Radio?

Yahoo group: DX-IS (2009)

Not DX, but about Ham Radio....

http://www.gocomics.com/boundandgagged/2009/11/10/

and after all discussion on DX QSLs and $$$ we need a laugh...

Best regards,

CSM(r) Gary Huber - AB9M
